Contents at a Glance	xiii
Introduction	xxvii
Part I: Getting Started with Adobe Photoshop CC	1
Chapter 1: Introducing Adobe Photoshop CC	3
Discovering the Versatile World of Photoshop	3
Introducing Photoshop Creative Cloud Interaction	4
Knowing when to use Photoshop	5
Understanding the limitations of Photoshop	6
Looking at What's New in Photoshop CC	6
Summary	12
Chapter 2: Exploring the Photoshop Workspace	13
Touring the Workspace	13
Introducing Creative Cloud Synchronization	14
Cruising the Photoshop menu bar	15
Looking at the document workspace	16
Changing the view size of a document	16
Viewing document information	18
Arranging the view of multiple documents	20
Understanding the Toolbox and tool options bar	23
Understanding panels	23
Using workspace presets	25
Exploring the Photoshop Menu Bar	26
Using the File menu	26
Exploring the Edit menu	26
Using the Image menu	28
Ruler Tool	29
Count Tool	29
Record Measurements	30

Set Measurement Scale	30
Select Data Points.....	31
Place Scale Marker	31
Understanding the Layer menu.....	32
Examining the Type menu.....	33
Using the Select menu.....	34
Exploring the Filter menu	35
Understanding the 3D menu	36
Using the View menu.....	36
Proof Options.....	37
Extras and Show	37
Rulers.....	39
Snap and Snap To	39
New Guide, Lock Guides, and Clear Guides	40
Lock Slices and Clear Slices	40
Exploring the Window menu	40
Using the Help menu	40
Photoshop Help.....	41
Sign In/Sign Out.....	42
Exploring Panels.....	42
Understanding the Tools in the Toolbox	45
Configuring Presets	49
Selecting tool presets.....	49
Managing presets.....	51
Creating presets	52
Setting Preferences	54
Updating General preferences	55
Arranging Interface preferences	59
Configuring Sync Settings preferences	61
Setting File Handling preferences	63
Adjusting Performance preferences	65
Configuring Cursors preferences	68
Setting Transparency and Gamut preferences	69
Using Units and Rulers preferences	70
Adjusting Guides, Grid, and Slices preferences	71
Configuring Plug-Ins preferences	73
Setting Type preferences	73
Adjusting 3D preferences.....	74
Customizing Shortcuts and Menus.....	74
Customizing menus	75
Customizing shortcuts.....	76
Summary	79
Chapter 3: Performing Image Basics	81
Exploring File Types	81
Understanding compressed versus uncompressed file formats	82
Using raster versus vector	82
Introducing HDR images	83

Understanding image files	83
Photoshop (*.PSD; *.PDD).....	83
Tagged Image File Format (*.TIF; *.TIFF)	84
Joint Photographic Experts Group (*.JPG; *.JPEG; *.JPE)	84
JPEG 2000 (*.JP2; *.JPX)	84
CompuServe GIF (*.GIF).....	84
Portable Network Graphics (*.PNG)	85
Bitmap (*.BMP; *.RLE; *.DIB)	85
RAW (*.RAW; *.CR; *.CR2; *.DNG; and several others).....	85
Portable Bitmap (*.PBM; *.PGM; *.PPM; *.PNM; *.PFM; *.PAM)	86
Wireless Bitmap (*.WBM; *.WBMP)	86
Encapsulated PostScript (*.EPS; *.AI3; *.AI8; *.PS; *.EPSP; *.EPSF)	86
Photoshop PDF (*.PDF; *.PDP)	87
Personal Computer eXchange (*.PCX)	87
PICT (*.PCT; *.PICT)	87
Pixar (*.PXR)	87
Flash XML Graphics (*.FXG).....	88
Google Earth 4 (*.KMZ)	88
Photoshop Big (*.PSB).....	88
OpenEXR (*.EXR).....	88
Cineon (*.CIN).....	88
Interchange File Format (*.IFF; *.TDI).....	89
Scitex CT (*.SCT)	89
Targa (*.TGA; *.VDA; *.ICB; *.VST)	89
Radiance (*.HDR; *.RGBE; *.XYZE)	89
Understanding video files	89
Supporting 3-D file formats.....	90
Supporting the DICOM file format.....	91
Creating and Opening Images.....	91
Creating a new image.....	91
Opening an existing image	93
Opening an existing image as a specific file type.....	94
Resizing Files and Adjusting Resolution.....	97
Understanding resolution	97
Changing the image size and resolution	97
Understanding the resolution and size relationship.....	98
Understanding resizing algorithms in Photoshop	98
Adjusting the image size and resolution.....	99
Changing the canvas size	101
Cropping and Straightening Images	102
Using general guidelines for cropping a photo	103
Getting rid of background clutter.....	103
Preserving aspect ratio.....	103
Applying the rule of thirds	103
Giving your subject somewhere to go	104
Closing in on your subject	105
Telling a story with a photo	106

