Foreword ix

List of Contributors xv

1. Introduction 1

BRUCE A. FOWLER

2. Quantitative Structure-Activity Relationship (QSAR) Models, Physiologically Based Pharmacokinetic (PBPK) Models, Biologically Based Dose Response (BBDR) and Toxicity Pathways 5

PATRICIA RUIZ, XIAOXIA YANG, ANNIE LUMEN, AND JEFF FISHER

Introduction 5

Application of Structure-Activity Relationship (SAR) and Quantitative Structure-Activity Relationship (QSAR) 6

Physiologically Based Pharmacokinetic (PBPK) Modeling Case Studies 7

VOC Models 8

Metals Models 10

References 16

3. Multiple Chemical Exposures and Risk Assessment 23

JOHN C. LIPSCOMB, NIKKI MAPLES-REYNOLDS, AND MOIZ MUMTAZ

Historical Perspective 23

Regulatory Perspective 24

Mixtures versus Components 26

Additivity Approaches 27

Future Directions 38

References 41

4. Modeling of Sensitive Subpopulations and Interindividual Variability in Pharmacokinetics for Health Risk Assessments 45

KANNAN KRISHNAN, BROOKS McPHAIL, WEIHSUEH CHIU, AND PAUL WHITE

Introduction 45

Physiological Differences and PBPK Modeling of Sensitive Human Subpopulations 47

Animal PBPK Models for Evaluating Sensitive Subpopulations 58

Concluding Remarks 61

Disclaimer 62

References 62

5. Integrated Systems Biology Approaches to Predicting Drug-Induced Liver Toxicity 67

KALYANASUNDARAM SUBRAMANIAN

Introduction 67

General Principles 68

Model Building 68

Energy Homeostasis 69

Glutathione Homeostasis 70

Fatty Acid Metabolism 71

Bile Salt Metabolism and Transport 73

Solving the Equation-Set 74

Model Validation and Predictions 74

Conclusions 79

References 80

## 6. Computational Translation and Integration of Test Data to Meet Risk Assessment Goals 85

LUIS G. VALERIO JR.

- Introduction 85
- Computational Analyses and Translational Research 86
- Toxicology-Based (Q)SARs 87
- Read-Across 97
- Data Mining for Computational Translation and Integration of Test Data 98
- High-Throughput Screening for Signal Detection in Risk Assessment 100
- Integrating Computational Tools with Test Data for Risk Assessment 102
- Disclaimer 107
- References 108

## 7. Computational Translation of Nonmammalian Species Data to Mammalian Species to Meet REACH and Next Generation Risk Assessment Needs 113

EDWARD J. PERKINS AND NATÀLIA GARCIA-REYERO

- A Changing Regulatory Environment 113
- Nonmammalian Species Can Help to Reduce, Refine, and Replace Mammalian Animal Testing 115
- Pathway-Based Hazard and Risk Assessment 115
- Translating Effects on Nonmammalian Species to Mammalian Species 118
- Translating Molecular Initiating Events: Gene/Protein Annotation and Mammalian Ortholog Identification 120
- Annotation of Large Gene Sets 122
- Pathway-Level Comparison/Translation 123
- Pathway-Based Extrapolation to Mammals in Determining Chemical Mode of Action 124
- Pathway-Based Dose-Response Relationships 125
- Network Inference and Mapping 128
- Cross-Species Analysis Using Networks 128
- Translating Effects through Computational Modeling at the Systems Level 130

- Future Efforts in Use of High-Throughput Screening and “Omics” Technology and Computational Tools in Translation of Nonmammalian Species to Mammalian Species to Meet REACH and Next Generation Risk Assessment Needs 130

References 131

## 8. Interpretation of Human Biological Monitoring Data Using a Newly Developed Generic Physiological-Based Toxicokinetic Model 137

FRANS JONGENELEN, WIL TEN BERGE, AND PETER J. BOOGAARD

- Introduction 137
- The Generic PBTK Model IndusChemFate 139
- Examples 141
- Discussion 148
- Supplementary Information 149
- References 149

## 9. Uses of Publicly Available Data in Risk Assessment 151

ISAAC WARREN AND SORINA EFTIM

- Introduction 151
- Publicly Available Data Sets with Uses in Risk Assessment 152
- Comparison of the NHANES IV and ToxCast™ Data Sets 159
- Methods for Compiling Data from Multiple Sources for Risk Assessment 159
- Designing Publicly Available Toxicological Data Sets 162
- Analogies to the Human Genome Project in Computational Toxicology 163
- Chemical Domain and Limitations to Data Analysis of Traditional and Computational Toxicology Data 164
- Data Semantics and Limitations to Relating HTS Data to *In Vivo* Effects 165
- Conclusions 166
- References 166

10. Computational Toxicology Experience  
and Applications for Risk Assessment in  
the Pharmaceutical Industry 171

NIGEL GREENE AND MARK GOSINK

Background 171  
Two Main Considerations 172  
Summary 188  
References 188

11. Omics Biomarkers in Risk  
Assessment 195

HONG FANG, HUIXIAO HONG, ZHICHAO LIU,  
ROGER PERKINS, REAGAN KELLY,  
JOHN BERESNEY, WEIDA TONG, AND  
BRUCE A. FOWLER

Abbreviations and Glossaries 195  
Introduction 196  
Biomarkers 198  
Bioinformatics Approaches: Challenges and  
Solutions in Omics Biomarker Discovery 201  
Decision Forest for Omics Biomarkers 206  
Conclusion 210  
Disclaimer 210  
References 211

12. Translation of Computational Model  
Results for Risk Decisions 215

WILLIAM MENDEZ AND BRUCE A. FOWLER

Origins and Nature of the Computational Toxicology  
Applications in Risk Assessment 215  
Drivers for the Application of Computational  
Toxicology to Risk Assessment 220  
Translational Research 221  
Computational Toxicology Applications in Risk- and  
Hazard-Based Screening 228  
Current Status of Computational Toxicology in  
Quantitative Risk Assessment 236  
Summary 238  
References 242

13. Future Directions for Computational  
Toxicology for Risk Assessment 247

BRUCE A. FOWLER

Needed Essential Elements 247  
Specific Elements in Computational Toxicology  
Needed for the Field to Move Forward 248

**Index 251**
