

# Contents

## PART ONE

### OVERVIEW AND OPPORTUNITY IDENTIFICATION/SELECTION 3

#### Chapter 1

#### The Strategic Elements of Product Development 5

- Setting 5
- The Importance of New Products 6
- Globalization and New Product Development 9
- How Product Development Is Different 11
- What Is a New Product, and What Leads to Success? 14
- Does This Field of Activity Have a Unique Vocabulary? 16
- Does the Field of New Products Offer Careers? 17
- The Strategic Elements of Product Development 18
- The Basic New Products Process 19
- The Other Strategic Elements 22
- Product Development in Action 23
- Summary 24
- Applications 24

#### Chapter 2

#### The New Products Process 25

- Setting 25
- The Procter & Gamble Cosmetics Saga 25
  - The Product Innovation Charter (PIC)* 26
  - The New Products Process* 27
  - The New Product Portfolio* 27
  - Supporting the Strategic Elements: Effective Team Management* 28
  - What Happened in That Saga?* 28

#### The Phases in the New Products Process 29

- Phase 1: Opportunity Identification and Selection* 30
- Phase 2: Concept Generation* 31
- Phase 3: Concept/Project Evaluation* 31
- Phase 4: Development* 32
- Phase 5: Launch* 33
- Evaluation Tasks Throughout the New Products Process 34
- Speeding the Product to Market 37
  - Risks and Guidelines in Speeding to Market* 40
- What about New Services? 43
- New-to-the-World Products 46
- The Role of the Serial Innovator 48
- Spiral Development and the Role of Prototypes 50
- Closing Thoughts about the New Products Process 51
- Summary 52
- Applications 53
- Case: Lego 53
- Case: Tastykake Sensables 55
- Case: The Levacor Heart Pump 57

#### Chapter 3

#### Opportunity Identification and Selection: Strategic Planning for New Products 60

- Setting 60
- A Product Strategy for a “Company within a Company” 61
- New Product Strategy Inputs and Identifying Opportunities 61
  - Product Platform Planning* 61
  - Opportunity Identification* 66
  - Noncorporate Strategic Planning* 68
  - Miscellaneous Sources* 70
- The Product Innovation Charter 70
  - Why Have a PIC?* 72

|                                                             |    |
|-------------------------------------------------------------|----|
| The Sections of the PIC                                     | 74 |
| <i>Background Section of the PIC</i>                        | 74 |
| <i>The Arena (Area of Focus) Section of the PIC</i>         | 74 |
| <i>Goals and Objectives Section of the PIC</i>              | 77 |
| <i>Special Guidelines Section of the PIC</i>                | 77 |
| How to Prepare a Product Innovation Charter                 | 80 |
| Product Portfolio Analysis: The New Product's Strategic Fit | 82 |
| Summary                                                     | 87 |
| Applications                                                | 87 |
| Case: New Product Strategy at Kellogg                       | 88 |
| Case: The Honda Element                                     | 90 |

## PART TWO

### CONCEPT GENERATION 95

#### Chapter 4

#### Creativity and the Product Concept 97

|                                                   |     |
|---------------------------------------------------|-----|
| Setting                                           | 97  |
| Preparation                                       | 97  |
| <i>The Product Innovation Charter</i>             | 97  |
| <i>Finding the Right People</i>                   | 98  |
| <i>Management's Role in Creativity</i>            | 99  |
| <i>Activities to Encourage Creativity</i>         | 101 |
| <i>Special Rewards</i>                            | 103 |
| <i>The Removal of Roadblocks</i>                  | 103 |
| The Product Concept                               | 104 |
| <i>The Designer Decaf Example</i>                 | 107 |
| <i>The Concept Statement</i>                      | 108 |
| Two Basic Approaches                              | 110 |
| Important Sources of Ready-Made New Product Ideas | 111 |
| <i>User Toolkits</i>                              | 111 |
| <i>Crowdsourcing</i>                              | 114 |
| <i>Lead Users</i>                                 | 115 |
| <i>Open Innovation</i>                            | 118 |
| Summary                                           | 123 |
| Applications                                      | 123 |
| Case: Pillsbury Grands! Biscuit Sandwiches        | 124 |
| Case: P&G CarpetFlick                             | 126 |
| Case: Aquafresh White Trays                       | 127 |

