<b>1</b>	<b>Mechanical Testing of Materials</b> .....	<b>1</b>
1.1	Introduction .....	1
1.2	The Tension Test .....	2
1.2.1	Elastic Deformation and the Relations Between Stress and Strain .....	3
1.2.2	The Elastic and Proportional Limits .....	13
1.2.3	Plastic Deformation .....	14
1.2.4	The True Stress/Strain Relation .....	16
1.2.5	Elongation .....	18
1.2.6	The Reduction of Area .....	19
1.2.7	Necking .....	20
1.2.8	Instability in Tension .....	20
1.2.9	The Shear Stress and Shear Strain .....	23
1.2.10	The Elastic Strain Energy .....	25
1.2.11	Resilience .....	27
1.2.12	Toughness .....	28
1.2.13	Fracture Stress .....	29
1.3	Compression Stress .....	30
1.3.1	Introduction .....	30
1.3.2	The Compression of Brittle Materials .....	30
1.3.3	The Compression of Ductile Materials .....	31
1.3.4	The Effect of Hydrostatic Pressure on Compression .....	34
1.4	The Hardness Test .....	36
1.4.1	Indentation by Spherical (Ball) Indenters .....	37
1.4.2	Indentation by Pyramid and Cone Indenters .....	43
1.4.3	Indentation by Cone (or Spherical) Indenters .....	46
1.4.4	Comments on Hardness Tests .....	50
1.5	The Torsion Test (Shear) .....	50
1.5.1	Torsion in the Elastic Region .....	51
1.5.2	Torsion in the Plastic Region .....	55

1.5.3	Axial Change in Torsion .....	62
1.5.4	Fracture by Torsion Test .....	63
1.6	The Impact Tests .....	64
1.7	Anelasticity .....	69
1.7.1	Introduction .....	69
1.7.2	The Elastic After Effect.....	70
1.7.3	The Thermoelastic Effect .....	71
1.7.4	Energy Losses/Hysteresis Loop .....	73
1.7.5	Internal Friction .....	73
	Appendix I .....	78
	Appendix II .....	80
	References .....	84
<b>2</b>	<b>Introduction to Dislocations .....</b>	<b>85</b>
2.1	Introduction .....	85
2.2	The Theoretical Strength of Crystals .....	86
2.3	Seeing (Dislocations) Is Believing .....	88
2.3.1	Etch Pits .....	89
2.3.2	Transmission Electron Microscopy (TEM) .....	92
2.3.3	Field Ion Microscopy (FIM).....	95
2.4	The Geometrical Characterization of Dislocations.....	97
2.5	The Formation of Dislocations .....	101
2.6	The Motion of Dislocations .....	103
2.6.1	Conservative Motion .....	105
2.6.2	Non-conservative Motion (Climb) .....	108
2.7	The Energy of Dislocations .....	110
2.7.1	Screw Dislocation .....	112
2.7.2	Edge Dislocation .....	114
2.8	Line Tension .....	117
2.9	The Stress Field of a Dislocation .....	118
2.9.1	Screw Dislocations.....	118
2.9.2	Edge Dislocations .....	120
2.10	The Forces Acting on Dislocations .....	122
2.10.1	The Glide Forces .....	122
2.10.2	Climb .....	124
2.11	The Forces Between Dislocations .....	125
2.11.1	Screw Dislocations .....	125
2.11.2	Edge Dislocations .....	126
2.12	The Intersection of Dislocations .....	127
2.13	Dislocation Multiplication .....	130
2.14	Partial Dislocations .....	132
2.14.1	Shockley Partial Dislocations .....	133
2.14.2	Frank Partial Dislocations .....	136
2.14.3	The Cross Slip of Partial Dislocations .....	138
2.14.4	The Thompson Tetrahedron .....	139
2.14.5	Lomer-Cottrell Locks .....	140

