

# Table of Contents

1. Introduction: Biology Today	
Eric Simon/Jane Reece/Jean Dickey	<b>1</b>
The Scope of Life	<b>4</b>
Evolution: Biology's Unifying Theme	<b>10</b>
The Process of Science	<b>14</b>
Chapter Review	<b>19</b>
2. The Molecules of Life	
Eric Simon/Jane Reece/Jean Dickey	<b>23</b>
Organic Compounds	<b>26</b>
Large Biological Molecules	<b>28</b>
Chapter Review	<b>40</b>
3. A Tour of the Cell	
Eric Simon/Jane Reece/Jean Dickey	<b>45</b>
The Microscopic World of Cells	<b>48</b>
Membrane Structure	<b>52</b>
The Nucleus and Ribosomes: Genetic Control of the Cell	<b>54</b>
The Endomembrane System: Manufacturing and Distributing Cellular Products	<b>56</b>
Chloroplasts and Mitochondria: Energy Conversion	<b>60</b>
The Cytoskeleton: Cell Shape and Movement	<b>61</b>
Chapter Review	<b>64</b>
4. The Working Cell	
Eric Simon/Jane Reece/Jean Dickey	<b>69</b>
Some Basic Energy Concepts	<b>72</b>
ATP and Cellular Work	<b>75</b>

Enzymes	<b>76</b>
Membrane Function	<b>79</b>
Chapter Review	<b>84</b>
<b>5. Cellular Respiration: Obtaining Energy from Food</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>89</b>
Energy Flow and Chemical Cycling in the Biosphere	<b>92</b>
Cellular Respiration: Aerobic Harvest of Food Energy	<b>94</b>
Fermentation: Anaerobic Harvest of Food Energy	<b>101</b>
Chapter Review	<b>104</b>
<b>6. Photosynthesis: Using Light to Make Food</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>107</b>
The Basics of Photosynthesis	<b>110</b>
The Light Reactions: Converting Solar Energy to Chemical Energy	<b>112</b>
The Calvin Cycle: Making Sugar from Carbon Dioxide	<b>117</b>
Chapter Review	<b>119</b>
<b>7. Cellular Reproduction: Cells from Cells</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>123</b>
What Cell Reproduction Accomplishes	<b>126</b>
The Cell Cycle and Mitosis	<b>127</b>
Meiosis, the Basis of Sexual Reproduction	<b>134</b>
Chapter Review	<b>145</b>
<b>8. Patterns of Inheritance</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>151</b>
Heritable Variation and Patterns of Inheritance	<b>154</b>
Variations on Mendel's Laws	<b>166</b>
The Chromosomal Basis of Inheritance	<b>170</b>
Sex Chromosomes and Sex-Linked Genes	<b>173</b>
Chapter Review	<b>176</b>
<b>9. The Structure and Function of DNA</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>183</b>
DNA: Structure and Replication	<b>186</b>
The Flow of Genetic Information from DNA to RNA to Protein	<b>190</b>
Viruses and Other Noncellular Infectious Agents	<b>200</b>
Chapter Review	<b>207</b>

<b>10. How Genes are Controlled</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>213</b>
How and Why Genes Are Regulated	<b>216</b>
Cloning Plants and Animals	<b>223</b>
The Genetic Basis of Cancer	<b>227</b>
Chapter Review	<b>231</b>
<b>11. DNA Technology</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>235</b>
Recombinant DNA Technology	<b>238</b>
DNA Profiling and Forensic Science	<b>244</b>
Genomics and Proteomics	<b>248</b>
Human Gene Therapy	<b>252</b>
Safety and Ethical Issues	<b>253</b>
Chapter Review	<b>256</b>
<b>12. How Populations Evolve</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>261</b>
Charles Darwin and The Origin of Species	<b>264</b>
Evidence of Evolution	<b>268</b>
Natural Selection	<b>272</b>
The Modern Synthesis: Darwinism Meets Genetics	<b>276</b>
Mechanisms of Evolution	<b>280</b>
Chapter Review	<b>285</b>
<b>13. How Biological Diversity Evolves</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>289</b>
The Origin of Species	<b>292</b>
The Origin of Life	<b>294</b>
Prokaryotes	<b>297</b>
The Evolution of Biological Novelty	<b>300</b>
Earth History and Macroevolution	<b>302</b>
Protists	<b>304</b>
Classifying the Diversity of Life	<b>307</b>
Chapter Review	<b>312</b>
<b>14. The Evolution of Microbial Life</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>315</b>

