Contributors	xix
CHAPTER 1 Introduction	1
Sven Erik Jørgensen, Ni-Bin Chang, Fu-Liu Xu	
1.1. Models of Lakes and Wetlands	1
1.2. Ecological Engineering Applied to Lakes and Wetlands	4
References	7
CHAPTER 2 Structurally Dynamic Models of Lakes	9
Sven Erik Jørgensen	
2.1. Introduction	9
2.2. How to Construct Structurally Dynamic Models and Definitions of Eco-Exergy	10
2.3. Biomaniipulation	16
2.4. Development of a SDM to Describe the Competition Between Phytoplankton and Submerged Vegetation	23
2.5. SDM Developed for Lake Fure	27
2.6. Summary and Conclusions	31
References	33
CHAPTER 3 Development of Level-IV Fugacity-Based QWASI Model for Dynamic Multimedia Fate and Transport Processes of HCHs in Lake Chaohu, China	35
Xiang-Zhen Kong, Fu-Liu Xu, Wei He, Ning Qin	
3.1. Introduction	35
3.1.1. Hexachlorocyclohexanes and the Isomers	35
3.1.2. HCHs Usage and Residue Level in the Study Site	36
3.1.3. Level-IV Fugacity-Based QWASI Model	36
3.2. Development of Level IV Fugacity-Based QWASI Model	38
3.2.1. Model Framework	38
3.2.2. Model Simulation and Validation	41
3.2.3. Parameter Determination	41
3.2.4. Sensitivity Analysis	49
3.2.5. Uncertainty Analysis	50
3.3. Results and Discussion	51
3.3.1. Simulation of Seasonal Variations	51
3.3.2. Transfer Fluxes	56

3.3.3. Sensitivity Analysis of the Model Parameters.....	61
3.3.4. Uncertainty Analysis of the Model Simulation.....	64
3.4. Conclusion.....	68
References.....	69

CHAPTER 4 Eco-Risk Assessments for Toxic Contaminants Based on Species Sensitivity Distribution

Models in Lake Chaohu, China	75
Fu-Liu Xu, Xiang-Zhen Kong, Ning Qin, Wei He, Wen-Xiu Liu	
4.1. Introduction.....	75
4.1.1. Ecological Risk Assessments	75
4.1.2. Organochlorine Pesticides	76
4.1.3. Polycyclic Aromatic Hydrocarbons	76
4.1.4. The Study Site of Lake Chaohu.....	77
4.2. Materials and Methods	78
4.2.1. Measurements of OCPs and PAHs	78
4.2.2. Ecological Risk Assessments by SSD and PRA.....	80
4.3. Eco-Risk Assessments for OCPs in Lake Chaohu.....	90
4.3.1. The Residues of OCPs in the Water	90
4.3.2. The Spatial and Temporal Distribution of OCPs in the Water	92
4.3.3. Eco-Risk Assessments for OCPs.....	94
4.4. Eco-Risk Assessments for PAHs in Lake Chaohu	97
4.4.1. The Residues of PAHs in the Water	97
4.4.2. Site-Specific Ecological Risk of PAHs Based on the SSD Method.....	100
4.4.3. Probability of Ecological Risk of PAHs Based on the PRA Method	101
4.4.4. Uncertainty Analysis	105
4.4.5. Discussion.....	106
References.....	107

CHAPTER 5 Addressing the Uncertainty in Modeling Watershed Nonpoint Source Pollution

Yi Zheng, Feng Han, Yong Tian, Bin Wu, Zhongrong Lin	
5.1. Introduction to the Issue	113
5.1.1. Current Status of Nonpoint Source Pollution	113
5.1.2. Management Efforts	114
5.1.3. Existing Models.....	116
5.1.4. Modeling for Decision Support.....	119

5.2.	Uncertainty in Modeling NPS Pollution: State of the Art.....	121
5.2.1.	A Framework for Analysis	121
5.2.2.	Parameter Uncertainty	123
5.2.3.	Input Uncertainty	126
5.2.4.	Observational Uncertainty	127
5.2.5.	Model Structure Uncertainty	129
5.2.6.	Uncertainty About the Future.....	130
5.3.	Uncertainty Analysis for Complex NPS Pollution Models	131
5.3.1.	MCMC Approaches.....	132
5.3.2.	Informal Bayesian Approaches	138
5.3.3.	Probabilistic Collocation Method (PCM)	142
5.4.	Improving Data and Model Structure: Future Directions.....	149
5.4.1.	Strategic Data Collection	149
5.4.2.	Process Understanding and Representation	151
	References.....	152

