

Table of Contents

1. Aircraft Equations of Motion	1
1.1 Introduction	1
1.2 Reference Frames and Assumptions	2
1.3 Conservation of the Linear Momentum Equations (CLMEs)	3
1.4 Conservation of the Angular Momentum Equations (CAMEs)	6
1.5 Conservation of the Angular Momentum Equations (CAMEs) with Rotor Effects	10
1.6 Euler Angles	11
1.7 Flight Path Equations (FPEs)	12
1.8 Kinematic Equations (KEs)	14
1.9 Gravity Equations (GEs)	16
1.10 Summary of the Aircraft Equations of Motion	16
1.11 Definition of Steady-State and Perturbation Conditions	17
1.12 Aircraft Equations of Motion at Steady-State Conditions	18
1.13 Aircraft Equations of Motion at Perturbed Conditions	19
1.14 Small Perturbation Equations from a Steady-State Level Flight	22
1.15 Summary	23
References	26
Student Sample Problems	26
Problems	32
2. Review of Basic Concepts of Aerodynamic Modeling	37
2.1 Introduction	37
2.2 Review of Key Aerodynamic Characteristics for Wing Sections	37
2.3 Wing Planforms and Wing Lift Curve Slope	42
2.4 Review of the Downwash Effect and Effectiveness of Control Surfaces	48
2.5 Determination of the Aerodynamic Center for Wing and Wing + Fuselage	53
2.6 Approaches to the Modeling of Aerodynamic Forces and Moments	57
2.6.1 Wind Tunnel Analysis	57
2.6.2 CFD Analysis	58
2.6.3 Parameter Identification from Flight Data	59
2.6.4 Correlation from Wind Tunnel Data and Empirical “Build-Up” Analysis	60
2.7 Summary	60
References	61
Student Sample Problems	62
Problems	75
3. Modeling of Longitudinal Aerodynamic Forces and Moments	78
3.1 Introduction	78
3.2 Aircraft Stability Axes	79
3.3 Modeling of the Longitudinal Steady-State Aerodynamic Forces and Moment	79
3.4 Modeling of F_{AX_1}	80
3.5 Modeling of F_{AZ_1}	83
3.6 Modeling of M_{A_1}	87
3.7 Aircraft Aerodynamic Center	89
3.8 Summary of the Longitudinal Steady-State Aerodynamic Forces and Moment	91
3.9 Modeling of the Longitudinal Small Perturbation Aerodynamic Forces and Moments	91
3.9.1 Modeling of $(c_{D_1}, c_{L_1}, c_{m_1})$	93
3.9.2 Modeling of $(c_{D_u}, c_{L_u}, c_{m_u})$	93
3.9.3 Modeling of $(c_{D_{\dot{\alpha}}}, c_{L_{\dot{\alpha}}}, c_{m_{\dot{\alpha}}})$ and $(c_{D_q}, c_{L_q}, c_{m_q})$	94
3.10 Summary of Longitudinal Stability and Control Derivatives	96