#### Chapter 5

#### Finding and Solving Customers' Problems 130

|                                                                             |     |
|-----------------------------------------------------------------------------|-----|
| Setting                                                                     | 130 |
| The Overall System of Internal Concept Generation                           | 130 |
| Gathering the Problems                                                      | 131 |
| <i>Internal Records</i>                                                     | 132 |
| <i>Direct Inputs from Technical and Marketing Departments</i>               | 132 |
| <i>Problem Analysis</i>                                                     | 133 |
| <i>Scenario Analysis</i>                                                    | 141 |
| Solving the Problems                                                        | 145 |
| <i>Group Creativity</i>                                                     | 145 |
| <i>Brainstorming</i>                                                        | 145 |
| <i>Electronic Brainstorming and Computer-Assisted Creativity Techniques</i> | 146 |
| <i>Online Communities</i>                                                   | 147 |
| <i>Disciplines Panel</i>                                                    | 149 |
| Concept Generation Techniques in Action                                     | 149 |
| Summary                                                                     | 150 |
| Applications                                                                | 150 |
| Case: Campbell's IQ Meals                                                   | 151 |
| Case: Earning Organizational Respect                                        | 152 |

#### Chapter 6

#### Analytical Attribute Approaches: Introduction and Perceptual Mapping 154

|                                                                           |     |
|---------------------------------------------------------------------------|-----|
| Setting                                                                   | 154 |
| Understanding Why Customers Buy a Product                                 | 154 |
| <i>Products Are Groups of Attributes</i>                                  | 154 |
| <i>Analyzing Product Attributes for Concept Generation and Evaluation</i> | 156 |
| Gap Analysis                                                              | 156 |
| <i>Determinant Gap Maps</i>                                               | 157 |
| <i>Perceptual Gap Maps Based on Attribute Ratings (AR)</i>                | 158 |
| <i>Perceptual Gap Maps Based on Overall Similarities (OS)</i>             | 164 |
| <i>Comments on Gap Analysis</i>                                           | 167 |
| Summary                                                                   | 168 |
| Applications                                                              | 168 |
| Case: Comparing Smartphones (A)                                           | 169 |

