<i>Woodhead Publishing Series in Food Science, Technology and Nutrition</i>	<i>xvii</i>
<i>Introduction</i>	<i>xxvii</i>

Part I Microbial food safety risks and hygiene regulation	1
1 Food hygiene regulation in the European Union (EU)	3
<i>B. Van der Meulen, Wageningen UR, The Netherlands and H. Van de Weerd, Strat-X bvba, Belgium</i>	
1.1 Introduction.....	3
1.2 History of hygiene regulation in the European Union (EU).....	4
1.3 Key elements of hygiene regulation in the EU.....	5
1.4 Content of the hygiene regulations.....	6
1.5 Hazard analysis critical control point (HACCP).....	12
1.6 European hygiene legislation with regard to equipment.....	17
1.7 Hygiene regulations in relation to private food safety standards	19
1.8 Conclusion	19
1.9 Sources of further information and advice	19
1.10 References and further reading.....	19
2 Hazards, sources and vectors of contamination	21
<i>H. L. M. Lelieveld, formerly Unilever R&D, The Netherlands and J. T. Holah, Campden BRI, UK</i>	
2.1 Introduction.....	21
2.2 Physical contaminants.....	23

2.3	Chemical contaminants.....	24
2.4	Microbiological contamination.....	27
2.5	Hazard sources.....	28
2.6	Hazard vectors and controls.....	32
2.7	Recommended procedure for developing a processing environment plan (PEP).....	36
2.8	Conclusion.....	47
2.9	References.....	47
 Part II Hygienic design of food factory infrastructure.....		51
 3 Hygienic factory design for food processing.....		53
<i>J. T. Holah, Campden BRI, UK</i>		
3.1	Introduction.....	53
3.2	Design, construction and maintenance of the site.....	56
3.3	Building structure.....	58
3.4	High-care/risk areas.....	63
3.5	Storage areas.....	65
3.6	Personnel areas.....	66
3.7	Cleaning facilities: food, equipment and chemicals.....	69
3.8	Roofs.....	70
3.9	Floors.....	71
3.10	Drainage.....	74
3.11	Walls.....	76
3.12	Doors.....	79
3.13	Windows.....	79
3.14	Ceilings.....	80
3.15	Ventilation and temperature control.....	81
3.16	Lighting.....	83
3.17	Services.....	83
3.18	Water.....	86
3.19	Food and solid waste.....	87
3.20	Conclusion.....	88
3.21	References.....	89
 4 Hygienic design of food processing equipment.....		91
<i>H. L. M. Lelieveld, formerly Unilever R&D, The Netherlands and M. A. Mostert and G. J. Curiel, Unilever R&D Vlaardingen, The Netherlands</i>		
4.1	Introduction: key criteria in hygienic design.....	91
4.2	Risk assessment in equipment design.....	93
4.3	Regulatory requirements for hygienic equipment design: the European Union (EU).....	95
4.4	Drainability.....	97
4.5	Materials of construction.....	99

4.6	Surface finish.....	101
4.7	Corners, crevices and dead spaces	102
4.8	Welds and joints.....	107
4.9	Fasteners	112
4.10	Seals.....	114
4.11	Shaft ends	119
4.12	Doors, covers and panels.....	120
4.13	Rims	122
4.14	Conveyor belts.....	122
4.15	Equipment controls and instrumentation	125
4.16	Equipment installation	132
4.17	Insulation and cladding	138
4.18	Conclusion.....	139
4.19	References.....	139
5	Food processing equipment construction materials	142
	<i>M. Lewan, Materials Engineering Research Laboratory Ltd, UK</i>	
	<i>and E. Partington, Nickel Institute, UK</i>	
5.1	Introduction.....	142
5.2	Metals in food processing equipment.....	144
5.3	Plastics, composites and elastomers	149
5.4	Other materials.....	154
6	Verification and certification of hygienic design in	
	food processing.....	155
	<i>J. Hofmann, European Hygienic Engineering & Design Group,</i>	
	<i>Germany and T. R. Rugh, 3-A Sanitary Standards, USA</i>	
6.1	Introduction.....	155
6.2	Testing methods.....	156
6.3	Particular tests for cleanability.....	160
6.4	Future trends.....	163
6.5	Certification of equipment.....	165
6.6	Conclusion	172
6.7	References.....	172
7	Control of airborne contamination in food processing.....	174
	<i>K. L. Brown, formerly Campden BRI, UK and</i>	
	<i>S. Wray, Filtration Engineering Ltd, UK</i>	
7.1	Introduction: why control of airborne contamination is	
	important in food production	174
7.2	Sources of airborne contamination.....	176
7.3	Dust control	179
7.4	Control of environmental air quality.....	179
7.5	Process air control.....	187
7.6	Air disinfection systems.....	188
7.7	Air sampling.....	190

7.8	Guide to maximum airborne counts for different product contamination rates	195
7.9	Conclusion and future trends	198
7.10	Sources of further information and advice	198
7.11	References	199
8	Hygiene control in the application of compressed air and food gases	203
	<i>F. Moerman, Catholic University of Leuven – KU Leuven, Belgium and S. Dewulf, Dewulf Consulting, Belgium</i>	
8.1	Introduction.....	203
8.2	Hygiene control in the supply and application of food safe compressed air	204
8.3	Compressed air systems: components and location.....	213
8.4	Equipment to remove the bulk of water	218
8.5	Filtration and drying in compressed air systems.....	221
8.6	Design and installation of compressed air distribution system.....	231
8.7	Measures and procedures to prevent compressed air from contaminating the food processing area.....	235
8.8	Monitoring and maintenance of compressed air systems	236
8.9	Hygiene control in the supply and application of food gases	239
8.10	Conclusion	254
8.11	References	254
Part III	Hygiene practices in food processing	257
9	Cleaning and disinfection practices in food processing	259
	<i>J. T. Holah, Campden BRI, UK</i>	
9.1	Introduction.....	259
9.2	Sanitation principles.....	260
9.3	Cleaning chemicals.....	265
9.4	Disinfectants.....	268
9.5	Testing disinfectants	273
9.6	Water quality.....	276
9.7	Sanitation methodology.....	278
9.8	Wholeroom disinfection	282
9.9	Sanitation procedures	287
9.10	Evaluation of sanitation effectiveness.....	290
9.11	Sanitation management	293
9.12	Conclusion	298
9.13	References	298

