List of Contributors	xv
Acknowledgements	xvii

1. General Introduction

KAI SAVOLAINEN

1.1. Use and Applications of Engineered Nanomaterials	3
1.2. What is a Nanomaterial?	5
1.3. Exposure to Engineered Nanomaterials Merits Attention	6
1.4. How to Measure Exposure to Engineered Nanomaterials	8
1.5. How About the Hazards?	9
1.6. Requirements for the Assessment and Management of Risks of Engineered Nanomaterials	11
1.7. To Be Expected in the Future	12
1.8. Conclusions	12
References	13

2. Nanotechnology and Exposure Scenarios

SHEONA A.K. READ, ARACELI SÁNCHEZ JIMÉNEZ,
BRYONY L. ROSS, ROBERT J. AITKEN, MARTIE VAN TONGEREN

2.1. Introduction	17
2.2. Development of Nanotechnology	18
2.3. Production of Engineered Nanomaterials	19
2.4. Applications of Nanotechnology	20
2.5. Exposure Scenarios for Nanomaterials	28
2.6. Exposure Scenario Case Examples	36
2.7. Summary	55
Acknowledgements	55
References	55

3. Nanomaterials and Human Health

HARRI ALENIUS, JULIA CATALÁN, HANNA LINDBERG,
HANNU NORPPA, JAANA PALOMÄKI, KAI SAVOLAINEN

- 3.1. Introduction 59
- 3.2. Biokinetics, Cardiovascular and Neurotoxicity
of Engineered Nanomaterials 66
- 3.3. Inflammatory Effects of Engineered Nanomaterials 75
- 3.4. Nanomaterial-Induced Pulmonary Inflammation 79
- 3.5. Nanomaterial-Induced Skin Inflammation 89
- 3.6. Genotoxicity of Engineered Nanomaterials 93
- 3.7. Carcinogenicity of Engineered Nanomaterials 110
- 3.8. Implications of Health Effects and Safety of Engineered
Nanomaterials for Nanotechnologies 117
- 3.9. Conclusions 122
- References 122

4. From Source to Dose: Emission, Transport, Aerosol Dynamics and Dose Assessment for Workplace Aerosol Exposure

MARTIN SEIFENBUSCH, MINGZHOU YU, CHRISTOF ASBACH, UWE RATING,
THOMAS A.J. KUHLBUSCH, GÖRAN LIDÉN

- 4.1. Sources of Nanoparticles in the Workplace (*Seipenbusch*) 135
- 4.2. Aerosol Dynamics in Workplace Atmospheres (*Seipenbusch*) 137
- 4.3. Modelling Approaches to Aerosol Dynamics and Transport in the
Workplace (*Yu*) 141
- 4.4. Applications of Aerosol Dynamics and Flow Modelling
to Workplace Exposure (*Mingzhou Yu*) 147
- 4.5. Modelling of the Evolution of a Nanoparticle Aerosol in a Simulated Workplace
(*Asbach, Rating, Kuhlbusch*) 152
- Acknowledgement 157
- 4.6. Dose Assessment (*Lidén*) 157
- References 166

5. Monitoring and Sampling Strategy for (Manufactured) Nano Objects Agglomerates and Aggregates (NOAA): Potential Added Value of the NANODEVICE Project

DERK H. BROUWER, GÖRAN LIDÉN, CHRISTOF ASBACH, MARKUS G.M. BERGES,
MARTIE VAN TONGEREN

- 5.1. Introduction 173
- 5.2. Measurement Principles and Instrumentation 176
- 5.3. Measurement Strategy 191
- 5.4. New Devices (Pre-Prototypes) Developed by NANODEVICE and
Implications for Measurement Strategies 196
- 5.5. Conclusions 202
- References 202

6. Quality Control of Measurement Devices – What Can Be Done to Guarantee High-Quality Measurements?

HANS-GEORG HORN, DIRK DAHMANN, CHRISTOF ASBACH

- 6.1. Responsibilities of the manufacturers (*Horn*) 207
- 6.2. Responsibilities of the Users (*Dahmann*) 213
- 6.3. External Instrument Comparison (*Asbach*) 216
- References 221

7. Examples and Case Studies

CHRISTOF ASBACH, OLIVIER AGUERRE, CHRISTOPHE BRESSOT, DERK H. BROUWER, UDO GOMMEL, BORIS GORBUNOV, OLIVIER LE BIHAN, KELD ALSTRUP JENSEN, HEINZ KAMINSKI, MARKUS KELLER, ISMO KALEVI KOPONEN, THOMAS A.J. KUHMBUSCH, ANDRE LECLOUX, MARTIN MORGENEYER, ROBERT MUIR, NEERAJ SHANDILYA, BURKHARD STAHLMECKE, ANA MARÍA TODEA

- 7.1. Introduction 224
- 7.2. Emission Chambers, a Method for Nanosafety (*Le Bihan, Morgeneyer, Shandilya, Aguerre, Bressot*) 226
 - Acknowledgements 231
- 7.3. Exposure of Workers to Carbon Nanotubes in a Commercial Production Facility; Preliminary Results in the Frame of Risk Assessment and Risk Management (*Lecloux, Gorbunov, Brouwer, Muir*) 231
 - Acknowledgements 242
- 7.4. Investigations on CNT Release from Composite Materials During End of Life (*Stahlmecke, Asbach, Todea, Kaminski, Kuhlbusch*) 242
 - Acknowledgement 255
- 7.5. The Need for Speed: Detection and Characterization of Particle Release During Powder Handling Using On-line Monitors (*Jensen, Koponen*) 255
 - Acknowledgements 268
- 7.6. Particulate Emissions from Equipment Used in Ultra Clean Areas of the Semiconductor Industry (*Gommel, Keller*) 268
 - References 275

8. Risk Assessment and Risk Management

MARKUS G.M. BERGES, ROBERT J. AITKEN, SHEONA A.K. READ, KAI SAVOLAINEN, MARITA LUOTAMO, THOMAS BROCK

- 8.1. Introduction 279
- 8.2. Basic Approaches to Control Exposure to Hazardous Substances (*By Thomas Brock*) 280
 - 8.3. Hierarchy of Control 288
- 8.4. Excursus: Safe Handling of Nanomaterials in the Laboratory 296
- 8.5. Health Risk Management of Engineered Nanomaterials 300
- 8.6. Risk Governance, Policy Aspects and Legislation in the European Union and the United States 308
 - Disclaimer 320
 - Acknowledgement 320
 - References 320

9. Future Outlook of Engineered Nanomaterials and Nanotechnologies

KAI SAVOLAINEN

9.1. Introduction	327
9.2. New Principles for Engineered Nanomaterials Risk and Safety Governance	330
9.3. Key Areas of Nanosafety Research and the Expected Achievements in These Research Areas	331
9.4. Future Health and Safety Requirements of Nanomaterials and Nanotechnologies and Identification of the Knowledge Needs and Gaps	331
9.5. The Complexity of Nanomaterials and Their Control and Regulation	333
9.6. Progress of Nanotechnologies on Safety Requirements of Nanomaterials and Technologies	333
9.7. Conclusions	335
Acknowledgements	336
References	336
