<i>Foreword by Dr. Kalyani Bogineni</i> .....	xv
<i>Foreword by Dr. Ulf Nilsson</i> .....	xvii
<i>Preface</i> .....	xix
<i>Acknowledgements</i> .....	xxv
<i>List of Abbreviations</i> .....	xxvii
<b>Part I: Introduction – Background and Vision of EPC</b> .....	<b>1</b>
<b>Chapter 1: Mobile Broadband and the Core Network Evolution</b> .....	<b>3</b>
1.1 A Global Standard.....	4
1.2 Origins of the Evolved Packet Core.....	5
1.2.1 3GPP Radio Access Technologies.....	6
1.2.2 3GPP2 Radio Access Technologies.....	9
1.2.3 SAE – Building Bridges Between Different Networks.....	9
1.3 A Shifting Value Chain .....	10
1.4 Terminology Used in This Book .....	11
<b>Part II: Overview of EPS</b> .....	<b>15</b>
<b>Chapter 2: Architecture Overview</b> .....	<b>17</b>
2.1 EPS Architecture .....	17
2.1.1 Basic IP Connectivity Over LTE Access.....	21
2.1.2 Adding More Advanced Functionality for LTE Access .....	25
2.1.3 Interworking Between LTE and GSM/GPRS or WCDMA/HSPA .....	27
2.1.4 Support for 3GPP Voice Services.....	34
2.1.5 Interworking Between LTE and CDMA Networks.....	37
2.1.6 Interworking Between 3GPP Access Technologies and Non-3GPP Access Technologies.....	40
2.1.7 Support for Broadcasting in Cellular Networks.....	44
2.1.8 Positioning Services .....	45
2.1.9 Optimizations for Small Cells and Local Access.....	47
2.1.10 Miscellaneous Features .....	48
2.1.11 Summary of the Architecture Overview.....	49
2.2 Mobile Network Radio Technologies .....	51
2.2.1 Overview of Radio Networks for Mobile Services.....	51
2.2.2 Radio Network Functionality .....	52
2.2.3 GSM .....	55

---

2.2.4	WCDMA .....	56
2.2.5	LTE.....	56
<b>Chapter 3: EPS Deployment Scenarios and Operator Cases .....</b>		<b>65</b>
3.1	Scenario 1: Existing GSM/GPRS and/or WCDMA/HSPA Operators Deploying LTE/EPC.....	67
3.1.1	First Phase – Initial EPC Deployment .....	67
3.1.2	Second Phase – Integration with Existing Packet Core .....	71
3.1.3	Third Phase – Further Optimizations Towards the Common Core .....	76
3.2	Scenario 2: Existing CDMA Operators Deploying LTE/EPC .....	77
3.3	Scenario 3: New Operators Deploying LTE/EPC .....	79
<b>Chapter 4: Data Services in EPS.....</b>		<b>81</b>
4.1	Messaging Services.....	82
4.2	Machine Type Communication .....	84
4.2.1	Industrial and Corporate Uses.....	85
4.2.2	Societal – M2M and Sustainable Development .....	86
<b>Chapter 5: Voice Services in EPS.....</b>		<b>89</b>
5.1	Realization of Voice Over LTE .....	89
5.2	Voice Services Using IMS Technology.....	90
5.3	Single-Radio Voice Call Continuity (SRVCC) .....	91
5.4	Circuit-Switched Fallback.....	93
5.5	Comparing MMTel/SRVCC and CSFB .....	93
5.6	IMS Emergency Calls and Priority Services.....	94
<b>Part III: Key Concepts and Services .....</b>		<b>95</b>
<b>Chapter 6: Session Management and Mobility .....</b>		<b>97</b>
6.1	IP Connectivity and Session Management.....	97
6.1.1	The IP Connection .....	97
6.2	Session Management, Bearers, and QoS Aspects .....	107
6.2.1	General.....	107
6.2.2	The EPS Bearer for E-UTRAN Access.....	108
6.2.3	Session Management for EPS and GERAN/UTRAN Accesses .....	114
6.2.4	Session Management for Other Accesses .....	116
6.3	Subscriber Identifiers and Corresponding Legacy Identities .....	116
6.3.1	Permanent Subscriber Identifiers .....	116
6.3.2	Temporary Subscriber Identifiers.....	117
6.3.3	Relation to Subscription Identifiers in 2G/3G.....	118
6.4	Mobility Principles.....	120
6.4.1	General .....	120
6.4.2	Mobility within 3GPP Family of Accesses .....	121
6.4.3	Idle-Mode Signaling Reduction (ISR) .....	125
6.4.4	Closed Subscriber Group .....	129
6.4.5	Mobility Between E-UTRAN and HRPD.....	132
6.4.6	Generic Mobility Between 3GPP and Non-3GPP Accesses .....	135

