Series Preface.....	ix
Foreword	xi
Preface.....	xiii
Reminiscences	xv
Editors.....	xix
Contributors	xxi
An Interview with B. M. Deb	xxv
Chapter 1 Kinetic Energy Functionals of Electron Density and Pair Density	1
<i>Debajit Chakraborty and Paul W. Ayers</i>	
Chapter 2 Quantum Adiabatic Switching and Supersymmetric Approach to Excited States of Nonlinear Oscillators	43
<i>Susmita Kar and S. P. Bhattacharyya</i>	
Chapter 3 Isomorphic Local Hardness and Possible Local Version of Hard–Soft Acids–Bases Principle.....	65
<i>Carlos Cárdenas and Patricio Fuentealba</i>	
Chapter 4 Quantum Chemistry of Highly Symmetrical Molecules and Free-Space Clusters, Plus Almost Spherical Cages of C and B Atoms.....	79
<i>N. H. March and G. G. N. Angilella</i>	
Chapter 5 Energy Functionals for Excited States	99
<i>M. K. Harbola, M. Hemanadhan, Md. Shamim, and P. Samal</i>	
Chapter 6 Benchmark Studies of Spectroscopic Parameters for Hydrogen Halide Series via Scalar Relativistic State-Specific Multireference Perturbation Theory	119
<i>Avijit Sen, Lan Cheng, and Debashis Mukherjee</i>	
Chapter 7 Local Virial Theorem for Ensembles of Excited States.....	135
<i>Á. Nagy</i>	

Chapter 8	Information-Theoretic Probes of Chemical Bonds	143
	<i>Roman F. Nalewajski</i>	
Chapter 9	Molecular Electrostatic Potentials: Some Observations	181
	<i>Peter Politzer and Jane S. Murray</i>	
Chapter 10	Extending the Domain of Application of Constrained Density Functional Theory to Large Molecular Systems.....	201
	<i>Aurélien de la Lande, Dennis R. Salahub, and Andreas M. Köster</i>	
Chapter 11	Spin and Orbital Physics of Alkali Superoxides: p-Band Orbital Ordering	221
	<i>Ashis Kumar Nandy, Priya Mahadevan, and D. D. Sarma</i>	
Chapter 12	Electronic Stress with Spin Vorticity	235
	<i>Akitomo Tachibana</i>	
Chapter 13	Single Determinantal Approximations: Hartree–Fock, Optimized Effective Potential Theory, Density Functional Theory	253
	<i>Andreas K. Theophilou</i>	
Chapter 14	Analysis of Generalized Gradient Approximation for Exchange Energy	295
	<i>José L. Gázquez, Jorge M. del Campo, Samuel B. Trickey, Rodrigo J. Alvarez-Mendez, and Alberto Vela</i>	
Chapter 15	Intermolecular Interactions through Energy Decomposition: A Chemist’s Perspective.....	313
	<i>R. Mahesh Kumar, Dolly Vijay, G. Narahari Sastry, and V. Subramanian</i>	
Chapter 16	Perfectly Periodic Table of Elements in Nonrelativistic Limit of Large Atomic Number	345
	<i>John P. Perdew</i>	
Chapter 17	Quantum Similarity	349
	<i>Ramon Carbó-Dorca</i>	

Contents

Chapter 18	Electronic Excitation Energies of Molecular Systems from the Bethe–Salpeter Equation: Example of the H ₂ Molecule	367
	<i>Elisa Rebolini, Julien Toulouse, and Andreas Savin</i>	
Chapter 19	Semiquantitative Aspects of Density-Based Descriptors and Molecular Interactions: A More Generalized Local Hard–Soft Acid–Base Principle	391
	<i>K. R. S. Chandrakumar, Rahul Kar, and Sourav Pal</i>	
Chapter 20	First-Principles Design of Complex Chemical Hydrides as Hydrogen Storage Materials	415
	<i>S. Bhattacharya and G. P. Das</i>	
Chapter 21	The Parameter $I - A$ in Electronic Structure Theory	431
	<i>Robert G. Parr and Rudolph Pariser</i>	
Chapter 22	Uncertainty and Entropy Properties for Coulomb and Simple Harmonic Potentials Modified by $\frac{ar^2}{1+br^2}$	441
	<i>S. H. Patil and K. D. Sen</i>	
Index	451
