| About the Author | xv |
| Preface | xvii |
| 1 Basics | 1 |
| 1.1 Introduction | 1 |
| 1.2 Lift and Drag | 1 |
| 1.3 Monoplane Aircraft | 4 |
| 1.3.1 <i>Types of Monoplane</i> | 5 |
| 1.4 Biplane | 5 |
| 1.4.1 <i>Advantages and Disadvantages</i> | 6 |
| 1.5 Triplane | 6 |
| 1.5.1 <i>Chord of a Profile</i> | 7 |
| 1.5.2 <i>Chord of an Aerofoil</i> | 8 |
| 1.6 Aspect Ratio | 9 |
| 1.7 Camber | 10 |
| 1.8 Incidence | 11 |
| 1.9 Aerodynamic Force | 12 |
| 1.10 Scale Effect | 15 |
| 1.11 Force and Moment Coefficients | 17 |
| 1.12 The Boundary Layer | 18 |
| 1.13 Summary | 20 |
| Exercise Problems | 21 |
| Reference | 22 |
| 2 Essence of Fluid Mechanics | 23 |
| 2.1 Introduction | 23 |
| 2.2 Properties of Fluids | 23 |
| 2.2.1 <i>Pressure</i> | 23 |
| 2.2.2 <i>Temperature</i> | 24 |
| 2.2.3 <i>Density</i> | 24 |
| 2.2.4 <i>Viscosity</i> | 25 |
| 2.2.5 <i>Absolute Coefficient of Viscosity</i> | 25 |
| 2.2.6 <i>Kinematic Viscosity Coefficient</i> | 27 |
| 2.2.7 <i>Thermal Conductivity of Air</i> | 27 |
| 2.2.8 <i>Compressibility</i> | 28 |
| 2.3 Thermodynamic Properties | 28 |
| 2.3.1 <i>Specific Heat</i> | 28 |
| 2.3.2 <i>The Ratio of Specific Heats</i> | 29 |

| | | |
|----------|--|------------|
| 2.4 | Surface Tension | 30 |
| 2.5 | Analysis of Fluid Flow | 31 |
| | 2.5.1 <i>Local and Material Rates of Change</i> | 32 |
| | 2.5.2 <i>Graphical Description of Fluid Motion</i> | 33 |
| 2.6 | Basic and Subsidiary Laws | 34 |
| | 2.6.1 <i>System and Control Volume</i> | 34 |
| | 2.6.2 <i>Integral and Differential Analysis</i> | 35 |
| | 2.6.3 <i>State Equation</i> | 35 |
| 2.7 | Kinematics of Fluid Flow | 35 |
| | 2.7.1 <i>Boundary Layer Thickness</i> | 37 |
| | 2.7.2 <i>Displacement Thickness</i> | 38 |
| | 2.7.3 <i>Transition Point</i> | 39 |
| | 2.7.4 <i>Separation Point</i> | 39 |
| | 2.7.5 <i>Rotational and Irrotational Motion</i> | 40 |
| 2.8 | Streamlines | 41 |
| | 2.8.1 <i>Relationship between Stream Function and Velocity Potential</i> | 41 |
| 2.9 | Potential Flow | 42 |
| | 2.9.1 <i>Two-dimensional Source and Sink</i> | 43 |
| | 2.9.2 <i>Simple Vortex</i> | 45 |
| | 2.9.3 <i>Source-Sink Pair</i> | 46 |
| | 2.9.4 <i>Doublet</i> | 46 |
| 2.10 | Combination of Simple Flows | 49 |
| | 2.10.1 <i>Flow Past a Half-Body</i> | 49 |
| 2.11 | Flow Past a Circular Cylinder without Circulation | 57 |
| | 2.11.1 <i>Flow Past a Circular Cylinder with Circulation</i> | 59 |
| 2.12 | Viscous Flows | 63 |
| | 2.12.1 <i>Drag of Bodies</i> | 65 |
| | 2.12.2 <i>Turbulence</i> | 70 |
| | 2.12.3 <i>Flow through Pipes</i> | 75 |
| 2.13 | Compressible Flows | 78 |
| | 2.13.1 <i>Perfect Gas</i> | 79 |
| | 2.13.2 <i>Velocity of Sound</i> | 80 |
| | 2.13.3 <i>Mach Number</i> | 80 |
| | 2.13.4 <i>Flow with Area Change</i> | 80 |
| | 2.13.5 <i>Normal Shock Relations</i> | 82 |
| | 2.13.6 <i>Oblique Shock Relations</i> | 83 |
| | 2.13.7 <i>Flow with Friction</i> | 84 |
| | 2.13.8 <i>Flow with Simple T_0-Change</i> | 86 |
