

CONTENTS

<i>Preface</i>	vii
<i>Acknowledgements</i>	xi
1. Introduction	1
Objectives	1
1.1 Computers in Industrial Manufacturing	1
1.2 Design Process	2
1.3 Computer Aided Design (CAD)	13
1.4 Computer Aided Manufacturing (CAM)	14
1.5 Computer Integrated Manufacturing (CIM)	15
<i>Summary</i>	16
<i>Questions</i>	17
Part - I Hardware and Software Components	
2. CAD/CAM Hardware	21
Objectives	21
2.1 Basic Structure	21
2.2 Central Processing Unit (CPU)	22
2.3 Memory Types	25
2.4 Input Devices	28
2.5 Display Devices	32
2.6 Hard-Copy Devices	39
2.7 Storage Devices	41
2.8 Software	45
2.9 System Configuration	47
<i>Summary</i>	50
<i>Questions</i>	51
<i>Problems</i>	51

3. Computer Graphics**53**

Objectives 53

3.1 Raster-Scan Graphics 53

3.2 Coordinate Systems 59

3.3 Database Structures for Graphic Modelling 61

3.4 Engineering Data Management (EDM) System 66

3.5 Transformation of Geometry 70

3.6 3D Transformations 77

3.7 Mathematics of Projection 78

3.8 Clipping 80

3.9 Hidden Line/Surface Removal 83

3.10 Colour 86

3.11 Shading 87

Summary 90*Questions* 91*Problems* 92**Part - II Design of Industrial Products****4. Geometric Modelling****97**

Objectives 97

4.1 Requirements of Geometric Modelling 97

4.2 Geometric Models 99

4.3 Geometric Construction Methods 102

4.4 Constraint-Based Modelling 113

4.5 Other Modelling Methods 116

4.6 Wireframe Modelling 118

4.7 Curve Representation 122

4.8 Surface-Representation Methods 139

4.9 Solid-Representation Methods 152

4.10 Modelling Facilities Desired 164

4.11 Rapid Prototyping (RP) 168

Summary 176*Questions* 177*Problems* 179**5. CAD Standards****182**

Objectives 182

5.1 Standardisation in Graphics 182

5.2 Graphical Kernel System (GKS) 183

5.3 Other Graphic Standards 185

5.4 Exchange of Modelling Data	186
<i>Summary</i>	198
<i>Questions</i>	199
6. Introduction to a Drafting System	200
Objectives	200
6.1 Basic Facilities in Autocad	200
6.2 Basic Geometric Commands	205
6.3 Layers	209
6.4 Display Control Commands	210
6.5 Editing a Drawing	214
6.6 Dimensioning	218
<i>Summary</i>	219
<i>Questions</i>	220
7. Introduction to Modelling Systems	221
Objectives	221
7.1 Introduction	221
7.2 Constraint-Based Modelling	222
<i>Summary</i>	231
<i>Questions</i>	232
8. Finite Element Analysis	233
Objectives	233
8.1 Introduction	233
8.2 FEM Software	234
8.3 Stiffness Matrices	238
8.4 Truss and Beam Analysis	244
8.5 Beam Analysis	249
8.6 Plane Stress/Strain Analysis	252
<i>Summary</i>	255
<i>Questions</i>	255
<i>Problems</i>	255
 Part - III Manufacturing Aspects of Industrial Products	
9. Introduction to Computer Numerical Control	259
Objectives	259
9.1 Introduction	259
9.2 Numerical Control	260
9.3 Numerical Control Modes	263
9.4 Numerical Control Elements	264

- 16.6 Compilation Control Commands 485
- 16.7 Repetitive Programming 486
- 16.8 Complete Part Program in APT 494
- 16.9 CAM Systems 496
 - Summary* 511
 - Questions* 512
 - Problems* 512

Part - IV Role of Information Systems

- 17. Information Requirements of Manufacturing 515**
 - Objectives 517
 - 17.1 Discrete Part Manufacture 517
 - 17.2 Information Requirements of a Production Organisation 519
 - 17.3 Manufacturing Strategies 521
 - 17.4 Integration Requirements 522
 - Summary* 523
 - Questions* 523
- 18. Group Technology and Computer Aided Process Planning 524**
 - Objectives 524
 - 18.1 Group Technology 524
 - 18.2 Classification and Coding 528
 - 18.3 Production Flow Analysis 536
 - 18.4 Cellular Manufacturing 544
 - 18.5 Computer Aided Process Planning 549
 - 18.6 CAPP: Implementation Techniques 549
 - Summary* 554
 - Questions* 555
 - Problems* 556
- 19. Production Planning and Control 559**
 - Objectives 559
 - 19.1 Introduction 559
 - 19.2 Production Planning 560
 - 19.3 Capacity Planning 562
 - 19.4 Master Production Schedule 563
 - 19.5 Material Requirement Planning (MRP) 565
 - 19.6 Production Activity Control (PAC) 570
 - 19.7 Optimised Production Technology (OPT) 576
 - 19.8 Manufacturing Resource Planning (MRP II) 577
 - 19.9 Just In Time (JIT) 579

Summary 580
Questions 581

Part - V Integration of Manufacturing Systems

20. Communications	585
Objectives	585
20.1 Communication Methods	585
20.2 Direct Numerical Control	589
20.3 Communication Standards	596
<i>Summary</i>	599
<i>Questions</i>	600
21. Material-Handling Systems	601
Objectives	601
21.1 Introduction	602
21.2 Automatic Guided Vehicles (AGV)	603
21.3 Robots	612
21.4 Automated Storage and Retrieval System	648
<i>Summary</i>	655
<i>Questions</i>	656
22. Flexible Manufacturing Systems	659
Objectives	659
22.1 Introduction to FMS	660
22.2 FMS Equipment	662
22.3 Tool-Management Systems	666
22.4 System Layouts	674
22.5 FMS Control	674
22.6 Development of the Concept	680
22.7 FMS Case Study	685
<i>Summary</i>	690
<i>Questions</i>	691
23. Computer Aided Quality Control	693
Objectives	693
23.1 Introduction	693
23.2 Inspection and Testing	694
23.3 Coordinate Measuring Machine	695
23.4 Non-Contact Inspection Methods	701
23.5 Statistical Quality Control	702
23.6 Statistical Process Control (SPC)	706

Contents

23.7	Total Quality Management (TQM)	707	
23.8	Six Sigma	709	
23.9	Integration of CAQC with CAD and CAM	711	
	<i>Summary</i>	713	
	<i>Questions</i>	714	
24.	Computer Integrated Manufacturing		715
	<i>Objectives</i>	715	
24.1	Historical Background	715	
24.2	Integration	718	
24.3	CIM Implementation	720	
24.4	Benefits of CIM	726	
24.5	Lean Manufacturing	727	
	<i>Summary</i>	730	
	<i>Questions</i>	730	
	<i>Bibliography</i>		731
	<i>Glossary of Terms</i>		735
	<i>Standards Pertaining to CAM</i>		751
	<i>Internet Addresses</i>		755
	<i>Index</i>		759