Cropping an image.....	106
Using the Crop tool	107
Cropping an image to a different perspective	110
Cropping using the Selection tools.....	110
Straightening an image.....	111
Rotating and flipping images.....	111
Rotating while cropping.....	112
Using the Crop and Straighten tool	112
Using the Ruler tool.....	114
Trimming a border.....	115
Summary	116

Chapter 4: Understanding Colors, Histograms, Levels, and Curves 117

Knowing Color Basics	117
Understanding color.....	117
Looking at color, intensity, and the human eye	118
Understanding Channels and Levels	118
Adjusting with Histograms.....	119
Understanding histograms	119
Determining overexposure and underexposure in an image	120
Determining color balance in an image.....	121
Using the Histogram panel	122
Setting Histogram panel options	123
Selecting channels	123
Selecting a source.....	125
Understanding statistics	125
Adjusting images with the histogram tools	127
Using the handles to adjust the histogram.....	127
Using the eyedroppers to adjust the histogram	129
Adjusting levels with the Curves tool	129
Understanding curves	130
Using the Curves tool	131
Working in Different Color Modes	133
Understanding the different color modes	133
Bitmap.....	134
Grayscale.....	135
Duotone.....	136
Indexed color	137
RGB color	138
CMYK color	139
Lab color	139
Multichannel.....	139
Learning about bits per channel.....	140
Choosing Colors	141
Choosing colors with the Color Picker tool	141
Using the Color panel.....	143
Using the Swatches panel.....	145
Selecting color from an image with the Eyedropper tool	146

Understanding the Color Sampler tool	148
Using the HUD Color Picker	148
Summary	149
Chapter 5: Applying History and Actions	151
Understanding the Non-Destructive Features in Photoshop	151
Using the History Panel	153
Understanding the History panel.....	154
Configuring the History panel	154
Navigating through history states	156
Using snapshots	156
Creating documents.....	156
Deleting history.....	157
Painting from history	157
Using the Eraser tool in the History panel	158
Using the History Brush	160
Working with the Art History Brush	160
Using selections when painting history	160
Creating and Using Automated Actions.....	161
Understanding the Actions panel	161
Loading existing action sets	164
Creating custom actions	164
Editing actions	166
Applying a stop.....	166
Adding conditional actions.....	166
Inserting operations.....	167
Moving operations.....	167
Duplicating actions and operations.....	167
Modifying operations.....	168
Deleting an operation	168
Modifying the action name and function key	169
Saving actions.....	169
Adjusting action settings temporarily by using the toggle boxes	169
Playing actions	169
Managing the action list	169
Summary	170
Chapter 6: Using Bridge to Organize and Process Files	171
Working in the Bridge Workspaces.....	171
Examining the Bridge interface	171
Main menu	172
Toolbar.....	173
Window panes	174
Content view controls.....	175
Using the Bridge workspaces	176
Organizing Files in Bridge	177
Importing images from cameras and card readers	177
Get Photos From	177
Location	177

