Chapter 1 Chemical Pollution of the Aquatic Environment by Priority Pollutants and its Control	1
<i>Oliver A.H. Jones and Rachel L. Gomes</i>	
1.1 Introduction	1
1.2 Pollution Control Philosophy	3
1.2.1 Integrated Control Measures	7
1.2.2 Trans-boundary Considerations	7
1.2.3 Complementary and Supplementary Control Measures	8
1.2.4 Life-cycle Considerations	8
1.2.5 The Impacts of Chemical Mixtures	9
1.3 Regulation of Direct Discharge Sources	9
1.3.1 The Water Framework Directive	9
1.3.2 REACH Regulations	14
1.4 Regulation of Diffuse Sources	16
1.5 Case Studies	20
1.5.1 Disinfection By-Products (DBPs)	20
1.5.2 Oestrogenic Chemicals	21
1.5.3 Pesticides	23
1.5.4 Emerging Contaminants of Concern (ECC)	24
1.6 Conclusions	25
References	26
Chapter 2 Chemistry and Pollution of the Marine Environment	29
<i>Martin R. Preston</i>	
2.1 Introduction	29
2.2 General Features of the Oceanic Environment	30
2.2.1 Sources of Chemicals to the Oceans	30
2.2.2 Circulation Patterns	31
2.2.3 Sea Water Reactivity – Biogeochemical Processes	31

2.3	Sources, Movement and Behaviour of Individual Pollutants or Classes of Pollutant	32
2.3.1	Oil	32
2.3.2	Sewage and Nutrients	38
2.3.3	Persistent Organic Compounds	43
2.3.4	Trace Metals	49
2.3.5	Radioactivity	52
2.3.6	The Effects of Artificial Radioactivity on the Marine Environment	55
2.4	Conclusions	56
	References	56
Chapter 3	Drinking Water Quality and Health	60
	<i>John K. Fawell</i>	
3.1	Introduction	60
3.2	Drinking Water Sources	61
3.3	Drinking Water Treatment and Supply	61
3.4	Sources of Contamination	62
3.5	Drinking Water Guidelines and Standards	63
3.6	Microbiological Contaminants	65
3.7	Chemical Contaminants	67
3.7.1	Inorganic Contaminants	67
3.7.2	Organic Contaminants	72
3.8	Water Safety Plans (WSPs)	76
3.9	Conclusions	76
	References	77
Chapter 4	Water Pollution Biology	80
	<i>William M. Mayes</i>	
4.1	Introduction	80
4.1.1	The Role of Biology in Understanding Water Pollution	80
4.1.2	Pollution Types and Interactions	81
4.2	Organic Pollution	82
4.3	Eutrophication	87
4.3.1	Nutrient Pollution in Lakes	87
4.3.2	Nutrient Enrichment in Rivers and Groundwaters	89
4.3.3	Managing Nutrient Pollution	90
4.4	Acidification	91
4.4.1	Acidification from Above: Sulfur and Nitrogen Oxides	91
4.4.2	Recovery from Acidification	93
4.4.3	Acidification from Below: Acid Mine Drainage	94
4.5	Toxic Chemicals	94
4.5.1	Modes of Action of Toxic Chemicals	94
4.5.2	Bioaccumulation and Biomagnification	97
4.6	Thermal Pollution	99
4.6.1	Anthropogenic Impacts on Thermal Regime	99
4.6.2	Climate Change	100

4.7	Radioactivity	101
4.8	Oil	102
4.9	Emerging Contaminants	102
4.9.1	Nanomaterials	103
4.9.2	Human and Veterinary Medicines	104
4.10	Biological Monitoring of Pollution in Freshwaters	105
4.10.1	Laboratory Monitoring Techniques	105
4.10.2	Field Monitoring Techniques	105
4.11	Conclusions	110
	References	111
Chapter 5	Sewage and Sewage Sludge Treatment	115
	<i>Elise Cartmell</i>	
5.1	Introduction	115
5.1.1	Objectives of Sewage Treatment	116
5.1.2	The Importance of Wastewater Reuse	117
5.1.3	Criteria for Sewage Treatment	118
5.1.4	Composition of Sewage	119
5.2	Sewage Treatment Processes	120
5.2.1	Preliminary Treatment	120
5.2.2	Primary Sedimentation	121
5.2.3	Secondary (Biological) Treatment	123
5.2.4	Secondary Sedimentation	132
5.3	Sludge Treatment and Reuse	132
5.3.1	Sources of Municipal Sludge	133
5.3.2	Sludge Recycling Options	133
5.3.3	Pre-treatment Handling	134
5.3.4	Sludge Treatment Processes	134
	References	138
Chapter 6	Treatment of Toxic Wastes	140
	<i>Stuart T. Wagland and Simon J. T. Pollard</i>	
6.1	Introduction	140
6.1.1	Definition of Toxic and Hazardous Wastes	141
6.1.2	Sources	142
6.1.3	Case Study: Detection of Hazardous Materials used in the Preservation of Wood	143
6.2	Treatment and Management Routes	144
6.2.1	Introduction and Overview	144
6.2.2	Case Study: Animal Carcass Disposal following Disease Outbreak	144
6.2.3	Thermal Processes	147
6.2.4	Chemical Processes	150
6.3	Environmental and Health Management	152
6.3.1	Case Study: Severe Environmental Consequences of Poor Hazardous Waste Management (Spodden Valley, UK).	152
	References	153