---

6.4.7	Access Network Discovery and Selection .....	140
6.5	Interworking with Managed WLAN Networks .....	146
6.6	Pooling, Overload Protection, and Congestion Control.....	149
<b>Chapter 7: Security .....</b>	<b>157</b>	
7.1	Introduction.....	157
7.2	Security Services.....	158
7.2.1	Security Domains.....	159
7.3	Network Access Security .....	161
7.3.1	Access Security in E-UTRAN .....	161
7.3.2	Interworking with GERAN/UTRAN .....	168
7.3.3	Special Consideration for IMS Emergency Calls .....	169
7.3.4	Trusted and Untrusted Non-3GPP Accesses .....	170
7.3.5	Access Security in Trusted Non-3GPP Accesses .....	170
7.3.6	Access Security in Untrusted Non-3GPP Access.....	173
7.3.7	Special Considerations for Host-Based Mobility DSMIPv6 .....	175
7.4	Network Domain Security .....	176
7.5	User Domain Security .....	178
7.6	Security Aspects of Home eNBs and Home NBs .....	178
7.6.1	H(e)NB Security Architecture.....	179
7.6.2	Closed Subscriber Groups.....	180
7.6.3	Device Authentication .....	180
7.6.4	Hosting Party Authentication .....	181
7.6.5	Backhaul Link Security.....	182
7.6.6	Location Verification .....	183
7.7	Lawful Intercept.....	183
<b>Chapter 8: Quality of Service, Charging, and Policy Control.....</b>	<b>187</b>	
8.1	Quality of Service .....	187
8.1.1	QoS in E-UTRAN .....	187
8.1.2	Interworking with GERAN/UTRAN .....	198
8.1.3	QoS Aspects When Interworking with Other Accesses .....	199
8.2	Policy and Charging Control.....	200
8.2.1	The PCC Architecture .....	202
8.2.2	Basic PCC Concepts .....	205
8.2.3	Network vs. Terminal-Initiated QoS Control.....	217
8.2.4	PCC and Roaming.....	220
8.2.5	Additional PCC Features Developed Since Release 8 .....	222
8.2.6	PCC Support for Fixed Broadband Access .....	238
8.3	Charging.....	241
<b>Chapter 9: Selection Functions.....</b>	<b>253</b>	
9.1	Architecture Overview for Selection Functions.....	253
9.2	Selection of MME, SGSN, Serving GW, and PDN GW .....	254
9.2.1	Selection Procedure at a Glance.....	254
9.2.2	Use of DNS Infrastructure .....	257

---

9.2.3	MME Selection .....	261
9.2.4	SGSN Selection Function for EPS.....	263
9.2.5	GW Selection Overview.....	263
9.2.6	PDN GW Selection Function.....	264
9.2.7	Serving GW Selection Function .....	266
9.2.8	Handover (Non-3GPP Access) and PDN GW Selection .....	267
9.3	PCRF Selection.....	268
<b>Chapter 10: Subscriber Data Management.....</b>		<b>271</b>
10.1	Home Subscriber Server (HSS) .....	272
10.2	Subscriber Profile Repository (SPR) .....	276
10.3	User Data Convergence (UDC) .....	278
10.3.1	UDC Overall Description.....	279
10.3.2	Front-Ends and User Data Repository .....	280
<b>Chapter 11: Voice and Emergency Services.....</b>		<b>283</b>
11.1	Voice Services Based on Circuit-Switched Technology .....	283
11.2	Voice Services with IMS Technology .....	285
11.3	MMTel .....	287
11.3.1	MMTel Architecture.....	287
11.4	VoLTE .....	288
11.5	T-ADS .....	290
11.5.1	Ensuring Service Coverage .....	291
11.6	Single Radio Voice Call Continuity (SRVCC).....	291
11.6.1	Entities with Additional Functions to Support SRVCC .....	292
11.7	IMS Centralized Services (ICS).....	294
11.7.1	Service Centralization and Continuity Application Server (SCC-AS) ....	295
11.7.2	SRVCC from E-UTRAN to GERAN or UTRAN.....	296
11.8	SRVCC from E-UTRAN to CDMA 1xRTT .....	298
11.9	Circuit-Switched Fallback .....	299
11.10	Migration Paths and Coexistence of Circuit-Switched and VoLTE .....	304
11.11	EPS Emergency Bearer Service for IMS Emergency .....	305
11.12	Multimedia Priority Service (MPS).....	312
<b>Chapter 12: LTE Broadcasting.....</b>		<b>321</b>
12.1	Background and Main Concepts .....	321
12.2	MBMS Solution Overview .....	323
12.3	MBMS User Services .....	326
12.3.1	Associated Delivery Procedures.....	329
12.4	Mobile Network Architecture for MBMS.....	330
12.4.1	Architecture Overview .....	330
12.4.2	Interfaces .....	331
12.5	MBMS Bearer Services .....	333
12.5.1	Session Start .....	334
12.5.2	Session Stop .....	335
12.5.3	Session Update .....	336

