

Table of Contents

Table of Contents	iii
Acknowledgements.....	vi
Preface.....	v
References.....	xiv
Chapter 1 The Traffic Signal Control System: Its Pieces and How They Fit Together	1
Activity #1 Exploring the System and Providing a Framework (Reading).....	3
Activity #2 What Do You Know About Traffic Signal Systems? (Assessment)	17
Activity #3 Exploring the System: Driving Along an Arterial and Noting What You See (Discovery).....	23
Activity #4 Learning to See: The Simulation Environment in Which We Will Work (Discovery).....	25
Activity #5 Working Together – Team Building for Effective Learning and Design (Discovery).....	27
Activity #6 Team Agreement (Design)	39
Activity #7 Introduction to the <i>Traffic Signal Timing Manual</i> (In Practice)	41
Chapter 2 Modeling What We’ve Observed: Queuing Systems.....	45
Activity #8 Modeling Traffic Flow at Signalized Intersections (Reading)	47
Activity #9 What Do You Know About Queuing Systems? (Assessment)	65
Activity #10 Using High Resolution Field Data to Visualize Traffic Flow (Discovery).....	71
Activity #11 From Model to the Real World: Field Observations (Field)	75
Activity #12 Basic Operational Principles (In Practice).....	81
Chapter 3 Whose Turn is it? Phasing, Rings, and Barriers	85
Activity #13 Phasing, Rings, and Barriers (Reading)	87
Activity #14 What Do You Know About Phasing and Ring Barrier Diagrams? (Assessment)	97
Activity #15 Verifying Ring Barrier Operation in the Field (Field).....	99
Activity #16 Phasing, Rings, and Barriers in Practice (In Practice)	101
Chapter 4 Actuated Traffic Controller Timing Processes.....	105
Activity #17 Controller Timing Process (Reading).....	107
Activity #18 What Do You Know About Controller Operations? (Assessment)	113
Activity #19 The ASC/3 Traffic Controller (Discovery)	117
Activity #20 How a Traffic Phase Times and Terminates (Discovery)	121
Activity #21 Exploring a Controller Emulator (Discovery)	125
Activity #22 Constructing a Traffic Control Process Diagram (Discovery).....	127
Activity #23 Inferring Signal Timing Parameter Values (Field)	137
Activity #24 Signal Timing Parameters (In Practice)	141

Chapter 5	The Simulation Environment: Learning to See a Traffic Signal System.....	145
Activity #25	Microsimulation Models and the Traffic Control System (Reading)	147
Activity #26	What Do You Know About Simulation Models? (Assessment)	155
Activity #27	The VISSIM Simulation Model – Learning Your Way Around (Discovery)	159
Activity #28	Building a Simulation Model Network (Design)	163
Activity #29	Traffic Analysis Tools (In Practice)	167
Chapter 6	Timing Processes on One Approach	171
Activity #30	Considering Minimum Green Time, Passage Time, and Detection Zone Length (Reading).....	173
Activity #31	What Do You Know About Detection Zone Length and Passage Time? (Assessment)	185
Activity #32	Relating the Length of the Detection Zone to the Duration of the Green Indication (Discovery)	189
Activity #33	Determining the Length of the Minimum Green Time (Discovery)	193
Activity #34	Understanding the Variation of Vehicle Headways in a Departing Queue (Discovery)	197
Activity #35	Relating Headway to Unoccupancy Time and Vehicle Extension Time (Discovery)	201
Activity #36	Determining the Maximum Allowable Headway (Design)	205
Activity #37	Determining the Passage Time (Design).....	213
Activity #38	Actuated Traffic Control Processes (In Practice).....	221
Chapter 7	Timing Processes for the Intersection	225
Activity #39	Maximum Green Time, Cycle Length, and Delay (Reading)	227
Activity #40	What Do You Know About Maximum Green Time, Cycle Length, and Delay? (Assessment)	235
Activity #41	Determining the Effect of the Minor Street Vehicle Extension Time on Intersection Operations (Discovery)	237
Activity #42	Determining the Effect of the Maximum Green Time on Intersection Operations (Discovery) ...	245
Activity #43	Setting the Maximum Green Timing Parameter for All Approaches of an Intersection (Design).....	249
Activity #44	Maximum Green Time (In Practice)	251
Chapter 8	Left Turn Phasing—Permitted, Protected, or Both	255
Activity #45	Left Turn Phasing (Reading)	257
Activity #46	What Do You Know About Left Turn Phasing? (Assessment)	265
Activity #47	Permitted Left Turn Operations (Discovery)	267
Activity #48	Comparing Permitted and Protected Left Turn Phasing (Discovery)	271
Activity #49	Comparing Protected/Permitted and Protected Left Turn Phasing (Discovery).....	273
Activity #50	Analysis and Design of Left Turn Treatment (Design)	277
Activity #51	Left Turn Phasing Options (In Practice)	279

Chapter 9	Right of Way Change: Change and Clearance Intervals.....	283
Activity #52	The Theoretical Basis of the Yellow and Red Clearance Intervals (Reading)	285
Activity #53	What Do You Know About the Change and Clearance Intervals? (Assessment)	293
Activity #54	Drivers Responding to Yellow and Red Indications (Discovery).....	295
Activity #55	Vehicle Response to Displays at End of Green (Field)	297
Activity #56	Determining Vehicle Change and Clearance Intervals (Design).....	301
Activity #57	Yellow and Red Clearance Intervals (In Practice).....	305
Chapter 10	Your Final Design: Putting It All Together	309
Activity #58	Integrating Information, Justifying Choices, and Communicating Results (Reading)	311
Activity #59	Assembling Information For Your Timing Plan Design (Discovery).....	325
Activity #60	What Do You Know About the Signal Timing Process? (In Practice)	327
Activity #61	Signal Timing Design in Practice (In Practice)	329
Activity #62	Design Report (Design)	331
Activity #63	Design Evaluations and Assessments (Design)	333