2.15	Dislocation Pile-Ups .....	141
2.16	Low (Small)-Angle Grain Boundaries .....	143
	References .....	145
<b>3</b>	<b>Plastic Deformation</b> .....	<b>147</b>
3.1	Introduction .....	147
3.2	Critical Resolved Shear Stress (CRSS) .....	147
3.3	Slip .....	151
3.3.1	FCC Structures .....	151
3.3.2	BCC Structures .....	152
3.3.3	HCP Structures .....	153
3.4	The Slip in Polycrystalline Materials .....	155
3.5	Twinning .....	157
3.6	Yield Phenomena .....	163
3.6.1	Introduction .....	163
3.6.2	Sharp Yield .....	164
3.6.3	Lüders Bands .....	165
3.6.4	Stain Aging .....	166
3.6.5	The Cottrell-Bilby Theory .....	169
3.7	The Bauschinger Effect (BE) .....	179
3.8	The Effect of Impurity (Solute), Temperature and Orientation .....	180
3.9	Polygonization .....	184
3.10	Deformation in Polycrystalline Materials .....	186
3.10.1	Preferred Orientation (Texture) .....	188
3.10.2	The Bauschinger Effect (BE) .....	190
3.11	Grain Boundaries .....	192
	References .....	193
<b>4</b>	<b>Strengthening Mechanisms</b> .....	<b>195</b>
4.1	Introduction .....	195
4.2	Strain Hardening .....	196
4.2.1	Stage I .....	197
4.2.2	Stage II .....	205
4.2.3	Stage III (Dynamic Recovery) .....	210
4.3	Microstructure .....	214
4.4	Theories of Strain Hardening .....	217
4.4.1	Stage I .....	219
4.4.2	Stage II .....	223
4.4.3	Stage III .....	233
4.5	Strain Hardening in Polycrystalline Materials .....	234
4.6	Solid Solution Strengthening .....	236
4.6.1	Introduction .....	236
4.6.2	Strengthening by Interstitial Atoms .....	237
4.6.3	Strengthening by Substitution Atoms .....	237
4.7	Grain Boundaries and Grain Size .....	239

4.8	Second-Phase Hardening (Precipitates and/or Other Particles) .....	246
4.8.1	Introduction .....	246
4.8.2	Orowan Loop Formation .....	247
4.8.3	The Strength of Obstacles and Break-Away Stress.....	249
4.8.4	Cutting Through the Second Phase .....	252
4.8.5	The Mott-Nabarro Concept.....	253
4.8.6	Summary of Second-Phase Strengthening .....	255
	References .....	256
<b>5</b>	<b>Time Dependent Deformation – Creep</b> .....	<b>259</b>
5.1	Introduction .....	259
5.2	Creep in Single Crystals.....	260
5.3	Creep in Polycrystalline Materials .....	272
5.4	Mechanisms of Creep .....	282
5.4.1	Nabarro-Herring Creep .....	284
5.4.2	Dislocation Creep and Climb.....	288
5.4.3	Climb-Controlled Creep .....	288
5.4.4	Glide via Cross-Slip .....	291
5.4.5	Coble Creep .....	296
5.5	Grain-Boundary Sliding .....	298
5.6	Creep Rupture.....	307
5.7	Recovery (Relaxation).....	314
5.8	The Prediction of Life-Time (Parametric Method).....	318
5.8.1	The Larson-Miller Approach .....	318
5.8.2	The Manson-Haferd Approach .....	321
5.8.3	The Orr-Sherby-Dorn (OSD) Approach .....	325
5.8.4	The Monkman-Grant Approach .....	329
5.9	Concepts of Designing (Selecting) Creep-Resistant Materials .....	332
	References .....	335
<b>6</b>	<b>Cyclic Stress – Fatigue</b> .....	<b>339</b>
6.1	Introduction .....	339
6.2	The Endurance Limit; S-N Curves.....	340
6.2.1	The Endurance Limit in Ferrous Metals .....	345
6.2.2	The Endurance Limit in Non-ferrous Metals .....	346
6.3	The Stress Cycles .....	347
6.3.1	Low-Cycle Fatigue Tests .....	348
6.3.2	High-Cycle Fatigue Tests .....	353
6.3.3	Very High Cycle Tests .....	353
6.4	Fatigue Life .....	354
6.4.1	The Stress-Based Approach .....	354
6.4.2	Strain-Based Life-Times.....	355
6.5	Work Hardening (Softening) .....	360
6.6	Hysteresis .....	371
6.7	The Mean Stress .....	381