| 2.14 | Summary | 87 |
| | Exercise Problems | 97 |
| | References | 102 |
| 3 | Conformal Transformation | 103 |
| | 3.1 Introduction | 103 |
| | 3.2 Basic Principles | 103 |
| | 3.2.1 <i>Length Ratios between the Corresponding Elements in the Physical and Transformed Planes</i> | 106 |
| | 3.2.2 <i>Velocity Ratios between the Corresponding Elements in the Physical and Transformed Planes</i> | 106 |
| | 3.2.3 <i>Singularities</i> | 107 |

| | | |
|----------|---|------------|
| 3.3 | Complex Numbers | 107 |
| 3.3.1 | <i>Differentiation of a Complex Function</i> | 110 |
| 3.4 | Summary | 112 |
| | Exercise Problems | 113 |
| 4 | Transformation of Flow Pattern | 115 |
| 4.1 | Introduction | 115 |
| 4.2 | Methods for Performing Transformation | 115 |
| 4.2.1 | <i>By Analytical Means</i> | 116 |
| 4.3 | Examples of Simple Transformation | 119 |
| 4.4 | Kutta–Joukowski Transformation | 122 |
| 4.5 | Transformation of Circle to Straight Line | 123 |
| 4.6 | Transformation of Circle to Ellipse | 124 |
| 4.7 | Transformation of Circle to Symmetrical Aerofoil | 125 |
| 4.7.1 | <i>Thickness to Chord Ratio of Symmetrical Aerofoil</i> | 127 |
| 4.7.2 | <i>Shape of the Trailing Edge</i> | 129 |
| 4.8 | Transformation of a Circle to a Cambered Aerofoil | 129 |
| 4.8.1 | <i>Thickness-to-Chord Ratio of the Cambered Aerofoil</i> | 132 |
| 4.8.2 | <i>Camber</i> | 134 |
| 4.9 | Transformation of Circle to Circular Arc | 134 |
| 4.9.1 | <i>Camber of Circular Arc</i> | 137 |
| 4.10 | Joukowski Hypothesis | 137 |
| 4.10.1 | <i>The Kutta Condition Applied to Aerofoils</i> | 139 |
| 4.10.2 | <i>The Kutta Condition in Aerodynamics</i> | 140 |
| 4.11 | Lift of Joukowski Aerofoil Section | 141 |
| 4.12 | The Velocity and Pressure Distributions on the Joukowski Aerofoil | 144 |
| 4.13 | The Exact Joukowski Transformation Process and Its Numerical Solution | 146 |
| 4.14 | The Velocity and Pressure Distribution | 147 |
| 4.15 | Aerofoil Characteristics | 155 |
| 4.15.1 | <i>Parameters Governing the Aerodynamic Forces</i> | 157 |
| 4.16 | Aerofoil Geometry | 157 |
| 4.16.1 | <i>Aerofoil Nomenclature</i> | 157 |
| 4.16.2 | <i>NASA Aerofoils</i> | 161 |
| 4.16.3 | <i>Leading-Edge Radius and Chord Line</i> | 161 |
| 4.16.4 | <i>Mean Camber Line</i> | 161 |
| 4.16.5 | <i>Thickness Distribution</i> | 162 |
| 4.16.6 | <i>Trailing-Edge Angle</i> | 162 |
| 4.17 | Wing Geometrical Parameters | 162 |
| 4.18 | Aerodynamic Force and Moment Coefficients | 166 |
| 4.18.1 | <i>Moment Coefficient</i> | 169 |
| 4.19 | Summary | 171 |
| | Exercise Problems | 180 |
| | Reference | 181 |
| 5 | Vortex Theory | 183 |
| 5.1 | Introduction | 183 |
| 5.2 | Vorticity Equation in Rectangular Coordinates | 184 |
| 5.2.1 | <i>Vorticity Equation in Polar Coordinates</i> | 186 |

| | | |
|----------|---|------------|
| 5.3 | Circulation | 188 |
| 5.4 | Line (point) Vortex | 192 |
| 5.5 | Laws of Vortex Motion | 194 |
| 5.6 | Helmholtz's Theorems | 195 |
| 5.7 | Vortex Theorems | 196 |
