Preface.....	xv
Author.....	xvii
Abbreviations	xix
1. Introduction to Composites.....	1
1.1 Definition.....	2
1.2 Brief History of Composites	2
1.3 Classification.....	3
1.4 Advantages of Composites	8
1.5 Disadvantages of Composites	9
1.6 Properties of Composites	10
1.6.1 Fiber-Reinforced Composites	12
1.6.1.1 Elastic Behavior under Longitudinal Loading.....	14
1.6.1.2 Elastic Behavior under Transverse Loading	16
1.6.1.3 Longitudinal Tensile Strength.....	17
1.6.1.4 Transverse Tensile Strength.....	19
1.6.1.5 Discontinuous Fiber-Reinforced Composites	20
1.6.2 Particulate Composites	22
1.7 Applications	24
Questions	26
Reference.....	29
Bibliography.....	29
2. Dispersed Phase.....	31
2.1 Fiber Reinforcements.....	33
2.1.1 Natural Fibers.....	36
2.1.1.1 Bast Fibers.....	38
2.1.1.2 Leaf Fibers	39
2.1.1.3 Seed Fibers	39
2.1.1.4 Properties of Natural Fibers	39
2.1.2 Synthetic Fibers.....	41
2.1.2.1 Glass Fibers	41
2.1.2.2 Carbon Fibers.....	46
2.1.2.3 Organic Fibers.....	51
2.1.2.4 Ceramic Fibers	58
2.1.3 Surface Modification of Fibers	67
2.1.3.1 Surface Modification of Glass Fibers	70
2.1.3.2 Surface Modification of Carbon Fibers.....	73
2.1.3.3 Surface Modification of Polymeric Fibers.....	73
2.1.3.4 Surface Treatment of Natural Fibers	74
2.1.4 Fiber Selection Criteria.....	75

2.2	Particulate Materials.....	76
2.3	Nano-Reinforcements.....	80
2.3.1	Nanofibers.....	80
2.3.2	Nanotubes.....	82
2.3.2.1	Electric Arc Discharge Technique	82
2.3.2.2	Chemical Vapor Deposition Process	83
2.3.3	Nanoclays.....	83
2.3.4	Nanoparticles	85
2.3.4.1	Preparation of Nanoparticles	85
2.3.4.2	Carbon Black.....	89
2.3.4.3	Silica	90
2.3.4.4	Zinc Oxide.....	91
2.3.4.5	Titanium Dioxide	91
2.3.4.6	Talc.....	92
2.3.4.7	Calcium Carbonate	92
	Questions	93
	References	94
	Bibliography.....	95
	Further Reading	96
3.	Matrix Materials	97
3.1	Polymer Matrix.....	97
3.1.1	Comparison of Thermoset Polymers and Thermoplastics	101
3.1.2	Properties of Polymers	102
3.1.3	Thermoset Polymers.....	105
3.1.3.1	Polyester Resins	105
3.1.3.2	Epoxy Resins.....	112
3.1.3.3	Vinyl Ester Resins.....	118
3.1.3.4	Phenolic Resins	119
3.1.3.5	Polyimide Resins	121
3.1.4	Thermoplastics	124
3.1.4.1	Aliphatic Polyamides.....	126
3.1.4.2	Polypropylene	127
3.1.4.3	Polyethylene Terephthalate	128
3.1.4.4	Polyether Ether Ketone	128
3.1.4.5	Polyphenylene Sulfide	128
3.1.4.6	Polysulfone.....	129
3.1.4.7	Thermoplastic Polyimides	129
3.1.5	Elastomers (Rubbers).....	130
3.1.5.1	Natural Rubber.....	133
3.1.5.2	Styrene–Butadiene Rubber	133
3.1.5.3	Polybutadiene Rubber.....	133
3.1.5.4	Synthetic Polyisoprene Rubber (IR).....	134
3.1.5.5	Ethylene–Propylene (Diene) Rubber.....	134

