

# Contents

Preface . . . . .	xv	
Acknowledgments . . . . .	xvii	
Reviewers . . . . .	xix	
<b>CHAPTER 1</b>	<b>Introduction to Clinical Microbiology . . . . .</b>	<b>1</b>
Classification and Taxonomy . . . . .	2	
Characteristics of Eukaryotes and Prokaryotes . . . . .	3	
Bacterial Components . . . . .	4	
Cellular Metabolism . . . . .	5	
Exotoxins and Endotoxins . . . . .	6	
The Role of Clinical Microbiology . . . . .	6	
The Infectious Process . . . . .	7	
Normal Flora . . . . .	7	
Modes of Transmission—Routes of Infection . . . . .	8	
True versus Opportunistic Pathogens . . . . .	9	
Host Defense Mechanisms . . . . .	10	
Signs of Infection . . . . .	13	
Nosocomial and Health Care–Associated Infections . . . . .	14	
Review Questions . . . . .	14	
Bibliography . . . . .	16	
<b>CHAPTER 2</b>	<b>Safety in the Clinical Microbiology Laboratory . . . . .</b>	<b>17</b>
Laboratory Safety . . . . .	18	
Exposure Control . . . . .	18	
Safety Education . . . . .	18	
Universal Precautions and Standard Precautions . . . . .	19	
Personal Protective Equipment . . . . .	20	
Engineering Controls . . . . .	21	
Postexposure Plan . . . . .	22	
Fire Safety . . . . .	24	
Chemical Safety . . . . .	26	
Review Questions . . . . .	27	
Bibliography . . . . .	27	

<b>CHAPTER 3</b>	<b>Specimen Collection, Transport, and Processing: Preliminary Identification Methods . . . . .</b>	<b>29</b>
	General Specimen Guidelines . . . . .	31
	Specimen Collection Requirements for Specific Sites . . . . .	33
	Respiratory Tract . . . . .	33
	Gastrointestinal Tract. . . . .	34
	Urine. . . . .	35
	Blood . . . . .	36
	Cerebrospinal Fluid . . . . .	36
	Genital Tract. . . . .	37
	Wound and Abscesses. . . . .	37
	Specimen Transport and Processing . . . . .	37
	Initial Specimen Plating and Identification Methods . . . . .	38
	Microscopic Examination of Clinical Specimens . . . . .	38
	Selection and Inoculation of Primary Media . . . . .	39
	Preliminary Biochemical Tests. . . . .	43
	Carbohydrate Utilization. . . . .	43
	Catalase. . . . .	44
	Cytochrome Oxidase. . . . .	44
	Coagulase . . . . .	44
	Spot Indole. . . . .	44
	PYR Hydrolysis. . . . .	44
	Quality Control . . . . .	45
	Laboratory Procedures. . . . .	45
	Quality Control . . . . .	48
	Quality Control . . . . .	48
	Review Questions. . . . .	48
	Bibliography . . . . .	49
<b>CHAPTER 4</b>	<b>Microscopy, Staining, and Traditional Methods of Examination . . . . .</b>	<b>51</b>
	Microscopy . . . . .	52
	Brightfield Microscopy . . . . .	52
	Direct Examination Methods . . . . .	53
	Staining Methods. . . . .	53
	Methylene Blue. . . . .	54
	Gram Stain. . . . .	54
	Acid-Fast Stains. . . . .	54
	Fluorescent Stains . . . . .	55
	Fungal Stains . . . . .	56
	Antibody-Conjugated Stains . . . . .	56
	Laboratory Procedures. . . . .	56
	Quality Control . . . . .	57
	Laboratory Exercises . . . . .	57
	Review Questions. . . . .	57
	Bibliography . . . . .	58