10	Cleaning in place (CIP) in food processing.....	305
	<i>F. Moerman, Catholic University of Leuven – KU Leuven, Belgium, P. Rizoulières, Bocard Food, France and F. A. Majoor, formerly Unilever R&D Vlaardingen, The Netherlands</i>	
10.1	Introduction.....	305
10.2	Cleaning chemicals and disinfectants for cleaning in place (CIP).....	306
10.3	Other key factors for an effective CIP process.....	312
10.4	The main types of CIP systems	323
10.5	Centralized/decentralized CIP systems	330
10.6	Design of CIP line circuit.....	332
10.7	Cleaning of process vessels, large-volume equipment and tanks.....	341
10.8	Spray and jet devices for CIP	344
10.9	Installation, positioning and operation of tank cleaning devices	357
10.10	Managing tank cleaning.....	369
10.11	Automation	378
10.12	Automated self-cleaning of CIP systems	380
10.13	Future trends.....	380
10.14	Acknowledgement.....	381
10.15	References	381
11	Hygienic practices for equipment maintenance.....	384
	<i>F. Moerman, Catholic University of Leuven – KU Leuven, Belgium, J. T. Holah, Campden BRI, UK and P. Steenaard, European Hygienic Engineering & Design Group, The Netherlands</i>	
11.1	Introduction.....	384
11.2	Scheduled maintenance	385
11.3	Design, installation and working practices for improved hygiene during maintenance and repairs	387
11.4	Purchase and acceptance of bought-in equipment, tools and lubricants	389
11.5	Maintenance, repair and lubrication according to the principles of hygienic design	392
11.6	Personal hygiene practices during maintenance operations in the food industry	399
11.7	Hygienic maintenance and repair practices in the food industry	400
11.8	Evaluation of the quality of maintenance work done and record keeping.....	405
11.9	Conclusion	406
11.10	References	406

12	Personal hygiene in the food industry.....	408
	<i>E. Margas, The University of Nottingham, UK and J. T. Holah, Campden BRI, UK</i>	
12.1	Introduction: definition of personal hygiene	408
12.2	People as sources of contamination.....	412
12.3	Management practices for controlling contamination	416
12.4	Personal hygiene policy and practices for controlling contamination	421
12.5	Control of indirect contamination from people.....	431
12.6	Conclusion.....	436
12.7	References.....	437
13	Food hygiene and foreign bodies.....	441
	<i>M. Edwards, Campden BRI, UK</i>	
13.1	Introduction.....	441
13.2	The range of foreign bodies.....	442
13.3	The role of good hygiene practice in managing these hazards	444
13.4	Methods of preventing foreign body contamination.....	446
13.5	Detection and removal systems for foreign bodies	453
13.6	Conclusion	461
13.7	Future trends.....	461
13.8	Sources of further information and advice	464
13.9	References and further reading.....	464
14	Pest control in food businesses: an introduction.....	465
	<i>L. Kloosterman, Optascan, The Netherlands and K. Mager, EHEDG, The Netherlands</i>	
14.1	Introduction.....	465
14.2	Integrated pest management (IPM)	466
14.3	Pest control programs.....	467
14.4	Contents of a pest control program.....	469
14.5	Data collection.....	474
14.6	Communication.....	488
14.7	Maintaining and evaluating the pest control program.....	490
14.8	Conclusion.....	492
14.9	Future trends.....	492
15	Pest control of stored food products: insects and mites	494
	<i>C. H. Bell, Food and Environment Research Agency, UK</i>	
15.1	Introduction.....	494
15.2	The spread of pests	495
15.3	Physical control of pests	499

15.4	Chemical control of pests.....	513
15.5	Biological control of pests.....	521
15.6	Threats to successful control.....	524
15.7	Conclusion	526
15.8	References	527
16	Microbiological environmental sampling, records and record interpretation.....	539
	<i>J. T. Holah, Campden BRI, UK</i>	
16.1	Introduction.....	539
16.2	Sampling programmes and strategies	541
16.3	Sampling methods: monitoring surfaces.....	552
16.4	Sampling methods: validation and verification of surfaces.....	555
16.5	Sampling of personnel	561
16.6	Air and water sampling	563
16.7	Practical sampling.....	568
16.8	Sample transport and processing	571
16.9	Conclusion	575
16.10	References	575
17	Economics and management of hygiene in food plants	577
	<i>H. Timmerman, Sealed Air Corporation, USA and European Hygienic Engineering and Design Group, Belgium</i>	
17.1	Introduction: the perception of cleaning costs as an example of the perception of hygiene.....	577
17.2	The real cost of hygiene	578
17.3	Direct factors	580
17.4	Indirect factors.....	585
17.5	Overview of optimisation tools	586
17.6	Conclusion and future trends	588
17.7	References and further reading.....	589
	<i>Index.....</i>	<i>591</i>