3.1.5.6	Butyl Rubber (IIR)	135
3.1.5.7	Nitrile Rubber	135
3.1.5.8	Chloroprene Rubber	136
3.1.5.9	Silicone Rubber	137
3.1.5.10	Fluorocarbon Elastomers	137
3.1.5.11	Polyurethane	138
3.1.5.12	Sulfur Vulcanization	138
3.1.5.13	Peroxide Vulcanization	138
3.1.6	Polymer Matrix Materials: Selection Criteria	139
3.2	Metallic Matrix Materials	141
3.2.1	Aluminum Alloys	147
3.2.2	Titanium Alloys	148
3.2.3	Magnesium Alloys	149
3.2.4	Copper	149
3.2.5	Intermetallic Compounds	149
3.3	Ceramic Matrix Materials	151
3.3.1	Crystalline Oxides	154
3.3.1.1	Alumina	154
3.3.1.2	Mullite	156
3.3.1.3	Spinel	157
3.3.1.4	Zirconia	157
3.3.1.5	Silica	158
3.3.1.6	Silicon Carbide	158
3.3.1.7	Silicon Nitride	158
3.3.1.8	Boron Carbide	159
3.3.1.9	Boron Nitride	159
3.3.1.10	Aluminum Nitride	159
3.3.2	Glasses and Glass-Ceramics	160
3.3.2.1	Magnesium Aluminosilicates	161
3.3.2.2	Barium Magnesium Aluminosilicates	162
3.3.2.3	Calcium Aluminosilicates	162
3.3.2.4	Lithium Aluminosilicates	162
3.3.3	Cement	162
	Questions	164
	References	165
	Bibliography	166
4.	Polymer Matrix Composites	167
4.1	Processing of Polymer Matrix Composites	167
4.1.1	Hand Lay-Up Process	170
4.1.1.1	Molds	171
4.1.1.2	Release Film or Layer	171
4.1.1.3	Gel Coat	171
4.1.1.4	Surface Mat Layer	172
4.1.1.5	Laminates	172

	4.1.1.6	Lamination	173
	4.1.1.7	Advantages and Limitations	174
4.1.2		Spray-Up Process	175
4.1.3		Resin Transfer Molding.....	176
	4.1.3.1	Two-Pot System.....	177
	4.1.3.2	Catalyst Injection System	177
	4.1.3.3	Premixing System	177
	4.1.3.4	Selection of Resin Transfer Molding Equipment Capacity.....	177
	4.1.3.5	Mold	178
	4.1.3.6	Raw Materials	179
	4.1.3.7	Resin Injection Pressure.....	179
	4.1.3.8	Mold Filling Time.....	180
	4.1.3.9	Molding Process	180
	4.1.3.10	Advantages and Limitations	181
	4.1.3.11	Vacuum-Assisted Resin Transfer Molding Process	182
	4.1.3.12	Seemann Composite Resin Infusion Molding Process	182
4.1.4		Vacuum Impregnation Methods.....	183
	4.1.4.1	Vacuum Impregnation.....	183
	4.1.4.2	Vacuum Injection Molding	185
	4.1.4.3	Vacuum Bag Molding	185
4.1.5		Autoclave Process	186
	4.1.5.1	Prepregs	187
	4.1.5.2	Automatic Tape-Laying	190
	4.1.5.3	Autoclave Molding.....	192
4.1.6		Filament Winding Process.....	194
	4.1.6.1	Reinforcements.....	195
	4.1.6.2	Matrix Materials	196
	4.1.6.3	Mandrels.....	197
	4.1.6.4	Winding Machines.....	199
	4.1.6.5	Advantages of Filament Winding.....	202
	4.1.6.6	Limitations	202
4.1.7		Pultrusion.....	203
	4.1.7.1	Raw Materials	204
	4.1.7.2	Pultrusion Process.....	204
	4.1.7.3	Pultrusion Die Design Criteria.....	205
	4.1.7.4	Pultrusion Products	206
4.1.8		Compression Molding.....	207
	4.1.8.1	Molding Compounds.....	207
	4.1.8.2	Compression Molding Press.....	215
	4.1.8.3	Molds (Dies)	216
	4.1.8.4	Molding Process	216