## Chapter 7

### Analytical Attribute Approaches: Trade-Off Analysis and Qualitative Techniques 171

Setting 171

Trade-Off Analysis 171

*Using Trade-Off Analysis to Generate Concepts* 172

*A Conjoint Analysis Application* 173

*Is Conjoint the Right Method?* 177

*Alternatives to Full-Profile Conjoint Analysis* 178

*Recent Modifications in Conjoint Analysis* 179

*Virtual Prototypes in Concept Testing* 179

Qualitative Techniques 180

*Dimensional Analysis* 180

*Checklists* 182

*Relationships Analysis* 183

*About the Dimensions Used in Relationships  
Analysis* 183

*Two-Dimensional Matrix* 183

*Morphological or Multidimensional Matrix* 184

Analogy 186

Summary 187

Applications 187

Case: Rubbermaid 188

## PART THREE

### CONCEPT/PROJECT EVALUATION 191

## Chapter 8

### The Concept Evaluation System 193

Setting 193

What's Going On in the New Products  
Process? 193

*The Evaluation System for the Basic New Products  
Process* 194

*Product Line Considerations in Concept  
Evaluation* 197

The Cumulative Expenditures Curve 198

*The Risk/Payoff Matrix* 199

*The Decay Curve* 200

Planning the Evaluation System 201

*Everything Is Tentative* 201

*Potholes* 202

*The People Dimension* 203

*Surrogates* 204

The A-T-A-R Model 205

*Where Do We Get the Figures for the A-T-A-R  
Model?* 209

*Further Uses of the A-T-A-R Model* 209

Summary 209

Applications 210

Case: Chipotle Mexican Grill 210

Case: Concept Development Corporation 212

## Chapter 9

### Concept Testing 214

Setting 214

The Importance of Up-Front Evaluations 214

The Product Innovation Charter 215

Market Analysis 216

Initial Reaction 216

Concept Testing and Development 217

*What Is a New Product Concept?* 219

*The Purposes of Concept Testing* 219

Considerations in Concept Testing

Research 221

*Prepare the Concept Statement* 221

*Define the Respondent Group* 225

*Select the Response Situation* 226

*Prepare the Interviewing Sequence* 227

*Variations* 228

Analyzing Research Results 228

*Identifying Benefit Segments* 228

*Joint Space Maps* 230

*Preference Regression* 232

Conjoint Analysis in Concept Testing 233

Market Research to Support Concept  
Testing 235

Conclusions 238

Summary 238

Applications 239

Case: Domino's 240

Case: Comparing Smartphones (B) 242

## Chapter 10

### The Full Screen 243

Setting 243

Purposes of the Full Screen 244

|                                                                 |     |
|-----------------------------------------------------------------|-----|
| The Scoring Model                                               | 246 |
| <i>Introduction to Scoring Models</i>                           | 246 |
| <i>The Screening Procedure</i>                                  | 247 |
| <i>Profile Sheet</i>                                            | 252 |
| A Screening Model Based on Project<br>NewProd                   | 253 |
| The Analytic Hierarchy Process                                  | 255 |
| Special Aspects                                                 | 258 |
| Summary                                                         | 258 |
| Applications                                                    | 259 |
| Case: Logitech (A)                                              | 259 |
| <br><b>Chapter 11</b>                                           |     |
| <b>Sales Forecasting and Financial<br/>Analysis</b>             | 262 |
| Setting                                                         | 262 |
| Sales Forecasting for New Products                              | 263 |
| Forecasting Sales Using Traditional<br>Methods                  | 264 |
| Forecasting Sales Using Purchase<br>Intentions                  | 266 |
| Forecasting Sales Using the A-T-A-R<br>Model                    | 267 |
| Techniques for Forecasting Product<br>Diffusion                 | 269 |
| Observations on Forecasting Models                              | 271 |
| Problems with Sales Forecasting                                 | 272 |
| <i>Summary of the Problems</i>                                  | 273 |
| Actions by Managers to Handle These<br>Problems                 | 274 |
| <i>Improve the New Product Process Currently in<br/>    Use</i> | 274 |
| <i>Use the Life Cycle Concept of Financial<br/>    Analysis</i> | 274 |
| <i>Reduce Dependence on Poor Forecasts</i>                      | 275 |
| Return to the PIC                                               | 280 |
| Summary                                                         | 283 |
| Applications                                                    | 283 |
| Case: Bay City Electronics                                      | 284 |

## **Chapter 12**

### **Product Protocol 291**

|                      |     |
|----------------------|-----|
| Setting              | 291 |
| The Product Protocol | 292 |

|                                                                    |     |
|--------------------------------------------------------------------|-----|
| Purposes of the Protocol                                           | 294 |
| Protocol's Specific Contents                                       | 296 |
| <i>Target Market</i>                                               | 298 |
| <i>Positioning</i>                                                 | 298 |
| <i>Product Attributes</i>                                          | 299 |
| <i>Competitive Comparisons and Augmentation<br/>    Dimensions</i> | 301 |
| <i>Other Components of the Product Protocol</i>                    | 301 |
| Protocol and the Voice of the Customer                             | 302 |
| <i>Hearing the Voice of the Customer</i>                           | 302 |
| Protocol and Quality Function Deployment<br>(QFD)                  | 305 |
| <i>QFD and the House of Quality</i>                                | 305 |
| <i>Outcomes of QFD</i>                                             | 309 |
| Some Warnings about the Difficulty of the<br>Protocol Process      | 311 |
| Summary                                                            | 312 |
| Applications                                                       | 312 |
| Case: Fisher & Paykel                                              | 313 |
| Case: DuPont                                                       | 315 |
| Case: Logitech (B)                                                 | 317 |

