<i>Abbreviations and Acronyms</i>	<i>xvii</i>

Section I Introduction to Ground Improvement and Soil Stabilization

1. What is “Ground Improvement?”	3
1.1 Introduction	3
1.2 Alternatives to “Poor” Soil Conditions	4
1.3 Historical Soil and Ground Improvement	6
References	6
2. Ground Improvement Techniques and Applications	9
2.1 Categories of Ground Improvement	9
2.2 Typical/Common Ground Improvement Objectives	10
2.3 Factors Affecting Choice of Improvement Method	11
2.4 Common Applications	13
2.5 Emerging Trends and Promising Technologies	16
References	17
3. Soil Mechanics Basics, Field Investigations, and Preliminary Ground Modification Design	19
3.1 Soil Mechanics Fundamentals Overview	19
3.2 Site Investigations, Data, and Reports	44
3.3 Preliminary Modification Design Evaluation	58
Relevant ASTM Standards	58
References	59

Section II Soil Densification

4. Objectives and Improvements from Soil Densification	63
4.1 Overview of Soil Densification	63
4.2 Engineering Improvement Objectives	66
Relevant ASTM Standards	69
References	69

5. Shallow Compaction	71
5.1 Methods of Shallow Compaction	71
5.2 Principles of Compaction/Compaction Theory	72
5.3 Shallow Field Compaction Equipment	81
5.4 Properties of Compacted Soils	87
5.5 Field Compaction and Specifications	94
5.6 Compaction Control/Field Inspection	100
Relevant ASTM Standards	110
References	112
6. Deep Densification	115
6.1 Deep Densification Applications and Techniques	115
6.2 Deep Densification QC, Monitoring, and Specifications	139
Relevant ASTM Standards	145
References	145
Section III Hydraulic Modification	
7. Objectives and Approaches to Hydraulic Modification	151
7.1 Fundamental Objectives and Improvements	152
7.2 Dewatering Methods	160
7.3 Well Hydraulics and Dewatering Design	167
7.4 Drainage Capacity, Permeability, and Tests	168
7.5 Slope Stabilization by Dewatering/Drainage	172
7.6 Filtering and Seepage Control	182
7.7 Membrane Encapsulation	185
7.8 Altering Soil/Ground Hydraulic Properties	186
References	187
8. Geosynthetics for Filtration Drainage, and Seepage Control	189
8.1 Geotextiles for Filtration and Drainage	190
8.2 Geonets, Geocomposites, and Micro Siphon Drains	197
8.3 Geosynthetic Hydraulic Barriers	202
Relevant ASTM Standards	206
References	207
9. Preconsolidation	209
9.1 Preconsolidation Concepts and Methodologies	209
9.2 Use of Vertical Drains	211
9.3 Vacuum-Assisted Consolidation	217

9.4 Instrumentation and Performance Monitoring	219
References	220
10. Electro-Osmosis (Electrokinetic Dewatering)	221
10.1 Principles of Electro-Osmosis	221
10.2 Applications/Improvements	224
References	227
Section IV Physical and Chemical Modification	
11. Admixture Soil Improvement	231
11.1 Introduction to Admixture Soil Improvement	231
11.2 Admixture Materials	233
11.3 Application Methods and Mixing	259
11.4 Stabilization of Wastes and Contaminated Soils	273
Relevant ASTM Standards	274
Appendix Example Specification Guide for Soil Mixing with Admixtures	275
References	285
12. Ground Modification by Grouting	289
12.1 Fundamental Concepts, Objectives, and History	289
12.2 Grout Materials and Properties	290
12.3 Techniques, Technology, and Control	295
12.4 Applications of Grouting	308
Relevant ASTM Standards	315
References	316
13. Thermal Treatments	319
13.1 Types of Thermal Treatments	319
13.2 Heat Capacity of Soils	320
13.3 Heat Treatment of Soils	321
13.4 Ground Freezing	322
References	338
Section V Modification with Inclusions and Confinement	
14. Geosynthetic Reinforced Soil	343
14.1 History, Fundamentals, and Materials for Soil Reinforcement	343
14.2 MSE Walls and Slopes	350
14.3 Other Geosynthetic Reinforcement Applications	359
Relevant ASTM Specifications	368
References	368

15. In Situ Reinforcement	371
15.1 Types, Installations, Applications	371
15.2 Design Basics	381
15.3 Helical Anchors and Piles	383
15.4 Other In Situ Reinforcement	386
Relevant ASTM Standards	386
References	387
16. Soil Confinement	389
16.1 Concepts and History	389
16.2 Soldier Piles and Lagging	390
16.3 Cribs, Gabions and Mattresses	391
16.4 Geocells	396
16.5 Geosynthetically Confined Soil/Geosynthetic Reinforced Soil	404
16.6 Fabric Formwork and Geotubes	407
16.7 Erosion Control	408
Relevant ASTM Standards	411
References	411
17. Lightweight Fill Materials	413
17.1 Types of Lightweight Fills	413
17.2 Properties of EPS Geofoam	414
17.3 Geofoam Applications	416
Relevant ASTM Standards	427
References	430
18. Emerging Technologies, Trends, and Materials	433
18.1 What's New—What's Ahead?	433
18.2 Utilization of Wastes	434
18.3 Bioremediation	436
References	437
Appendix A: Standard Sieve Sizes	439
Appendix B: Approximate Conversions to SI Units	441
<i>Index</i>	445