Major Episodes in the History of Life	<b>318</b>
15. Plants, Fungi, and the Move onto Land	
Eric Simon/Jane Reece/Jean Dickey	<b>339</b>
Colonizing Land	<b>342</b>
Plant Diversity	<b>344</b>
Fungi	<b>354</b>
Chapter Review	<b>359</b>
16. The Evolution of Animals	
Eric Simon/Jane Reece/Jean Dickey	<b>363</b>
The Origins of Animal Diversity	<b>366</b>
Major Invertebrate Phyla	<b>369</b>
Vertebrate Evolution and Diversity	<b>382</b>
The Human Ancestry	<b>389</b>
Chapter Review	<b>396</b>
17. An Introduction to Ecology and the Biosphere	
Eric Simon/Jane Reece/Jean Dickey	<b>401</b>
An Overview of Ecology	<b>404</b>
Living in Earth's Diverse Environments	<b>406</b>
Biomes	<b>410</b>
Global Climate Change	<b>424</b>
Chapter Review	<b>429</b>
18. Population Ecology	
Eric Simon/Jane Reece/Jean Dickey	<b>435</b>
An Overview of Population Ecology	<b>438</b>
Population Growth Models	<b>442</b>
Applications of Population Ecology	<b>446</b>
Human Population Growth	<b>451</b>
Chapter Review	<b>455</b>
19. Communities and Ecosystems	
Eric Simon/Jane Reece/Jean Dickey	<b>459</b>
The Loss of Biodiversity	<b>462</b>
Community Ecology	<b>464</b>
Ecosystem Ecology	<b>473</b>
Conservation and Restoration Biology	<b>480</b>

Chapter Review	<b>486</b>
<b>20. Unifying Concepts of Animal Structure and Function</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>491</b>
The Structural Organization of Animals	<b>494</b>
Exchanges with the External Environment	<b>502</b>
Regulating the Internal Environment	<b>503</b>
Chapter Review	<b>510</b>
<b>21. Nutrition and Digestion</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>515</b>
Overview of Animal Nutrition	<b>518</b>
A Tour of the Human Digestive System	<b>521</b>
Human Nutritional Requirements	<b>527</b>
Nutritional Disorders	<b>531</b>
Chapter Review	<b>534</b>
<b>22. Circulation and Respiration</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>539</b>
Unifying Concepts of Animal Circulation	<b>542</b>
The Human Cardiovascular System	<b>543</b>
Unifying Concepts of Animal Respiration	<b>553</b>
The Human Respiratory System	<b>555</b>
Chapter Review	<b>560</b>
<b>23. The Body's Defenses</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>565</b>
Innate Defenses	<b>568</b>
Adaptive Defenses	<b>571</b>
Immune Disorders	<b>578</b>
Chapter Review	<b>581</b>
<b>24. Hormones</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>585</b>
Hormones: An Overview	<b>588</b>
The Human Endocrine System	<b>590</b>
Chapter Review	<b>600</b>
<b>25. Reproduction and Development</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>605</b>

Unifying Concepts of Animal Reproduction	<b>608</b>
Human Reproduction	<b>610</b>
Reproductive Health	<b>615</b>
Human Development	<b>618</b>
Reproductive Technologies	<b>624</b>
Chapter Review	<b>627</b>
<b>26. Nervous, Sensory, and Locomotor Systems</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>633</b>
An Overview of Animal Nervous Systems	<b>636</b>
The Human Nervous System: A Closer Look	<b>641</b>
The Senses	<b>647</b>
Locomotor Systems	<b>653</b>
Chapter Review	<b>660</b>
<b>27. The Life of a Flowering Plant</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>667</b>
The Structure and Function of a Flowering Plant	<b>670</b>
Plant Growth	<b>677</b>
The Life Cycle of a Flowering Plant	<b>681</b>
Chapter Review	<b>685</b>
<b>28. The Working Plant</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>691</b>
How Plants Acquire and Transport Nutrients	<b>694</b>
✱ Plant Hormones	<b>700</b>
Response to Stimuli	<b>704</b>
Chapter Review	<b>706</b>
<b>29. Essential Chemistry for Biology</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>709</b>
Some Basic Chemistry	<b>712</b>
Water and Life	<b>717</b>
Chapter Review	<b>722</b>
<b>30. Appendix: Metric Conversion Table</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>727</b>
<b>31. Appendix: The Periodic Table</b>	
Eric Simon/Jane Reece/Jean Dickey	<b>729</b>
