Introduction	xiii
CHAPTER 1 Setting up Your Creative Environment: The Studio	1
1.1 Basic Studio Information	1
1.2 Setting up Your Production Space: The Project Studio	2
1.3 The Music Equipment	3
1.3.1 MIDI Equipment and MIDI Messages	5
1.3.2 Channel Voice Messages	8
1.3.3 Channel Mode Messages	13
1.3.4 System Real-Time Messages	15
1.3.5 System Common Messages	16
1.3.6 System Exclusive Messages	16
1.4 MIDI Components: Controllers, Hardware Synthesizers/Sound Modules, Software Synthesizers and Sequencers	17
1.4.1 MIDI Synthesizer	17
1.4.2 Keyboard Controller	17
1.4.3 Sound Module	17
1.4.4 Software Synthesizers	18
1.4.5 Sequencers: An Overview	21
1.4.6 Which Controller?	22
1.4.7 Sound Palette	25
1.5 Connecting the MIDI Devices: Soft Synth-Only, Daisy Chain, and Star Network Setups	28
1.5.1 The Software Synthesizer-Only Studio	28
1.5.2 Daisy Chain Setup	29
1.5.3 Star Network Setup	32
1.5.4 The Future of MIDI	33
1.6 The Audio Equipment	33
1.6.1 Mixing Board and Monitors	34
1.6.2 Computer and Audio Connections	37
1.6.3 Audio Interface Inputs and Outputs	41
1.6.4 Audio Interface Connections	43
1.6.5 Software and Audio Interface Compatibility	46
1.7 Which Digital Audio Workstation?	47
1.7.1 The Primary Goals You Want to Achieve with Your Audio Sequencer	48
1.7.2 Ease of Use and Learning Curve	48

1.7.3	Which Features Suit You Best?	48
1.7.4	Other Factors to Consider	51
1.7.5	What About the Computer?	53
1.8	Final Considerations and Budget Issues	55
1.9	Summary	56
1.10	Exercises	56
CHAPTER 2	Basic Sequencing Techniques	59
2.1	Introduction	59
2.2	The Sequencer: Concepts and Review	59
2.3	How a Sequencer Works and How it is Organized	60
2.4	MIDI Tracks	63
2.5	Audio Tracks	65
2.6	Organizing Your Projects	68
2.7	Flight-Check Before Take-off!	69
2.8	The First Session: Click Track and Tempo Setup	70
2.8.1	Who Plays the Metronome?	71
2.9	Recording MIDI Tracks	72
2.10	Basic MIDI Editing Techniques	76
2.10.1	The Graphic Editor	76
2.10.2	Level of Undos	77
2.10.3	The List Editor	78
2.10.4	The Score Editor	79
2.11	Basic Principles of MIDI Note Quantization	79
2.12	Audio Track Basics	83
2.12.1	Destructive and Nondestructive Audio Editing	84
2.12.2	Playing it Nice with the Other Tracks	86
2.13	Basic Automation	89
2.13.1	Static Automation	89
2.13.2	Dynamic Mix: Real-Time Automation	91
2.13.3	Editing Automation Data	92
2.14	Practical Applications of Automation	94
2.14.1	Volume Automation	95
2.14.2	Pan Automation	96
2.14.3	Mute Automation	97
2.15	Exporting and Importing your Work: Standard MIDI Files	97
2.16	Summary	98
2.17	Exercises	99
CHAPTER 3	Intermediate Sequencing Techniques	101
3.1	Introduction	101
3.2	Groove Quantization and the “Humanize” Function	101
3.2.1	Quantization Filters	102