Create Subfolder(s).....	179
Rename Files	179
Open Adobe Bridge	179
Convert to DNG	180
Delete Original Files	181
Save Copies To.....	181
Apply Metadata.....	182
Working with image metadata.....	182
Assigning ratings and labels to files	184
Assigning keywords to files	185
Adding an existing keyword to a file.....	185
Adding a new keyword.....	185
Finding a keyword in the list.....	186
Renaming and deleting keywords.....	186
Renaming files.....	186
Finding files.....	188
Locating files using the Filter panel	188
Tracking files using the Find tool	189
Viewing files using the Review Mode utility.....	190
Using collections.....	191
Creating collections	191
Creating smart collections.....	191
Creating stacks	192
Deleting versus rejecting files	193
Processing Images Using Bridge and Photoshop	194
Opening images in Photoshop.....	194
Placing images in Photoshop.....	194
Loading files as Photoshop layers.....	194
Opening in Camera Raw	195
Processing Multiple Files Using the Batch Interface	195
Using the Image Processor Interface.....	196
Merging photos.....	197
Using Photoshop Photomerge.....	198
Using Photoshop Merge to HDR	198
Auto-merging images into HDR and panoramic images.....	199
Using the Mini Bridge Extension in Photoshop	200
Summary	202

Part II: Working with Camera Raw Images

203

Chapter 7: Exploring Camera Raw Basics 205

Looking at Camera Raw Benefits	206
Keeping original CMOS information	206
Editing non-destructively.....	207
Saving time	209
Understanding Camera Raw File Types.....	210
Creating an XMP sidebar file	210
Converting RAW formats to DNG files	210

Opening Images in Camera Raw	211
Getting to Know the Camera Raw Workspace	212
Changing Your Workflow Options	214
Setting the color space	214
Choosing your intent	215
Choosing a bit depth	216
Adjusting image size	216
Setting the resolution	217
Applying output sharpening	217
Opening images as Smart Objects	218
Setting Preferences	218
Saving images	218
Changing image settings	219
Applying sharpening	220
Changing the default image settings	220
Modifying the Camera Raw cache	221
Handling DNG files	221
Handling JPEG and TIFF file formats	221
Using the Camera Raw Panel Menu	222
Creating Snapshots	224
Saving Presets	225
Exporting Camera Raw Files	227
Summary	228

Chapter 8: Processing Photos with Camera Raw 229

Getting to Know the Camera Raw Tools	229
Synchronizing Adjustments in Multiple RAW Images	233
Adjusting the White Balance	235
Using the White Balance tool	237
Changing the lighting settings	238
Using the Temperature and Tint sliders	238
Correcting Lighting	239
Adjusting Color and Clarity	244
Tweaking clarity, vibrance, and saturation	244
Adjusting the Tone Curve	245
The Parametric tab	246
The Point tab	248
Adjusting hue, saturation, and luminance	251
Hue adjustments	252
Saturation adjustments	252
Luminance adjustments	253
Creating a grayscale photo	253
Using Split Toning	254
Correcting and Retouching	255
Cloning and spot removal	256
Removing red-eye	258
Using the Adjustment Brush	259
Setting the Mask options	260
Using the pins	260

Setting the Brush options	261
Setting the Adjustment options	261
Creating a Graduated Filter	264
Creating a Radial Filter	267
Creating Artistic Effects	269
Adding grain to your image	269
Adding a vignette	270
Correcting Camera Quirks	271
Making lens corrections	271
Setting camera calibration	272
Reducing Noise and Adjusting Sharpness	273
Reducing noise	274
Sharpening	275
Summary	276

Part III: Working with Selections, Layers, and Channels

277

Chapter 9: Creating Selections. 279

Getting Familiar with the Select Menu	279
Using the Selection Tools	282
Exploring the Marquee tools	282
Using the Rectangular Marquee tool	285
Using the Elliptical Marquee tool	285
Looking at the Lasso tools	286
Using the Lasso tool	287
Working with the Polygonal Lasso tool	288
Using the Magnetic Lasso tool	290
Examining the Quick Selection tools	292
Looking at the Quick Selection tool	292
Working with the Quick Selection tool	293
Looking at the Magic Wand tool	295
Working with the Magic Wand tool	296
Refining Your Selection	298
Adjusting a selection	298
Using the selection tools	298
Transforming a selection	299
Using paths	300
Using Quick Mask mode	302
Refining the edges	306
Changing your View Mode	307
Using the Edge Detection options	308
Adjusting edges	312
Choosing Output settings	313
Using the Color Range Selector	314
Summary	317