CHAPTER 6 Extending the Application of Network Analysis to Ecological Risk Assessment for Aquatic Ecosystems161
Shaoqing Chen, Bin Chen

6.1.	Introduction	161
6.2.	General Framework of Applying Network Analysis to ERA....	163
6.3.	INA for ERA: Methodology and Rationale	164
6.3.1.	Food Web Investigation	164
6.3.2.	Network CA.....	165
6.3.3.	A Conversion of Flow Currency	166
6.3.4.	Development of Risk Flow	167
6.4.	A Case Study of the Application of INA: ERA of a River Ecosystem Intercepted by Damming.....	169
6.5.	Network Indicators for Risk Management	174
6.6.	Identifying Uncertainty in Network Analysis	176
6.7.	A System-Based ERA Framework for Aquatic Ecosystems	177
6.8.	Conclusion.....	179
	References.....	179

CHAPTER 7 Modeling the Purification Effects of the Constructed *Sphagnum* Wetland on Phosphorus and Heavy Metals in Dajiuhu Wetland Reserve, China185
Wei He, Fu-Liu Xu, Yanyan Zhang, Rong Tian, Hongxing Hu

7.1.	Introduction	185
-------------	--------------------	-----

7.2.	Material and Methods	186
7.2.1.	General Situation of the Study Area	186
7.2.2.	Simulation Device	187
7.2.3.	Simulation Experimental Method	188
7.2.4.	Storage and Processing Method for the <i>Sphagnum</i> and the Peat	189
7.2.5.	Chemical Analysis of the Sampling Water	190
7.2.6.	Purification Capacity and Purification Rate	190
7.2.7.	Kinetic Model	190
7.3.	Results and Discussion	192
7.3.1.	Background Values	192
7.3.2.	Purification of the SW to TP	193
7.3.3.	Purification of SW to Divalent Metal Ions	193
7.3.4.	Purification Ability of the SW to Various Contaminants	195
7.3.5.	The Best Kinetic Model Selection for Purification Effects of Constructed SW	196
7.3.6.	Modeling the Purification Effects of the Constructed SW	199
7.3.7.	Importance of the SW, its Purification Mechanism, and Further Study	203
7.4.	Conclusions	204
	Acknowledgments	204
	References	204

CHAPTER 8	Ecological Accounting for a Constructed Wetland	209
	Ling Shao, Z.M. Chen, G.Q. Chen	
8.1.	Introduction	209
8.2.	Methodology	211
8.2.1.	Accounting Framework	211
8.2.2.	Inventory	212
8.2.3.	Embodied Ecological Endowment Intensity Database	212
8.3.	Case Study	214
8.3.1.	Case Description, Inventory, and Database	215
8.3.2.	Embodied GHG Emissions	215
8.3.3.	Embodied Solar Energy	218
8.3.4.	Embodied Cosmic Exergy	222

8.4.	Conclusion.....	224
	References.....	226
CHAPTER 9	Modeling the Response of the Planktonic Microbial Community to Warming Effects in Maritime Antarctic Lakes: Ecological Implications	231
	Antonio Camacho, Juan Antonio Villaescusa, Carlos Rochera, Sven Erik Jørgensen	
9.1.	Introduction.....	231
9.2.	Study Area: Byers Peninsula, an Antarctic Special Protected Area.....	233
9.3.	Ecological Features: Lake Limnopolar and its Catchment	236
9.4.	Modeling of Lake Limnopolar	240
9.5.	Conclusions	245
	References.....	247
CHAPTER 10	Analytical Modeling for Environmental Dispersion in Wetland	251
	Zi Wu, L. Zeng, G.Q. Chen	
10.1.	Introduction.....	251
	10.1.1. Methodology.....	251
	10.1.2. Analytical Approaches	253
	10.1.3. Progresses in the Analytical Modeling of Environmental Dispersion	254
10.2.	Formulation.....	256
	10.2.1. Momentum and Concentration Transport	257
	10.2.2. Analytical Approaches for Environmental Dispersion in Wetland Flows	257
10.3.	Environmental Dispersion for Depth-Dominated Wetland Flows	266
	10.3.1. Steady Flow Wetlands.....	266
	10.3.2. Tidal Flow Wetlands	266
	10.3.3. Two-Layer Flow Wetlands.....	267
	10.3.4. Ecological Degradation, Duration, and Influenced Region.....	268
10.4.	Conclusions	271
	References.....	272