3.11	Summary	100
	References	100
	Student Sample Problems	101
	Case Study	110
	Short Problems	127
	Problems	128
4.	Modeling of Lateral Directional Aerodynamic Forces and Moments	135
4.1	Introduction	135
4.2	Modeling of F_{AY}	137
4.2.1	Conceptual Modeling of $c_{Y\beta}$	138
4.2.2	Mathematical Modeling of $c_{Y\beta}$	140
4.2.3	Modeling of $c_{Y\delta_A}$	147
4.2.4	Modeling of $c_{Y\delta_R}$	147
4.3	Modeling of L_{A_1}	149
4.3.1	Conceptual Modeling of $c_{l\beta}$	150
4.3.2	Mathematical Modeling of $c_{l\beta}$	155
4.3.3	Modeling of $c_{l\delta_A}$	160
4.3.4	Modeling of $c_{l\delta_R}$	166
4.4	Modeling of N_{A_1}	168
4.4.1	Conceptual Modeling of $c_{n\beta}$	169
4.4.2	Mathematical Modeling of $c_{n\beta}$	172
4.4.3	Modeling of $c_{n\delta_A}$	174
4.4.4	Modeling of $c_{n\delta_R}$	176
4.5	Summary of the Lateral Directional Steady-State Force and Moments	177
4.6	Modeling of the Small Perturbation Lateral Directional Aerodynamic Force and Moments	178
4.6.1	Modeling of $c_{Y\beta}, c_{l\beta}, c_{n\beta}$	180
4.6.2	Modeling of c_{Yp}	180
4.6.3	Modeling of c_{lp}	181
4.6.4	Modeling of c_{np}	183
4.6.5	Modeling of c_{Yr}	185
4.6.6	Modeling of c_{lr}	185
4.6.7	Modeling of c_{nr}	187
4.7	Summary of Longitudinal and Lateral Directional Aerodynamic Stability and Control Derivatives	189
4.8	Final Overview and Ranking of the Importance of the Aerodynamic Coefficients	196
4.9	Summary of the Modeling of the Longitudinal and Lateral-Directional Aerodynamic Forces and Moments	198
	References	200
	Student Sample Problems	200
	Case Study	236
	Short Problems	262
	Problems	263
5.	Review of Basic Aircraft Performance and Modeling of Thrust Forces and Moments	268
5.1	Introduction	268
5.2	Review of Different Aircraft Propulsion Systems	268
5.2.1	Piston Engine (Propeller) Aircraft Engines	269
5.2.2	Turboprop Aircraft Engines	270
5.2.3	Turbojet Aircraft Engines	271
5.2.4	Turbofan Aircraft Engines	272
5.2.5	Ramjet Aircraft Engines	273
5.3	Review of Basic Aircraft Performance	273

5.4	Power at Level Flight	274
5.4.1	Maximum Aerodynamic Efficiency	275
5.4.2	Minimum Aerodynamic Drag	275
5.4.3	Minimum Power Required	277
5.5	Determination of Power Required	279
5.6	Determination of Power Available	282
5.7	Modeling of the Thrust Forces and Moments	287
5.7.1	Modeling of the Steady-State Thrust Forces and Moments	288
5.7.2	Modeling of the Small Perturbation Thrust Forces and Moments	291
5.8	Summary	294
	References	296
	Student Sample Problems	296
	Problems	304

6. Aircraft Stability and Design for Trim Conditions 305

6.1	Introduction	305
6.2	Concept of Aircraft Stability	305
6.3	Criteria for Aircraft Static Stability	306
6.3.1	Static Stability Criteria #1 (SSC #1)	307
6.3.2	Static Stability Criteria #2 (SSC #2)	308
6.3.3	Static Stability Criteria #3 (SSC #3)	308
6.3.4	Static Stability Criteria #4 (SSC #4)	309
6.3.5	Static Stability Criteria #5 (SSC #5)	310
6.3.6	Static Stability Criteria #5, #6, and #7 (SSC #5, SSC #6, SSC #7)	311
6.3.7	Static Stability Criteria #9 (SSC #9)	311
6.3.8	Static Stability Criteria #10 (SSC #10)	312
6.4	Longitudinal Analysis of Steady-State Straight Flight	313
6.5	Lift Chart and Trim Diagram	322
6.5.1	Lift Chart	322
6.5.2	Trim Diagram	324
6.5.3	Trim Diagrams for Different Classes of Aircraft	329
6.5.4	Trim Diagrams for Thrust Axis Above/Below Center of Gravity	329
6.6	Lateral Directional Analysis of Steady-State Straight Flight	332
6.7	Summary	340
	References	340
	Student Sample Problems	340
	Problems	349

7. Solution of the Aircraft Equations of Motion Based on Laplace Transformations and Transfer Functions 352

7.1	Introduction	352
7.2	Application of Laplace Transformations to the Longitudinal Small Perturbation Equations	353
7.3	Routh–Hurwitz Analysis of the Longitudinal Stability	358
7.4	Longitudinal Dynamic Modes: Short Period and Phugoid	360
7.5	Solution of the Longitudinal Equations	361
7.6	Short Period Approximation	363
7.7	Phugoid Approximation	366
7.8	Summary of the Longitudinal Equations	369
7.9	Application of Laplace Transformations to the Lateral Directional Small Perturbation Equations	371
7.10	Routh–Hurwitz Analysis of the Lateral Directional Stability	376
7.11	Lateral Directional Dynamic Modes: Rolling, Spiral, and Dutch Roll	377
7.12	Solution of the Lateral Directional Equations	379

