

CONTENTS

PREFACE	ix
CONTRIBUTORS	xiii
 PART I	
1 X-Ray Crystallography of Biological Macromolecules: Fundamentals and Applications	3
<i>Antonio L. Llamas-Saiz and Mark J. van Raaij</i>	
2 Nuclear Magnetic Resonance Methods for Studying Soluble, Fibrous, and Membrane-Embedded Proteins	23
<i>Victoria A. Hlgman</i>	
3 Small-Angle X-Ray Scattering Applied to Proteins in Solution	49
<i>Leandro Ramos Souza Barbosa, Francesco Spinozzi, Paolo Mariani, and Rosangela Itri</i>	
4 Analyzing the Solution State of Protein Structure, Interactions, and Ligands by Spectroscopic Methods	73
<i>Verónica I. Dodero and Paula V. Messina</i>	
5 Resolving Membrane-Bound Protein Orientation and Conformation by Neutron Reflectivity	99
<i>Hirsh Nanda</i>	
6 Investigating Protein Interactions at Solid Surfaces—<i>In Situ</i>, Nonlabeling Techniques	113
<i>Olof Svensson, Javier Sotres, and Alejandro Barrantes</i>	
7 Calorimetric Methods to Characterize the Forces Driving Macromolecular Association and Folding Processes	139
<i>Conceição A.S.A. Minetti, Peter L. Privalov, and David P. Remeta</i>	

8	Virtual Ligand Screening Against Comparative Models of Proteins	179
	<i>Hao Fan</i>	
9	Atomistic and Coarse-Grained Molecular Dynamics Simulations of Membrane Proteins	193
	<i>Thomas J. Piggot, Peter J. Bond, and Syma Khalid</i>	

PART II

10	Preparation of Nanomaterials Based on Peptides and Proteins	209
	<i>Yujing Sun and Zhuang Li</i>	
11	Natural Fibrous Proteins: Structural Analysis, Assembly, and Applications	219
	<i>Mark J. van Raaij and Anna Mitraki</i>	
12	Amyloid-Like Fibrils: Origin, Structure, Properties, and Potential Technological Applications	233
	<i>Pablo Taboada, Silvia Barbosa, Josué Juárez, Manuel-Alatorre Meda, and Víctor Mosquera</i>	
13	Proteins and Peptides in Biomimetic Polymeric Membranes	283
	<i>Alfredo González-Pérez</i>	
14	Study of Proteins and Peptides at Interfaces By Molecular Dynamics Simulation Techniques	291
	<i>David Poger and Alan E. Mark</i>	
15	A Single-Molecule Approach to Explore the Role of the Solvent Environment in Protein Folding	315
	<i>Katarzyna Tych and Lorna Dougan</i>	
16	Enhanced Functionality of Peroxidases By Its Immobilization at The Solid–Liquid Interface of Mesoporous Materials and Nanoparticles	335
	<i>José Campos-Terán, Iker Iñárritu, Jorge Aburto, and Eduardo Torres</i>	
17	Superactivity of Enzymes in Supramolecular Hydrogels	353
	<i>Ye Zhang and Bing Xu</i>	
18	Surfactant Proteins and Natural Biofoams	365
	<i>Malcolm W. Kennedy and Alan Cooper</i>	
19	Promiscuous Enzymes	379
	<i>Luis F. Olguin</i>	
20	Thermodynamics and Kinetics of Mixed Protein/Surfactant Adsorption Layers at Liquid Interfaces	389
	<i>Reinhard Miller, E.V. Aksenenko, V.S. Alahverdjeeva, V.B. Fainerman, C.S. Kotsmar, J. Krägel, M.E. Leser, J. Maldonado-Valderrama, V. Pradines, C. Stefaniu, A. Stocco, and R. Wüstneck</i>	
21	Application of Force Spectroscopy Methods to the Study of Biomaterials	429
	<i>Chuan Xu and Erika F. Merschrod S.</i>	
22	Protein Gel Rheology	437
	<i>Katie Weigandt and Danilo Pozzo</i>	

23	Exploring Biomolecular Thermodynamics in Aqueous and Nonaqueous Environments using Time-Resolved Photothermal Methods	449
	<i>Randy W. Larsen, Carissa M. Vetromile, William A. Maza, Khoa Pham, Jaroslava Mikšovská</i>	
	INDEX	473
