Introduction	xiii
1 Introduction: Role of Petroleum Energy in Society	1
1.1 Introduction	1
Oil Spill Costs and Damages	3
1.2 Historic Use of Petroleum in Society	4
1.3 Current Use of Petroleum in Society	5
1.4 The Environmental Challenge	7
Onshore Spills	7
Marine Oil Spills	7
Oil Spills and War	11
1.5 Petroleum Fuels in an Age of Sustainability ...	13
References and Further Reading	14
2 Geology and Geochemistry of Oil and Gas Deposits	17
2.1 Geologic Principles	17
2.2 Introduction	18
2.3 Porosity, Permeability, and Diagenesis	21
2.4 Sedimentary Sequences and Facies Architecture	28
Fluvial Sequences	31
Alluvial Fan Sequences	35
Deltaic Sequences	37
Glacial Sequences	40
Eolian Sequences	42
Carbonate Sequences	46
Volcanic-Sedimentary Sequences	48
2.5 Structural Style and Framework	52
Faults	53
Fractured Media	56
Seismicity	59
2.6 Defining Petroleum: Geochemistry	59
2.7 Physical Characteristics of Petroleum	63
2.8 Chemical Characteristics of Petroleum	64
Paraffinic versus Naphthenic Crude Oils ...	66
Sweet Crude versus Sour Crude	66
Light Crude versus Heavy Crude	66

2.9	Hydrocarbon Constituents of Environmental Concern	68
	Other Chemical Analysis of Crude Oils	79
2.10	Vapor Screening	79
	Chemical Characteristics of Crude Oils	80
	Soil Organic Carbon-Water Partitioning Coefficient (K_{oc})	80
	Distribution Coefficient (K_d)	81
	Henry's Law of Solubilities	81
	Aqueous Solubility (S)	81
	References and Further Reading	82
3	Drilling for Oil and Gas	89
3.1	Introduction	89
	History of Oil and Gas Exploration	89
	Location of Major Oil and Gas Fields	93
	Environmental Concerns During Exploration and Production	99
	Formation Kick	100
	Well Control	102
	Surface Blowouts	102
	Underground Blowouts	102
3.2	Natural Sources of Oil and Gas in the Environment	103
	Natural Formation of Petroleum Deposits	103
	Natural Seeps	106
3.3	Environmental Concerns on Oil and Gas Fields	108
	Physical and Chemical Characteristics of Petroleum	108
	Constituents of Environmental Concern	109
	Unconventional Oil and Gas Production	117
	Sources of Environmental Concern	117
3.4	Waste Handling And Waste Minimization	123
	Waste Handling and Minimization Onshore	123
	Waste Handling and Minimization in Marine Environments	126
3.5	Abandoning Oil and Gas Wells	127
	Economic Limit Calculation	127
	Well Abandonment Process	129
	Site Restoration	132
	Well Abandonment Legacy	132
3.6	Summary	132
	References and Further Reading	133

4	Sources of Spills	135
4.1	Onshore Spills	135
4.2	Spills during Discovery and Production	139
4.3	Spills during Transportation and Distribution	139
4.4	Spills during Refining	140
4.5	Spills from Producer to User	143
	Large-Volume End Users	143
	Small-Volume End Users	143
4.6	Spill Behavior	145
4.7	Remediation Constraints and Limitations	156
	Terrestrial Crude Oil Spill, Bemidji, Minnesota	157
	Oil Phase	160
	Aqueous Phase	161
	Vapor Phase	162
	Microbial Distributions	162
	Modeling of Solute Transport and Biodegradation	163
	Oil Spills in a Water Body	163
4.8	Marine Spills	170
	Marine-Based Spills	170
	References and Further Reading	180
5	Gas Leaks and Environmental Impacts	183
5.1	Introduction	183
5.2	Biogenic and Thermogenic Hydrocarbon Gases	187
5.3	Gas Leaks	193
5.4	Offshore Gas Leaks	193
5.5	Underground Natural Gas Storage	194
	Unconventional Resources	196
5.6	Gas Leaks and Explosions	196
5.7	Gas Explosions	196
5.8	Gas Explosions in Urban Environments	197
5.9	Impact on Groundwater Resources	199
	References and Further Reading	200
6	Assessment of Oil Spills and Gas Leaks:	
	Onshore and Offshore	203
6.1	Onshore Oil Spills and Gas Leaks	203
	Phase I Environmental Assessment	205
	Phase II Subsurface Investigation	205
	Phase III Corrective Action	205
	Phase IV Case Closure	206
	Environmental Responsibilities and Resources	208