CHAPTER 11 Trade-Offs Between Biodiversity Conservation and Nutrients Removal in Wetlands of Arid Intensive Agricultural Basins: The Mar Menor Case, Spain	275
Julia Martínez-Fernández, Miguel-Angel Esteve-Selma, Jose-Miguel Martínez-Paz, María-Francisca Carreño, Javier Martínez-López, Francisco Robledano, Pablo Farinós	
11.1. Introduction	275
11.2. Dynamic Modeling of the Mar Menor Watershed.....	278
11.2.1. Model Description	278
11.2.2. Simulation Results	281
11.3. Effects of Hydrological Changes on the Mar Menor Lagoon: Jellyfish Outbreaks	284
11.4. Assessment of Ecosystem Services: Nutrient Removal.....	285
11.4.1. Role of Wetlands and Effects of Measures to Reduce Nutrient Inputs into the Lagoon	285
11.4.2. Cost-Effectiveness Analysis	286
11.4.3. Economic Valuation of the Ecosystem Service of Nutrients Removal of Mar Menor Wetlands	289
11.5. Assessment of Ecosystem Services: Biodiversity Conservation	290
11.5.1. Changes in Aquatic Bird Populations in Relation to Nutrient Inputs and Related Trophic Variables: Indicator Species and Guilds.....	290
11.5.2. Effects of Hydrological Changes on Habitats and Vegetation Dynamics	297
11.6. Trade-Offs Between Ecosystem Services of Wetlands	302
11.7. Concluding Remarks.....	305
References.....	306
CHAPTER 12 Structurally Dynamic Model and Ecological Indicators to detect the crayfish invasion in a lake ecosystem	311
Michela Marchi, Sven Erik Jørgensen, Federico Maria Pulselli, Simone Bastianoni	
12.1. Introduction	311
12.2. The Case Study of Lake Chozas (Spain) to Describe the Response to Biological Invasion	313
12.2.1. The Structurally Dynamic Model of Lake Chozas.....	316
12.2.2. Re-organization of Chozas Lake in Response to Biological Invasion.....	320

12.3.	Joint Application of Ecological Indicators to Assess the Health Status of Two Spanish Lakes	321
12.3.1.	Ecological Indicators	321
12.3.2.	Application of Ecological Indicators to Lakes Sentiz and Chozas	323
12.4.	Conclusion.....	330
	References.....	332
CHAPTER 13	Development of Ecological Models for the Effects of Macrophyte Restoration on the Ecosystem Health of a Large Eutrophic Chinese Lake (Lake Chaohu)	337
	Fu-Liu Xu, Sven Erik Jørgensen, Xiang-Zhen Kong, Wei He, Ning Qin	
13.1.	Introduction.....	337
13.2.	Methods.....	340
13.2.1.	Procedures for Ecosystem Health Assessment Based on Ecological Model	340
13.2.2.	Development of Ecological Model for Ecosystem Health Assessment.....	340
13.2.3.	Ecosystem Health Indicators Used in the Ecological Models	357
13.3.	Results.....	359
13.3.1.	Model 1 Calibration and Present Health State of Lake Chaohu Ecosystem	359
13.3.2.	Effects of Macrophytes on Lake Ecosystem Health.....	364
13.4.	Discussion	365
13.5.	Conclusions	368
	Acknowledgments	369
	References.....	369
CHAPTER 14	Development of Structural Dynamic Model for the Ecosystem Evolution of a Large Shallow Chinese Lake (Lake Chaohu)	375
	Xiang-Zhen Kong, Sven Erik Jørgensen, Fu-Liu Xu, Wei He, Ning Qin, Qing-Mei Wang, Wen-Xiu Liu	
14.1.	Introduction.....	375
14.1.1.	Alternative States of Shallow Lakes.....	375
14.1.2.	Lake Chaohu as a Eutrophicated Shallow Lake	376
14.1.3.	Modeling Approaches for Restoration of Lake Chaohu	377

