## 1. Biomarkers and Inflammatory Network in Aging: Targets for Therapies

CARMELA RITA BALISTRERI, GIULIA ACCCARDI, CALOGERO CARUSO,  
GIUSEPPINA CANDORE

Introduction 1

Aging Biomarkers: Definition and Selection Criteria 2

Inflammatory Network: A Description and Its Biological Effects  
on Aging 3

Cellular Inflammatory Biomarkers 4

Serum Inflammatory Biomarkers 7

Molecules and Mechanisms Linked to the NF- $\kappa$ B Signaling System  
Are Potential Targets for Anti-Aging and Anti-Age-Related  
Disease Treatment Strategies 8

Conclusions 11

References 11

## 2. The Biological Significance of Zinc in Inflammation and Aging

BIN BAO, AAMIR AHMAD, ASFAR AZMI, YIWEI LI, ANANDA PRASAD,  
FAZLUL H. SARKAR

Introduction 15

Inflammation, Cellular and Tissue Damage,  
and Chronic Disease 15

Reactive Oxygen Species and Their Physiological Roles 16

Reactive Oxygen Species and Cell or Tissue Injury 17

The Biology of Aging 17

Aging, Inflammation, Oxidative Stress, and DNA Damage 18

The Biological Functions of Zinc 19

The Role of Zinc as an Anti-Inflammatory Agent 19

Zinc as an Antioxidant Agent 20

The Molecular Link between NF- $\kappa$ B, A20, Zinc, and Cancer 21

The Role of Zinc in the Regulation of Nrf2, Aging, and Cancer 22

The Role of Zinc in the Regulation of P53 and Cancer 22

Conclusions and Perspectives 23

Acknowledgments 23

References 24

## 3. Immunity, Inflammation, and Aging

KEITH C. MEYER

Introduction 29

Aging and Immune System Remodeling 29

Aging and Inflammation 33

Summary and Conclusions 35

References 35

## 4. Oxidative Stress, Inflammaging, and Immunosenescence

MOISÉS EVANDRO BAUER, MÓNICA DE LA FUENTE

Introduction 39

Inflammaging 39

Roles of Oxidative and Inflammatory Stress  
in Immunosenescence 40

The Oxidation-Inflammation Theory of Aging 40

Role of Antioxidants in the Immune System 41

Chronic Stress Leads to Premature Immunosenescence  
and Increased Inflammaging 43

Conclusions 44

References 45

## 5. Stress Response, Inflammaging, and Cancer

MI-KYUNG KIM, YONG SANG SONG

Introduction 49

Inflammation and Cancer 49

Inflammaging in Carcinogenesis 51

Phytochemicals as Chemopreventive Agents 52

References 52

## 6. Aging, Immunosenescence, and Cancer

TAMAS FÜLÖP, ANIS LARBI, MARTINE EXTERMAN, RAFAEL SOLANA,  
GILLES DUPUIS, RAMI KOTB, EVELYNA DERHOVANASSIAN,  
GRAHAM PAWELEC

Introduction 55

The Definition of Aging 55

Aging and Cancer 56

Immune System and Cancer 57

Immunosenescence and Inflammaging 58

Immunosenescence and Cancer 64

Modulation 65

Conclusions 65

Acknowledgments 66

References 66

## 7. Telomere Biology in Senescence and Aging: Focus on Cardiovascular Traits

HAIDONG ZHU, PIM VAN DER HARST

Introduction 71

Telomere Biology and Its Link to Cellular Senescence 71

Telomere/Telomerase and Aging 73

The Axis of Aging: Telomere-P53-Mitochondria 74

Factors Influencing Telomere Length 74

Factors Influencing Telomerase 75

Telomere Biology in Stem Cells 76

Telomere Biology and Cardiovascular Traits	76
Telomere Biology and Diabetes	79
Perspectives	79
Acknowledgments	79
References	80