	Oil Production Facility Checklist	212
	Best Management Practices	212
	Site Conceptual Model	214
6.2	Oil Spills and Gas Leaks Into Water Bodies	217
	Description and Documentation	218
	Documentation Goals	220
	Characterizing Marine Spills	220
	Chemical Testing	221
	Visual Surveillance	221
	Detection	222
	Remote Sensing Techniques	222
	Offshore Crude Oil Identification	224
	Remote Sensing Tools for Marine Oil Spills	232
	Degradation of Oil in the Environment	234
	Special Environmental Mapping	240
	Marine Oil Spill Responses	242
	Summary	248
	References and Further Reading	248
7	Remediation of Oil Spills and Habitat	
	Restoration	251
7.1	Offsite Commercial Disposal Facilities	251
7.2	RCRA Exemptions	252
7.3	Drilling Waste Management	257
7.4	Waste Minimization Methods	258
	Directional Drilling	259
	Drilling Smaller-Diameter Holes	260
	Drilling Techniques That Use Less Drilling Fluid	261
	Drilling Fluid Systems That Generate Less Waste	261
	Life Cycle Analysis of Well Materials	262
7.5	Introduction to Drilling Muds	263
	Synthetic-Based Muds (SBMs) Offer Alternative to Traditional Muds	263
	New Drilling Fluid Systems	264
	Alternate Weighting Agents	264
	Recycling of Muds	264
	Reuse of Cuttings	265
	Burial	267
	Pits	267
	Landfills	268
	Land Farming	270
	Land Treatment	272
	Bioremediation	274

Composting	275
Bioreactors	275
Vermiculture	276
Past Practices	277
Stricter Regulation of Drilling Waste	
Discharges	277
Treatment Processes Prior to	
Discharge	279
Commercial Disposal Facilities	280
Slurry Injection of Drilling Wastes	280
Types of Slurry Injection	280
Slurry Injection Process	281
Regulatory Requirements	282
Database of Slurry Injection Jobs	283
Observed Problems	283
Disposal in Salt Caverns	285
Thermal Treatment Technologies	286
Incineration	286
Thermal Desorption	288
7.6 Cost Estimates	292
7.7 Remedial Approaches at Oil and	
Gas Fields	293
7.8 Redox Changes	294
7.9 In-Situ Remediation Delivery Systems	294
Chemical Injections	297
Bioremediation	300
Soil Vapor Extraction	302
Risk Analysis and Modeling	302
7.10 Abandoned Oil and Gas Wells	302
7.11 Geophysical Surveys and Ecosystem	
Protection	303
Seismic Exploration	303
Field Measures	303
7.12 Characterizing Risk	304
Oil Spill Cleanup Costs	305
7.13 Analytical Approaches for Determining	
Environmental Impact	306
Characterizing Land-Based Oil Spills	306
7.14 Land-Based Remediation, Treatment,	
and Reuse/Recycling	308
Soil Remediation, Treatment, and Reuse	
and Recycling	308
Crude Oil Removal	316
Chemical and Biological Treatments	327
Aquifer Restoration	329
Site Closure	334