Chapter 10: Learning All About Layers	319
Introducing Layers.....	320
Understanding multiple layers	320
Adding new layers	322
Adding another document as a new layer	322
Adding text or shapes as a new layer.....	323
Creating selections to make a new layer	323
Using the Layer Menus	324
Getting to know the Layer menu.....	324
Getting to know the Layers panel menu	327
Looking at the Layers Panel	329
Filtering layers.....	330
Changing the Opacity and Fill settings.....	332
Changing the lock settings.....	333
Blending modes	334
Choosing Normal and Dissolve blending modes	334
Using darkening blending modes.....	335
Using lightening blending modes.....	336
Adding contrast blending modes	336
Using difference blending modes.....	337
Looking at the color blending modes	338
Blending images using blending modes	338
Linking layers.....	340
Creating layer styles, layer masks, and fill and adjustment layers	341
Grouping layers	341
Creating a blank layer	342
Throwing layers away.....	342
Applying Worry-Free Fill and Adjustment Layers	342
Choosing a fill or adjustment layer.....	343
Learning the basics of fill layers.....	343
Learning the basics of adjustment layers	345
Editing the properties of a fill or adjustment layer.....	347
Creating Layer Style Special Effects	347
Choosing a layer style	348
Adjusting layer style options.....	350
Creating a separate layer from a layer style	351
Creating Smart Objects	352
Converting a layer to a Smart Object.....	353
Adding Smart Filters	354
Making changes to Smart Filters	354
Manipulating Layer Masks	357
Creating masks	357
Using the Add layer mask icon.....	357
Using the Refine Edge dialog box	358
Creating type masks	359
Looking at clipping masks	359

Editing masks	361
Making changes to a mask by painting on the image	361
Editing masks using the Channels panel	362
Editing masks using the Properties panel	364
Unlinking and moving masks	365
Creating Layer Comps.....	367
Merging Layers.....	368
Summary	370
Chapter 11: Exploring Channels	371
Understanding Color Channels	371
Using the Channel Mixer.....	373
Mixing colors with the Channel Mixer.....	374
Swapping colors	375
Converting color to grayscale.....	377
Using the Channels Panel	380
Selecting channels	381
Deleting channels	382
Duplicating channels.....	382
Splitting and merging channels	383
Sharing channels between images.....	385
Making Channel Selections	386
Understanding the Alpha Channel	389
Creating alpha channels	390
Loading selections from alpha channels	390
Modifying alpha channels.....	391
Understanding alpha channels versus layer masks	391
Changing the channel options for alpha channels	392
Using Spot Color Channels.....	394
Creating a spot color channel	394
Merging spot color channels	397
Removing ink overlap using spot color channels.....	397
Summary	398
Part IV: Enhancing, Correcting, and Retouching Images	399
Chapter 12: Optimizing Adjustment Workflow	401
Understanding Workflow	401
Making Auto Adjustments.....	403
Creating Adjustment Layers	405
Making Adjustments Using the Properties Panel.....	409
Summary	410
Chapter 13: Making Lighting and Color Adjustments	411
Applying Quick Adjustments to Light and Color.....	412
Adjusting brightness and contrast versus exposure	412
Using the Brightness/Contrast tool to adjust lighting	413
Using the Exposure tool to adjust lighting.....	413

Changing the color balance	417
Making selective color adjustments.....	420
Applying Photo Filter to images	423
Replacing specific colors	425
Using the Variations tool	429
Changing the shadows and highlights in images	431
Fixing shadows	431
Fixing highlights.....	432
Adjusting after shadows or highlights are corrected.....	432
Creating customized black-and-white photos.....	434
Fine-Tuning Hue and Saturation.....	435
Using the Hue/Saturation tool	436
Adjusting the hue and saturation to make colors pop	439
Adjusting Levels.....	442
Using the Levels adjustment tool	443
Configuring the Auto Levels adjustment.....	446
Adjusting levels to increase detail in images	448
Making Adjustments with Curves.....	451
Using the Curves tool.....	451
Configuring the Curves tool.....	456
Configuring the Auto Curves tool.....	457
Adjusting the curve to correct color and contrast in images.....	457
Using the Match Color Tool to Change Colors	461
Doing It All with the Camera Raw Filter.....	464
Working with HDR Images	466
Creating HDR images	467
Converting HDR images to 8 bits per channel.....	471
Summary	474