## 8. Epigenetics, Inflammation, and Aging

ROCIO G. URDINGUIO, SANDRA RODRIGUEZ-RODERO, AGUSTIN F. FERNANDEZ, MARIO F. FRAGA

Introduction	85
Epigenetics and the Fetal Origin of Adult Diseases	86
Mechanisms Involved in Dietary and Nutritional Modulation of DNA Methylation and Histone Modifications	88
Dietary Influence on Epigenetics during Early Development	89
Influence of Dietary Components on Epigenetic Marks in Developed Organisms	91
Epigenetic Changes to the Immune System That Lead to Inflammation and Disease	93
Conclusions	95
References	95

## 9. Nutrition as an Epigenetic Modifier in Aging and Autoimmunity

DONNA RAY, RAYMOND YUNG

Introduction	103
Epigenetics and Aging	103
Environmental Stressors, Epigenetics, and Autoimmunity	104
Epigenetics in Different Autoimmune Diseases	105
Diet, DNA Methylation, and Immune-Mediated Diseases	105
Lifetime Diet	106
Conclusions	107
References	107

## 10. Connecting Phytochemicals, Epigenetics, and Healthy Aging: Is Metabolism the Missing Link?

KATARZYNA SZARC VEL SZIC, AJAY PALAGANI, CHANDRA SEKHAR CHIRUMAMILLA, JOLIEN DIDDENS, WIM VANDEN BERGHE

Introduction	111
Crosstalk of Inflammation and Energy Metabolism Fuel Epigenetic Plasticity	112
Nutriepigenomics: Lifelong Remodeling of Our Epigenomes by Nutritional, Phytochemical, and Metabolic Factors	114
Xenohormetic Epigenetic Effects of Plant Secondary Metabolites across Species: An Evolutionary Role for Stress Adaptive Responses in Healthy Aging and Longevity	117
Conclusion	118
Acknowledgments	118
References	118

## 11. Diet/Nutrition, Inflammation, Cellular Senescence, Stem Cells, Diseases of Aging, and Aging

JAMES E. TROSKO, MEI-HUI TAI, BENJAMIN SOPCZYNSKI, KYUNG-SUN KANG

Introduction: The Effect of Evolution of the Physical World on the Evolution of the Biological World	125
--	-----

Evolutionary Transition from an Anoxic Environment to an Aerobic Environment: Mitochondria, Asymmetric Cell Division, Stem Cells, and Metazoans	126
Aging of the Organism	128
How the Study of Human Carcinogenesis Might Assist in Unraveling Aging: The Role of Stem Cells, Cell-Cell Communication, Diet, and Inflammation in the Multistage, Multi-Mechanism Process of Carcinogenesis	131
What Is the Origin of the Initiated Cell?	133
Role of Oxygen in the Homeostatic Regulation of Stem Cells	135
Stem Cells, the Warburg Hypothesis, and Cancer	135
Roles of Nutrition/Diet and Inflammation in the Different Phases of Carcinogenesis	136
Stem Cells and Aging	138
Cellular Senescence: The End of Cellular Life Span or Only a Reversible, Transient Epigenetic Quiescent Stage of the Cell's Life?	138
Summary	139
References	140

## 12. Circadian Clock Mechanisms Link Aging and Inflammation

ANNA A. KONDRATOVA, ROMAN V. KONDRATOV

Introduction	145
The Circadian System and Rhythms	145
Molecular Mechanisms of the Circadian Clock	146
Circadian Clock Disruption and Aging	147
Mechanisms of the Circadian Clock and Aging	149
Circadian Clock and Inflammation	150
Conclusions and Perspectives	152
References	153

## 13. Obesity, Insulin Resistance, and Inflammaging

BIANCA K. ITARIU, THOMAS M. STULNIG

Introduction	157
Inflammatory Mediators, Obesity, and Aging	158
Cross-Talk between Insulin and Inflammatory Signaling	159
Adipose Tissue Macrophages	159
Role of Other Immune Cell Types in Obesity-Associated Inflammaging	160
Therapeutic Options	160
Conclusion	161
References	161

