Foreword	vii
Preface	ix
Acknowledgements	xiii
1 Special Foundations	1.1
1.1 Foundations for Special Structures	1.1
1.1.1 Foundations for Water Tanks and Silos	1.1
1.1.2 Foundations for Chimneys and Cooling Towers	1.2
1.1.3 Foundations for Telecommunication Towers	1.3
1.1.4 Foundations for Transmission Line Towers	1.4
1.1.5 Design of Footings subjected to Tension	1.6
1.1.6 Piles subjected to Tension	1.6
1.1.7 Poles	1.7
1.1.8 Anchors	1.8
1.1.9 Foundations for Guyed Structures	1.8
1.1.10 Foundations for Industrial Structures	1.9
1.1.11 Foundations for Ground Storage Tanks	1.9
1.1.12 Foundations for Underground Structures	1.10
1.1.13 Foundations for Coastal and Offshore Structures	1.13
1.1.14 Marine Piles	1.14
1.1.15 Foundations for Offshore Drilling Platforms	1.15
1.1.16 Foundations for Offshore Defence Installations	1.17
1.2 Foundations in Special Soils	1.18
1.2.1 Foundations in Expansive Soils	1.18
1.2.2 Foundations in Soft and Compressible Soils	1.20
1.2.3 Foundations on Overconsolidated Desiccated Soils	1.20
1.2.4 Foundations in Other Soils	1.20
1.2.5 Foundations under Special Environments	1.21
1.2.6 Foundations to resist Dynamic Loads	1.21
<i>References</i>	1.22

2	New Foundations	2.1
2.1	Special Piles	2.1
2.1.1	Tapered Piles	2.1
2.1.2	Underreamed Piles	2.6
2.1.3	Screw Piles	2.9
2.1.4	Old and New Screw Piles	2.10
2.2	Prestressed Foundations	2.14
2.2.1	Prestressed Concrete Piles	2.14
2.2.2	Prestressed Concrete Pavements	2.15
2.2.3	Prestressing in Underpinning	2.17
2.2.4	Other Examples of Foundation Prestressing	2.17
2.3	Shell Foundations	2.19
2.3.1	Scope of using Shells in Foundations	2.20
2.3.2	Geometric Forms of Shells used in Foundations	2.21
2.3.3	Analysis of Foundation Shells	2.24
2.3.4	Design of Shell Foundations	2.30
2.3.5	Construction of Shell Foundations	2.32
2.3.6	Shell Anchors	2.34
	<i>References (Secs. 2.1 and 2.2)</i>	2.35
	<i>Select Bibliography (Sec. 2.3)</i>	2.38
3	New Soil Retaining Techniques	3.1
3.1	Reinforced Earth	3.1
3.1.1	The Mechanics of the Reinforced Earth Technique	3.2
3.1.2	Design	3.3
3.1.3	History and Development	3.5
3.1.4	Materials	3.6
3.1.5	Construction	3.7
3.1.6	Reinforced Earth Construction using GI Sheets and Strips	3.7
3.1.7	A Simple Soil Reinforcing Technique	3.8
3.1.8	Sandwich Construction	3.9
3.1.9	Use of Anchor Blocks	3.9
3.1.10	Reinforcing Foundation Soil	3.10
3.1.11	Uses of Reinforced Earth	3.12
3.1.12	Advantages of Reinforced Earth	3.12
3.2	Nehemiah Anchored Earth Wall	3.15
3.2.1	The Nehemiah AE Wall	3.15

3.3	Prestressed Ground Anchors	3.17
3.3.1	Design	3.19
3.3.2	Prestressed Ground Anchors – Additional Aspects	3.23
3.3.3	Load Tests of Ground Anchors	3.25
3.3.4	History	3.25
3.3.5	Rock Bolts	3.26
3.4	Diaphragm Walls and Bored Pile Walls	3.26
3.4.1	Diaphragm Walls	3.26
3.4.2	Bored Pile Walls	3.27
3.4.3	Metro Construction by the ‘Cut and Cover’ Method	3.28
3.4.4	BAUER – Piling	3.28
3.5	Soil Nailing	3.32
3.5.1	Reinforced Earth and Soil Nailing	3.34
3.5.2	Soil Nailing – Advantages	3.35
3.6	Gabions	3.36
3.6.1	Terramesh	3.41
3.6.2	Rock-Fall Protection	3.43
3.6.3	Other Uses	3.46
3.7	Crib Walls	3.47
3.8	“Controlled Yielding Technique” for the Reduction of Lateral Earth Pressure	3.50
3.9	Retaining Walls with Relieving Shelves	3.51
3.10	Cement-Stabilised Backfill	3.52
3.11	Texsol	3.52
3.12	Geotechnical use of Soil Bags	3.52
3.13	Trench Cutter Systems	3.53
	<i>References</i>	3.56
4	Geosynthetics and their Applications in Geotechnical Engineering	4.1
4.1	Geosynthetics – An Overview	4.1
4.1.1	Tests on Geotextiles	4.3
4.1.2	Geotextile as Filter	4.4
4.1.3	Reinforced Earth as Retaining Structure	4.5
4.2	Polyfelt Geotextiles and their Uses	4.6
4.2.1	Subgrade Stabilisation	4.6
4.2.2	Drainage and Filtration	4.6
4.2.3	Reinforcement of Slopes and Embankments	4.7
4.2.4	Soft Soil Stabilisation using Geotextile with Bamboo	4.8
4.2.5	Railway Engineering	4.9