4.1.9	Thermoplastic Composite Processing.....	217
4.1.9.1	Film Stacking	218
4.1.9.2	Thermoplastic Tape-Laying	218
4.1.9.3	Commingled Fibers	219
4.1.9.4	Other Processing Methods	219
4.1.9.5	Consolidation of Thermoplastic Composites	220
4.1.9.6	Injection Molding	227
4.2	Advances in Polymer Matrix Composites	228
4.2.1	Advanced Curing Processes.....	228
4.2.2	Metal-Composite Laminates	230
4.2.3	Smart Composites.....	232
4.2.3.1	Structural Health Monitoring	233
4.2.3.2	Structural Damping	234
4.2.3.3	Smart Electromagnetic Antenna Structures	235
4.2.3.4	Self-Healing Composites.....	235
4.3	Structure and Properties of PMCs.....	236
4.3.1	Structural Defects in PMCs	237
4.3.2	Mechanical Properties of PMCs	237
4.3.2.1	Tensile Properties	239
4.3.2.2	Compressive Strength of Unidirectional Fiber Composites	239
4.3.2.3	Fracture.....	241
4.3.2.4	Damping Characteristics.....	245
4.3.2.5	Fatigue Properties	245
4.3.2.6	Creep of PMCs	247
4.4	Environmental Effects on PMCs.....	248
4.5	Applications of PMCs.....	248
4.5.1	Aerospace Applications	249
4.5.2	Automotive Applications.....	251
4.5.3	Sporting Goods	252
4.5.4	Marine Applications.....	253
4.5.5	Infrastructure	253
4.5.6	Armor	256
4.6	Recycling of PMCs	256
4.6.1	Grading.....	257
4.6.2	Shredding.....	257
4.6.3	Recycling of Thermoset Composites.....	257
4.6.3.1	Fine Grinding.....	258
4.6.3.2	Advanced Grinding Processes	258
4.6.3.3	Selective Chemical Degradation	259
4.6.3.4	Pyrolysis of Composites	259
4.6.3.5	Energy Recovery.....	260
4.6.4	Recycling of Thermoplastic Composites	261

Questions	262
References	263
Bibliography.....	265
Further Reading.....	265
5. Metal Matrix Composites	267
5.1 Selection of Reinforcements	269
5.2 Processing of Metal Matrix Composites.....	272
5.2.1 Liquid-State Processes.....	273
5.2.1.1 Stir Casting.....	274
5.2.1.2 Squeeze Casting	276
5.2.1.3 Slurry Casting (Compocasting).....	277
5.2.1.4 Centrifugal Casting.....	278
5.2.1.5 Microstructure of Cast MMCs	279
5.2.1.6 Melt Infiltration	280
5.2.1.7 Spray-Forming Technique.....	296
5.2.1.8 In Situ Processes.....	302
5.2.1.9 Melt Oxidation Process (Lanxide Process)	311
5.2.2 Solid-State Processes	311
5.2.2.1 Powder Metallurgy Techniques	312
5.2.2.2 Diffusion Bonding.....	322
5.2.2.3 Explosive Shock Consolidation	324
5.2.2.4 Roll Bonding and Coextrusion.....	325
5.2.3 Gaseous-State Processes	327
5.2.4 Deposition Techniques.....	328
5.3 Secondary Processing.....	329
5.3.1 Extrusion and Drawing	329
5.3.2 Rolling, Forging, and Hot Isostatic Pressing.....	331
5.3.3 Superplastic Processing and Sheet Forming.....	332
5.4 Machining and Joining of MMCs.....	333
5.4.1 Mechanical Operations	333
5.4.1.1 Electrical Cutting.....	334
5.4.1.2 High-Energy Beam Cutting	334
5.4.1.3 Fluid Jet Cutting	334
5.4.2 Joining Processes	335
5.5 Properties of Metal Matrix Composites.....	335
5.5.1 Modulus	337
5.5.2 Strength	337
5.5.3 Toughness	343
5.5.4 Thermal Characteristics.....	344
5.5.5 Aging Characteristics	345
5.5.6 Fatigue	345
5.5.6.1 Fatigue of Composites under Cyclic Compressive Loading.....	346