## 14. Organelle Stress and mTOR in Aging-Associated Inflammation

GIOVAMBATTISTA PANI

Introduction	165
Turning Cellular Stress into Inflammation: Endoplasmic Reticulum and Mitochondria	165
mTOR in Nutrient Sensing and Aging	168
mTOR Routes to Inflammation	169
mTOR, Inflammation, and "Hypertrophic" Aging	172
mTOR and Cellular Senescence	172
mTOR and Stem Cell Aging	173

mTOR, Obesity, and “Metainflammation”	174
Hypertrophy versus Atrophy, mTOR, and Muscle Aging	175
Concluding Remarks: Aging and mTOR-Dependent Repair	176
References	177

## 15. SIRT1 and Inflammaging in Chronic Obstructive Pulmonary Disease

JAE-WOONG HWANG, ISAAC K. SUNDAR, HONGWEI YAO,  
IRFAN RAHMAN

Introduction	183
Inflammaging in COPD	184
Abnormal Cellular Processes during Inflammaging in COPD	185
SIRT1 and Inflammaging	186
SIRT1 Agonists/Activators: Anti-Inflammaging Molecules	187
Conclusions	188
Acknowledgments	188
References	188

## 16. Stress-Induced Premature Senescence: Another Mechanism Involved in the Process of Accelerated Aging in Chronic Obstructive Pulmonary Disease

HYE YUN PARK, DON D. SIN

Introduction	193
Inflammaging and Cellular Senescence: Basic Characteristics	193
Inflammaging and Oxidative Stress in COPD	195
Stress-Induced Premature Senescence under Oxidative Stress in COPD	196
Functions of Stress-Induced Premature Senescence Overlap with Inflammaging in COPD	197
COPD in a Human Model with Premature Aging Features Related to Inflammaging or Stress-Induced Premature Senescence	198
Role of Inflammaging in Extrapulmonary Manifestations of COPD	199
Unresolved Questions	200
References	200

## 17. Cellular Senescence and Premature Aging in Lung Diseases

KAZUTETSU AOSHIBA, TAKAO TSUJI, KAZUHIRO YAMAGUCHI,  
MASAYUKI ITOH, HIROYUKI NAKAMURA

Why Do Senescence- and Elderly-Specific Diseases Develop?	203
Cellular Senescence Associated with Aging and Illness Often Seen in Elderly People	204
COPD	205
Pulmonary Fibrosis	207
Differences in the Cellular Senescence Underlying the Onset of Pulmonary Emphysema and Fibrosis	208
Conclusions	208
References	208

## 18. Rheumatoid Arthritis: Disease Pathophysiology

ANKIT SAXENA, S.K. RAYCHAUDHURI, S.P. RAYCHAUDHURI

Introduction	215
--------------	-----

T Cells in Rheumatoid Arthritis	216
B Cells and Autoantibodies	219
Cytokines in Rheumatoid Arthritis	220
Cartilage/Bone Destruction	224
Conclusions	224
References	225

## 19. Aging and Anti-Aging in Hair and Hair Loss

CHAO-CHUN YANG, CHIH-CHIANG CHEN, WEN-CHIEH CHEN

Introduction	231
Mechanisms in the Aging of Hair Follicles	231
Chronic Inflammation in the Pathogenesis of Hair Diseases	235
Anti-Aging	238
Conclusion	241
References	241

## 20. Muscle Wasting, Dysfunction, and Inflammaging

HANS DEGENS, JAMIE S. MCPHEE

Introduction	247
Age-Related Changes in Skeletal Muscle	247
Disability Threshold	249
Causes of Age-Related Muscle Dysfunction	249
Exercise	251
Conclusion	251
References	252