7.13	Rolling Approximation	382
7.14	Summary of Lateral Directional Equations	385
7.15	Sensitivity Analysis for the Aircraft Dynamics	386
7.15.1	Short Period Sensitivity Analysis	387
7.15.2	Phugoid Sensitivity Analysis	394
7.15.3	Sensitivity Analysis for the Lateral Directional Parameters	398
7.16	Summary	407
	References	407
	Student Sample Problems	407
	Problems	430

8. State Variable Modeling of the Aircraft Dynamics 432

8.1	Introduction	432
8.2	Introduction to State Variables for Nonlinear Systems	433
8.3	Introduction to State Variables for Linear/Linearized Systems	433
8.4	State Variable Modeling of the Longitudinal Dynamics	435
8.5	State Variable Modeling of the Lateral Directional Dynamics	440
8.6	Augmentation of the Aircraft State Variable Modeling	445
8.6.1	Modeling of the Altitude (h)	445
8.6.2	Modeling of the Flight Path Angle (γ)	446
8.6.3	Modeling of the Engine Dynamics	446
8.6.4	Modeling of the Actuator Dynamics	446
8.6.5	Modeling of the Atmospheric Turbulence	447
8.7	Summary of State Variable Modeling of the Aircraft Dynamics	447
8.8	Summary	450
	References	450
	Student Sample Problems	450
	Problems	470

9. Introduction to Modern Flight Simulation Codes 476

9.1	Introduction	476
9.2	Introduction to the Flight Dynamics & Control (FDC) Toolbox	479
9.2.1	Equations of Motion within the FDC Simulation Environment	479
9.2.2	FDC Modeling of Beaver Aerodynamic Forces and Moments	483
9.2.3	Alternative Approach for FDC Modeling of Aerodynamic Forces and Moments	485
9.2.4	Case Study #1: FDC Modeling of Look-Up Tables Based Aerodynamic Coefficients	486
9.2.5	FDC Modeling of the Gravity Force	493
9.2.6	FDC Modeling of the Atmospheric Turbulence Force	493
9.2.7	FDC Modeling of the Beaver Propulsive Forces and Moments	494
9.2.8	Case Study #2: FDC Modeling of Propulsive Forces and Moments	496
9.2.9	Auxiliary FDC Blocks	498
9.2.10	Additional FDC Blocks	503
9.3	Introduction to the Aerospace Blockset by Mathworks	503
9.3.1	General Organization of the Aerospace Blockset	503
9.3.2	Introduction to the Environment Library	504
9.3.3	Introduction to the Flight Parameters Library	506
9.3.4	Introduction to the Equations of Motion Library	506
9.3.5	Introduction to the Aerodynamics Library	508
9.3.6	Introduction to the Propulsion Library	508
9.3.7	Introduction to the Utilities Library	509
9.3.8	Introduction to the Mass Properties Library	510
9.3.9	Introduction to the Actuators Library	511
9.3.10	Introduction to the GNC and Animation Libraries	511

9.4	Introduction to AIRLIB	512
9.4.1	AIRLIB's Structure	512
9.4.2	Generic Aircraft Model: Continuous-time Block	512
9.4.3	Generic Aircraft Model: Discrete-time Block	515
9.4.4	Collection of Aircraft Models	516
9.4.5	Alternative Model Implementation	517
9.4.6	Additional Tools within AIRLIB: The Function ' <i>air3m</i> '	517
9.4.7	Additional Tools within AIRLIB: The Function ' <i>ab2dv</i> '	518
9.5	Summary	518
	References	518
	Student Sample Problems	519

