

List of Contributors	vii
Preface	xi
Reviewers	xiii

Section I Components of Biological Systems

1. Proteomic Analysis of Cellular Systems	3
<i>Marco Y. Hein, Kirti Sharma, Jürgen Cox and Matthias Mann</i>	
2. The Coding and the Non-coding Transcriptome	27
<i>Roderic Guigó</i>	

Section II Network Properties of Biological Systems

3. Interactome Networks	45
<i>Anne-Ruxandra Carvunis, Frederick P. Roth, Michael A. Calderwood, Michael E. Cusick, Giulio Superti-Furga and Marc Vidal</i>	
4. Gene Regulatory Networks	65
<i>Martha L. Bulyk and A.J. Marian Walhout</i>	
5. Analyzing the Structure, Function and Information Flow in Signaling Networks using Quantitative Cellular Signatures	89
<i>Meghana M. Kulkarni and Norbert Perrimon</i>	

6. Genetic Networks	115
<i>Michael Costanzo, Anastasia Baryshnikova, Benjamin VanderSluis, Brenda Andrews, Chad L. Myers and Charles Boone</i>	

7. The Spatial Architecture of Chromosomes	137
<i>Job Dekker and Bas van Steensel</i>	

8. Chemogenomic Profiling: Understanding the Cellular Response to Drug	153
<i>Anna Y. Lee, Gary D. Bader, Corey Nislow and Guri Giaever</i>	

9. Graph Theory Properties of Cellular Networks	177
<i>Baruch Barzel, Amitabh Sharma and Albert-László Barabási</i>	

Section III Dynamic and Logical Properties of Biological Systems

10. Boolean Models of Cellular Signaling Networks	197
<i>Zhongyao Sun and Réka Albert</i>	

11. Transcriptional Network Logic: The Systems Biology of Development	211
<i>Isabelle S. Peter and Eric H. Davidson</i>	

12. Reconstruction of Genome-Scale Metabolic Networks	229	21. The Role of the Circadian System in Homeostasis	407
<i>Hooman Hefzi, Bernhard O. Palsson and Nathan E. Lewis</i>		<i>Anand Venkataraman, Heather Ballance and John B. Hogenesch</i>	
13. Genotype Networks and Evolutionary Innovations in Biological Systems	251	22. Biological and Quantitative Models for Stem Cell Self-Renewal and Differentiation	427
<i>Andreas Wagner</i>		<i>Huilei Xu, Dmitri Papatsenko, Avi Ma'ayan and Ihor Lemischka</i>	
14. Irreversible Transitions, Bistability and Checkpoint Controls in the Eukaryotic Cell Cycle: A Systems-Level Understanding	265	Section V	
<i>John J. Tyson and Béla Novák</i>		Multi-Scale Biological Systems, Health and Ecology	
15. Phenotypes and Design Principles in System Design Space	287	23. Systems Medicine and the Emergence of Proactive P4 Medicine: Predictive, Preventive, Personalized and Participatory	445
<i>Michael A. Savageau</i>		<i>Leroy Hood, Mauricio A. Flores, Kristin R. Brogaard and Nathan D. Price</i>	
16. System Biology of Cell Signaling	311	24. Cancer Systems Biology: A Robustness-Based Approach	469
<i>Chiara Mariottini and Ravi Iyengar</i>		<i>Hiroaki Kitano</i>	
17. Spatial Organization of Subcellular Systems	329	25. Systems Immunology: From Cells and Molecules to a Dynamic Multi-Scale System	481
<i>Malte Schmick, Hernán E. Grecco and Philippe I.H. Bastiaens</i>		<i>Mark M. Davis and Shai S. Shen-Orr</i>	
Section IV		26. Causal Inference and the Construction of Predictive Network Models in Biology	499
Systems and Biology		<i>Eric E. Schadt</i>	
18. Yeast Systems Biology: Towards a Systems Understanding of Regulation of Eukaryotic Networks in Complex Diseases and Biotechnology	343	27. Social Networks, Contagion Processes and the Spreading of Infectious Diseases	515
<i>Juan I. Castrillo, Pinar Pir and Stephen G. Oliver</i>		<i>Bruno Gonçalves, Nicola Perra and Alessandro Vespignani</i>	
19. Systems Biology of <i>Caenorhabditis elegans</i>	367		
<i>Andrew Fraser and Ben Lehner</i>			
20. <i>Arabidopsis</i> as a Model for Systems Biology	391		
<i>Philip N. Benfey and Ben Scheres</i>			
		Index	529