<b>CHAPTER 5</b>	<b>Automation, Immunodiagnostics, and Molecular Methods . . . . .</b>	<b>59</b>
	Multitest Systems . . . . .	60
	Automated Identification Systems . . . . .	62
	Principles . . . . .	62
	Automated Systems for Identification . . . . .	62
	Immunochemical Methods . . . . .	64
	Antigens and Antibodies . . . . .	64
	Immunochemical Methods to Detect Microorganisms . . . . .	65
	Immunofluorescence . . . . .	69
	Immunoserological Techniques . . . . .	70
	Acute and Convalescent Phase Specimens . . . . .	70
	Immunoserological Applications . . . . .	71
	Introduction to Molecular Techniques . . . . .	72
	Nucleic Acid Probes . . . . .	72
	Amplification Methods . . . . .	74
	Nucleic Acid Sequencing . . . . .	76
	Review Questions . . . . .	80
	Bibliography . . . . .	81
<b>CHAPTER 6</b>	<b>Antimicrobial Susceptibility Testing . . . . .</b>	<b>83</b>
	Overview of Antibiotic Susceptibility Testing . . . . .	84
	Selection of Antibiotics . . . . .	85
	Categories and Types of Antibiotics . . . . .	86
	Antimycobacterial Agents . . . . .	92
	Antifungal Agents . . . . .	93
	Antiviral Agents . . . . .	93
	Resistance to Antimicrobial Agents . . . . .	95
	Intrinsic Resistance . . . . .	95
	Acquired Resistance . . . . .	95
	Laboratory Methods for Susceptibility Testing . . . . .	97
	Disk Diffusion Susceptibility Testing . . . . .	98
	Quantitative Dilution Susceptibility Testing . . . . .	100
	Specific Methods to Determine Bacterial Resistance . . . . .	115
	Laboratory Procedures . . . . .	119
	Laboratory Exercises . . . . .	124
	Review Questions . . . . .	127
	Bibliography . . . . .	128
<b>CHAPTER 7</b>	<b><i>Staphylococci</i> and Other Catalase-Positive Gram-Positive Cocc . .</b>	<b>131</b>
	Gram-Positive Cocc . . . . .	132
	<i>Staphylococcus</i> . . . . .	133
	<i>Staphylococcus aureus</i> . . . . .	135
	Specimen Collection . . . . .	137
	Infectious Processes . . . . .	137
	Detection of Antibiotic-Resistant <i>Staphylococcus aureus</i> . . . . .	139

Coagulase-Negative Staphylococci . . . . .	140
<i>Staphylococcus epidermidis</i> . . . . .	140
<i>Staphylococcus saprophyticus</i> . . . . .	141
Laboratory Procedures . . . . .	141
Laboratory Exercises . . . . .	145
Review Questions . . . . .	147
Bibliography . . . . .	148
<b>CHAPTER 8      <i>Streptococcus, Enterococcus, and Related Organisms</i></b> . . . . .	<b>149</b>
<i>Streptococcus</i> . . . . .	150
Classification . . . . .	151
β-Hemolytic <i>Streptococcus</i> . . . . .	152
<i>Streptococcus pyogenes</i> (Group A <i>Streptococcus</i> ) . . . . .	152
<i>Streptococcus agalactiae</i> (Group B <i>Streptococcus</i> ) . . . . .	155
Miscellaneous β-Hemolytic <i>Streptococcus</i> . . . . .	156
Viridans Streptococci . . . . .	157
<i>Streptococcus pneumoniae</i> . . . . .	158
<i>Streptococcus bovis</i> Group . . . . .	159
<i>Enterococcus</i> . . . . .	160
Nutritionally Variant Streptococci (NVS): <i>Abiotrophia</i> and <i>Granulicatella</i> . . . . .	161
Other Catalase-Negative Streptococcal-Like Organisms . . . . .	161
Laboratory Procedures . . . . .	162
Laboratory Exercises . . . . .	166
Review Questions . . . . .	167
Bibliography . . . . .	168
<b>CHAPTER 9      <i>Neisseria</i></b> . . . . .	<b>171</b>
Characteristics of <i>Neisseria</i> . . . . .	172
Identification of <i>Neisseria</i> Species . . . . .	172
Infectious Process . . . . .	174
<i>Neisseria gonorrhoeae</i> . . . . .	174
<i>Neisseria meningitidis</i> . . . . .	178
<i>Moraxella catarrhalis</i> . . . . .	180
Miscellaneous <i>Neisseria</i> . . . . .	180
Laboratory Procedures . . . . .	180
Laboratory Exercises . . . . .	183
Review Questions . . . . .	183
Bibliography . . . . .	185
<b>CHAPTER 10      <i>Enterobacteriaceae</i></b> . . . . .	<b>187</b>
Characteristics of Enterobacteriaceae . . . . .	188
Serological Characteristics . . . . .	189
Isolation . . . . .	189
Identification . . . . .	190