| | 5.7.1 <i>Stoke's Theorem</i> | 200 |
| 5.8 | Calculation of u_R , the Velocity due to Rotational Flow | 204 |
| 5.9 | Biot-Savart Law | 207 |
| | 5.9.1 <i>A Linear Vortex of Finite Length</i> | 210 |
| | 5.9.2 <i>Semi-Infinite Vortex</i> | 211 |
| | 5.9.3 <i>Infinite Vortex</i> | 211 |
| | 5.9.4 <i>Helmholtz's Second Vortex Theorem</i> | 216 |
| | 5.9.5 <i>Helmholtz's Third Vortex Theorem</i> | 220 |
| | 5.9.6 <i>Helmholtz's Fourth Vortex Theorem</i> | 220 |
| 5.10 | Vortex Motion | 220 |
| 5.11 | Forced Vortex | 223 |
| 5.12 | Free Vortex | 224 |
| | 5.12.1 <i>Free Spiral Vortex</i> | 226 |
| 5.13 | Compound Vortex | 229 |
| 5.14 | Physical Meaning of Circulation | 230 |
| 5.15 | Rectilinear Vortices | 235 |
| | 5.15.1 <i>Circular Vortex</i> | 236 |
| 5.16 | Velocity Distribution | 237 |
| 5.17 | Size of a Circular Vortex | 239 |
| 5.18 | Point Rectilinear Vortex | 239 |
| 5.19 | Vortex Pair | 240 |
| 5.20 | Image of a Vortex in a Plane | 241 |
| 5.21 | Vortex between Parallel Plates | 242 |
| 5.22 | Force on a Vortex | 244 |
| 5.23 | Mutual action of Two Vortices | 244 |
| 5.24 | Energy due to a Pair of Vortices | 244 |
| 5.25 | Line Vortex | 247 |
| 5.26 | Summary | 248 |
| | Exercise Problems | 254 |
| | References | 256 |
| 6 | Thin Aerofoil Theory | 257 |
| 6.1 | Introduction | 257 |
| 6.2 | General Thin Aerofoil Theory | 258 |
| 6.3 | Solution of the General Equation | 261 |
| | 6.3.1 <i>Thin Symmetrical Flat Plate Aerofoil</i> | 262 |
| | 6.3.2 <i>The Aerodynamic Coefficients for a Flat Plate</i> | 265 |
| 6.4 | The Circular Arc Aerofoil | 269 |
| | 6.4.1 <i>Lift, Pitching Moment, and the Center of Pressure Location for Circular Arc Aerofoil</i> | 271 |
| 6.5 | The General Thin Aerofoil Section | 275 |
| 6.6 | Lift, Pitching Moment and Center of Pressure Coefficients for a Thin Aerofoil | 278 |
| 6.7 | Flapped Aerofoil | 283 |
| | 6.7.1 <i>Hinge Moment Coefficient</i> | 286 |

| | | |
|----------|--|------------|
| 6.7.2 | <i>Jet Flap</i> | 288 |
| 6.7.3 | <i>Effect of Operating a Flap</i> | 288 |
| 6.8 | Summary | 289 |
| | Exercise Problems | 294 |
| | References | 295 |
| 7 | Panel Method | 297 |
| 7.1 | Introduction | 297 |
| 7.2 | Source Panel Method | 297 |
| 7.2.1 | <i>Coefficient of Pressure</i> | 300 |
| 7.3 | The Vortex Panel Method | 302 |
| 7.3.1 | <i>Application of Vortex Panel Method</i> | 302 |
| 7.4 | Pressure Distribution around a Circular Cylinder by Source Panel Method | 305 |
| 7.5 | Using Panel Methods | 309 |
| 7.5.1 | <i>Limitations of Panel Method</i> | 309 |
| 7.5.2 | <i>Advanced Panel Methods</i> | 309 |
| 7.6 | Summary | 329 |
| | Exercise Problems | 330 |
| | Reference | 330 |
| 8 | Finite Aerofoil Theory | 331 |
| 8.1 | Introduction | 331 |
| 8.2 | Relationship between Spanwise Loading and Trailing Vorticity | 331 |
| 8.3 | Downwash | 332 |
| 8.4 | Characteristics of a Simple Symmetrical Loading – Elliptic Distribution | 335 |