	Evaluation of Parameters	336
	Hydrogeologic Factors	338
	Chemical Characteristics	339
	Biological Characteristics	340
	Circumstantial Factors	341
	Summary of Onshore Spills	342
7.15	Marine Remediation Strategies	342
	Off-Shore Strategies	342
	Shore-Line Strategies	344
7.16	Shoreline Cleanup Methods	345
7.17	Spill Prevention	346
7.18	Offshore Oil Spills and Wildlife	347
7.19	Minimizing Spills on Wildlife	347
	Fish	348
	Birds	349
	Mammals	349
	Pinnipeds and Cetaceans	350
	Manatees	350
7.20	Response Options to Protect Wildlife	352
	Containing Spilled Oil	352
	Keeping Animals Away from Spilled Oil	352
	Rescuing Oiled Animals	353
7.21	Major Considerations in Oiled Animal Rescue	354
7.22	Wildlife and Oil Spill Examples	354
7.23	Summary	355
	References and Further Reading	356
8	Accidents, Risk Strategies, and Sustainable Remediation	363
8.1	General Model of Accidents	363
8.2	Case Histories of Preventable Accidents	365
	Piper Alpha Platform, North Sea, United Kingdom	365
	Petrobras 36 Platform, Campos Basin, Brazil	366
	Alexander Kielland Oil Rig, North Sea, Scotland-Norway	367
	Ocean Ranger, Grand Banks, North Atlantic, Canada	367
8.3	Onshore Oil Wells and Spills	368
	Seismic Exploration	369
	Field Measures to Minimize Spills and Leaks	369

Risks and Resource Limitations	370
Environmental Damage during Oil and Gas Operations	370
Risk Strategies	372
Minimizing Oil Spills and Improving Cleanup	372
Inflation Factors and Worker Safety Associated with Remediation Costs	375
Reliability of Remediation Equipment	375
Human Factors and Performance	377
Green and Sustainable Remediation	377
Environmental Footprint Assessment Methodology	382
Footprint Reduction Methods	383
Sustainable Remediation Tool (SRT)	383
8.4 Summary	384
References and Further Reading	385
9 Case Histories: Onshore and Offshore	387
9.1 Case Histories	387
Signal Hill, California	387
Old Salt Lake Oil Field, Los Angeles, California	390
Martha Oil Field, Kentucky	392
Los Angeles Basin on the Coastal Plain, California	393
Regulatory Framework	394
Hydrogeologic Setting	396
LNAPL Occurrence	399
LNAPL Hydrocarbon Recovery	401
Regional Long-Term Remediation Strategy	402
Future of the Los Angeles Basin Production	405
Pipelines and Tanks	405
Kalamazoo River Dilbit Spill, Michigan	406
Ashland Oil Spill, Pennsylvania	407
9.2 Case Studies: Offshore	409
Exxon Valdez	409
Torrey Canyon	413
Castillo de Bellver	414
Gulf War, 1991	414
BP Oil Spill of 2010	417
9.3 Summary	428
References and Further Reading	428

10	Air Quality Issues and Oil Spills and Gas Leaks . . .	433
10.1	Soil Vapor Intrusion Overview	433
	Environmental Factors Description	435
	Natural Factors Affecting Gas Migration into Buildings	435
	Architectural Factors Affecting Gas Migration into Buildings	436
	Other Factors Affecting Indoor Air Quality	437
	Other Source Descriptions for Indoor Air Degradation	437
	General Approach to Evaluating Soil Vapor Intrusion	438
	Types of Samples	438
	Mitigation Measures	439
	Laboratory Analysis	442
	Vapor Sample Collection	442
	Analytical Approach	444
10.4	Summary	444
	References and Further Reading	445
11	Conclusions	447
A	History of Oil and Gas Production and Worst Oil Spills	449
B	Human Health and Safety Issues for Oil Spill Responders	457
C	Investigations and Sampling Methods	493
D	Political and Legal Issues	533
E	Glossary and Abbreviations	541
F	Conversions	555
	Index	559