14.2.	Model Development	378
14.2.1.	Model Framework	378
14.2.2.	Parameter Determination	386
14.2.3.	Seasonal Simulation and Validation	386
14.3.	Restoration Methods and the Possible Effects.....	391
14.3.1.	Potential Restoration Methods	391
14.3.2.	Possible Effects of Various Restoration Methods	393
14.4.	Structural Dynamic Approaches.....	399
14.4.1.	Structural Dynamic Approaches on the Lake Shift.....	399
14.4.2.	SDMs Results and Discussion.....	400
14.4.3.	Conclusion	406
	References.....	407
CHAPTER 15	Exploring the Mechanism of Catastrophic Regime Shift in a Shallow Plateau Lake: A Three-Dimensional Water Quality Modeling Approach	411
	Rui Zou, Yuzhao Li, Lei Zhao, Yong Liu	
15.1.	Introduction.....	411
15.2.	Materials and Methodology.....	413
15.2.1.	Study Area: Lake Yilong	413
15.2.2.	Modeling Framework	414
15.2.3.	Model Development for Lake Yilong.....	424
15.3.	Results and Discussions.....	428
15.3.1.	Hydrodynamic Simulation and Calibration	428
15.3.2.	Water Quality Simulation and Calibration	428
15.3.3.	Simulation of the Catastrophic Regime Shift in Lake Yilong	430
15.4.	Conclusions.....	432
	Acknowledgments	432
	References.....	432
CHAPTER 16	Floating Treatment Wetlands for Nutrient Removal in a Subtropical Stormwater Wet Detention Pond with a Fountain	437
	Ni-Bin Chang, Martin P. Wanielista, Zheming Xuan, Zachary A. Marimon	
16.1.	Overview of Stormwater Flow and Quality Impact.....	437
16.2.	Stormwater Treatment Capacity.....	439
16.3.	Field Pond Study.....	443
16.3.1.	Study Site.....	443
16.3.2.	Materials and Methods	443

16.4.	Results and Discussion	450
16.4.1.	Temporal and Spatial Nutrients Distributions	450
16.4.2.	Operating HRT and REs	456
16.4.3.	Hydrological Processes.....	459
16.5.	BMP Credit Assessment	461
16.6.	Conclusions	463
	Acknowledgments	464
	References.....	464
CHAPTER 17	System Dynamics Modeling for Nitrogen Removal in a Subtropical Stormwater Wet Pond.....	469
	Ni-Bin Chang, Zachary A. Marimon, Zheming Xuan, Benjamin Vannah, Jamie Jones	
17.1.	Introduction.....	469
17.2.	Limitations of Traditional Stormwater Ponds.....	470
17.3.	Floating Treatment Wetland Technologies	473
17.4.	Field Campaign for Investigating the Copper Impact	474
17.5.	Collection of Nutrient Data	478
17.6.	Investigation of Aquatic Nitrogen Cycling.....	481
17.7.	System Dynamics Modeling.....	483
17.8.	Results and Discussion	485
17.8.1.	Model Calibration and Validation.....	485
17.8.2.	Sensitivity Analysis for Addressing Copper-Related Ecotoxicity	490
17.9.	Conclusions	491
	Appendix A. Stock Symbols Used in the STELLA Model.....	492
	Appendix B. Flow Symbols Used in the STELLA Model.....	493
	Appendix C. Converter Symbols Used in the STELLA Model.....	495
	References.....	496
CHAPTER 18	Modeling Management Options for Controlling the Invasive Zebra Mussel in a Mediterranean Reservoir	501
	Carles Alcaraz, Nuno Caiola, Carles Ibáñez, Enrique Reyes	
18.1.	Introduction.....	501
18.2.	Methods.....	503
18.2.1.	Study Area	503
18.2.2.	Model Description	503
18.2.3.	Zebra Mussel Mortality Rates and System Carrying Capacity	505
18.2.4.	Model Formulation and Calibration.....	506

18.3.	Scenario Analyses	507
18.4.	Results and Discussion	507
18.4.1.	Population Dynamics and Model Calibration	507
18.4.2.	Total Phosphorus Effect	508
18.4.3.	Scenario with Increased Mortality	510
18.5.	Final Remarks	513
	Acknowledgments	514
	References.....	514
CHAPTER 19	SubWet 2.0. Modeling the Performance of Treatment Wetlands	519
	Annie Chouinard, Gordon C. Balch, Brent C. Wootton, Sven Erik Jørgensen, Bruce C. Anderson	
19.1.	Introduction	519
19.2.	Model Structure	520
19.2.1.	General Considerations.....	520
19.2.2.	Model Parameter Ranges and Default Values	521
19.3.	Model Calibration	521
19.3.1.	Field Trials from a Cold Climate Environment (Arctic Canada, Natural Tundra Wetland Examples)	524
19.3.2.	Field Trial from a Warm Climate Environment (Iringa, Tanzania—a Constructed Wetland Example).....	530
19.4.	Advantages of SubWet in Comparison to Other Predictive Tools	533
19.5.	Summary and Conclusions	535
	References.....	536
CHAPTER 20	Framing the Need for Applications of Ecological Engineering in Arctic Environments	539
	Colin N. Yates, Gordon C. Balch, Brent C. Wootton	
20.1.	Introduction	539
20.2.	Review of Application of Ecological Engineering in the Arctic: 1970s to Present.....	541
20.2.1.	Revegetation of Disturbed Tundra	542
20.2.2.	Soil Remediation	543
20.2.3.	Wetlands for Wastewater Treatment and Rehabilitation.....	545
20.3.	Barriers to the Application Ecological Engineering in the Arctic	546
20.4.	Moving Research to Application.....	547
20.5.	Conclusions	547
	References.....	548