## **PART FOUR**

### **DEVELOPMENT 319**

## **Chapter 13**

### **Design 323**

|                                                           |     |
|-----------------------------------------------------------|-----|
| Setting                                                   | 323 |
| What Is Design?                                           | 324 |
| Design-Driven Innovation                                  | 324 |
| The Role of Design in the New Products<br>Process         | 325 |
| <i>Contributions of Design to New Product Goals</i>       | 325 |
| Product Architecture                                      | 331 |
| <i>A Process for Product Architecture</i>                 | 331 |
| <i>Product Architecture and Product Platforms</i>         | 333 |
| Industrial Design and the Industrial<br>Designer          | 333 |
| Prototype Development                                     | 334 |
| Managing the Interfaces in the Design<br>Process          | 336 |
| Improving the Interfaces in the Design<br>Process         | 339 |
| Computer-Aided Design and Design for<br>Manufacturability | 340 |

|                                  |     |
|----------------------------------|-----|
| Continuous Improvement in Design | 342 |
| Summary                          | 343 |
| Applications                     | 343 |
| Case: The Mini                   | 344 |
| Case: Palm Pilot                 | 345 |
| Case: Gillette Mach3 and Fusion  | 348 |

## Chapter 14

### Development Team Management 351

|                                                  |     |
|--------------------------------------------------|-----|
| Setting                                          | 351 |
| What Is a Team?                                  | 351 |
| Structuring the Team                             | 352 |
| <i>Another Look at Projectization</i>            | 355 |
| Building a Team                                  | 356 |
| <i>Establishing a Culture of Collaboration</i>   | 356 |
| <i>The Team Assignment and Ownership</i>         | 357 |
| <i>Selecting the Leader</i>                      | 358 |
| <i>Selecting the Team Members</i>                | 359 |
| <i>Roles and Participants</i>                    | 360 |
| <i>Network Building</i>                          | 363 |
| <i>Training the Teams</i>                        | 363 |
| Managing the Team                                | 364 |
| <i>Cross-Functional Interface Management</i>     | 364 |
| <i>Overcoming Barriers to Market Orientation</i> | 367 |
| <i>Ongoing Management of the Team</i>            | 368 |
| <i>Team Compensation and Motivation</i>          | 368 |
| <i>Closing the Team Down</i>                     | 370 |
| Virtual Teams                                    | 370 |
| Managing Globally Dispersed Teams                | 372 |
| Summary                                          | 376 |
| Applications                                     | 376 |
| Case: Provo Craft                                | 377 |
| Case: Ford Fusion                                | 378 |

## Chapter 15

### Product Use Testing 381

|                                                                |     |
|----------------------------------------------------------------|-----|
| Setting                                                        | 381 |
| The Role of Marketing During Development                       | 382 |
| <i>Marketing Is Involved from the Beginning of the Process</i> | 382 |
| <i>Marketing Ramp-Up, or the "I Think We've Got It" Phase</i>  | 383 |
| Why Do Product Use Testing?                                    | 384 |

|                                          |     |
|------------------------------------------|-----|
| Is Product Use Testing Really Necessary? | 384 |
| <i>Are These Arguments Correct?</i>      | 385 |