6.8	Underloading (UL), Overloading (OL), Coaxing and Cumulative Damage .....	385
6.8.1	Underloading (UL) .....	385
6.8.2	Overloading (OL) .....	387
6.8.3	Coaxing .....	391
6.8.4	Cumulative Damage .....	392
6.8.5	Variable-Amplitude Loading (Intermittent Loading).....	395
6.9	Structural Observations in Fatigued Specimens .....	398
6.9.1	Progression Markings (Beach Marks) and Striations .....	398
6.9.2	The Dislocation Structure in Fatigue .....	400
6.10	The Notch Effect .....	411
6.11	Failure Resulting from Cyclic Deformation (Fracture by Fatigue)..	415
6.12	The Effects of Some Materials and Process Variables .....	416
6.12.1	Surface Effects on Fatigue .....	416
6.12.2	The Residual Stresses .....	417
6.12.3	Introduction to Residual Stresses .....	418
6.13	Miscellaneous Variables .....	425
6.13.1	Grain Size .....	426
6.13.2	The Effect of Temperature .....	430
6.13.3	Specimen Size .....	432
6.13.4	The Environment .....	434
6.14	Thermal Fatigue .....	436
6.15	Design for Fatigue .....	442
	References .....	444
<b>7</b>	<b>Fracture .....</b>	<b>449</b>
7.1	Introduction .....	449
7.2	Fracture Types .....	451
7.3	Brittle Fracture .....	454
7.4	Theories of Brittle Fracture .....	455
7.4.1	Griffith's Theory on Fracture .....	456
7.4.2	Orowan's Fracture Theory .....	459
7.4.3	Brittle Fracture in Crystalline Materials .....	461
7.4.4	The Dislocation Theory of Brittle Fracture .....	462
7.5	Factors Causing Embrittlement .....	465
7.5.1	Liquid Metal Embrittlement (LME) .....	465
7.5.2	Hydrogen Embrittlement (HE) .....	466
7.5.3	Aqueous-Environment Embrittlement (AEE) or Stress-Corrosion Cracking .....	471
7.5.4	Temper Embrittlement (TE) .....	474
7.6	Fracture Toughness .....	479
7.7	Ductile Fracture .....	490
7.7.1	Introduction .....	490
7.7.2	The Process of Neck Formation .....	491

7.8	Ductile-to-Brittle Transition (Transition Temperature) .....	504
7.8.1	Introduction .....	504
7.8.2	The Features .....	505
7.9	Fatigue Fracture .....	509
7.9.1	Crack-Tip Blunting .....	509
7.9.2	The Effect of Inclusion .....	512
	References .....	518
<b>8</b>	<b>Mechanical Behavior in the Micron and Submicron/Nano Range .....</b>	<b>521</b>
8.1	Introduction .....	521
8.2	Mechanical Behavior in the Small-Size Range .....	521
8.2.1	An Explanation of the Size Effect .....	522
8.3	The Static Properties .....	523
8.3.1	Single Crystals .....	523
8.3.2	Polycrystalline Materials .....	530
8.3.3	Thin Films .....	533
8.3.4	Free-Standing Films .....	544
8.3.5	Whiskers .....	549
8.3.6	Twinning .....	553
8.3.7	The Hall-Petch Relation (H-P) in Materials of Small Dimensions .....	564
8.3.8	Superplasticity .....	569
8.4	Time-Dependent Deformation (Creep) .....	584
8.5	Fatigue Behavior .....	597
8.5.1	Introduction .....	597
8.5.2	Fatigue in Micron-/Submicron-Sized Materials .....	597
8.5.3	The Fatigue of Nanocrystalline (NC) Materials .....	608
8.6	Fracture .....	614
8.6.1	Introduction .....	614
8.6.2	The Characteristics .....	615
8.7	Epilogue .....	623
	Reference .....	624
	<b>Index .....</b>	<b>629</b>
