

TABLE OF CONTENTS

Preface	ix
Chapter 1 A Brief Overview of Phenomena Involved in Light Trapping	1
1.1 Interference	3
1.2 Scattering	5
1.3 Reflection	6
1.4 Diffraction.....	9
1.5 Plasmonics.....	14
1.6 Refraction.....	15
Chapter 2 Modes and Hybridization	17
2.1 Introductory Comments.....	17
2.2 Radiation Modes.....	17
2.3 Trapped Traveling Modes: Guided Modes.....	27
2.4 Trapped Traveling Modes: Bloch Modes	29
2.5 Trapped Localized Modes: Mie Modes and Plasma Modes	32
Chapter 3 Light-Trapping Structures	33
3.1 Introduction	33
3.2 Planar Structures with ARCs.....	33
3.3 Planar Structures with Randomly Textured Surfaces.....	34
3.4 Structures with Nanoelement Arrays.....	37
3.5 Structures with Plasmonic Effects.....	46
Chapter 4 Summary	49
4.1 The Current Picture.....	49
4.2 Some Future Directions?.....	50
4.3 Overview	50

Appendix A	Yablonovitch Limit Derivation	53
Appendix B	Fresnel Equations for the Situation of Section 2.2	59
Appendix C	Index of Refraction, Permittivity, and Absorption Coefficient.....	61
References		63
