Preface.....	xi
Author	xv
Chapter 1 Special Features of SimPowerSystems™ Models	
1.1 General Characteristics	1
1.2 Graphical User Interface Powergui	7
References	16
Chapter 2 Models of Power Circuit Devices.....	17
2.1 Electrical Sources.....	17
2.2 Impedances and Loads	22
2.3 Transformers.....	36
2.4 Transmission Line Models	51
2.5 Miscellaneous	59
References	63
Chapter 3 Measuring and Control Blocks.....	65
3.1 Measurement of Main Circuit Quantities.....	65
3.2 Meters with Employment of Simulink® Blocks	68
3.3 Control Blocks.....	77
References	83
Chapter 4 Simulation of Power Electronics Devices	85
4.1 Models of Power Semiconductor Devices	85
4.2 Control Blocks for Power Electronics	92
4.3 Simulation of Converter with Thyristors.....	101
4.4 Simulation of a High-Voltage Direct Current Electric Power Transmission System	108
4.5 Simulation of Converters with Forced-Commutated Devices	115
4.6 Cascaded H-Bridge Multilevel Inverter Simulation.....	122
4.7 Four-Level Inverter with “Flying” Capacitor Simulation.....	126
4.8 Simulation of Z-Source Converters.....	134
4.9 Simulation of Resonant Inverters	143
4.10 Simulation of Modular Multilevel Converters.....	152
4.11 Simulation of Matrix Converters.....	157
References	166

Chapter 5 Electric Machine and Electric Drive Simulation 167

- 5.1 Direct Current (DC) Motors and Drives 167
 - 5.1.1 DC Drives with Chopper Control..... 167
 - 5.1.2 Saturation Consideration 179
 - 5.1.3 Continuous Models of DC Electrical Drives
in SimPowerSystems™ 187
- 5.2 Induction Motors and Electric Drives 190
 - 5.2.1 Model Description..... 190
 - 5.2.2 Simulation of IM with Two-Level
Voltage-Source Inverter (VSI) and DTC..... 196
 - 5.2.3 Models of the Standard IM Drives
in SimPowerSystems™ 204
 - 5.2.4 IM with Two-Level VSI and an Active Front-End
Rectifier 209
 - 5.2.5 IM with Three-Level VSI..... 211
 - 5.2.5.1 IM with Three-Level VSI and DTC 211
 - 5.2.5.2 IM with Three-Level Inverter and L-C
Filter 214
 - 5.2.6 Simulation of IM Supplied from CHB Inverter 216
 - 5.2.7 IM Supplied from the Four-Level Inverter
with “Flying” Capacitors..... 221
 - 5.2.8 Simulation of the Five-Level H-Bridge
Neutral-Point Clamped Inverter (5L-HNPC)
Supplying IM..... 223
 - 5.2.9 Simulation of the IM with Phase-Wound Rotor..... 236
 - 5.2.10 IM with Current Source Inverter..... 240
 - 5.2.11 Simulation of IM Soft-Start 242
 - 5.2.12 IM Model with Six Terminals..... 244
 - 5.2.13 Model of Six-Phase IM 247
 - 5.2.14 Simulation of the Special Operation Modes
of the Line-Fed IM 254
- 5.3 Synchronous Motors (SM) and Electric Drives 256
 - 5.3.1 SM Model..... 256
 - 5.3.2 Simulation of the Electrical Drive with SM
and Load-Commutated Converters 264
 - 5.3.3 Model of Six-Phase SM..... 271
 - 5.3.4 Cycloconverter Simulation 277
 - 5.3.5 SM with VSI Simulation 284
 - 5.3.5.1 Standard Model..... 284
 - 5.3.5.2 Power Electrical Drive with
Three-Level VSI 287
 - 5.3.5.3 Power Electrical Drive with CHB
Inverter..... 291
 - 5.3.6 Simplified SM Model 297

5.4	Synchronous Motor with Permanent Magnets	299
5.5	Switched Reluctance Motor Simulation	305
5.6	Mechanical Coupling Simulation	311
	References	315
Chapter 6	Electric Power Production and Transmission Simulation	317
6.1	Computation of Transmission Line Parameters	317
6.2	Use of the Simplified SM Model	324
6.3	Simulation of Systems with Hydraulic-Turbine Generators	326
6.4	Simulation of Systems with Steam Turbine-Synchronous Generator	338
6.5	Simulation of Wind Generation Systems (WG)	349
6.5.1	WG with an Induction Generator (IG)	349
6.5.2	WG with a Synchronous Generator with Permanent Magnets (SGPM)	356
6.5.3	WG with SGPM and Diesel-Generator	359
6.5.4	Simulation of a Stand-Alone WG	363
6.6	Simulation of the Unit: Diesel—Squirrel-Cage IG	369
6.7	FACTS Simulation	372
6.7.1	Static Synchronous Compensator Simulation	372
6.7.2	STATCOM Simulation	384
6.7.2.1	Models of Standard STATCOM Systems	384
6.7.2.2	DSTATCOM Simulation	390
6.7.2.3	STATCOM with Cascaded H-Bridge Multilevel Inverter Simulation	392
6.7.3	Active Filter Simulation	397
6.7.4	Static Synchronous Series Compensator Simulation	403
6.7.5	Unified Power Flow Controller Simulation	407
6.7.6	Phase-Shifting Transformer Simulation	415
	References	418
	List of the Models on CD	419
	Index	423
