

# CONTENTS

Preface	<i>page</i> ix
Acknowledgments	xi
<b>1 Introduction</b>	<b>1</b>
1.1 Scope of chemical oceanography	2
1.2 History of chemical oceanography	5
1.3 Major features of ocean circulation	12
<b>2 The water in seawater</b>	<b>20</b>
2.1 Physical properties of water	20
2.2 Isotopes of hydrogen and oxygen	29
2.3 Clathrate compounds	41
<b>3 Salinity, chlorinity, conductivity, and density</b>	<b>46</b>
3.1 Need for accurate determination of salinity and density	46
3.2 Salinity	48
3.3 Chlorinity	51
3.4 Relationships between chlorinity and salinity	52
3.5 Conductivity and salinity	53
3.6 Salinity and density	59
<b>4 Major constituents of seawater</b>	<b>66</b>
4.1 Concentrations	66
4.2 Residence times	69
<b>5 Simple gases</b>	<b>74</b>
5.1 General considerations	74
5.2 Simple gas laws	75
5.3 Solubility in water	76
5.4 Sources and sinks within the ocean	80
5.5 Atmospheric exchange by diffusion	81
5.6 Air injection	90
<b>6 Salts in solution</b>	<b>95</b>
6.1 Solubility of salts	95
6.2 Freezing point and boiling point	97
6.3 Osmotic pressure	97
6.4 Activity coefficients	101

6.5	Electrostriction	105
6.6	Absorption of sound	107
6.7	A note on pH	110
<b>7</b>	<b>Carbon dioxide</b>	<b>114</b>
7.1	Reservoirs of carbon dioxide	115
7.2	Relationships in solution	116
7.3	Calcium carbonate	136
7.4	Anthropogenic carbon dioxide	150
7.5	Longer-term issues	173
<b>8</b>	<b>Nutrients</b>	<b>176</b>
8.1	Phosphorus	176
8.2	Nitrogen	186
8.3	Silicon	199
8.4	Other nutrients	209
8.5	Quantitative relationships	212
8.6	Initial nutrients	220
<b>9</b>	<b>Trace metals and other minor elements</b>	<b>228</b>
9.1	Analytical considerations	228
9.2	Various patterns of distribution	231
9.3	Mercury, an interesting special case	243
9.4	Speciation	249
9.5	Iron, another special case	253
9.6	Trace elements in sediments	257
<b>10</b>	<b>Radioactive clocks</b>	<b>261</b>
10.1	Radioactivity	262
10.2	Radionuclides in seawater	267
10.3	The uranium series	270
10.4	Carbon-14	278
<b>11</b>	<b>Organic matter in the sea</b>	<b>287</b>
11.1	Historical note	288
11.2	Primary production	289
11.3	Other sources of organic matter	294
11.4	Fate of the primary product	296
11.5	Measurement of organic carbon in seawater	304
11.6	Concentration and age of marine organic matter	305
11.7	Nature of marine organic matter	308
<b>12</b>	<b>Anoxic marine environments</b>	<b>327</b>
12.1	Rates of oxygen consumption	327
12.2	Anoxic oxidation	330
12.3	The Black Sea	333

<b>13</b>	<b>Exchanges at the boundaries</b>	<b>342</b>
13.1	River input	343
13.2	Air–sea exchange	345
13.3	Hot rocks	347
13.4	Sediment–water exchange	356
13.5	Warm clay	361
13.6	Residence times	365
<b>14</b>	<b>Chemical extraction of useful substances from the sea</b>	<b>368</b>
14.1	Salt	368
14.2	Evaporation of seawater	370
14.3	Rock salt	372
14.4	Magnesium	374
14.5	Bromine	375
14.6	Gold	376
14.7	Water	377
<b>15</b>	<b>Geochemical history of the oceans</b>	<b>379</b>
15.1	Illustrative rates	380
15.2	Early history of the ocean volume	381
15.3	Glacially caused changes in ocean volume	387
15.4	Mass of salt in the ocean	387
15.5	Composition of sea salt	389
15.6	Oxygen	392
15.7	Strontium isotopes	393
15.8	The churning of the Earth	395
	<b>Appendices</b>	<b>398</b>
A	The chemical elements	398
B	Symbols, units, and nomenclature	400
C	Physical properties of seawater	404
D	Gases	414
E	Carbon dioxide	430
F	Dissociation constants and pH scales	441
G	Solubility of calcium carbonate	450
H	Effects of pressure	453
I	Radioactive decay	456
J	Geochemical reservoirs, and some rates	459
K	Sound absorption	466
	Epilogue	467
	Questions for chapters	471
	Glossary	479
	References	483
	Index	516
