Part One: The Foundation of Health Promotion **1**

Chapter 1 Health Promotion **3**

Anastasia Snelling

Brief Overview of Health in the Twentieth Century	3
1900–1950s	4
1960s–2000s	6
Health Promotion: An Emerging Field	9
Health Education	10
Public Health	10
Determinants of Health	12
Important Health Promotion Concepts	14
Risk Factors, Chronic Diseases, and Empowerment	15
Prevention Activities: Primary, Secondary, and Tertiary	16
Health Promotion Meets the Health Care System	17
Patient Protection and Affordable Care Act	18
Discussion	19
Positions in the Health Promotion Field	19
Summary	20
Key Terms	21
Review Questions	22
Student Activities	22
References	23

Chapter 2 Health Behavior Change Theories and Models **25**

Maura Stevenson

Health Behavior Theories	26
------------------------------------	----

Social Cognitive Theory	27
Transtheoretical Model of Behavior Change	31
Health Belief Model	36
Theory of Planned Behavior	39
Historical Perspective	43
Summary	44
Key Terms	46
Review Questions	47
Student Activities	47
References	48
Chapter 3 Program Planning Models	51
<i>Anastasia Snelling</i>	
Effective Health Promotion Planning	52
Social Ecological Model	52
PRECEDE-PROCEED Model	53
Multilevel Approach to Community Health (MATCH)	57
Consumer-Based Planning Models for Health Communication	57
CDCynergy	61
Making Health Communication Programs Work	63
Health Promotion Planning Model for Community-Level Programs	63
Mobilizing for Action through Planning and Partnerships (MAPP)	65
MAP-IT	66
Connecting Health Behavior Theories to Program Planning Models	67
Summary	67
Key Terms	68
Review Questions	69
Student Activities	69
References	69
Part Two: Health Behaviors	71
Chapter 4 Tobacco Use	75
<i>Laurie DiRosa</i>	
Tobacco Use	76
Tobacco Use Statistics	76
Cancer	80
Cardiovascular Disease	81

Pulmonary Disease	82
Reproductive and Developmental Effects	84
Smokeless Tobacco and Chronic Disease	84
Harm Reduction	85
Cancer	86
Cardiovascular Disease	86
Pregnancy	87
Oral Complications	87
Secondhand Smoke Exposure and Chronic Disease	88
Political and Cultural History of Tobacco Use	89
Warning Labels	90
Purchasing Restrictions	91
Taxation	91
1998 Master Settlement Agreement	91
Recent Efforts to Reduce Tobacco Use	93
National Policy	93
State Policy	96
Local Policy	97
Effective Programs That Discourage Tobacco Use	98
Healthy People 2020	98
Population-Based Strategies	100
Effective Examples of Population-Based Strategies	100
Practical Examples of Work Site Initiatives	102
School Initiatives	104
Practical Examples of School Initiatives	105
Challenges to Reducing Smoking	107
Access to Treatment	107
Addictive Property of Nicotine	108
Tobacco Industry Practices	109
Summary	109
Key Terms	110
Review Questions	111
Student Activities	112
References	112
Chapter 5 Eating Behaviors	117
<i>Maya Maroto</i>	
Eating Behaviors	117
Taste	118
Emotions	118
Price	119

Convenience	119
Health and Nutrition	120
Culture and Familiarity	121
Environment	121
Marketing	121
Nutrition, Eating Habits, and Health	122
Heart Disease	123
Cancer	123
Stroke	124
Type 2 Diabetes	125
Obesity	125
Benefits of Healthy Eating Habits	126
Recommended Nutrition and Dietary Intake	127
History of Nutrition and Dietary Patterns	128
Pattern 1: Paleolithic and Hunter-Gatherers	129
Pattern 2: Advent of Agriculture	130
Pattern 3: Industrialization and Receding Famine	130
Pattern 4: Noncommunicable Disease	131
Pattern 5: Desired Societal and Behavior Change	131
Changes to the American Food Environment	131
Food Supply and Consumption	131
Where Americans Eat	135
The Food Industry: Friend, Foe, or Both?	136
Farm Subsidies: The Culprit?	137
Portion Sizes: Bigger but Not Better	138
Recent Efforts to Promote Healthy Eating	139
National Policy Actions	139
State Policy Actions	140
Local Policy Actions	140
Community Nutrition Efforts	141
Work Site Wellness	142
School Food Environments	142
Programs for the Individual	143
Summary	143
Key Terms	144
Review Questions	145
Student Activities	146
References	147

Chapter 6 Physical Activity Behaviors 153

Jennifer Childress

Physical Activity	154
-----------------------------	-----

Recommended Physical Activity Levels	154
Benefits of Physical Activity	156
Sedentary Behavior	156
Physical Activity Patterns	158
Historical Patterns	158
1990s to Present	159
Physical Activity Behaviors and Barriers	159
Individual	161
Built Environment	162
Social Environment	163
Efforts and Initiatives to Increase Physical Activity	164
Technology	164
Tracking Activity	164
Education Programs in Work Sites, Schools, and Communities	165
Policies That Promote Increasing Physical Activity	169
National Policy	169
State Policy	170
Local Policy	173
Community Policy	175
Community Partner Initiatives and Multisectorial Strategies	175
Summary	179
Key Terms	180
Review Questions	181
Student Activities	181
References	182

Chapter 7 Stress, Emotional Well-Being, and Mental Health 187

Marty Loy

The Origins of the Term <i>Stress</i>	188
The Fight-or-Flight Response	188
Stress Physiology	191
Eustress and Distress	192
Life Stress and Illness	194
Coping: Stress Management Techniques	194
Four Coping Opportunities	196
Stress at Work	200
Demand and Control	200
Work Site Stress Management	202
Mental Health in Communities	204