| 8.4.1 | <i>Lift for an Elliptic Distribution</i> | 336 |
| 8.4.2 | <i>Downwash for an Elliptic Distribution</i> | 336 |
| 8.4.3 | <i>Drag D_v due to Downwash for Elliptical Distribution</i> | 338 |
| 8.5 | Aerofoil Characteristic with a More General Distribution | 339 |
| 8.5.1 | <i>The Downwash for Modified Elliptic Loading</i> | 341 |
| 8.6 | The Vortex Drag for Modified Loading | 343 |
| 8.6.1 | <i>Condition for Vortex Drag Minimum</i> | 345 |
| 8.7 | Lancaster – Prandtl Lifting Line Theory | 347 |
| 8.7.1 | <i>The Lift</i> | 349 |
| 8.7.2 | <i>Induced Drag</i> | 350 |
| 8.8 | Effect of Downwash on Incidence | 353 |
| 8.9 | The Integral Equation for the Circulation | 355 |
| 8.10 | Elliptic Loading | 356 |
| 8.10.1 | <i>Lift and Drag for Elliptical Loading</i> | 357 |
| 8.10.2 | <i>Lift Curve Slope for Elliptical Loading</i> | 359 |
| 8.10.3 | <i>Change of Aspect Ratio with Incidence</i> | 359 |
| 8.10.4 | <i>Problem II</i> | 360 |
| 8.10.5 | <i>The Lift for Elliptic Loading</i> | 363 |
| 8.10.6 | <i>The Downwash Velocity for Elliptic Loading</i> | 366 |
| 8.10.7 | <i>The Induced Drag for Elliptic Loading</i> | 366 |
| 8.10.8 | <i>Induced Drag Minimum</i> | 369 |
| 8.10.9 | <i>Lift and Drag Calculation by Impulse Method</i> | 370 |

| | | |
|----------|---|------------|
| 8.10.10 | <i>The Rectangular Aerofoil</i> | 371 |
| 8.10.11 | <i>Cylindrical Rectangular Aerofoil</i> | 372 |
| 8.11 | Aerodynamic Characteristics of Asymmetric Loading | 372 |
| 8.11.1 | <i>Lift on the Aerofoil</i> | 372 |
| 8.11.2 | <i>Downwash</i> | 372 |
| 8.11.3 | <i>Vortex Drag</i> | 373 |
| 8.11.4 | <i>Rolling Moment</i> | 374 |
| 8.11.5 | <i>Yawing Moment</i> | 376 |
| 8.12 | Lifting Surface Theory | 378 |
| 8.12.1 | <i>Velocity Induced by a Lifting Line Element</i> | 378 |
| 8.12.2 | <i>Munk's Theorem of Stagger</i> | 381 |
| 8.12.3 | <i>The Induced Lift</i> | 382 |
| 8.12.4 | <i>Blenk's Method</i> | 383 |
| 8.12.5 | <i>Rectangular Aerofoil</i> | 384 |
| 8.12.6 | <i>Calculation of the Downwash Velocity</i> | 385 |
| 8.13 | Aerofoils of Small Aspect Ratio | 387 |
| 8.13.1 | <i>The Integral Equation</i> | 388 |
| 8.13.2 | <i>Zero Aspect Ratio</i> | 390 |
| 8.13.3 | <i>The Acceleration Potential</i> | 390 |
| 8.14 | Lifting Surface | 391 |
| 8.15 | Summary | 394 |
| | Exercise Problems | 401 |
| 9 | Compressible Flows | 405 |
| 9.1 | Introduction | 405 |
| 9.2 | Thermodynamics of Compressible Flows | 405 |
| 9.3 | Isentropic Flow | 409 |
| 9.4 | Discharge from a Reservoir | 411 |
| 9.5 | Compressible Flow Equations | 413 |
| 9.6 | Crocco's Theorem | 414 |
| 9.6.1 | <i>Basic Solutions of Laplace's Equation</i> | 418 |
| 9.7 | The General Potential Equation for Three-Dimensional Flow | 418 |
| 9.8 | Linearization of the Potential Equation | 420 |
| 9.8.1 | <i>Small Perturbation Theory</i> | 420 |
| 9.9 | Potential Equation for Bodies of Revolution | 423 |
| 9.9.1 | <i>Solution of Nonlinear Potential Equation</i> | 425 |
| 9.10 | Boundary Conditions | 425 |