Chapter 14: Applying Sharpness, Blur, and Noise Adjustments 475

Using Sharpening Filters to Sharpen Images.....	475
Understanding basic sharpening filters.....	476
Using the Unsharp Mask filter.....	481
Applying Smart Sharpen.....	483
Using Blur Filters to Soften Images	487
Understanding the automatic blur filters.....	487
Using the Gaussian, Box, and Shape Blur filters.....	487
Gaussian Blur.....	488
Box Blur	489
Shape Blur	490
Creating a direction blur.....	491
Adding a Motion Blur to an image.....	491
Adding a Radial Blur to an image	494
Adding a Surface Blur	494
Applying a Smart Blur.....	495
Faking Lens Blur.....	496
Preview	496
Depth Map.....	497
Iris	497

Specular Highlights	498
Noise	498
Introducing the Blur Gallery	498
Using the Blur Gallery Options bar	499
Using the on-image controls.....	500
Applying a Field Blur.....	504
Adding an Iris Blur	506
Applying a Tilt-Shift Blur	508
Adding blur effects in the Blur Lab	509
Reducing Noise in an Image.....	510
Using the Despeckle filter	511
Applying a Median filter.....	511
Reducing dust and scratches.....	512
Reducing noise	513
Adding noise	515
Removing Camera-Shake Blurring from an Image.....	515
Summary	519
Chapter 15: Cleaning Up Digital Images with Cloning and Healing Tools	521
Using the Healing Brush Tools	521
Using the Spot Healing Brush	523
Proximity Match.....	523
Create Texture	523
Content-Aware	524
Using the Healing Brush.....	529
Fixing larger blemishes with the Patch tool	533
Using the Content-Aware fill.....	536
Using the Remix tool.....	538
Fixing red-eye.....	542
Using the Clone Stamp Tool.....	542
Looking over the Clone Stamp options	543
Learning the basics of cloning	545
Utilizing the Clone Source panel	548
Using the Clone and Healing Brushes Together for Optimal Effect	553
Fixing damaged photos	553
Swapping faces with multiple images.....	556
Summary	561
 Part V: Using Paint, Paths, Shapes, and Text Tools	 563
Chapter 16: Editing with Paintbrush Tools	565
Painting in Photoshop.....	565
Understanding the Painting Tools.....	566
Working with painting tools in blending modes.....	567
Choosing a basic blending mode option.....	567
Applying a darkening blending mode	567
Selecting a lightening blending mode.....	568
Adding contrast blending modes	568

Blending two layers	569
Finishing with a color blending mode	570
Applying color with painting tools	570
Painting with editing tools	575
Making quick fixes with the healing tools	575
Choosing a Stamp tool to replace pixels	575
Using history tools	576
Choosing an eraser tool	576
Selecting the right Sharpen, Blur, or Smudge tool	579
Choosing a Dodge, Burn, or Sponge tool	580
Painting with mixing tools	583
Using the Brush Panel	586
Selecting the brush tip shape	586
Selecting flat brush shapes	587
Choosing bristle brush shapes	588
Selecting erodible tip brush shapes	591
Selecting airbrush shapes	593
Setting the brush behavior	595
Configuring the Shape Dynamics settings	595
Creating a scattering effect	597
Applying a texture effect	598
Applying dual brush strokes	600
Painting with multiple colors simultaneously	600
Controlling the brush stroke with the Transfer option	601
Using the Brush Presets panel	602
Painting with Non-Brush Painting Tools	603
Applying paint to layers	604
Filling a selection with a color or pattern	606
Applying a gradient fill	608
Creating custom gradients	609
Applying Painting Techniques	610
Painting from a blank canvas	611
Tracing edges from an existing image	615
Using wet paint on an existing image	615
Summary	617

Chapter 17: Working with Paths and Vector Shapes 619

Understanding Paths	619
Building path components	620
Defining types of paths	622
Exploring the Vector Path	623
Using the Pen tools	623
Pen tools	624
Pen tool options	627
Using the Path Selection tools	634
Path Selection tools	634
Path Selection tool options	635
Understanding the Paths panel	636
Applying the Free Transform Option to paths	638

