<i>Preface</i>	viii
<i>Acknowledgments</i>	x
<i>Biography</i>	xi

SECTION I BASIC CONCEPTS IN TOXICOLOGY TESTING

Chapter 1. Introduction to principles of toxicology	1
Chapter 2. Effects of chemicals	8
Chapter 3. Toxicokinetics	23
Chapter 4. Risk assessment and regulatory toxicology	44
Chapter 5. Descriptive animal toxicology tests	58

SECTION II TOXICOLOGY TESTING *IN VIVO*

Chapter 6. Acute toxicology testing	74
Chapter 7. Subchronic and chronic toxicology testing	93
Chapter 8. Acute dermal toxicity testing	106
Chapter 9. Acute ocular toxicity testing	116
Chapter 10. Toxicity testing for fertility and reproduction	122
Chapter 11. Carcinogenicity and mutagenicity testing <i>in vivo</i>	142

SECTION III TOXICOLOGY TESTING *IN VITRO*

Chapter 12. Introduction to <i>in vitro</i> toxicology testing	157
Chapter 13. Cell culture methodology	163
Chapter 14. Cell culture methods for acute toxicology testing	187
Chapter 15. Acute local toxicology testing <i>in vitro</i>	206
Chapter 16. Toxicokinetic studies <i>in vitro</i>	224
Chapter 17. Mutagenicity and carcinogenicity testing <i>in vitro</i>	229
Chapter 18. Reproductive and teratogenicity studies <i>in vitro</i>	256
Chapter 19. High-throughput screening and microarray analysis	264
Chapter 20. Toxicogenomics and epigenetic testing <i>in vitro</i>	276
Chapter 21. Experimental design and statistics	289
Chapter 22. Standardization and validation of alternative methods	302
Chapter 23. Applications of alternative models for toxicology testing	317

<i>Index</i>	331