<b>Chapter 13: Positioning</b> .....	<b>339</b>
13.1 Positioning Solutions .....	340
13.2 Positioning Architecture and Protocols .....	342
13.3 Positioning Methods .....	343
13.4 Position-Reporting Formats .....	345
13.5 EPS Positioning Entities and Interfaces .....	345
13.5.1 GMLC .....	345
13.5.2 E-SMLC .....	346
13.5.3 SLP .....	346
13.5.4 Le Interface .....	346
13.5.5 SLg Interface .....	346
13.5.6 SLs Interface .....	346
13.5.7 LTE Positioning Protocol (LPP) .....	346
13.5.8 LTE Positioning Protocol Annex (LPPa) .....	347
13.6 Positioning Procedure .....	347
<b>Chapter 14: Offload Functions and Simultaneous Multi-Access</b> .....	<b>349</b>
14.1 Introduction .....	349
14.2 Offloading the 3GPP RAN – Simultaneous Multi-Access .....	350
14.2.1 Multi-Access PDN Connectivity (MAPCON) .....	351
14.2.2 IP Flow Mobility (IFOM) .....	351
14.2.3 Non-Seamless WLAN Offloading (NSWO) .....	353
14.3 Offloading the Core and Transport Network – Selected IP Traffic Offload (SIPTO) .....	354
14.4 Access to Local Networks – Local IP Access (LIPA) .....	357
<b>Part IV: The Nuts and Bolts of EPC</b> .....	<b>363</b>
<b>Chapter 15: EPS Network Entities and Interfaces</b> .....	<b>365</b>
15.1 Network Entities .....	367
15.1.1 eNodeB .....	367
15.1.2 Mobility Management Entity .....	368
15.1.3 Serving GW .....	368
15.1.4 PDN GW .....	369
15.1.5 Policy and Charging Rules Function .....	369
15.1.6 Home eNodeB Subsystem and Related Entities .....	370
15.2 Control Plane Between UE, eNodeB, and MME .....	371
15.2.1 S1-MME .....	371
15.3 GTP-Based Interfaces .....	372
15.3.1 Control Plane .....	372
15.3.2 MME ↔ MME (S10) .....	373
15.3.3 MME ↔ Serving GW (S11) .....	373
15.3.4 Serving GW ↔ PDN GW (S5/S8) .....	375
15.3.5 SGSN ↔ MME (S3) .....	375
15.3.6 SGSN ↔ Serving GW (S4) .....	376
15.3.7 SGSN ↔ SGSN (S16) .....	376