### Knowledge Gained from Product Use Testing 387

|                                                               |     |
|---------------------------------------------------------------|-----|
| <i>Pre-Use Sense Reactions</i>                                | 387 |
| <i>Early Use Experiences</i>                                  | 388 |
| <i>Alpha and Beta Tests</i>                                   | 388 |
| <i>Gamma Testing</i>                                          | 390 |
| <i>Diagnostic Information</i>                                 | 391 |
| Decisions in Product Use Testing                              | 391 |
| <i>Who Should Be in the User Group?</i>                       | 391 |
| <i>How Should We Reach the User Group?</i>                    | 392 |
| <i>Should We Disclose Our Identity?</i>                       | 393 |
| <i>How Much Explanation Should We Provide?</i>                | 393 |
| <i>How Much Control over Product Use Should There Be?</i>     | 393 |
| <i>How Should the Test Be Conducted?</i>                      | 394 |
| <i>Over What Time Period Should the Test Be Conducted?</i>    | 395 |
| <i>What Should Be the Source of the Product Being Tested?</i> | 396 |
| <i>What Should Be the Form of the Product Being Tested?</i>   | 396 |
| <i>How Should We Record Respondents' Reactions?</i>           | 397 |
| <i>How Should We Interpret the Figures We Get?</i>            | 398 |
| <i>Who Should Do the Product Use Test?</i>                    | 398 |

### Special Problems 399

|                                                               |     |
|---------------------------------------------------------------|-----|
| <i>Don't Change the Data Just Because They Came Out Wrong</i> | 399 |
| <i>Be Alert to Strange Conditions</i>                         | 399 |
| <i>What If We Have to Go Ahead without Good Use Testing?</i>  | 399 |

### Summary 399

### Applications 400

|                                                        |     |
|--------------------------------------------------------|-----|
| Case: Product Use Testing for New Consumer Nondurables | 401 |
|--------------------------------------------------------|-----|

## PART FIVE

### LAUNCH 403

## Chapter 16

### Strategic Launch Planning 406

|         |     |
|---------|-----|
| Setting | 406 |
|---------|-----|

|                                                               |     |
|---------------------------------------------------------------|-----|
| The Strategic Gives                                           | 407 |
| Revisiting the Strategic Goals                                | 408 |
| Strategic Platform Decisions                                  | 409 |
| <i>Type of Demand Sought</i>                                  | 409 |
| <i>Permanence</i>                                             | 410 |
| <i>Aggressiveness</i>                                         | 411 |
| <i>Competitive Advantage</i>                                  | 411 |
| <i>Product Line Replacement</i>                               | 411 |
| <i>Competitive Relationship</i>                               | 413 |
| <i>Scope of Market Entry</i>                                  | 413 |
| <i>Image</i>                                                  | 413 |
| The Target Market Decision                                    | 413 |
| <i>Alternative Ways to Segment a Market</i>                   | 414 |
| <i>Targeting May Also Use Diffusion of Innovation</i>         | 418 |
| Product Positioning                                           | 420 |
| Creating Unique Value for the Chosen Target                   | 422 |
| Branding and Brand Management                                 | 424 |
| <i>Trademarks and Registration</i>                            | 424 |
| <i>What Is a Good Brand Name?</i>                             | 426 |
| <i>Managing Brand Equity</i>                                  | 428 |
| <i>Brand Equity and Branding Strategies</i>                   | 432 |
| <i>Global Branding and Positioning: Standardize or Adapt?</i> | 433 |
| <i>Global Brand Leadership</i>                                | 434 |
| Packaging                                                     | 435 |
| <i>The Role of Packaging</i>                                  | 435 |
| <i>The Packaging Decision</i>                                 | 435 |
| Summary                                                       | 436 |
| Applications                                                  | 437 |
| Case: Wii                                                     | 437 |
| Case: Iridium                                                 | 439 |
| Case: Comparing Smartphones (C)                               | 440 |

## Chapter 17

### Implementation of the Strategic Plan 441

|                                                  |     |
|--------------------------------------------------|-----|
| Setting                                          | 441 |
| The Launch Cycle                                 | 441 |
| <i>Prelaunch and Preannouncement</i>             | 441 |
| <i>Announcement, Beachhead, and Early Growth</i> | 444 |
| Lean Launch and Launch Timing                    | 445 |

|                                    |     |
|------------------------------------|-----|
| Launch Tactics                     | 447 |
| <i>The Communications Plan</i>     | 447 |
| <i>The Copy Strategy Statement</i> | 449 |
| <i>Personal Selling</i>            | 449 |
| Alliances                          | 450 |
| A-T-A-R Requirements               | 451 |
| <i>Awareness</i>                   | 451 |
| <i>Stocking and Availability</i>   | 452 |
| <i>Trial</i>                       | 454 |
| <i>Repeat Purchase</i>             | 457 |
| Summary                            | 458 |
| Applications                       | 458 |
| CASE: Hulu                         | 459 |
| Case: Dodge Nitro                  | 461 |

