

1	Introduction	1
1.1	Contaminants in Aquatic Environment	1
1.1.1	Physical Contaminants	1
1.1.2	Chemical Contaminants.....	1
1.1.3	Biological Contaminants	4
1.2	Wastewater Treatment Methods	5
1.3	Bioremediation	6
1.3.1	Microbes.....	6
1.3.2	Fungi.....	7
1.3.3	Algae.....	8
1.3.4	Other Materials	9
1.4	Phytoremediation.....	10
1.4.1	Phytoextraction.....	11
1.4.2	Phytostabilization	13
1.4.3	Rhizofiltration (Phytofiltration).....	14
1.4.4	Phytovolatilization.....	14
1.4.5	Rhizodegradation.....	14
1.4.6	Phytodegradation (Phytotransformation).....	15
1.4.7	Advantages of Phytoremediation Technique	15
1.5	Plant Species Used in Phytoremediation Technology.....	15
	Literature Cited.....	19
2	Aquatic Plant Species and Removal of Contaminants	21
2.1	Contaminants Removed by Aquatic Plants	21
2.1.1	Inorganic Contaminants.....	21
2.1.2	Organic Contaminants	23
2.2	Major Plant Species.....	24
2.2.1	Free-Floating Species	24
2.2.2	Submerged Species.....	32
2.2.3	Emergent Species.....	36
2.2.4	Other Plant Species.....	40
	Literature Cited.....	41
3	Mechanism of Removal of Contaminants	
	by Aquatic Plants	51
3.1	Inorganic Contaminants	51
3.1.1	Heavy Metals.....	51
3.1.2	Radionuclides	54

3.1.3	Nitrogen and Phosphorus.....	55
3.2	Organic Contaminants.....	55
3.2.1	Halogenated Compounds.....	59
3.2.2	Hydrocarbons.....	61
3.2.3	Herbicides.....	61
3.2.4	Explosives.....	61
	Literature Cited.....	62
4	Role of Wetlands.....	65
4.1	Constructed Wetlands (Man-Made, Artificial or Engineered Wetlands).....	65
4.1.1	Composition of Wetlands.....	66
4.1.2	Types of Wetlands.....	67
4.1.3	Major Wetland Species	68
4.1.4	Factors Affecting Functioning of Wetlands	69
4.2	Mechanism of Contaminant Removal by Wetlands	70
4.3	Contaminants Removed by Wetlands.....	71
4.3.1	Inorganic Contaminants.....	71
4.3.2	Organic Contaminants	81
4.4	Limitations	85
4.5	Future	86
	Literature Cited.....	88
5	Future Prospects	95
5.1	Limitations of Phytoremediation Technology	95
5.2	Enhancement of Phytoremediation Efficiency	96
5.2.1	Plant–Bacteria Symbiosis	97
5.2.2	Plant–Fungi Symbiosis	98
5.2.3	Biotechnological Approach	98
5.3	Cost Analysis.....	101
5.4	Conclusions and Future Developments.....	103
	Literature Cited.....	104
	About the Author.....	107
	Index.....	109