Exploring Paths	643
Creating a path	643
Converting paths to vector shapes	646
Creating a clipping mask	647
Creating vector masks	649
Using Vector Shape Tools	650
Working with vector shape tools.....	651
Rectangle tool	652
Rounded Rectangle tool	653
Ellipse tool.....	653
Polygon tool.....	653
Custom Shape tool	654
Adding vector shape layers.....	655
Adding custom vector shapes	657
Editing a vector shape	659
Summary	660
Chapter 18: Working with Text	661
Learning a Little Bit About Text.....	661
Using the Text Tools to Add Text to Images	662
Setting type preferences	662
Using the text tools to add text	663
Adding text as a point type	666
Adding text as a paragraph type.....	666
Editing vector text layers	668
Edit Type	668
Check Spelling	669
Find and Replace Text	669
Rasterize Type	669
Create Work Path	670
Convert to Shape.....	671
Horizontal and Vertical options	671
Anti-Alias adjustment.....	671
Faux formatting.....	671
Convert to Point Text and to Paragraph Text.....	671
Warp Text.....	672
Layer Style.....	673
Using the Character panel	674
Applying Paragraph panel settings	680
Using the Character and Paragraph Styles panels	683
Creating and managing character styles	683
Creating and managing paragraph styles.....	684
Adding default type styles to documents	686
Applying Text to Images	686
Adding text on a path.....	686
Applying text to a path	687
Editing text on a path	687
Constraining text using a vector shape	689

Adding text in a Smart Object	691
Applying text as a mask	694
Creating Cool Text Effects	697
Rock solid	697
Extreme solid.....	699
Summary	701

Part VI: Creating Artistic Effects 703

Chapter 19: Distorting Images 705

Using Transformations.....	705
Understanding the importance of the reference point	706
Scaling images	707
Rotating images	708
Skewing images	709
Distorting images	710
Changing the perspective of images	710
Using the Warp transformation.....	711
Applying free transform	712
Using the Content-Aware Scale feature.....	713
Using the Puppet Warp tool.....	716
Having Fun with the Liquify Filter.....	721
Identifying the Liquify tools.....	722
Looking at Tool Options	724
Saving a mesh	724
Restoring your image with Reconstruct and Restore All.....	724
Modifying the Mask Options selections	725
Using the View Options.....	725
Changing Perspective with Vanishing Point	726
Correcting Wide-Angle Lens Distortions.....	731
Summary	734

Chapter 20: Applying Filters. 735

Looking at Artistic Effects Filters	735
Exploring Artistic filters.....	736
Discovering Brush Stroke filters	738
Examining Distort filters.....	739
Checking out the Pixelate filters.....	741
Considering the Render filters.....	742
Looking into the Sketch filters	743
Using the Stylize filters.....	744
Delving into Texture filters	745
Defining the Other menu	746
Exploring the Filter Gallery	747
Looking at the preview pane	748
Checking out the filter thumbnail pane	749
Looking at the options pane	749
Using Smart Objects to Make Filter Adjustments	750

Creating a Custom Filter	753
Summary	756

Chapter 21: Combining Images 757

Creating Seamless Composites.....	757
Combining files.....	757
Adjusting and transforming new layers	759
Blending composite files.....	760
Refining edges.....	760
Creating a drop shadow	760
Changing fill or opacity settings	761
Changing the Blending mode	762
Creating a Fill or Adjustment layer	763
Using masks to tuck in a composite file	763
Changing images using transformation and cloning tools.....	768
Using Multiple Images to Create a Photo Collage	775
Using Photomerge to Create a Panorama	781
Summary	784