## Chapter Eighteen

### Market Testing 464

|                                                        |     |
|--------------------------------------------------------|-----|
| Setting                                                | 464 |
| The Market Testing Decision                            | 464 |
| <i>When Is the Decision Made?</i>                      | 465 |
| <i>Is This an Easy Decision to Make?</i>               | 465 |
| <i>Market Tests Must Have Teeth</i>                    | 466 |
| <i>The Factors for Deciding Whether to Market Test</i> | 468 |
| Methods of Market Testing                              | 470 |
| <i>Pseudo Sale</i>                                     | 470 |
| <i>Controlled Sale</i>                                 | 470 |
| <i>Full Sale</i>                                       | 471 |
| Pseudo Sale Methods                                    | 471 |
| <i>Speculative Sale</i>                                | 472 |
| <i>Simulated Test Market</i>                           | 473 |
| Controlled Sale Methods                                | 476 |
| <i>Informal Selling</i>                                | 476 |
| <i>Direct Marketing</i>                                | 477 |
| <i>Minimarkets</i>                                     | 477 |
| <i>Scanner Market Testing</i>                          | 479 |
| Full Sale Methods                                      | 480 |
| <i>Test Marketing</i>                                  | 480 |
| <i>The Rollout</i>                                     | 484 |
| Wrap-Up on Market Testing Methodologies                | 488 |
| Summary                                                | 488 |
| Applications                                           | 489 |
| Case: PepsiCo—Pepsi-Kona and Pepsi One                 | 489 |

## CHAPTER 19

### Launch Management 492

- Setting 492
- What We Mean by Launch Management 492
- The Launch Management System 493
  - Step One: Spot Potential Problems* 494
  - Step Two: Select the Control Events* 498
  - Step Three: Develop Contingency Plans* 499
  - Step Four: Design the Tracking System* 500
- Effective Innovation Metrics 504
- A Sample Launch Management Plan 506
- Launch Management and Knowledge
  - Creation 506
- Product Failure 509
- Summary 511
- Applications 512
- Case: Levitra 512

## CHAPTER 20

### Public Policy Issues 515

- Setting 515
- Bigger Picture: A Cycle of Concerns 515
  - Phase I: Stirring* 516
  - Phase II: Trial Support* 517
  - Phase III: The Political Arena* 517
  - Phase IV: Regulatory Adjustment* 518
- Business Attitudes toward Product Issues 518
- Current Problem Areas 518
- Product Liability 519
  - Typology of Injury Sources* 519
  - The Four Legal Bases for Product Liability* 521
  - Other Legislation* 523
- Planning for the Product Recall 524
  - Prior to the Recall* 524
  - During the Recall* 524
  - After the Recall* 524

- Attempts at Standardization and
  - Clarification 525
- Environmental Needs 525
- Product Piracy 528
- Worthy Products 529
- Morality 530
- Designing Products for Emerging
  - Markets 530
- Personal Ethics 532
- The Underlying Residual Issues 533
- What Are New Products Managers Doing
  - about All This? 534
  - Strategy and Policy* 534
  - Control Systems* 534
  - Product Testing* 534
  - Marketing and Market Testing* 534
  - Customer Education and External Affairs* 535
- Summary 535
- Applications 536
- Case: Clorox Green Works 536
- Case: Hybrid or Hydrogen Vehicles
  - at General Motors? 539
- Case: Product (RED) 541

**Appendix A** Sources of Ideas Already Generated 543

**Appendix B** Other Techniques of Concept Generation 549

**Appendix C** The Marketing Plan 559