4.2.6	Geomembrane Protection	4.9
4.2.7	Polyfelt 'Rock Strata' Geogrids	4.10
4.2.8	Design of Geotextile-Stabilised Earth Structures over Soft Soils	4.10
4.2.9	Drainage and Filtration	4.10
4.2.10	Construction	4.12
4.2.11	Riverbank and Coastal Erosion	4.13
4.2.12	Filtration and Permeability Criteria	4.13
4.3	Huesker Geotextiles	4.15
4.3.1	Examples	4.15
4.3.2	Geotextiles in Landfill Construction	4.21
4.3.3	Hydraulic Engineering	4.22
4.4	Netlon – Products and Uses	4.23
4.4.1	Properties	4.23
4.4.2	Railway Track Bed Stabilisation with Geogrids	4.23
4.4.3	Drainage	4.23
4.4.4	Geogrids for Slope Protection	4.25
4.4.5	Reinforced Grass	4.26
4.4.6	Waterfront Protection	4.26
4.5	Fibertex Geotextiles	4.27
4.6	Nylex Drains	4.27
4.7	Vinidex Drains	4.29
4.8	Fortrac Geogrids	4.29
4.9	Techfab India–Geosynthetics	4.29
4.9.1	Geogrids	4.29
4.9.2	'TechDrain' – Prefabricated Vertical Drains	4.29
4.9.3	'TechBox' Gabions	4.30
4.10	Strata Geosystems	4.31
4.10.1	Products	4.31
4.10.2	Soil Encapsulation	4.32
4.11	Geotextiles in Natural Fibres	4.32
4.11.1	Geotextiles in Jute	4.33
4.11.2	Geotextiles in Coir	4.34
4.12	Design with Geotextiles	4.36
4.12.1	Unpaved Roads	4.36
4.12.2	Paved Roads	4.37
4.12.3	Railways	4.37
4.12.4	Drainage	4.38
4.12.5	Erosion Control	4.40
4.12.6	Soil Reinforcement	4.41
4.12.7	Stability	4.42

4.13	Slope Protection	4.43
4.13.1	Coastal Slope Protection by Anchored Geosynthetics	4.43
4.13.2	Slope Protection by Reinforcing with Geotextile – Case History	4.44
4.14	Geotextiles for Hillside Development	4.45
4.15	Nehemiah Case Histories	4.46
4.16	Green Mur	4.48
4.17	'Rockmur' for Slope Stabilisation	4.49
	<i>References</i>	4.50

5 Special Ground Improvement Methods 5.1

5.1	Vibro-Compaction of Soils – Introduction	5.1
5.1.1	Vibroflotation	5.1
5.1.2	Ground Improvement by Vibro-Techniques	5.3
5.1.3	Stone Columns	5.3
5.2	Ground Improvement by KELLER	5.4
5.2.1	Vibro-Compaction	5.5
5.2.2	Vibro-Replacement	5.6
5.2.3	Design Principles	5.6
5.2.4	Design of Stone Columns	5.9
5.2.5	Examples of Vibro-Replacement	5.11
5.2.6	The Vibro-Technique – Additional Aspects	5.14
5.3	Soilcrete	5.19
5.3.1	Uses	5.19
5.3.2	Production	5.19
5.3.3	Soilcrete Construction	5.20
5.3.4	Soilcrete – Applications	5.20
5.3.5	Case Histories from Germany	5.23
5.3.6	Soilcrete by Jet Grouting	5.24
5.3.7	Soilcreting – Additional Features	5.26
5.4	Compaction Grouting	5.28
5.4.1	Design	5.30
5.5	Soil Fracturing – Soilfrac	5.31
5.5.1	Soilfrac – Additional Aspects	5.33
5.6	Dynamic Compaction	5.35
5.6.1	Dynamic Consolidation – Additional Features	5.36