## 21. Matrix Metalloproteinases and Skin Inflammaging

FRANK ANTONICELLI, WILLIAM HORNEBECK

Introduction	255
Matrix Metalloproteinases and Skin-Intrinsic Aging	255
Matrix Metalloproteinases and Skin Photoaging	257
Matrix-Directed Skin Inflammaging	259
Concluding Remarks: Skin Inflammaging Proteases and Cutaneous Disorders in Elderly Persons	260
References	262

## 22. Ocular Health, Vision, and a Healthy Diet

SUNNY E. OHIA, CATHERINE A. OPERE, MADHURA KULKARNI,  
AARON BARETT

Introduction	267
Ocular Inflammatory Diseases	268
Age-Related Ocular Diseases	271
Management of Ocular Diseases to Promote Healthy Vision	272
Conclusions and Perspectives	274
References	274

## 23. The Role of Physical Activity in Healthy Living: Its Anti-Inflammatory Effects

CHERI L. GOSTIC, DAWN BLATT

Introduction	279
Daily Physical Activity Recommendations	279
Overweight and Obesity	279
Type 2 Diabetes	280
Metabolic Syndrome	281

Hypertension	281
Hyperlipidemia	281
Inflammation	281
Review of the Evidence on the Effect of Exercise on Inflammatory Markers	282
References	283

## 24. Erectile Dysfunction in Inflammaging

CARLA COSTA, MAARTEN ALBERSEN

Introduction	287
Prevalence and Etiology	287
Pathophysiology of Erectile Dysfunction in the Aging Man	288
Assessment	291
Treatment	292
Conclusions	293
References	293

## 25. Role of Saturated and Polyunsaturated Fat in Obesity-Related Inflammation

JOSE E. GALGANI, DIEGO GARCÍA

Introduction	297
Intracellular Fatty Acid Metabolism	297
Polyunsaturated Fatty Acids as Precursors of Pro- and Anti-Inflammatory Mediators	298
The Cellular and Molecular Basis of Inflammation	299
Mechanisms of Obesity-Related Low-Grade Inflammation	300
Role of Different Fatty Acid Types on Low-Grade Inflammation	302
Concluding Remarks	304
References	305

## 26. Cellular Stress Response, Hormesis, and Vitagenes in Aging and Longevity: Role of Mitochondrial “Chi”

CAROLIN CORNELIUS, ANTONIO GRAZIANO, ROSARIO PERROTTA, ROSANNA DI PAOLA, SALVATORE CUZZOCREA, EDWARD J. CALABRESE, VITTORIO CALABRESE

Introduction	309
Cellular Stress Response, Heat Shock Transcription Factor Biology, and the Vitagene Network	310

The Mitochondrial Theory of Aging	315
Hormesis	317
Conclusions and Future Directions	319
Acknowledgments	319
References	319

## 27. Inflammaging Signaling in Health Span and Life Span Regulation: Next Generation Targets for Longevity

ANTERO SALMINEN, ANU KAUPPINEN, KAI KAARNIRANTA

Introduction	323
Inflammaging	323
Signaling Network Controlling the Aging Process	324
Dietary Restriction and Extension of Life Span	326
Potential Targets for Anti-Aging Medicine	326
Magic Bullets without Potency	327
Conclusions	329
Acknowledgments	329
References	330

## 28. Trophokines: Novel Therapy for Senescence-Related Fibrosis

JAMES W. LARRICK, ANDREW MENDELSON, VIK SHARMA, JIANMING WANG, JEFF FANG, MANLEY HUANG, JOHN M. WAGES, SUSAN C. WRIGHT

Introduction	383
Potential Clinical Applications of Trophokines	334
Preclinical Progress with Therapeutic Trophokines	336
Summary: HGF-FC/MSP-FC Fusion Provides a Possible New Therapeutic Antifibrotic Agent	341
References	341

## 29. Frailty: A Basic and Clinical Challenge for the Future

CRISTINA ALONSO, MARTA CASTRO, LEOCADIO RODRIGUEZ-MAÑAS

Introduction	345
Challenges Raised by Frailty	346
References	353

**Index** 357