Part VII: Working with 3-D Images 785

Chapter 22: Creating and Manipulating 3-D Objects..... 787

Understanding 3-D File Formats	788
Looking at the 3-D Workspace	789
Looking at the 3-D panel	789
Learning about the Properties panel when 3-D objects are selected.....	790
Looking at 3-D objects in the Layers panel	791
Finding the 3-D tools.....	792
Using the Picture in Picture window	793
Opening and Placing 3-D Files in Photoshop	793
Creating 3-D Files in Photoshop	794
Selecting a source for a 3-D object	795
Creating a 3-D postcard.....	795
Creating a 3-D extrusion.....	795
Defining an extrusion using the Mesh properties	797
Transforming a 3-D extrusion using the Deform properties	798
Changing the surfaces of a 3-D extrusion using the Cap properties	799
Making a 3-D shape from a preset.....	800
Creating a 3-D mesh from a depth map	801
Creating a 3-D volume	803
Manipulating 3-D Objects.....	803
Using the 3-D tools	803
Turning 3-D objects around a central point	804
Moving a 3-D object through 3-D space	806
Using the 3-D Axis widget	808
Typing in coordinates for your 3-D object.....	809
Summary	810

Chapter 23: Editing 3-D Scenes and Settings	811
Looking at the 3-D Panel	811
Working with a Whole 3-D Scene	812
Changing the properties of a 3-D environment	812
Changing the Global Ambient light	813
Using Image Based Lighting	813
Adjusting the Ground Plane properties	814
Changing the Background settings	815
Setting the properties of a 3-D scene	815
Creating cross-sections	816
Changing the render properties	818
Changing the Current View	820
Setting the view	820
Changing the perspective	821
Adjusting the depth of field	821
Creating a stereo image	821
Working with Mesh Layers	821
Editing the Textures and Materials of a 3-D Object	824
Editing textures	825
Editing materials	827
Creating and Modifying 3-D Lights	831
Adding new lights	832
Positioning lights	833
Changing the properties of a 3-D light	833
Summary	834
Chapter 24: Using Photoshop Tools with 3-D Layers	835
Using 3-D Paint Mode	835
Hiding areas on a 3-D object	836
Painting on a 3-D object	837
Looking at the 3-D Paint Properties panel	837
Understanding 3-D painting methods	838
Using painting texture types	841
Painting color on a 3-D object	842
Painting textures on a 3-D object	844
Adjustments, Layer Styles, and Filters	846
Applying an adjustment to a 3-D layer	846
Adding a layer style to a 3-D layer	847
Applying a filter to a 3-D layer	848
Using 3-D layers as Smart Objects	849
Creating Composites	850
Flying a carpet over the desert	850
Creating a 3-D rug	850
Placing the flying carpet into an image	854
Adding details to complete the flying carpet composite	856

Giving the moon away	858
Creating a gift box	858
Creating the moon	861
Making a present of the moon	863
Summary	866

Part VIII: Working with Video and Animation 867

Chapter 25: Understanding Video Editing Basics 869

Working with Video Files.....	870
Setting aspect ratios	870
Correcting the pixel aspect ratio	870
Changing video aspect ratios.....	872
Correcting the aspect ratio of an image	874
Using video filters.....	877
De-Interlace	877
NTSC Colors	878
Understanding the Features of the Timeline Panel.....	878
Adjusting time in the Timeline panel.....	878
Using the work area of the Timeline panel	880
Using the icons on the Timeline panel.....	881
Exploring the options in the Timeline panel menu	882
Accessing the Video Layers menu	885
Setting clip favorites.....	887
Creating video groups	888
Opening and Placing Video Files	889
Opening a video file	889
Adding additional video files	889
Importing image sequences	892
Importing an image sequence into one layer	892
Importing an image sequence into multiple layers	893
Trimming Video Clips.....	895
Dragging the clip duration bar	895
Trimming clips using the Timeline menu option	896
Moving Video Clips	896
Changing the clip hierarchy.....	897
Dragging clips inside the clip duration bar.....	898
Moving the clip start and clip end points.....	898
Splitting Clips.....	899
Lifting and Extracting Unwanted Sections of Video.....	900
Lifting a section of a video clip	901
Extracting a section of a video clip	901
Adding Still Shots or Other Elements to a Video Project	902
Adding a blank layer.....	903
Adding a text layer.....	903
Placing an image file.....	903
Adding or placing a 3-D model	904
Summary	905