5.5.6.2	Fatigue of Particle- and Whisker-Reinforced Composites	347
5.5.6.3	Thermal Fatigue	348
5.5.7	Creep	348
5.5.8	Wear	348
5.6	Applications of Metal Matrix Composites	349
5.7	Recycling of Metal Matrix Composites	351
5.8	Concluding Remarks	351
	Questions	352
	References	352
	Bibliography	354

6.	Ceramic Matrix Composites	355
6.1	Failure Behavior of CMCs	357
6.2	Toughening Mechanisms in CMCs	360
6.3	Processing of Ceramic Matrix Composites	364
6.3.1	Ceramic Particle-Based Processes	366
6.3.1.1	Cold Compaction	372
6.3.1.2	Slurry Impregnation	373
6.3.1.3	Sol-Gel Processing	376
6.3.1.4	Electrophoretic Deposition	383
6.3.1.5	Other Ceramic Particle-Based Methods	386
6.3.1.6	Layered Ceramic Structures	388
6.3.1.7	Sintering	389
6.3.1.8	Hot Pressing	392
6.3.1.9	Hot Isostatic Pressing	394
6.3.2	Reaction Bonding Process	395
6.3.3	Self-Propagating High-Temperature Synthesis	397
6.3.4	In Situ Ceramic Composite Processing	399
6.3.4.1	Mullite Matrix Composites	401
6.3.4.2	Alumina Matrix Composites	401
6.3.4.3	SiC Matrix Composites	402
6.3.4.4	Si ₃ N ₄ Matrix Composites	402
6.3.4.5	Advantages of In Situ Composites	402
6.3.5	Melt Processing	403
6.3.5.1	Melt Infiltration	404
6.3.6	Polymer Infiltration and Pyrolysis	413
6.3.7	Chemical Vapor Infiltration	417
6.3.7.1	Preform Preparation for CVI	422
6.3.7.2	Isothermal Isobaric CVI	423
6.3.7.3	Forced CVI (FCVI)	424
6.3.7.4	Pulse CVI (PCVI)	427
6.3.7.5	Thermal Gradient CVI	428
6.3.7.6	CVI Modeling	429

6.3.8	Chemical Vapor Composite Deposition	431
6.3.9	Potential Cost-Effective Processing Methods	432
6.3.9.1	Sullivan Process.....	432
6.3.10	Summary of CMC Processing.....	433
6.4	Mechanical Properties of CMCs	434
6.4.1	Strength and Modulus	440
6.4.2	Fracture Toughness	442
6.4.3	Fatigue Behavior	443
6.4.4	Creep.....	445
6.5	Thermal Conductivity	446
6.6	Wear Behavior	447
6.7	Applications.....	450
6.8	Concluding Remarks on CMCs	452
6.9	Cement-Based Composites	453
6.9.1	Asbestos Cement.....	453
6.9.2	Glass Fiber-Reinforced Cement	454
6.9.2.1	Properties	454
6.9.2.2	Applications	455
6.9.3	Natural Fiber-Reinforced Cement	455
6.9.3.1	Manufacture.....	456
6.9.3.2	Applications	456
6.9.4	Polypropylene Fiber-Reinforced Concrete	457
6.9.4.1	Properties	457
6.9.4.2	Applications	457
6.9.5	Steel Fiber-Reinforced Concrete.....	457
6.9.5.1	Manufacture.....	458
6.9.5.2	Properties	458
6.9.5.3	Applications	458
	Questions	459
	References	460
	Bibliography.....	462
7.	Carbon-Carbon Composites.....	463
7.1	Carbon Fiber Reinforcements.....	466
7.2	Matrix Systems	467
7.2.1	Thermosetting Resin Precursors	468
7.2.2	Thermoplastic Precursors.....	468
7.2.3	Gaseous Precursors	470
7.3	Processing of C/C Composites.....	470
7.3.1	Thermosetting Resin-Based Processing	472
7.3.2	Thermoplastic Pitch-Based Processing	474
7.3.3	Chemical Vapor Infiltration.....	477
7.3.3.1	Isothermal CVI	477
7.3.3.2	Thermal Gradient CVI.....	478