Patient Protection and Affordable Care Act (ACA)	205
Meeting Community Mental Health Needs	205
Mental Health Disparities	207
Stress Management with Children	208
Effects of Stress on Children	209
Stress Types among Children	210
Summary	211
Key Terms	211
Review Questions	212
Student Activities	213
References	213

Chapter 8 Clinical Preventive Services 217

Casey Korba

Benefits of Evidence-Based Clinical Preventive Services	218
Recommended Levels of Preventive Services	219
Patient Protection and Affordable Care Act	219
History of Preventive Services	220
The US Preventive Services Task Force	221
Primary and Secondary Preventive Services	222
Member Composition	223
Identifying Evidence-Based Preventive Services	223
Benefits and Harms	224
The Advisory Committee on Immunization Practices	225
Vaccines: Myths and Misinformation	225
Health Resources and Services Administration (HRSA)	227
Promoting the Use of Preventive Services	227
Health Care Coverage of Evidence-Based Preventive Services	227
Other Preventive Services Provisions	228
Prevention and Public Health Fund	230
Million Hearts Initiative	230
Technology and the Media	231
Nontraditional Sites of Care	232
Genetic Testing	232
Advances in Behavioral Science	233
Challenges to Increasing the Use of Evidence-Based Preventive Services	233
Educating the Public about Preventive Services	233
Research Limitations	234

Health Care Services Barriers	236
Summary	236
Key Terms	237
Review Questions	238
Student Activities	238
References	238

Part Three: Health Promotion in Action **241**

Chapter 9 National and State Initiatives to Promote Health and Well-Being **.243**

Jennifer Childress and Jill Dombrowski

Healthy People: 1979–2020	243
Healthy People 2020	244
US Department of Health and Human Services (HHS)	248
The Centers for Disease Control and Prevention (CDC)	250
National Institutes of Health (NIH)	254
US Department of Agriculture (USDA)	255
Monitoring the Nation’s Health	256
Behavioral Risk Factor Surveillance System (BRFSS)	257
Youth Risk Behavior Surveillance System (YRBSS)	257
National Health and Nutrition Examination Survey (NHANES)	259
State Initiatives	261
Arizona	262
Maine	262
Florida	262
Association of State and Territorial Health Officials (ASTHO)	263
The National Conference of State Legislatures (NCSL)	264
Local Programs	265
Summary	266
Key Terms	266
Review Questions	267
Student Activities	268
References	268

Chapter 10 Settings for Health Promotion **.271**

David Stevenson

The Home	271
--------------------	-----

Family	272
Physical Space	273
Personal Training	273
Physical Safety	274
Communities	274
Health Fairs	275
Targeted Community Initiatives	275
Farmers' Markets and Community Gardens	276
Volunteer Opportunities	276
Early Childhood Centers	276
Hygiene and Safety Habits	277
Physical Activity	277
Nutrition and Healthy Eating Habits	277
Health Assessments	278
Schools	278
Academics and Health	279
School Policy Supporting Health	280
Teachers' Roles	280
Healthy Food Choices	280
School Health Care Services	281
Health Promotion Initiatives	281
School After-Hours	282
Coordinated School Health	282
Professional Opportunities	282
Colleges and Universities	282
Safe and Healthy Environment	283
Coordinated Health Promotion	283
Physical Environment	284
Professional Opportunities	284
The Work Site	284
Leadership	286
Work Site Safety	287
Health Promotion	288
Health Coaches	289
Employee Assistance Programs	289
Technology and Social Media	289
Measuring and Celebrating Success	290
Professional Opportunities	290
Health Care Providers	290
Physicians	291
Other Health Care Providers	291
Faith-Based Centers	292

The Internet	292
Access to Information and Data	293
Tracking Personal Health Data	293
Social Media	294
Summary	294
Key Terms	295
Review Questions	296
Student Activities	296
References	297

**Chapter 11 Health Promotion–Related Organizations,
Associations, and Certifications 299**

<i>Anastasia Snelling and Michelle Kalicki</i>	
Nonprofit Health Associations	300
American Heart Association (AHA)	300
Other Nonprofit Health Organizations	301
Professional Health Associations	301
Nutrition	302
Physical Activity	305
Health, Wellness, and Education	307
Scholarly and Professional Health Journals	309
Certifications	311
Health Promotion Certifications	311
Health Education Certifications	312
Fitness-Based Certifications	314
Nutrition Certifications	315
Health Coaching	315
Academic Institute Certifications	316
Summary	317
Key Terms	317
Review Questions	318
Student Activities	318
References	319

Chapter 12 Trends in Health Promotion 321

<i>David Hunnicutt</i>	
Trend 1: The Population Will Get Much Older in the Next Three Decades	322
Trend 2: The Health Status of Aging Adults Will Decline Steadily If We Don't Do Things Differently	323

Trend 3: Adults Won't Be the Only Ones Who Are Losing Their Health Status	325
Trend 4: Health Care Costs Will Remain an Issue of Significant Concern Far into the Future	326
Trend 5: Prevention Will Become a National Priority	327
Trend 6: Medical Self-Care Will Gain Rapid Popularity	328
Trend 7: Physical Activity Will Become the Most Commonly Prescribed Medicine	329
Trend 8: Financial Incentives and Disincentives Will Go Mainstream	330
Trend 9: Physical Environments Will Be Altered Radically	331
Trend 10: Efforts to Curb Obesity Will Intensify Greatly	332
Trend 11: The Need for Talented Health Promotion Professionals Will Skyrocket	333
Summary	334
Key Terms	334
Review Questions	335