Identification and Significance of Selected Enterobacteriaceae . . . . .	194
<i>Escherichia coli</i> . . . . .	194
<i>Shigella</i> . . . . .	195
<i>Klebsiella-Enterobacter-Serratia-Hafnia</i> Group (Tribe Klebsielleae) . . . . .	198
<i>Proteaceae</i> . . . . .	205
Antibiotic Susceptibility and Treatment . . . . .	209
Laboratory Procedures. . . . .	210
Laboratory Exercises . . . . .	218
Review Questions. . . . .	221
Bibliography . . . . .	223
<b>CHAPTER 11 Nonfermentative Gram-Negative Bacilli . . . . .</b>	<b>227</b>
Characteristics of Nonfermenters . . . . .	228
Identification of Nonfermenters . . . . .	229
Family Pseudomonadaceae . . . . .	231
<i>Pseudomonas aeruginosa</i> . . . . .	231
<i>Pseudomonas fluorescens</i> and <i>P. putida</i> . . . . .	233
<i>P. stutzeri</i> and <i>P. mendocina</i> . . . . .	234
<i>Burkholderia</i> . . . . .	234
<i>Ralstonia</i> . . . . .	235
<i>Acinetobacter</i> . . . . .	236
<i>Stenotrophomonas</i> . . . . .	236
<i>Alcaligenes</i> . . . . .	237
<i>Achromobacter</i> . . . . .	237
<i>Moraxella</i> . . . . .	238
<i>Oligella</i> . . . . .	238
<i>Chryseobacterium</i> . . . . .	238
<i>Kingella</i> . . . . .	239
Laboratory Procedures. . . . .	239
Laboratory Exercises . . . . .	241
Review Questions. . . . .	242
Bibliography . . . . .	242
<b>CHAPTER 12 Miscellaneous Gram-Negative Bacilli: Part 1 . . . . .</b>	<b>245</b>
<i>Vibrio</i> . . . . .	246
<i>Vibrio cholerae</i> . . . . .	246
Other <i>Vibrio</i> . . . . .	247
<i>Campylobacter</i> . . . . .	248
<i>Helicobacter</i> . . . . .	250
<i>Aeromonas</i> . . . . .	250
<i>Plesiomonas</i> . . . . .	251
Laboratory Procedures. . . . .	251
Review Questions. . . . .	252
Bibliography . . . . .	252

<b>CHAPTER 13</b>	<b>Miscellaneous Gram-Negative Bacilli: Part 2 . . . . .</b>	<b>255</b>
	<i>Haemophilus</i> . . . . .	256
	Isolation . . . . .	256
	Identification . . . . .	257
	<i>Haemophilus influenzae</i> . . . . .	258
	Miscellaneous <i>Haemophilus</i> Species . . . . .	260
	<i>Legionella</i> . . . . .	260
	<i>Bordetella</i> . . . . .	262
	<i>Brucella</i> . . . . .	264
	<i>Pasteurella</i> . . . . .	265
	<i>Francisella</i> . . . . .	266
	<i>Streptobacillus</i> . . . . .	267
	HACEK Group . . . . .	267
	<i>Chromobacterium</i> . . . . .	268
	Laboratory Procedures . . . . .	268
	Laboratory Exercises . . . . .	270
	Review Questions . . . . .	271
	Bibliography . . . . .	272
<b>CHAPTER 14</b>	<b>Gram-Positive Bacilli . . . . .</b>	<b>275</b>
	Spore Formers . . . . .	276
	<i>Bacillus</i> . . . . .	276
	Nonspore Formers . . . . .	278
	Catalase Positive and Nonbranching . . . . .	278
	Catalase Negative and Simple Branching . . . . .	281
	Branching or Partially Acid Fast Gram-Positive Bacilli . . . . .	282
	Miscellaneous Gram-Positive Bacilli . . . . .	283
	Review Questions . . . . .	284
	Bibliography . . . . .	285
<b>CHAPTER 15</b>	<b>Spirochetes . . . . .</b>	<b>287</b>
	<i>Borrelia</i> . . . . .	288
	Relapsing Fever . . . . .	288
	<i>Borrelia burgdorferi</i> . . . . .	289
	<i>Treponema</i> . . . . .	291
	<i>Treponema pallidum</i> . . . . .	292
	Other Treponemes . . . . .	293
	Miscellaneous Spirochetes . . . . .	293
	<i>Leptospira</i> . . . . .	294
	Review Questions . . . . .	295
	Bibliography . . . . .	296
<b>CHAPTER 16</b>	<b>Anaerobes . . . . .</b>	<b>299</b>
	Overview of Anaerobes . . . . .	300
	Oxygen Tolerance . . . . .	301

