

# TABLE OF CONTENTS

## Preface

**xi**

---

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Axial-Flow Compressor Basics .....	3
1.2	Basic Velocity Diagrams for a Stage.....	5
1.3	Similitude and Performance Characteristics.....	7
1.4	Stage Matching and Stability.....	11
1.5	Dimensionless Parameters.....	13
1.6	Units and Conventions .....	14

---

<b>2</b>	<b>Thermodynamics</b>	<b>17</b>
2.1	First and Second Laws of Thermodynamics.....	18
2.2	Efficiency.....	20
2.3	Fluid Equation-of-State Fundamentals.....	22
2.4	The Caloric Equation of State .....	24
2.5	Entropy and the Speed of Sound.....	25
2.6	The Thermal Equation of State for Real Gases .....	26
2.7	Thermodynamic Properties of Real Gases .....	30
2.8	Thermally and Calorically Perfect Gases.....	31
2.9	The Pseudo-Perfect Gas Model .....	32
2.10	Component Performance Parameters .....	33
2.11	Gas Viscosity .....	37
2.12	A Computerized Equation-of-State Package .....	37

<b>3</b>	<b>Fluid Mechanics</b>	<b>41</b>
3.1	Flow in a Rotating Coordinate System .....	43
3.2	Adiabatic Inviscid Compressible Flow .....	46
3.3	Adiabatic Inviscid Compressible Flow Applications .....	48
3.4	Boundary Layer Analysis.....	50
3.5	Two-Dimensional Boundary Layer Analysis.....	51
3.6	Axisymmetric Three-Dimensional Boundary Layer Analysis.....	54
3.7	Vector Operators in Natural Coordinates.....	57
<hr/>		
<b>4</b>	<b>Axial-Flow Compressor Blade Profiles</b>	<b>59</b>
4.1	Cascade Nomenclature .....	60
4.2	NACA 65-Series Profile.....	62
4.3	Circular-Arc Camberline.....	65
4.4	Parabolic-Arc Camberline .....	66
4.5	British C.4 Profile.....	68
4.6	Double-Circular-Arc Profile.....	69
4.7	NACA A <sub>4</sub> K <sub>6</sub> 63-Series Guide Vane Profile .....	70
4.8	Controlled-Diffusion Airfoils.....	71
4.9	Blade Throat Opening .....	73
4.10	Staggered Blade Geometry .....	75
<hr/>		
<b>5</b>	<b>Two-Dimensional Blade-to-Blade Flow Through Cascades of Blades</b>	<b>77</b>
5.1	The Blade-to-Blade Flow Problem .....	79
5.2	Coordinate System and Velocity Components .....	81
5.3	Potential Flow in the Blade-to-Blade Plane .....	83
5.4	Linearized Potential Flow Analysis .....	92
5.5	The Time-Marching Method .....	96
5.6	Blade Surface Boundary Layer Analysis.....	107
5.7	Summary.....	113
<hr/>		
<b>6</b>	<b>Empirical Performance Models Based On Two-Dimensional Cascade Tests</b>	<b>117</b>
6.1	Cascade Geometry and Performance Parameters.....	119
6.2	Design Angle of Attack or Incidence Angle.....	121

## Table of Contents

6.3	Design Deviation Angle.....	125
6.4	Design Loss Coefficient and Diffusion Factors .....	128
6.5	Positive and Negative Stall Incidence Angles.....	134
6.6	Mach Number Effects.....	136
6.7	Shock Wave Loss for Supersonic Cascades.....	138
6.8	Off-Design Cascade Performance Correlations .....	141
6.9	Blade Tip Clearance Loss.....	146
6.10	Shroud Seal Leakage Loss.....	147
6.11	Implementation, Extensions and Alternate Methods .....	149
<hr/>		
<b>7</b>	<b>Meridional Through-Flow Analysis</b>	<b>153</b>
7.1	Meridional Coordinate System .....	154
7.2	Inviscid, Adiabatic Flow on a Quasi-Normal.....	157
7.3	Linking Quasi-Normals .....	162
7.4	Repositioning the Stream Surfaces.....	164
7.5	Full Normal Equilibrium Solution .....	165
7.6	Simplified Forms of the Through-Flow Analysis .....	167
7.7	Annulus Sizing .....	169
7.8	Numerical Approximations .....	171
<hr/>		
<b>8</b>	<b>End-Wall Boundary Layer Analysis</b>	<b>175</b>
8.1	Historical Development of End-Wall Boundary Layer Theory .....	177
8.2	The End-Wall Boundary Layer Equations .....	181
8.3	The Boundary Layer Velocity Profile Assumptions .....	183
8.4	Empirical Models for Entrainment and Wall Shear Stress.....	184
8.5	The Blade Force Defect Thicknesses .....	187
8.6	Seal Leakage Effects for Shrouded Blades .....	191
8.7	Boundary Layer Jump Conditions.....	193
8.8	Solution Procedure .....	194
8.9	Typical Results .....	195
<hr/>		
<b>9</b>	<b>Aerodynamic Performance Analysis</b>	<b>199</b>
9.1	Geometry Considerations.....	200

## Table of Contents

9.2	Cascade Performance Considerations.....	203
9.3	Stall and Compressor Surge Considerations.....	204
9.4	Approximate Normal Equilibrium Results.....	207
9.5	Full Normal Equilibrium Results.....	211
9.6	Concluding Remarks.....	213

---

### **10 Compressor Stage Aerodynamic Design 215**

10.1	Dimensionless Performance Parameters.....	217
10.2	Application to Stage Design.....	219
10.3	Blade Design.....	221
10.4	Selecting the Stage Performance Parameters.....	222
10.5	Selecting the Swirl Vortex Type.....	229
10.6	Free Vortex Flow.....	230
10.7	Constant Reaction Vortex Flow.....	235
10.8	Constant Swirl and Exponential Vortex Flow.....	242
10.9	Assigned Flow Angle Vortex Flows.....	245
10.10	Application to a Practical Stage Design.....	245
10.11	A Repeating Stage Axial-Flow Compressor.....	251
10.12	A Computerized Stage Design System.....	257

---

### **11 Multistage Axial-Flow Compressor Aerodynamic Design 259**

11.1	The Basic Compressor Design Approach.....	261
11.2	Aerodynamic Performance Specifications.....	262
11.3	Blade Design.....	264
11.4	Refining the Compressor Design.....	266
11.5	An Axial-Flow Compressor Design Example.....	268
11.6	The Distribution of Stage Performance Parameters.....	272
11.7	The Swirl Vortex Type.....	280
11.8	Risks and Benefits.....	284

---

### **12 Quasi-Three-Dimensional Blade Passage Flow Field Analysis 287**

12.1	Quasi-Three-Dimensional Flow.....	289
12.2	Hub-to-Shroud Flow Governing Equations.....	291

## Table of Contents

12.3	Numerical Integration of the Governing Equations.....	294
12.4	Repositioning Stream Surfaces .....	297
12.5	The Hub-to-Shroud Flow Analysis.....	298
12.6	Coupling the Two Basic Flow Analyses .....	299
12.7	Boundary Layer Analysis.....	302
<hr/>		
<b>13</b>	<b>Other Components and Variations</b>	<b>309</b>
13.1	Adjustable Blade Rows .....	311
13.2	The Exhaust Diffuser .....	316
13.3	The Scroll or Collector .....	322
13.4	Reynolds Number and Surface Roughness Effects.....	328
13.5	The Axial-Centrifugal Compressor .....	328
<hr/>
