Preface xiii
Preface to the SI Edition xvii
About the Author xviii

PART 1 INTRODUCTION TO STRUCTURAL ANALYSIS AND LOADS 1

1 Introduction to Structural Analysis 3

1.1 Historical Background 3
1.2 Role of Structural Analysis in Structural Engineering Projects 5
1.3 Classification of Structures 7
1.4 Analytical Models 12
Summary 16

2 Loads on Structures 17

2.1 Structural Systems for Transmitting Loads 18
2.2 Dead Loads 29
2.3 Live Loads 31
2.4 Classification of Buildings for Environmental Loads 34
2.5 Wind Loads 34
2.6 Snow Loads 42
2.7 Earthquake Loads 45
2.8 Hydrostatic and Soil Pressures 46
2.9 Thermal and Other Effects 46
2.10 Load Combinations 47
Summary 48
Problems 49

PART 2 ANALYSIS OF STATICALLY DETERMINATE STRUCTURES 51

3 Equilibrium and Support Reactions 53

3.1 Equilibrium of Structures 53
3.2 External and Internal Forces 56
3.3 Types of Supports for Plane Structures 56
3.4 Static Determinacy, Indeterminacy, and Instability 58
3.5 Computation of Reactions 69
3.6 Principle of Superposition 85
3.7 Reactions of Simply Supported Structures Using Proportions 86
Summary 88
Problems 89

4 Plane and Space Trusses 97

4.1 Assumptions for Analysis of Trusses 99
4.2 Arrangement of Members of Plane Trusses—Internal Stability 103
4.3 Equations of Condition for Plane Trusses 107
4.4 Static Determinacy, Indeterminacy, and Instability of Plane Trusses 107
4.5 Analysis of Plane Trusses by the Method of Joints 113
4.6 Analysis of Plane Trusses by the Method of Sections 126
4.7 Analysis of Compound Trusses 132
4.8 Complex Trusses 137
4.9 Space Trusses 138
Summary 147
Problems 148

5 Beams and Frames: Shear and Bending Moment 161

5.1 Axial Force, Shear, and Bending Moment 161
5.2 Shear and Bending Moment Diagrams 168
5.3 Qualitative Deflected Shapes 172
5.4 Relationships between Loads, Shears, and Bending Moments 173
5.5 Static Determinacy, Indeterminacy, and Instability of Plane Frames 192
5.6 Analysis of Plane Frames 200
Summary 213
Problems 215

6 Deflections of Beams: Geometric Methods 224

6.1 Differential Equation for Beam Deflection 225
6.2 Direct Integration Method 227
6.3 Superposition Method 231
6.4 Moment-Area Method 231
6.5 Bending Moment Diagrams by Parts 243
6.6 Conjugate-Beam Method 247
Summary 262
Problems 262

7 Deflections of Trusses, Beams, and Frames: Work–Energy Methods 268

7.1 Work 268
7.2 Principle of Virtual Work 270
7.3 Deflections of Trusses by the Virtual Work Method 274
7.4 Deflections of Beams by the Virtual Work Method 283
7.5 Deflections of Frames by the Virtual Work Method 295
7.6 Conservation of Energy and Strain Energy 306
7.7 Castigliano's Second Theorem 309
7.8 Betti's Law and Maxwell's Law of Reciprocal Deflections 317
Summary 319
Problems 320

8 Influence Lines 329

8.1 Influence Lines for Beams and Frames by Equilibrium Method 330
8.2 Müller-Breslau's Principle and Qualitative Influence Lines 344
8.3 Influence Lines for Girders with Floor Systems 356
8.4 Influence Lines for Trusses 366
8.5 Influence Lines for Deflections 377
Summary 380
Problems 380

9 Application of Influence Lines 387

9.1 Response at a Particular Location Due to a Single Moving Concentrated Load 387
9.2 Response at a Particular Location Due to a Uniformly Distributed Live Load 389

9.3 Response at a Particular Location Due to a Series of Moving Concentrated Loads 393
9.4 Absolute Maximum Response 400
Summary 405
Problems 406

10 Analysis of Symmetric Structures 408

10.1 Symmetric Structures 408
10.2 Symmetric and Antisymmetric Components of Loadings 414
10.3 Behavior of Symmetric Structures under Symmetric and Antisymmetric Loadings 424
10.4 Procedure for Analysis of Symmetric Structures 428
Summary 435
Problems 436

PART 3 ANALYSIS OF STATICALLY INDETERMINATE STRUCTURES 439

11 Introduction to Statically Indeterminate Structures 441

11.1 Advantages and Disadvantages of Indeterminate Structures 442
11.2 Analysis of Indeterminate Structures 445
Summary 449

12 Approximate Analysis of Rectangular Building Frames 450

12.1 Assumptions for Approximate Analysis 451
12.2 Analysis for Vertical Loads 454
12.3 Analysis for Lateral Loads—Portal Method 458
12.4 Analysis for Lateral Loads—Cantilever Method 473
Summary 480
Problems 480

13 Method of Consistent Deformations—Force Method 483

13.1 Structures with a Single Degree of Indeterminacy 484
13.2 Internal Forces and Moments as Redundants 504
13.3 Structures with Multiple Degrees of Indeterminacy 515
13.4 Support Settlements, Temperature Changes, and Fabrication Errors 537
13.5 Method of Least Work 545
Summary 551
Problems 552

14 Influence Lines for Statically Indeterminate Structures 559

14.1 Influence Lines for Beams and Trusses 560
14.2 Qualitative Influence Lines by Müller-Breslau's Principle 575
Summary 579
Problems 580

15 Slope-Deflection Method 583

15.1 Slope-Deflection Equations 584
15.2 Basic Concept of the Slope-Deflection Method 591
15.3 Analysis of Continuous Beams 598
15.4 Analysis of Frames without Sidesway 617
15.5 Analysis of Frames with Sidesway 625
Summary 643
Problems 643

16 Moment-Distribution Method 648

16.1 Definitions and Terminology 649
16.2 Basic Concept of the Moment-Distribution Method 657
16.3 Analysis of Continuous Beams 665
16.4 Analysis of Frames without Sidesway 678
16.5 Analysis of Frames with Sidesway 681
Summary 696
Problems 697

17 Introduction to Matrix Structural Analysis 702

17.1 Analytical Model 703
17.2 Member Stiffness Relations in Local Coordinates 707
17.3 Coordinate Transformations 714
17.4 Member Stiffness Relations in Global Coordinates 719
17.5 Structure Stiffness Relations 721
17.6 Procedure for Analysis 728
Summary 745
Problems 746

APPENDIX A Areas and Centroids of Geometric Shapes 747

APPENDIX B Review of Matrix Algebra 749

B.1 Definition of a Matrix 749
B.2 Types of Matrices 750
B.3 Matrix Operations 752
B.4 Solution of Simultaneous Equations by the Gauss-Jordan Method 758
Problems 762

APPENDIX C Computer Software 763

C.1 Starting the Computer Software 763
C.2 Inputting Data 763
C.3 Results of the Analysis 769
Problems 774

APPENDIX D Three-Moment Equation 775

D.1 Derivation of Three-Moment Equation 775
D.2 Application of Three-Moment Equation 780
Summary 786
Problems 787

Bibliography 789
Answers to Selected Problems 791
Index 801