5.7	Vacuum Consolidation	5.40
5.7.1	Vacuum Preconsolidation – Features	5.41
5.7.2	IFCO’s Vacuum Preconsolidation	5.42
5.7.3	Menard Vacuum Consolidation – Additional Features	5.42
	<i>References</i>	5.45
 Advanced Field Tests in Geotechnical Engineering		 6.1
6.1	Dynamic Pile Testing	6.1
6.1.1	Introduction	6.1
6.1.2	Dynamic Pile Load Testing	6.2
6.1.3	Pile Integrity Tester (PIT)	6.3
6.1.4	Pile Driving Analyser (PDA)	6.4
6.1.5	Specifications	6.6
6.1.6	Additional Features of Dynamic Testing	6.8
6.1.7	The Associated Softwares	6.10
6.1.8	Methods of Analysing Test Data	6.11
6.1.9	TNO	6.13
6.1.10	Equipments	6.15
6.2	Statnamic Load Testing	6.18
6.3	Load Testing using Bi-directional Osterberg Cell	6.20
6.4	Pressuremeter Testing	6.22
6.4.1	Menard Pressuremeter – Additional Details	6.24
6.4.2	Self-boring Pressuremeter	6.28
6.5	The Flat Dilatometer Test (DMT)	6.29
6.5.1	Marchetti Dilatometer – Additional Features	6.31
6.6	Piezocone Test	6.33
6.7	Some Field Instruments	6.36
6.7.1	Digitilt Inclinometer	6.36
6.7.2	Horizontal Inclinometer	6.38
6.7.3	Standpipe Piezometer	6.38
6.7.4	Water Level Indicator	6.40
6.8	New Field Testing Equipments	6.40
6.9	Radar Tomography for checking Pile Integrity	6.41
6.10	Ground Penetrating Radar (GPR)	6.43
6.11	Centrifugal Testing of Geotechnical Models	6.44
6.11.1	Necessity	6.44
6.11.2	Principle of Centrifugal Model Testing	6.45
6.11.3	The Centrifuge	6.45

6.11.4	Measurements	6.47
6.11.5	History of Development	6.47
	<i>References</i>	6.48

7	Some Additional Topics of Geotechnical Engineering Interest	7.1
7.1	Skirted Footings	7.1
7.2	Micropiles	7.2
7.3	Root Piles	7.4
7.4	V-Pile	7.4
	7.4.1 PMI Pile	7.5
7.5	Piled Rafts	7.6
7.6	The Observational Method	7.7
7.7	Analysis/Design Softwares	7.8
7.8	CHASM – A Special Software for Slope Stability	7.9
7.9	The Stabilising Action of Drilling Mud	7.9
	7.9.1 Mechanics of Caving-in of Drill Holes and Excavations	7.10
	7.9.2 Drilling Mud	7.11
	7.9.3 The Action of Drilling Mud	7.11
7.10	Foundation Materials	7.12
	7.10.1 Subsurface Corrosion	7.12
	7.10.2 Influence of Ground Environment on Deep Foundations	7.13
	7.10.3 Water Currents in Subsoil	7.14
7.11	Cathodic Protection	7.14
7.12	Quality Control for Deep Foundations	7.15
7.13	Controlled Modulus Column	7.16
7.14	Protection of Beaches against Coastal Erosion (BMS)	7.16
	7.14.1 The System	7.16
	7.14.2 Operation	7.16
7.15	Vertical Band Drains	7.18
7.16	Anco-Drain	7.19
7.17	Norwegian Rock Facilities	7.19
7.18	Stabilisation of Expansive Soils using Lime	7.19
7.19	Cohesive Non-Swelling Soil (CNS)	7.20
	7.19.1 The Function of Cohesive Non-Swelling Layer	7.20
	7.19.2 Examples of Uses	7.22
7.20	Granular Pile Anchor in Swelling Soils	7.23
7.21	New Light-Weight Embankment Material	7.23
	7.21.1 Expanded Polystyrene (EPS) as a Fill Material	7.24

7.22	Waterproofing Basements	7.26
7.23	Ionic Soil Stabiliser	7.26
7.23.1	Stabilising Action of ISS	7.26
7.24	Soil Stabilisation with Unisol 91	7.28
7.25	Vetiver	7.28
7.26	Pipe Jacking	7.29
7.26.1	Jacking Circular Pipes	7.29
7.26.2	Box Jacking	7.29
7.27	Hydraulic Piling Hammer	7.31
7.28	Interface of Mechanical Engineering with Geotechnical Engineering	7.31
7.28.1	Soil Compaction – Performance	7.31
7.29	Sanitary Landfill	7.32
7.30	Flyash Disposal	7.34
7.31	Bio-Geotechnical Issues	7.35
7.32	Civil Engineering Uses of Used Tyres	7.36
7.33	Megastructures – Disturbances	7.36
7.34	‘Well’ as Shallow Foundation	7.36
7.35	‘Keystone’ Wall Systems	7.36
7.36	Bamboo-Reinforced Soil-Cement for Rural Construction	7.37
	<i>References</i>	7.38

8 Some Important Case Histories relating to Geotechnical and Foundation Engineering

		8.1
8.1	St. Andrew’s Church, Madras	8.1
8.2	Rion-Antirion Bridge	8.1
8.3	Foundations for the High-Rise Structures at Times Square	8.2
8.4	The Petronas Twin Towers	8.4
8.5	Burj Dubai	8.7
8.6	The Leaning Tower of Pisa	8.10
8.7	Suez Canal	8.16
8.8	Panama Canal	8.19
8.9	The Pyramids	8.21
	<i>References</i>	8.23