7.3.3.3	Pressure Gradient CVI.....	479
7.3.3.4	Rapid CVI Process.....	480
7.3.4	Redensification Cycles.....	480
7.3.5	Graphitization	481
7.4	Microstructure of Carbon–Carbon Composites.....	482
7.5	Properties of C/C Composites.....	488
7.5.1	Mechanical Properties	488
7.5.2	Thermal Properties.....	494
7.5.3	Tribological Properties.....	497
7.6	Oxidation Protection of C/C Composites.....	497
7.6.1	Bulk Protection Systems	499
7.6.2	Multilayer Surface Coatings.....	500
7.7	Applications of C/C Composites	505
	Questions	508
	References	509
	Bibliography.....	510

8. Nanocomposites	511
8.1 Polymer Nanocomposites	512
8.1.1 Clay–Polymer Nanocomposites.....	516
8.1.1.1 Types of Clay Composite Structures	516
8.1.1.2 Clay Surface Modification.....	517
8.1.1.3 Processing of Clay–Polymer Nanocomposites.....	520
8.1.1.4 Clay–Epoxy Nanocomposites.....	525
8.1.1.5 Clay–Unsaturated Polyester Nanocomposites....	527
8.1.1.6 Clay–PET Nanocomposites.....	529
8.1.1.7 Clay–Rubber Nanocomposites	531
8.1.1.8 Characterization	535
8.1.1.9 Properties of Clay–Polymer Nanocomposites...	537
8.1.2 Graphite–Polymer Nanocomposites	543
8.1.2.1 Synthesis of Graphite Nanosheets and Graphite Oxide.....	544
8.1.2.2 Preparation of Graphite–Polymer Nanocomposites	544
8.1.3 Nanofiber-Reinforced Composites	545
8.1.3.1 Surface Modification of Carbon Nanofibers....	547
8.1.3.2 Alignment of CNF.....	547
8.1.3.3 Processing of Nanofiber-Reinforced Composites.....	548
8.1.3.4 Nanofiber–Polymer Interface.....	551
8.1.3.5 New Polymer Formulation	552
8.1.3.6 Interpenetrating Polymer Network	553
8.1.3.7 Properties of CNF–Polymer Nanocomposites....	553

8.1.4	Particulate Nanocomposites.....	553
8.1.4.1	Surface Modification.....	555
8.1.4.2	Processing of Particulate Nanocomposites	559
8.1.5	Organic–Inorganic Hybrids (Nanocomposites)	561
8.1.6	Applications of Polymer Nanocomposites	561
8.2	Metal Matrix Nanocomposites.....	563
8.2.1	Processing of Metallic Nanocomposites.....	563
8.2.1.1	Powder Metallurgy Techniques	563
8.2.1.2	Melt Processing.....	565
8.2.1.3	Thermal Spraying.....	567
8.2.1.4	In Situ Processing.....	569
8.2.1.5	Mechanical Alloying	570
8.2.2	Metallic Nanocomposite Coatings	571
8.2.2.1	Thermal Spraying.....	571
8.2.2.2	Electrodeposition of Nanocomposite Coatings	571
8.2.3	Properties and Applications.....	576
8.3	Ceramic Nanocomposites	577
8.3.1	Processing of Ceramic Nanocomposites	580
8.3.1.1	Mechanochemical Synthesis.....	580
8.3.1.2	Sol–Gel Processing	581
8.3.1.3	Polymer-Derived Ceramic Nanocomposites	583
8.3.1.4	Novel Processing Method	583
8.3.2	Carbon Nanotube–Ceramic Nanocomposites.....	583
8.3.3	Ceramic Nanocomposite Coatings.....	584
8.3.4	Properties of Ceramic Nanocomposites	587
	Questions	589
	References	589
	Bibliography.....	593
	Further Reading	593
	Appendix: Laboratory Practice.....	595
	Index	599