---

15.3.8	Trusted WLAN Access Network ↔ PDN GW (S2a) .....	377
15.3.9	ePDG ↔ PDN GW (S2b).....	377
15.3.10	User Plane .....	377
15.3.11	eNodeB ↔ Serving GW (S1-U).....	378
15.3.12	UE ↔ eNodeB ↔ Serving GW ↔ PDN GW (GTP-U).....	378
15.3.13	UE ↔ BSS ↔ SGSN ↔ Serving GW ↔ PDN GW (GTP-U).....	378
15.3.14	UE ↔ UTRAN ↔ Serving GW ↔ PDN GW (GTP-U) .....	379
15.3.15	UE ↔ UTRAN ↔ SGSN ↔ Serving GW ↔ PDN GW (GTP-U) .....	380
15.3.16	UE ↔ Trusted WLAN Access Network ↔ PDN GW (GTP-U).....	380
15.3.17	UE ↔ ePDG ↔ PDN GW (GTP-U).....	381
15.4	PMIP-Based Interfaces .....	382
15.4.1	Serving GW–PDN GW (S5/S8).....	382
15.4.2	Trusted Non-3GPP IP Access–PDN GW (S2a).....	382
15.4.3	ePDG–PDN GW (S2b) .....	384
15.5	DSMIPv6-Based Interfaces .....	385
15.5.1	UE–PDN GW (S2c).....	385
15.6	HSS-Related Interfaces and Protocols .....	388
15.6.1	General .....	388
15.6.2	MME–HSS (S6a) and SGSN–HSS (S6d).....	388
15.7	AAA-Related Interfaces.....	390
15.7.1	General .....	390
15.7.2	AAA Server–HSS (SWx) .....	391
15.7.3	Trusted Non-3GPP Access–3GPP AAA Server/Proxy (STa) .....	393
15.7.4	Untrusted Non-3GPP IP Access–3GPP AAA Server/Proxy (SWa).....	395
15.7.5	ePDG–3GPP AAA Server/Proxy (SWm) .....	397
15.7.6	PDN GW–3GPP AAA Server/Proxy (S6b) .....	399
15.7.7	3GPP AAA Proxy–3GPP AAA Server/Proxy (SWd).....	401
15.8	PCC-Related Interfaces.....	403
15.8.1	General .....	403
15.8.2	PCEF–PCRF (Gx).....	403
15.8.3	BBERF–PCRF (Gxa/Gxc).....	404
15.8.4	PCRF–AF (Rx) .....	405
15.8.5	TDF–PCRF (Sd) .....	406
15.8.6	OCS–PCRF (Sy) .....	409
15.8.7	PCRF–PCRF (S9).....	410
15.8.8	BPCF–PCRF (S9a) .....	411
15.8.9	SPR–PCRF (Sp).....	413
15.9	EIR-Related Interfaces.....	414
15.9.1	MME-EIR and SGSN-EIR Interfaces (S13 and S13').....	414
15.10	I-WLAN-Related Interfaces.....	415
15.10.1	UE–ePDG (SWu).....	415
15.11	ANDSF-Related Interfaces .....	417
15.11.1	ISMP Policy Node .....	418
15.11.2	Discovery Information Node .....	418
15.11.3	UE Location Node.....	419

---

15.11.4	ISRP Node.....	420
15.11.5	Ext Node.....	423
15.12	HRPD IW-Related Interfaces.....	423
15.12.1	Optimized Handover and Related Interfaces (S101 and S103).....	423
15.12.2	MME ↔ eHRPD Access Network (S101) .....	424
15.12.3	Serving GW ↔ HSGW (S103) .....	426
15.13	Interface to External Networks .....	427
15.13.1	General .....	427
15.13.2	Functions .....	428
15.14	CSS Interface .....	428
15.14.1	MME–CSS Interface (S7a) .....	428
<b>Chapter 16:</b>	<b>Protocols.....</b>	<b>431</b>
16.1	Introduction.....	431
16.2	GPRS Tunneling Protocol Overview .....	431
16.2.1	Protocol Structure.....	436
16.2.2	Control Plane (GTPv2-C).....	439
16.2.3	User Plane (GTPv1-U) .....	439
16.2.4	Protocol Format .....	443
16.3	Mobile IP .....	445
16.3.1	General .....	445
16.3.2	Host-Based and Network-Based Mobility Mechanisms .....	448
16.3.3	Basic Principles of Mobile IP.....	448
16.3.4	Mobile IPv6 Security .....	454
16.3.5	Packet Format.....	454
16.3.6	Dual-Stack Operation.....	458
16.3.7	Additional MIPv6 Features – Route Optimization .....	460
16.4	Proxy Mobile IPv6.....	461
16.4.1	General .....	461
16.4.2	Basic Principles .....	462
16.4.3	PMIPv6 Security .....	465
16.4.4	PMIPv6 Packet Format.....	466
16.4.5	Dual-Stack Operation .....	466
16.5	Diameter.....	467
16.5.1	Background .....	467
16.5.2	Protocol Structure.....	468
16.5.3	Diameter Nodes.....	469
16.5.4	Diameter Sessions, Connections, and Transport .....	470
16.5.5	Diameter Request Routing .....	471
16.5.6	Peer Discovery .....	471
16.5.7	Diameter Message Format.....	472
16.6	Generic Routing Encapsulation .....	474
16.6.1	Background .....	474
16.6.2	Basic Protocol Aspects .....	474
16.6.3	GRE Packet Format.....	475
16.7	S1-AP.....	476

