

Contents

Chapter 1. Drillers and Their Industry.....	1
1.1 Profile of a driller.....	1
1.2 Occupational skills.....	1
1.3 Working as part of a team	3
1.4 Drilling industry sectors.....	6
1.5 Drilling objectives.....	9
1.6 Introduction to drilling methods	10
Chapter 2. Mathematics and Mechanics.....	17
2.1 Measurement and calculations	17
2.2 Velocity and flow rates.....	24
2.3 Mass, density, force, and pressure.....	26
2.4 Levers, torque, and rotation.....	36
2.5 Centre of gravity and stability.....	42
2.6 Stress and strength of materials	47
2.7 Hydraulics	50
2.8 Bit pressure and drill string loads.....	51
2.9 Drill rig ratings	54
2.10 Drill pipe stretch and elongation	59
Chapter 3. Drilling Operations and Methods	63
3.1 Introduction.....	63
3.2 Cutting and drilling actions	63
3.3 Methods of drilling.....	69
3.4 The connection to the bit.....	74
3.5 Sampling.....	76
3.6 Cable-tool and hydraulic drilling.....	87
3.7 Cable-tool bits.....	96
3.8 Cable-tool operation.....	101
3.9 Auger drilling.....	110
3.10 Auger drilling practice.....	113
3.11 Rotary drilling.....	118
3.12 Rotary bits and tools.....	127
3.13 Rotary drilling practice	136
3.14 Rotary drilling tasks	140
3.15 Rotary Mud Drilling	145
3.16 Rotary Air Drilling	146
3.17 Slim-hole rotary and core drilling	156
3.18 Core drilling.....	157
3.19 Top-hole hammer drilling.....	191

3.20	Raise boring.....	192
3.21	Sonic drilling.....	196
3.22	Pile top drilling.....	199
3.23	Push or drive boring and sampling	200
3.24	Dutch cone probing	202
3.25	Vibracoring	204
3.26	In-hole water or mud hammer drilling.....	204
3.27	Coiled tube drilling.....	206
3.28	Vacuum drilling	208

Chapter 4. Drills, Pipes, and Auxiliary Equipment 209

4.1	Drilling machines.....	209
4.2	Drilling machine rating capacity	217
4.3	Transmissions.....	221
4.4	Hoists and winches.....	227
4.5	Rig hydraulics.....	228
4.6	Drilling instruments.....	239
4.7	Pipes and pipe threads.....	241
4.8	Other drill strings.....	249
4.9	Drill string handling	251
4.10	Casing – hole design.....	259
4.11	Downhole motors and hammers.....	263
4.12	Compressors.....	267
4.13	Circulating pumps and swivels.....	269
4.14	Automated and remote control drilling	277

Chapter 5. Maintenance 279

5.1	Rig maintenance.....	279
5.2	Engines.....	287
5.3	Transmissions.....	294
5.4	Maintaining the hydraulic systems	294
5.5	Filters	295
5.6	Vehicles	298
5.7	Compressors and air systems	300
5.8	Ancillary equipment and drilling tools.....	302
5.9	Safe use and care of tools	306
5.10	Electricity	311

Chapter 6. Circulation Fluids and Grouting315

6.1	Fluids for cleaning and stabilising	315
6.2	Drilling muds	322
6.3	The circulation system.....	327
6.4	Stabilisation using circulating fluids.....	331
6.5	Overcoming lost circulation using muds	337
6.6	Air and foam circulation	339
6.7	Testing and treating muds	340

6.8	Mud mixes for different drilling methods	345
6.9	Mud mixing and cleaning equipment.....	348
6.10	Stabilising and sealing boreholes with cement.....	350
6.11	Minimum requirements for cementing and sealing casing	354
6.12	Cementing and sealing casing practice	359
6.13	Sealing boreholes and casing with bentonite grout slurry.....	365

Chapter 7. Tests and Measurements 367

7.1	Hole depth and diameter measurements.....	367
7.2	Surveying deep holes	369
7.3	Wire line surveys	374
7.4	Core orientation	379
7.5	Downhole inspection	383
7.6	Geophysical logging.....	385
7.7	Borehole fluid measurements	388
7.8	Test pumping water bores	390
7.9	Packer testing	400
7.10	Soil penetration tests	403
7.11	Measurement of subsurface movement	406
7.12	Measurement of formation pore pressure	407
7.13	Testing soil samples.....	408

Chapter 8. Drilling Applications and Sectors413

8.1	Introduction	413
8.2	Blast hole drilling – Surface	413
8.3	Blast hole drilling – underground.....	417
8.4	Environmental drilling and sampling.....	422
8.5	Foundation drilling.....	443
8.6	Geotechnical drilling.....	456
8.7	Geothermal drilling.....	462
8.8	Exploration drilling.....	466
8.9	Mineral production and development drilling	469
8.10	Oil/Gas drilling – Onshore	470
8.11	Oil/Gas drilling – Well control	474
8.12	Seismic drilling.....	488
8.13	Trenchless technology.....	489
8.14	Water exploration drilling.....	505
8.15	Water well drilling and construction	508
8.16	Well construction – Screen selection	516
8.17	Well construction – Screen placement.....	525
8.18	Well construction – Artificial packs.....	530
8.19	Well development	534
8.20	Well development procedures.....	538
8.21	Well construction – Eliminating contamination.....	546
8.22	Well maintenance and rehabilitation.....	551
8.23	Borehole decommissioning	559

Chapter 9. Overcoming Downhole Problems	565
9.1 Decisions and problem solving.....	565
9.2 Deeper holes accentuate problems	568
9.3 Drill pipe sticking and recovery.....	572
9.4 Problem formations	576
9.5 Fishing principles	583
9.6 Fishing tools and their operation.....	587
9.7 Hazardous gases.....	593
9.8 Problems during well control procedures	595
Chapter 10. Geology and Mapping for Drillers	597
10.1 Benefits of knowing geology	597
10.2 Some geological basics.....	598
10.3 Defining drillability and stability	604
10.4 Relating rock classification and structural geology to drillability and stability.....	608
10.5 Groundwater occurrence and movement.....	612
10.6 Occurrences of pressurised water	618
10.7 Map reading and use	621
10.8 Global positioning systems (GPS)	631
Chapter 11. Information: Logs, Records, and Reports	635
11.1 Recording information	635
11.2 The driller's log – What is it for?	639
11.3 Shift or daily reports.....	640
11.4 Records of drilling tools.....	643
11.5 Cost records.....	644
11.6 Hole records.....	645
11.7 Legal requirements for reporting.....	646
11.8 Workplace health, safety, environmental management, and reporting.....	647
Chapter 12. A Guide to Rig and Crew Management.....	657
12.1 The driller's broad responsibilities	657
12.2 The management process.....	659
12.3 Defining the objective	660
12.4 The drilling plan.....	660
12.5 Carrying out the drilling plan.....	664
12.6 Monitoring the drilling.....	679
12.7 Continuous improvement	680
12.8 Managing the workplace health, safety and environment (WHS&E)	681
12.9 The owner-operator	696
12.10 Tendering for work.....	698
12.11 Financial management.....	701
Conclusion	703

Appendixes

A.	Abbreviations and Acronyms.....	705
B.	Glossary of General Drilling Terms	707
C.	Drilling Industry Associations and related bodies	713
D.	References and Further Reading	717
	Index.....	721
