Preface.....	ix
Acknowledgments	xi
Author.....	xiii
List of Illustrations.....	xv
List of Tables	xvii
Introduction	xix
1. Oil Spills: Why Do They Happen and How Often?.....	1
How Often Do Spills Occur?	2
Some Oil Spill Facts	9
2. Response to Oil Spills	19
Oil Spill Contingency Plans	19
Activation of Contingency Plans	23
Training	24
Structure of Response Organizations	25
Supporting Studies and Sensitivity Mapping	27
Communication Systems	29
Oil Spill Cooperatives	30
Private and Government Response Organizations	30
Cost Recovery	32
3. Types of Oil and Their Properties	33
The Composition of Oil.....	33
Properties of Oil.....	35
Correlation between Properties.....	41
4. Behavior of Oil in the Environment.....	43
The Importance of Behavior and Fate.....	43
An Overview of Weathering	43
Evaporation	44
Emulsification and Water Uptake.....	45
Natural Dispersion	49
Dissolution	51
Photooxidation	52
Sedimentation, Adhesion to Surfaces, and Oil-Fines	
Interaction	52
Biodegradation	53
Formation of Tar Balls	55
Movement of Oil and Oil Spill Modeling.....	56

Spreading	56
Movement of Oil Slicks	58
Sinking and Overwashing.....	58
Spill Modeling	61
5. Analysis, Detection, and Remote Sensing of Oil Spills.....	63
The Importance of Analytical and Detection Technologies.....	63
Sampling and Laboratory Analysis	63
Field Analysis	65
Detection and Surveillance	67
Detection and Tracking Buoys and Systems	67
Visual Surveillance	69
Remote Sensing	70
Visual Sensors	70
Infrared Sensors	70
Laser Fluorosensors.....	72
Passive Microwave Sensors	74
Thickness Sensors.....	74
Radar.....	75
Satellites.....	75
6. Containment on Water.....	79
Types of Booms and Their Construction.....	79
Uses of Booms	83
Boom Failures.....	85
Tow Forces	89
Ancillary Equipment.....	89
Sorbent Booms and Barriers.....	90
Special Purpose Booms.....	94
7. Oil Recovery on Water.....	97
Skimmers	97
Oleophilic Surface Skimmers.....	99
Weir Skimmers	105
Suction or Vacuum Skimmers.....	106
Elevating Skimmers.....	108
Submersion Skimmers.....	108
Other Devices	109
Skimmer Performance.....	109
Special-Purpose Ships	109
Sorbents	110
Manual Recovery	115
8. Separation, Pumping, Decontamination, and Disposal.....	117
Temporary Storage.....	117

Pumps.....	120
Centrifugal Pumps.....	120
Vacuum Systems	120
Positive Displacement Pumps	121
Performance of Pumps	123
Separation	123
Decontamination	124
Disposal.....	127
9. Spill-Treating Agents.....	131
Dispersants	131
Effectiveness of Dispersants.....	131
Application of Dispersants	137
Toxicity of Dispersants	141
Surface-Washing Agents.....	142
Emulsion Breakers and Inhibitors.....	143
Recovery Enhancers	144
Solidifiers	144
Sinking Agents.....	145
Biodegradation Agents.....	145
10. In-Situ Burning.....	147
Advantages	147
Disadvantages	148
Ignition and What Will Burn	149
Burn Efficiency and Rates.....	151
Use of Containment.....	153
Emissions from Burning Oil	157
Summary.....	161
11. Shoreline Cleanup and Restoration.....	163
Behavior of Oil on Shorelines	163
Environmental Effects of Oil on Shorelines.....	165
Types of Shorelines and Their Sensitivity to Oil.....	166
Shoreline Countermeasures Assessment Technique.....	172
Shoreline Protection Measures	176
Cleanup Methods.....	177
Recommended Cleanup Methods	177
Less Recommended Cleanup Methods	185
12. Oil Spills on Land	189
Behavior of Oil on Land.....	189
Movement of Oil on Land Surface	191
Movement of Oil in the Subsurface.....	192
Habitats and Ecosystems	193

Cleanup of Surface Spills	198
Natural Recovery	199
Removal of Excess Oil	199
Other Cleanup Methods	201
Cleanup of Subsurface Spills	203
13. Effects of Oil Spills on the Environment	207
Biological Effects	207
Aquatic Environments	209
Fish	210
Plankton	213
Benthic Invertebrates	214
Epontic Organisms	215
Marine Mammals	216
Intertidal Fauna	217
Marine Plants	218
Special Ecosystems	220
Land	222
Birds	222
Damage Assessment	224
Restoration	224
Net Environmental Benefits	225
Glossary	227
Reading for Further Information	247
Index	251