Chapter 26: Animating in the Timeline Panel	907
Creating and Editing Keyframes.....	908
Creating keyframes	908
Editing keyframes	913
Setting interpolation.....	914
Linear interpolation	914
Hold interpolation	915
Creating comments	915
Animating the Position of a Layer.....	916
Getting keyframe placement right	917
Animating positions in multiple layers	919
Using Smart Objects to Animate Transformations.....	921
Animating the Opacity Setting.....	923
Using Keyframes to Animate Layer Styles	925
Animating the Global Lighting.....	927
Using Keyframes to Animate Text.....	929
Animating Masks	930
Building 3-D Animations.....	931
Learning the Basics of Rotoscoping.....	934
Creating a new video layer	934
Creating modified frames	935
Using Onion Skins	937
Restoring frames.....	939
Animating DICOM Files	939
Summary	941
Chapter 27: Correcting Video Files and Adding Artistic Effects	943
Enhancing Layers with Color Corrections.....	943
Unclipping an adjustment layer	945
Changing the duration of an adjustment layer	946
Applying Smart Filters to Video Files	947
Cloning and Healing Over an Entire Video Layer.....	950
Modifying Video Clips Frame by Frame	952
Adding an adjustment to a single frame	954
Adding a filter to a single frame.....	954
Cloning and healing video files	954
Locking the source frame	957
Summary	958
Chapter 28: Animating Using Frames	959
Using the Timeline Panel's Frame Animation Interface	959
Using the panel features.....	960
Setting the frame delay time.....	960
Changing the disposal method	960
Choosing your looping options.....	961
Tweening using frames.....	961
Duplicating selected frames.....	963

Converting to video timeline	963
Activating the frame animation version of the Timeline panel menu	963
Looking at the frame animation Timeline panel menu	963
Using the animation features in the Layers panel	965
Creating Tweened Frame Animations	966
Opening an image to animate	967
Creating keyframes	967
Tweening keyframes	969
Creating a Frame-by-Frame Animation	971
Creating an animation from a layered image	971
Building an animation in the animation version of the Timeline panel	975
Rendering Video	977
Summary	980

Part IX: Using Advanced Output Techniques 981

Chapter 29: Printing and Color Management 983

Understanding the Importance of Color Accuracy and Consistency	983
Understanding ICC color profiles	984
Embedding color profiles in image files	984
Using device-independent color profiles	986
Calibrating Color for Monitors and Printers	986
Using Color Management in Photoshop	987
Configuring color settings in Photoshop	987
Setting color options	988
Configuring color profiles	989
Controlling the color profile in open images	990
Controlling conversion between color profiles	991
Configuring the Advanced Controls options	993
Assigning color profiles to images	994
Converting images to other color profiles	994
Proofing images using color management	996
Printing Images from Photoshop	998
Configuring general printing options	999
Using color management to print accurate colors	999
Adding crop marks and additional output to printed images	1001
Summary	1003

Chapter 30: Creating Images for the Web 1005

Preparing Images for the Web	1005
Understanding web image formats	1006
Selecting the right color profile	1007
Slicing images for web use	1007
Understanding slices	1007
Creating slices	1008
Configuring slices	1011

Adding transparency to images	1013
Animating images	1015
Outputting Images to the Web	1016
Using the preview layout and toolbar	1017
Setting file output options	1019
Manipulating the Color Table	1025
Setting the image size	1026
Previewing animation controls	1027
Previewing output in a browser	1028
Adding Zoomable Images to Websites	1029
Applying CSS to Photoshop Images	1031
Generating CSS styles from text and shape layers	1031
Importing swatches from HTML/CSS files	1032
Summary	1033
Chapter 31: Automating and Scripting Workflow in Photoshop	1035
Automating Workflow in Photoshop	1035
Batching multiple images	1036
Creating droplets to process images	1040
Using Scripting to Speed Up Workflow	1041
Using the Photoshop scripts	1042
Using stack modes to analyze multiple images and reduce noise	1045
Scripting workflow events	1048
Summary	1050
 Part X: Appendices	 1051
Appendix A: Timesaving Keyboard Shortcuts	1053
Appendix B: Extending the Capabilities of Photoshop with Plug-Ins	1059
Appendix C: Finding Resources	1063
 Index	 1067