3.2.2	Swing Quantization	107
3.2.3	Groove Quantization	108
3.3	Layering of MIDI Tracks	110
3.4	Layering of MIDI and Audio Tracks	114
3.5	Alternative MIDI Track Editing Techniques: The Drum Editor	114
3.6	Alternative MIDI Controllers	118
3.6.1	Guitar/Bass-to-MIDI Converters	118
3.6.2	MIDI Drums and Pads	119
3.6.3	MIDI Wind Controllers	121
3.7	Complex Tempo Tracks: Tempo and Meter Changes	121
3.7.1	Creative Use of Tempo Changes	124
3.8	Tempo Changes and Audio Tracks	128
3.8.1	Time-Stretching Audio Files	129
3.9	Interapplication Protocols: ReWire	132
3.9.1	Setting Up ReWire	132
3.10	Synchronization	136
3.10.1	Synchronization of Nonlinear Machines	137
3.10.2	Sequencer Setup for MC and MTC Synchronization	140
3.11	Safeguard Your Work: Back it Up!	141
3.11.1	Backup and Archive	142
3.11.2	How to Calculate the Size of a Session	144
3.12	Summary	145
3.13	Exercises	146
 CHAPTER 4	 Advanced Sequencing Techniques	 149
4.1	Introduction	149
4.2	Advanced Quantization Techniques	149
4.2.1	Custom Groove Creation	149
4.2.2	Editing a Groove	150
4.2.3	Audio to MIDI Groove Creation	152
4.2.4	Audio Quantization	157
4.3	Advanced Editing Techniques	162
4.3.1	Advanced MIDI Editors	162
4.3.2	“Offline” Global MIDI Data Transformers	163
4.3.3	“Real-Time” MIDI Effects	172
4.4	Overview of Audio Track Effects	176
4.4.1	“Insert” Effects	176
4.4.2	“Send” Effects	177
4.5	MIDI System Exclusive Messages	180
4.5.1	SysEx Custom Consoles	180
4.5.2	SysEx “MIDI Dump” Function	182
4.6	Summary	185
4.7	Exercises	187

CHAPTER 5	Elements of MIDI Orchestration	189
5.1	Introduction	189
5.2	Rhythm Section: Overview	189
5.2.1	The Piano	190
5.2.2	The Guitar	193
5.2.3	The Bass	195
5.2.4	Drums and Percussion	196
5.3	String Section: Overview	198
5.3.1	Sequencing Strings	198
5.3.2	Sonorities and Sound Libraries	200
5.3.3	Panning and Reverb Settings	203
5.4	Wind Instruments: Overview	205
5.4.1	The Brass Section: The Trumpet and the Flugelhorn	206
5.4.2	The Trombone	207
5.4.3	The French Horn	207
5.4.4	The Tuba	208
5.4.5	Sequencing Brass: Libraries, Pan, and Reverb	208
5.5	Woodwind: Overview	209
5.5.1	The Saxophones	209
5.5.2	The Flutes	211
5.5.3	The Clarinets	211
5.5.4	The Oboe and the English Horn	212
5.5.5	The Bassoon and the Contrabassoon	213
5.6	Synthesizers: Overview	213
5.6.1	Hardware and Software Synthesizers	214
5.6.2	Synthesis Techniques	216
5.6.3	Analog Subtractive Synthesis	216
5.6.4	Additive Synthesis	218
5.6.5	Frequency Modulation Synthesis	219
5.6.6	Wavetable Synthesis	220
5.6.7	Sampling	220
5.6.8	Physical Modeling Synthesis	221
5.6.9	Granular Synthesis	223
5.7	Summary	223
5.8	Exercises	227
CHAPTER 6	The Final Mix	229
6.1	Introduction	229
6.2	The Mixing Stage: Overview	230
6.2.1	Rendering MIDI Tracks for Hardware Synthesizers	230
6.2.2	Rendering MIDI Tracks for Software Synthesizers	233
6.2.3	Track Organization and Submixes	234
6.2.4	The “Rough” Mix	237

6.3	Panning	237
6.3.1	Balance	238
6.3.2	Frequency Placement	238
6.4	Reverberation and Ambience Effects	239
6.4.1	Specific Reverb Settings for DP, CU, LP, and PT	241
6.4.2	Synthesized Reverbs	242
6.4.3	Convolution Reverbs	247
6.5	Equalization	249
6.5.1	Equalizers in DP, CU, PT, and LP	253
6.6	Dynamic Effects: Compressor, Limiter, Expander, and Gate	256
6.6.1	Dynamic Effects in DP, PT, CU, and LP	258
6.7	Bounce to Disk	262
6.7.1	Audio File Formats	265
6.8	Premastering: Introduction	269
6.8.1	The Premastering Process: To Normalize or Not?	270
6.8.2	Premastering Equalization	271
6.8.3	Multiband Compression	271
6.8.4	The Limiter	274
6.9	Summary	277
6.10	Exercises	279
CHAPTER 7	Working with Video	281
7.1	Working with Video: Importing Movies in Digital Format	281
7.2	SMPTE: Synchronization of Linear to Nonlinear Machines	281
7.3	Synchronizing and Working with Nonlinear Video Media	285
7.3.1	Video Syncing in DP, LP, CU, and PT	286
7.3.2	Adding a “Two-Beep”	291
7.4	Using Markers	292
7.4.1	Beat-Based Markers	292
7.4.2	Time-Code-Based Markers	293
7.5	Bouncing to Movie	296
7.6	Stem Creation	299
7.7	Summary	304
7.8	Exercises	306
	Further Reading	307
	Index	309
