<i>Acknowledgments</i>	<i>xi</i>
<i>Introduction</i>	<i>xiii</i>
<i>Symbols and formats used</i>	<i>xvii</i>
Part I Concepts and Practices	1
1 Music and mixing	3
Music – An extremely short introduction	3
The role and importance of the mix	5
The perfect mix	7
Further reading	10
2 Some axioms and other gems	11
Louder is perceived as better	11
Percussives weigh less	13
Importance	14
Natural vs. artificial	15
Change	16
3 Learning to mix	19
What makes a great mixing engineer?	19
Methods of learning	24
Mixing analysis	25
Reference tracks	26
4 The process of mixing	30
Mixing and the production chain	30
The mix as a composite	34
Where to start	35
Deadlocks	41
Milestones	42
Finalizing and stabilizing the mix	43
5 Related issues	46
How long does it take?	46
Breaks	47
Using solos	47
Mono listening	48
Housekeeping	50
Mix edits	50
Mastering	52
Further reading	53

6	Mixing domains and objectives	54
	Mixing objectives	54
	Frequency domain	57
	Level domain	61
	Stereo domain	64
	Depth	67

Part II Tools 71

7	Monitoring	73
	How did we get here?	73
	Choosing monitors	77
	The room factor	80
	Positioning monitors	85
	Headphone mixing	89
	Further reading	92
8	Meters	93
	Amplitude vs. level	93
	Mechanical and bar meters	94
	Peak meters	95
	Average meters	96
	Phase meters	98
9	Mixing consoles	99
	Buses	100
	Processors vs. effects	100
	Basic signal flow	102
	The importance of signal flow diagrams	107
	Groups	117
	In-line consoles	122
	The monitor section	127
	Solos	129
	Correct gain structure	133
	The digital console	135
10	Software mixers	139
	Tracks and mixer strips	139
	Routing	144
	The internal architecture	147
11	Phase	161
	What is phase?	161
	Problems	163
	Tricks	166
12	Faders	174
	Types	174
	Scales	176
	Working with faders	178

13 Panning	181
How stereo works	181
Pan controls	183
Types of track	191
Panning techniques	195
Beyond pan pots	200
Further reading	201
14 Equalizers	202
Applications	202
The frequency spectrum	206
Types and controls	210
Graphic equalizers	226
In practice	229
Equalizing various instruments	245
15 Introduction to dynamic range processors	258
Dynamic range	258
Dynamics	260
Dynamic range processors in a nutshell	260
16 Compressors	266
The course of history	267
The sound of compressors	269
Principle of operation and core controls	271
Additional controls	283
Controls in practice	291
Applications	308
Tricks	318
More on compressors	323
17 Limiters	331
18 Gates	334
Controls	335
Applications	347
In practice	351
Tricks	354
19 Expanders	361
Controls	362
In practice	364
Upward expanders	367
20 Duckers	370
Operation and controls	370
Applications	373
21 Delays	376
Delay basics	376
Types	380
In practice	385
Applications	389

22 Other modulation tools	393
Vibrato	393
ADT	394
Chorus	395
Flanging	396
Phasing	398
Tremolo	399
23 Reverbs	401
What is reverb?	401
Applications	401
Types	406
Reverb programs	415
Reverb properties and parameters	417
Early reflections (ERs)	421
Reverbs and stereo	430
Other reverb types	434
Reverbs in practice	439
24 Distortion	447
Background	447
Distortion basics	447
Ways to generate distortion	450
25 Drum triggering	456
Methods of drum triggering	457
26 Other tools	461
MS	461
Pitch shifters and harmonizers	465
Exciters and enhancers	466
Transient designers	468
27 Automation	470
Automation engines	471
The automation process	472
Automation alternatives	474
Control surfaces	475

Part III Simple Mixes 479

28 Show Me (Rock n' Roll)	481
Drums	482
Bass	484
Rhythm guitar	485
Lead	485
Vocal	486
29 It's Temps Pt. II (Hip Hop/Urban/Grime)	488
Beat	488
Bass	491
Bass support	492

Other tracks	492
Vocals	496
30 Donna Pomini (Techno)	502
Ambiance reverb	502
Beat	503
Sound FX	509
Bass	510
Vocal	510
Other elements	511
31 The Hustle (DnB)	516
Ambiance reverb	517
Drums	517
Dirt Kick	517
Motif elements	522
Pads	525
Horns and brass	526
Risers	528
Strings	529
32 Hero (Rock)	530
Drums	530
Bass	536
Rhythm guitar	537
Lead guitar	540
Vocals	540
<i>Appendix A The Science of Bouncing</i>	<i>544</i>
<i>Appendix B Notes to Frequencies Chart</i>	<i>550</i>
<i>Appendix C Delay Time Chart</i>	<i>551</i>
<i>Index</i>	<i>561</i>
