<b>Preface</b>	<b>ix</b>
<b>1 Introduction to Reliability Engineering</b>	<b>1</b>
1.1 The Logic of Certainty	1
1.2 Union (OR) operation	2
1.3 Intersection (AND) operation	3
1.4 Series systems	4
1.5 Parallel systems	5
1.6 General Series-Parallel System	6
1.7 Active Redundancy	6
1.8 Standby Redundancy	7
1.9 Fault Tree Analysis	7
1.10 Minimum Cut Sets and Path Sets	9
References	10
<b>2 Elements of Probability Theory</b>	<b>11</b>
2.1 Basic Rules of Probability	11
2.2 Cumulative Distribution Function	12
2.3 Probability Mass Function	12
2.4 Probability Density Function	12
2.5 Moments	13
2.6 Percentiles	13
References	14
<b>3 Probability Distributions</b>	<b>15</b>
3.1 Binomial	16
3.2 Poisson	17
3.3 Exponential	18

3.4	Weibull	19
3.5	Normal	19
3.6	Lognormal	20
3.7	Mean Time To Failure (MTTF)	22
	References	23
<b>4</b>	<b>Availability</b>	<b>25</b>
4.1	Definition	25
4.2	Summary	27
4.3	Availability of Systems with Repair	28
	References	29
<b>5</b>	<b>Data Analysis</b>	<b>31</b>
5.1	Theoretical Model and Evidence	31
5.2	Censored Samples	32
5.3	Bayesian Theorem	33
	References	35
<b>6</b>	<b>Introduction to Network Systems</b>	<b>37</b>
6.1	Parallel Computing and Networks	38
6.2	Network Design Considerations	41
6.3	Classification of Interconnection Networks	45
6.3.1	Shared-Medium Networks	47
6.3.2	Direct Networks	49
6.3.3	Indirect Networks	52
6.3.4	Hybrid Networks	54
	References	56
<b>7</b>	<b>Classification of Multistage Interconnection Networks</b>	<b>57</b>
7.1	Background	57
7.1.1	Unidirectional Multistage Interconnection Networks	59
7.1.2	Bidirectional Multistage Interconnection Networks	60
7.1.3	Architectural Models of Parallel Machines	61
7.1.4	Terminology	63
7.1.5	Fault-Tolerant	66
7.2	Multistage Cube Network	67
7.3	Extra-Stage Cube Network	70
7.4	Shuffle-Exchange Network	72
7.5	Shuffle-Exchange Network with an Additional Stage	73

7.6	Gamma Network	75
7.7	Extra-Stage Gamma Network	77
7.8	Dynamic Redundancy Network	78
7.9	Improved Enhanced Augmented Data Manipulator Network	79
7.10	Improved Logical Neighborhood Network	80
7.11	Comparison	81
	References	84
<b>8</b>	<b>Network Reliability Evaluation Methods</b>	<b>87</b>
8.1	Overview of Network Reliability	87
8.2	Network Model	88
8.3	Network Operations	89
8.4	Approaches for Calculating Network Reliability	89
8.4.1	Minpaths Method	90
8.4.2	Boolean Function Decomposition Method	91
8.4.3	Direct Enumeration Method	93
8.4.4	Inclusion-Exclusion Method	95
8.4.5	Disjoint Products Method	96
8.4.6	Factoring Method	97
8.5	Summary	99
	References	100
<b>9</b>	<b>Reliability Analysis of Multistage Interconnection Networks</b>	<b>101</b>
9.1	Reliability Analysis of Shuffle-Exchange Network with Minimal Extra Stages	101
9.1.1	Terminal Reliability Comparison of SEN, SEN+, and SEN+2	102
9.1.2	Broadcast Reliability Comparison of SEN, SEN+, and SEN+2	105
9.1.3	Network Reliability Comparison of SEN, SEN+, and SEN+2	106
9.1.4	Concluding Remarks	113
9.2	Terminal Reliability Improvement in Modified Shuffle-Exchange Network	115
9.2.1	Terminal Reliability of Shuffle-Exchange Network (SEN)	115
9.2.2	Terminal Reliability of Modified Shuffle-Exchange Network (MODSEN)	116

9.2.3	Comparison of the Networks	119
9.2.4	Conclusion	120
9.3	Reliability Bounds for Large MINs	121
9.3.1	Lower Bound Reliability of the Extra-Stage Cube Network	122
9.3.2	Upper Bound Reliability of the Extra-Stage Cube Network	123
9.3.3	Comparison of the Bounds with the Exact Reliability of the Extra-Stage Cube Network	126
9.3.4	Lower Bound Reliability of the Gamma Network	126
9.3.5	Upper Bound Reliability of the Gamma Network	128
9.3.6	Comparison of the Bounds with the Exact Reliability of the Gamma Network	130
9.3.7	Conclusion	132
	References	132
<b>10</b>	<b>Terminal Reliability Assessment of Gamma and Extra-Stage Gamma Networks</b>	<b>133</b>
10.1	Introduction	133
10.2	Gamma Network	135
10.2.1	Routing Pattern in Gamma Network	135
10.2.2	Redundant Paths	136
10.3	Terminal Reliability of Gamma Network	139
10.4	Extra-Stage Gamma Network	140
10.5	Comparison	146
10.6	Conclusions	146
	References	147
<b>11</b>	<b>Reliability Prediction of Distributed Systems Using Monte Carlo Method</b>	<b>149</b>
11.1	Introduction	149
11.2	Reliability Parameters	152
11.3	Monte Carlo Method	153
11.4	Confidence Interval for Monte Carlo Point Estimate	155
11.5	Numerical Results	157
11.6	Conclusion	163
	References	164