16.8	Non-Access Stratum (NAS).....	478
16.8.1	EPS Mobility Management.....	478
16.8.2	EPS Session Management.....	479
16.8.3	Message Structure.....	479
16.8.4	Security-Protected NAS Messages .....	480
16.8.5	Message Transport .....	481
16.8.6	Future Extensions and Backward Compatibility .....	481
16.9	IP Security.....	481
16.9.1	Introduction.....	481
16.9.2	Encapsulated Security Payload and Authentication Header .....	483
16.9.3	Internet Key Exchange.....	485
16.9.4	IKEv2 Mobility and Multi-Homing.....	486
16.10	Extensible Authentication Protocol .....	487
16.10.1	Overview .....	487
16.10.2	Protocol.....	488
16.11	Stream Control Transmission Protocol .....	491
16.11.1	Background.....	491
16.11.2	Basic Protocol Features.....	491
16.11.3	Multi-Streaming.....	492
16.11.4	Multi-Homing .....	494
16.11.5	Packet Structure .....	495
<b>Chapter 17: Procedures .....</b>		<b>497</b>
17.1	Attachment and Detachment for E-UTRAN.....	497
17.1.1	Attachment Procedure for E-UTRAN .....	497
17.1.2	Detachment Procedure for E-UTRAN.....	500
17.2	Tracking Area Update for E-UTRAN.....	502
17.2.1	Tracking Area Update Procedure .....	502
17.2.2	TA Update with MME Change .....	503
17.3	Service Request for E-UTRAN .....	505
17.3.1	UE Triggered Service Request.....	505
17.3.2	Network Triggered Service Request .....	506
17.4	Intra- and Inter-3GPP Access Handover .....	507
17.4.1	Phases of the Handover Procedures.....	511
17.4.2	Handover Cases in EPS for 3GPP Accesses .....	514
17.4.3	Handover within E-UTRAN Access.....	514
17.4.4	Handover between E-UTRAN and Other 3GPP Accesses (GERAN, UTRAN) with S4-SGSN .....	519
17.4.5	Handover for Gn/Gp-Based SGSN.....	521
17.4.6	Handover between GERAN and UTRAN Access Using S4 SGSN and GTP/PMIP Protocol.....	524
17.5	Bearer and QoS-Related Procedures.....	525
17.5.1	Bearer Procedures for E-UTRAN.....	527
17.5.2	Bearer Procedures for GERAN/UTRAN.....	531

---

17.6	Attachment and Detachment for Non-3GPP Accesses .....	534
17.6.1	Attachment Procedure in Trusted WLAN Access Network (TWAN) Using GTPv2 on S2a .....	534
17.6.2	Detachment Procedure in Trusted WLAN Access Network (TWAN) Using GTPv2 on S2a .....	535
17.6.3	Attachment Procedure in Untrusted Non-3GPP Access Using PMIPv6 (S2b) .....	536
17.6.4	Detachment Procedure in Untrusted Non-3GPP Access Using PMIPv6 (S2b) .....	538
17.6.5	Attachment Procedure in Trusted Non-3GPP Access Using DSMIPv6 (S2c).....	539
17.6.6	Detachment Procedure in Trusted Non-3GPP Access Using DSMIPv6 (S2c).....	540
17.7	Intersystem Handover Between 3GPP and Non-3GPP Accesses .....	541
17.7.1	Overview .....	541
17.7.2	Details of Handover in EPS with Non-3GPP Accesses .....	543
17.8	QoS-Related Procedures in Non-3GPP Accesses .....	557
<b>Part V: Conclusion and Future of EPS .....</b>		<b>559</b>
<b>Chapter 18: Conclusions and Looking Ahead .....</b>		<b>561</b>
<i>Appendix A: Standards Bodies Associated with EPS .....</i>		<i>563</i>
<i>References.....</i>		<i>571</i>
<i>Index .....</i>		<i>577</i>
