2004 ANNUAL BOOK OF ASTM STANDARDS, VOLUME 02.05

STANDARDS RELATING TO METALLIC AND INORGANIC COATINGS; METAL POWDERS, SINTERED P/M STRUCTURAL PARTS

A complete Subject Index appears at the end of this volume.

Listed below are those standards included in this volume(s) and those standards that have appeared previously which have been discontinued within the past three years.

In the serial designations prefixed to the following titles, the number following the dash indicates the year of original adoption as standard or, in the case of revision, the year of last revision. Thus, standards adopted or revised during the year 2004 have as their final number, 04. A letter following this number indicates more than one revision during that year, that is, 04a indicates the second revision in 2004, 04b, the third revision, etc. Standards that have been reapproved without change are indicated by the year of last reapproval in parentheses as part of the designation number, for example, (2004). A superscript epsilon indicates an editorial change since the last revision or reapproval—^{ε1} for the first change, ^{ε2} for the second change, etc.