CHAPTER 21 Exploratory Performance Testing of a Pilot Scale HSSF Wetland in the Canadian Arctic	553
Colin N. Yates, Brent C. Wootton, Stephen D. Murphy, Sven Erik Jørgensen	
21.1. Introduction	553
21.2. Methods	554
21.3. Results/Discussion	556
21.4. Conclusions	564
Acknowledgments	564
References	565
CHAPTER 22 Practical Aspects, Logistical Challenges, and Regulatory Considerations for Modeling and Managing Treatment Wetlands in the Canadian Arctic	567
Colin N. Yates, Gordon C. Balch, Brent C. Wootton, Sven Erik Jørgensen	
22.1. Introduction	567
22.1.1. Arctic Context	568
22.2. Logistical Challenges	569
22.2.1. The Wastewater System	571
22.2.2. Current Regulatory Framework in the Canadian Arctic	577
22.3. Best Practices	578
22.3.1. Sampling	578
22.3.2. Management/Infrastructure	578
22.3.3. Modeling	579
22.4. Recommendations	580
22.4.1. Data Gaps/Science Needs	580
22.4.2. Tundra Wetland as Part of the Treatment Chain	581
22.5. Conclusions	581
References	581
CHAPTER 23 Modeling of Municipal Wastewater Treatment in a System Consisting of Waste Stabilization Ponds, Constructed Wetlands and Fish Ponds in Tanzania	585
T.A. Irene, L. Yohana, M. Senzia, M. Mbogo, T.S.A. Mbwette	
23.1. Introduction	585
23.2. Previous Efforts in Modeling of Wastewater Treatment	586

23.3.	Sampling and Model Development.....	588
23.3.1.	Sampling and Analysis.....	588
23.3.2.	Model State Variables and Processes/Flows.....	588
23.4.	Mathematical Equations	588
23.4.1.	WSP (Maturation Pond).....	588
23.4.2.	Horizontal Subsurface Constructed Wetlands	590
23.4.3.	Fish Pond	590
23.5.	Model Simulations and Output.....	591
23.5.1.	Waste Stabilization Pond (Maturation Pond)	591
23.5.2.	Nitrogen Mass Balance in WSP.....	591
23.5.3.	Horizontal Subsurface Flow Constructed Wetlands	593
23.5.4.	Mass Balance in the HSSFCW	593
23.5.5.	Fish Pond	595
23.5.6.	Mass Balance in the Fish Pond.....	595
23.6.	Conclusions and Recommendations.....	597
23.6.1.	Conclusions.....	597
	References.....	598

CHAPTER 24	A Novel Subsurface Upflow Wetland with the Aid of Biosorption-Activated Media for Nutrient Removal	601
	Ni-Bin Chang, Martin P. Wanielista, Zhemin Xuan	
24.1.	Introduction.....	601
24.2.	Regulation and Policy.....	603
24.2.1.	Current Regulation of Water Quality and OSTDS Standards.....	603
24.2.2.	NSF 245 Standards	604
24.3.	Biosorption-Activated Media	605
24.4.	Field-Scale Study.....	606
24.4.1.	Process Design.....	606
24.4.2.	Selection of Plant Species	610
24.4.3.	Sampling and Analysis.....	612
24.4.4.	Performance-Based Comparisons Between Wetland Cells	614
24.4.5.	SUW Effluent Performance Concentrations	616
24.4.6.	SUW Mass Balance with Removal Performance Data	618
24.5.	Conclusions.....	621
	Acknowledgments	621
	References.....	622

CHAPTER 25 Tracer-based System Dynamic Modeling for Designing a Subsurface Upflow Wetland for Nutrient Removal625
Ni-Bin Chang, Martin P. Wanielista, Zhemin Xuan

25.1. Introduction625

25.2. Site Description.....627

25.3. The Tracer Study629

 25.3.1. Tracer Study629

 25.3.2. Hydraulic Pathways of SUW631

25.4. Modeling the SUW System632

 25.4.1. Conceptual Model.....632

 25.4.2. Model Construction636

 25.4.3. Model Equations.....638

 25.4.4. Model Calibration and Validation.....639

25.5. Sensitivity Analysis643

25.6. Final Remarks647

25.7. Conclusions647

 Acknowledgments648

 References.....648
