## Section I Biorefinery Product and Process Design

<b>1 Product Portfolio Selection and Process Design for the Forest Biorefinery.....</b>	<b>3</b>
<i>Dieudonné R. Batsy, Charles C. Solvason, Norm E. Sammons, Virginie Chambost, David L. Billhartz, II, Mario R. Eden, Mahmoud M. El-Halwagi, and Paul R. Stuart</i>	
<b>2 Systematic Screening of Multiple Processing Paths in Biorefineries: The ABC (Assessing Biomass to Chemicals) Project and Its Potential to Build Process Synthesis Capabilities .....</b>	<b>37</b>
<i>Antonis C. Kokossis, Aidong Yang, Marinella Tsakalova, and Ta-Chen Lin</i>	
<b>3 Technoeconomic Assessment and Risk Analysis of Biorefinery Processes.....</b>	<b>59</b>
<i>Eemeli Hytönen and Paul R. Stuart</i>	
<b>4 Technoeconomic Analysis of Cellulosic Ethanol Production from Hardwoods in a Repurposed Kraft Mill .....</b>	<b>93</b>
<i>Trevor H. Treasure, Hasan Jameel, Richard B. Phillips, Hou-min Chang, Yongcan Jin, and Bon Wook Koo</i>	
<b>5 Cost Integration Methodology and the Forest Biorefinery .....</b>	<b>129</b>
<i>Milan Korbel and Paul R. Stuart</i>	
<b>6 Technoeconomic Analysis of a Lignocellulose-to-Hydrocarbons Process Using a Carboxylate Platform.....</b>	<b>157</b>
<i>Viet Pham, Mark Holtzapple, and Mahmoud M. El-Halwagi</i>	

## Section II Biorefinery Supply Chains

<b>7 Value-Chain Management Considerations for the Biorefinery.....</b>	<b>195</b>
<i>Louis Patrick Dansereau, Mahmoud M. El-Halwagi, and Paul R. Stuart</i>	
<b>8 Integrated Forest Biorefinery Supply Chain Network Design Using Mathematical Programming Approach.....</b>	<b>251</b>
<i>Yan Feng, Sophie D'Amours, Luc LeBel, and Mustapha Noureifath</i>	
<b>9 Forest Biorefinery Supply Chain Design and Process Flexibility.....</b>	<b>283</b>
<i>Behrang Mansoornejad and Paul R. Stuart</i>	

### Section III Biorefinery Process Analysis

- 10 **Optimal Synthesis of Sustainable Biorefineries** ..... 325  
*Mariano Martín and Ignacio E. Grossmann*
- 11 **Methodologies Developed and Applied in Process Integration Studies for the Swedish Kraft Pulp and Paper Industry: A Review** ..... 349  
*Maryam Mahmoudkhani and Thore Berntsson*
- 12 **Design of a Lignocellulosic Feedstock Biorefinery Based on a Biochemical Processing Platform Using Process Integration Methodologies and Exergy Analysis** ..... 369  
*Karina Ojeda, Mahmoud M. El-Halwagi, and Vyacheslav Kafarov*
- 13 **Automated Targeting for the Synthesis of an Integrated Biorefinery** ..... 397  
*Douglas H. S. Tay and Denny K. S. Ng*
- 14 **Synthesis of Flexible Heat-Exchanger Networks for Multifeedstock Biodiesel Production Processes** ..... 417  
*Grace Pokoo-Aikins and Mahmoud M. El-Halwagi*

### Section IV Biorefinery Feedstocks

- 15 **A Literature Review of Biomass Feedstocks for a Biorefinery** ..... 433  
*José Meléndez, Luc LeBel, and Paul R. Stuart*
- 16 **Lignocellulosic Biomass: A Raw Material for the Future** ..... 461  
*Agustin Jaime Castro-Montoya and Arturo Jiménez-Gutiérrez*
- 17 **Food Waste as a Renewable Raw Material for the Development of Integrated Biorefineries: Current Status and Future Potential** ..... 469  
*Antonis C. Kokossis and Apostolis A. Koutinas*

### Section V Biorefinery Technologies

- 18 **Forest Biorefinery: Current State of the Art** ..... 491  
*Tom Browne, Naceur Jemaa, Ibrahim Karidio, Talat Mahmood, Mike Paice, Mike Paleologou, Doug Singbeil, and Xiao Zhang*
- 19 **Thermochemical Conversion of Biomass to Liquid Fuels and Chemicals** ..... 517  
*W. J. Frederick, Jr.*
- 20 **Enzyme Applications in the Forest-Based Biorefinery** ..... 567  
*Alexey Vishtal and Andrzej Kraslawski*

<b>21 Biochemical Conversion</b> .....	591
<i>Shijie Liu, Yang Wang, John P. Buyondo, Yuanzhen Wang, and Michael Garver</i>	
<b>22 Separation of Hemicellulose by Hot-Water Extraction from Woody Biomass</b> .....	651
<i>Shijie Liu, Houfang Lu, Yichao Lei, Christopher D. Wood, Thomas E. Amidon, Bin Liang, Runcang Sun, Gary M. Scott, Daryl Nichol, and Al Ward</i>	
<b>23 Integrated Utilization of Algae Biomass in a Biorefinery Based on a Biochemical Processing Platform</b> .....	707
<i>Eduardo Sánchez-Tuirán, Mahmoud M. El-Halwagi, and Vyacheslav Kafarov</i>	

## Section VI Biorefinery Policy and Environmental Analysis

<b>24 Policy Options to Support Biorefining</b> .....	729
<i>Warren E. Mabee</i>	
<b>25 Biopower in the U.S. South: Barriers, Drivers, and Potential for Expansion</b> .....	749
<i>Youngsun Baek and Marilyn A. Brown</i>	
<b>26 Biorefinery Design from an Earth Systems Perspective</b> .....	771
<i>Damon Honnery, Gil Garnier, and Patrick Moriarty</i>	
<b>27 LCA-Based Environmental Evaluation of Biorefinery Projects</b> .....	793
<i>Shabnam Sanaei, Matty Janssen, and Paul R. Stuart</i>	
<b>Index</b> .....	819