Specimen Collection and Transport . . . . .	301
Identification . . . . .	302
Anaerobic Culture Media and Incubation . . . . .	303
Culture Media. . . . .	303
Incubation . . . . .	304
Biochemical and Other Identification Methods . . . . .	305
Clinically Relevant Anaerobes . . . . .	307
Anaerobic Gram-Negative Bacilli. . . . .	307
Anaerobic Gram-Positive Spore-Forming Bacilli: <i>Clostridium</i> . . . . .	310
<i>Clostridium tetani</i> . . . . .	310
<i>Clostridium botulinum</i> . . . . .	310
<i>Clostridium perfringens</i> . . . . .	311
<i>Clostridium difficile</i> . . . . .	312
Miscellaneous Clostridia . . . . .	313
Anaerobic Gram-Positive Non-Spore-Forming Bacilli . . . . .	313
Anaerobic Gram-Positive Cocci . . . . .	314
Anaerobic Gram-Negative Cocci . . . . .	315
Antimicrobial Susceptibility Testing for Anaerobes . . . . .	316
Laboratory Procedures. . . . .	317
Laboratory Exercises . . . . .	319
Review Questions. . . . .	320
Bibliography . . . . .	322
<b>CHAPTER 17     <i>Mycobacterium</i> . . . . .</b>	<b>325</b>
Classification. . . . .	326
Specimen Collection. . . . .	327
Specimen Processing . . . . .	327
Staining. . . . .	328
Culture Media. . . . .	329
Identification . . . . .	329
<i>Mycobacterium tuberculosis</i> Complex . . . . .	332
<i>Mycobacterium tuberculosis</i> and Tuberculosis . . . . .	332
Photochromogens . . . . .	337
Scotochromogens . . . . .	338
Nonphotochromogens . . . . .	339
Rapid Growers: <i>Mycobacterium Fortuitum Chelonei</i> Complex . . . . .	340
Laboratory Procedures. . . . .	340
Laboratory Exercises . . . . .	345
Review Questions. . . . .	346
Bibliography . . . . .	348
<b>CHAPTER 18    <i>Chlamydia, Mycoplasma, and Rickettsia</i> . . . . .</b>	<b>351</b>
Chlamydiaceae . . . . .	352
<i>Chlamydia trachomatis</i> . . . . .	352
<i>Chlamydophila psittaci</i> . . . . .	354
<i>Chlamydophila pneumoniae</i> . . . . .	354

<i>Mycoplasma</i> . . . . .	354
Rickettsiaceae . . . . .	356
<i>Rickettsia rickettsii</i> . . . . .	357
<i>Rickettsia akari</i> . . . . .	357
<i>Rickettsia prowazekii</i> . . . . .	357
<i>Rickettsia typhi</i> . . . . .	357
<i>Orientia tsutsugamushi</i> . . . . .	358
Anaplasmataceae. . . . .	358
<i>Ehrlichia</i> . . . . .	358
<i>Coxiella</i> . . . . .	358
Review Questions. . . . .	359
Bibliography . . . . .	360
<b>CHAPTER 19</b>	
<b>Introduction to Virology . . . . .</b>	<b>363</b>
Viral Structure and Characteristics. . . . .	364
Viral Replication . . . . .	365
Specimen Selection, Collection, and Processing . . . . .	367
Laboratory Methods in Virology . . . . .	369
Serological Detection of Viral Antibodies . . . . .	371
Selected Medically Important Viruses. . . . .	372
Adenovirus. . . . .	372
Hepatitis Viruses . . . . .	372
Herpes Viruses . . . . .	375
Papillomaviridae . . . . .	378
Papovaviruses. . . . .	379
Poxviruses . . . . .	380
Arboviruses . . . . .	380
Filoviridae . . . . .	383
Picornaviridae. . . . .	383
Orthomyxoviridae . . . . .	384
Paramyxoviridae . . . . .	385
Rhabdoviridae. . . . .	387
Reoviridae . . . . .	387
Caliciviruses . . . . .	387
Retroviridae . . . . .	388
Review Questions. . . . .	389
Bibliography . . . . .	391
<b>CHAPTER 20</b>	
<b>Introduction to Medical Mycology . . . . .</b>	<b>395</b>
Introduction to Mycology . . . . .	396
Specimen Collection. . . . .	398
Identification Methods . . . . .	398
Culture Media. . . . .	402
Microscopic Examination of Growth . . . . .	403
Incubation and Macroscopic Morphology . . . . .	403
Fungal Infections . . . . .	405
Superficial Mycoses . . . . .	405
Subcutaneous Mycoses . . . . .	412