10. Pilot Ratings and Aircraft Handling Qualities 523

10.1	Introduction	523
10.2	Aircraft Flight Envelope	524
10.3	Levels of Aircraft Flying Qualities: Cooper-Harper Pilot Rating	526
10.3.1	Aircraft Control Authority	526
10.3.2	Pilot Workload	526
10.3.3	Pilot Compensation	529
10.3.4	Levels of Flying Qualities	529
10.4	Classes of Aircraft	531
10.5	Classification of Aircraft Maneuvers and Mission Profile	531
10.6	Flying Quality Requirements for the Longitudinal Dynamics	532
10.6.1	Longitudinal Control Forces	533
10.6.2	Requirements for the Damping for the Phugoid Mode	535
10.6.3	Requirements for the Short Period Mode	536
10.7	Flying Quality Requirements for the Lateral Directional Dynamics	536
10.7.1	Lateral Directional Control Forces	536
10.7.2	Requirements for the Dutch Roll Mode	538
10.7.3	Requirements for the Spiral Mode	539
10.7.4	Requirements for the Rolling Mode	539
10.7.5	Requirements for the Roll Control Effectiveness	539
10.7.6	Additional Requirements for Steady Sideslips	541
10.8	Summary	541
	References	541

Appendix A Review of Useful Topics 543

Appendix A.1*	Review of Vector Operations	544
Appendix A.2	Review of Matrix Operations	548
Appendix A.3	Review of Center of Gravity and Inertial Properties	558
Appendix A.4	Review of Application of Laplace Transform to Linear Constant Coefficient: Differential Equations	564
Appendix A.5	Review of First and Second Order Systems	575
Appendix A.6	Review of Standard Atmospheric Model	581

Appendix B Data for Different Aircraft 584

Appendix B.1	Introduction	584
Appendix B.2	Aircraft 1—Cessna 182	586
Appendix B.3	Aircraft 2—Cessna 310	589
Appendix B.4	Aircraft 3—Beech 99	592
Appendix B.5	Aircraft 4—Cessna T37-A	595
Appendix B.6	Aircraft 5—Cessna 620	598
Appendix B.7	Aircraft 6—Learjet 24	601

Appendix B.8	Aircraft 7—Boeing 747-200	604
Appendix B.9	Aircraft 8—SIAI Marchetti S-211	607
Appendix B.10	Aircraft 9—Lockheed F-104	610
Appendix B.11	Aircraft 10—McDonnell Douglas F-4	613
Reference		615

Appendix C Detailed Drawings for Different Aircraft 616

Appendix C.1	Introduction	617
Appendix C.2	Aircraft 1—Aeritalia Fiat G-91	618
Appendix C.3	Aircraft 2—Beech 99	621
Appendix C.4	Aircraft 3—Boeing B52	624
Appendix C.5	Aircraft 4—Boeing B727-200	627
Appendix C.6	Aircraft 5—Boeing B737-600	630
Appendix C.7	Aircraft 6—Boeing B747-200	633
Appendix C.8	Aircraft 7—Boeing B757-200	637
Appendix C.9	Aircraft 8—Boeing B767-200	640
Appendix C.10	Aircraft 9—Cessna Citation CJ3	643
Appendix C.11	Aircraft 10—Cessna T37	645
Appendix C.12	Aircraft 11—General Dynamics F-16	649
Appendix C.13	Aircraft 12—Grumman F-14	652
Appendix C.14	Aircraft 13—Learjet 24	655
Appendix C.15	Aircraft 14—Lockheed F-104	658
Appendix C.16	Aircraft 15—Lockheed F-22	661
Appendix C.17	Aircraft 16—Lockheed L-1011	664
Appendix C.18	Aircraft 17—McDonnell Douglas C-17	667
Appendix C.19	Aircraft 18—McDonnell Douglas DC-8	670
Appendix C.20	Aircraft 19.1—McDonnell Douglas DC-9 Series 10	673
Appendix C.21	Aircraft 19.2—McDonnell Douglas DC-9 Series 30	677
Appendix C.22	Aircraft 19.3—McDonnell Douglas DC-9 Series 40	679
Appendix C.23	Aircraft 19.4—McDonnell Douglas DC-9 Series 50	681
Appendix C.24	Aircraft 20—McDonnell Douglas DC-10	683
Appendix C.25	Aircraft 21—McDonnell Douglas F-4	686
Appendix C.26	Aircraft 22—McDonnell Douglas F-15	689
Appendix C.27	Aircraft 23—Rockwell B-1	692
Appendix C.28	Aircraft 24—SIAI Marchetti S211	695
Appendix C.29	Aircraft 25—Supermarine Spitfire	699