Systemic Mycoses: Dimorphic Fungi . . . . .	414
Yeast and Yeast-Like Fungi . . . . .	418
<i>Candida</i> . . . . .	420
Opportunistic Saprobiic Fungi . . . . .	423
Serological Testing . . . . .	425
Laboratory Procedures . . . . .	426
Laboratory Exercises . . . . .	429
Review Questions . . . . .	431
Bibliography . . . . .	432
<b>CHAPTER 21 Introduction to Medical Parasitology . . . . .</b>	<b>435</b>
Introduction and Definitions . . . . .	437
Specimen Collecting, Processing, and Examining of Stool Specimens . . . . .	438
Collection and Processing of Stool Specimens . . . . .	438
Microscopic Examination . . . . .	439
Direct Smears . . . . .	439
Concentration Methods for Stool Specimens . . . . .	439
Permanently Stained Mounts . . . . .	440
Blood Specimens . . . . .	440
Protozoa . . . . .	440
Intestinal Amoebas . . . . .	441
Free-Living Amoebas . . . . .	441
Intestinal Flagellates . . . . .	445
Intestinal Ciliate . . . . .	446
Intestinal Coccidia . . . . .	446
Miscellaneous Protozoa . . . . .	449
Sporozoa from Blood and Tissue . . . . .	450
Hemoflagellates . . . . .	456
Trypanosomes . . . . .	456
Nematodes . . . . .	458
<i>Strongyloides stercoralis</i> . . . . .	459
Hookworms: <i>Necator americanus</i> and <i>Ancylostoma duodenale</i> . . . . .	459
<i>Enterobius vermicularis</i> . . . . .	462
<i>Ascaris lumbricoides</i> . . . . .	463
<i>Trichuris trichiura</i> . . . . .	465
<i>Trichinella spiralis</i> . . . . .	465
Blood and Tissue Nematodes: Filarial Worms . . . . .	468
Cestodes . . . . .	470
<i>Diphyllobothrium latum</i> . . . . .	471
<i>Hymenolepsis nana</i> . . . . .	473
<i>Hymenolepsis diminuta</i> . . . . .	473
<i>Dipylidium caninum</i> . . . . .	474
<i>Taenia saginata</i> , <i>T. solium</i> , and <i>T. asiatica</i> . . . . .	476
<i>Echinococcus granulosus</i> . . . . .	476
Trematodes . . . . .	478
Intestinal Flukes . . . . .	479
Schistosomes: Blood Flukes . . . . .	483

Laboratory Procedures . . . . .	485
Laboratory Exercises . . . . .	489
Review Questions . . . . .	490
Bibliography . . . . .	493
<b>CHAPTER 22 Clinical Specimens . . . . .</b>	<b>495</b>
Introduction . . . . .	496
Primary Plating of Specimens . . . . .	496
Blood Cultures and Bacteremia . . . . .	496
Types and Causes of Bacteremia . . . . .	497
Blood Culture Specimen Collection . . . . .	497
Manual Blood Cultures . . . . .	501
Automated Blood Culture Systems . . . . .	503
Microorganisms Associated with Blood Infections . . . . .	503
Cerebrospinal Fluid—Meningitis and Central Nervous System Infections . . . . .	504
Collection and Analysis of CSF . . . . .	507
Respiratory Tract Specimens and Infections . . . . .	509
Upper Respiratory Tract . . . . .	509
Throat Specimens . . . . .	509
Lower Respiratory Tract . . . . .	510
Diagnosis of Lower Respiratory Tract Infections—Sputum Specimens . . . . .	512
Eye and Ear Specimens and Infections . . . . .	514
Urinary Tract Specimens and Infections . . . . .	514
Urine Collection and Processing . . . . .	516
Colony Count . . . . .	517
Automated Urine Screening Methods . . . . .	518
Gastrointestinal Tract Specimens and Infections . . . . .	518
Specimen Collection and Processing . . . . .	520
Genital Tract Specimens and Infections . . . . .	522
Specimen Collection for Urogenital Infections . . . . .	523
Direct Examination . . . . .	523
Skin and Wound Specimens and Infections . . . . .	525
Specimen Collection for Wound and Skin Infections . . . . .	526
Pleural, Peritoneal, Pericardial, and Synovial Fluids . . . . .	526
Pleural Fluid . . . . .	528
Peritoneal Fluid . . . . .	528
Pericardial Fluid . . . . .	528
Synovial Fluid . . . . .	528
Laboratory Procedures . . . . .	529
Case Studies and Review Questions . . . . .	538
Bibliography . . . . .	542
<b>Glossary . . . . .</b>	<b>545</b>
<b>Index . . . . .</b>	<b>559</b>