Chapter 7	Air Pollution: Sources, Concentrations and Measurements	157
	<i>Roy M. Harrison</i>	
7.1	Introduction	157
7.2	Specific Air Pollutants	158
7.2.1	Sulfur Dioxide	158
7.2.2	Suspended Particulate Matter	159
7.2.3	Oxides of Nitrogen	165
7.2.4	Carbon Monoxide	168
7.2.5	Hydrocarbons	169
7.2.6	Secondary Pollutants: Ozone and Peroxyacetyl Nitrate	171
7.3	Temporal Patterns of Airborne Concentration	172
7.4	Air Quality Management	174
7.5	Indoor Air Quality	177
7.6	International Perspective	177
7.7	Appendix	177
7.7.1	Air Pollutant Concentration Units	177
	References	180
Chapter 8	Chemistry of the Troposphere	182
	<i>Roy M. Harrison</i>	
8.1	Introduction	182
8.1.1	Pollutant Cycles	183
8.2	Atmospheric Chemical Transformations	186
8.2.1	The Importance of the Hydroxyl Radical (OH)	186
8.3	Atmospheric Oxidants	187
8.3.1	Formation of Ozone	187
8.3.2	Formation of PAN	192
8.3.3	NO _x Compounds	193
8.4	Atmospheric Acids	193
8.4.1	Weak Acids	193
8.4.2	Strong Acids	194
8.4.3	Sulfuric Acid	194
8.4.4	Nitric Acid	196
8.4.5	Hydrochloric Acid	196
8.4.6	Methanesulfonic Acid (MSA)	197
8.5	Atmospheric Bases	197
8.6	Atmospheric Aerosols and Rainwater	198
8.6.1	Atmospheric Particles	198
8.6.2	Rainwater	200
8.6.3	Inter-relationships between Pollutants, Environmental Effects and Impacts	201
	References	202
Chapter 9	Chemistry and Pollution of the Stratosphere	204
	<i>A. Robert MacKenzie and Francis D. Pope</i>	
9.1	Introduction	204

9.2	Stratospheric Ozone Chemistry	206
9.2.1	Gas-Phase Chemistry	207
9.2.2	Heterogeneous Chemistry	211
9.3	Natural Sources of Trace Gases	213
9.4	Anthropogenic Sources of Trace Gases	214
9.4.1	Direct Injection of Pollutants into the Stratosphere	214
9.5	Antarctic Ozone	215
9.6	Arctic Zone	217
9.7	Mid-Latitude Ozone	219
9.8	Legislation	220
9.9	Geoengineering	221
9.10	Conclusions	222
	Acknowledgements	223
	References	223
Chapter 10	Atmospheric Dispersal of Pollutants and the Modelling of Air Pollution	225
	<i>Martin L. Williams</i>	
10.1	Introduction	225
10.2	Dispersion and Transport in the Atmosphere	226
10.2.1	Mechanical Turbulence	226
10.2.2	Turbulence and Atmospheric Stability	226
10.2.3	Boundary Layer and Mixing Heights	228
10.2.4	Building, Topographical and Street Canyon Effects	230
10.2.5	Removal Processes – Dry and Wet Deposition	231
10.3	Modelling of Air Pollution Dispersion	231
10.3.1	Modelling in the Near-field	232
10.3.2	Operational Models	235
10.3.3	Emission Inventories	236
10.3.4	Modelling beyond Urban Scales – Long Range Transport and Chemical Transport Models	237
10.3.5	Uncertainty and Accuracy of Models	239
	References	241
Chapter 11	Air Pollution and Health	244
	<i>Robert L. Maynard and Jon Ayres</i>	
11.1	Introduction	244
11.2	Exposure to Air Pollution	245
11.3	Epidemiological Methods Applied in the Air Pollution Field	246
11.3.1	Time Series Methods	246
11.3.2	Cohort Studies	249
11.3.3	Intervention Studies	250
11.4	Individual Air Pollutants	251
11.4.1	Particulate Matter	251
11.4.2	Problems with Mass as a Metric of Dose	252
11.4.3	Other Possible Metrics of “Dose”	252
11.4.4	World Health Organisation Air Quality Guidelines for Particulate Matter	253

11.4.5	Nitrogen Dioxide	254
11.4.6	Sulfur Dioxide	256
11.4.7	Ozone	258
11.4.8	Carbon Monoxide	260
11.4.9	Carcinogenic Air Pollutants	261
11.5	Conclusion	263
	References	263
Chapter 12	Impacts of Air Pollutants on Crops, Trees and Ecosystems	268
	<i>Mike Ashmore</i>	
12.1	Introduction	268
12.2	Methods of Investigation	270
12.3	Sulfur Dioxide and Sulfur Deposition	272
12.4	Nitrogen Oxides, Ammonia and N Deposition	273
12.5	Ozone	276
12.6	Interactions between Pollutants	279
12.6.1	Sulfur Dioxide and Nitrogen Oxides	279
12.6.2	Interactions between Ozone and Elevated CO ₂ Concentrations	280
12.7	Interactions with Biotic and Abiotic Factors	280
12.7.1	Climate	280
12.7.2	Interactions with Pests and Diseases	281
12.8	Critical Loads and Levels	283
12.9	Effects on Ecosystem Services	285
	References	289
Chapter 13	Control of Pollutant Emissions from Road Transport	297
	<i>Claire Holman</i>	
13.1	Introduction	297
13.2	Engines	301
13.2.1	Introduction	301
13.2.2	Spark Ignition/Petrol Engines	302
13.2.3	Compression Ignition/Diesel Engines	303
13.3	Controlling Regulated Emissions	303
13.3.1	Introduction	303
13.3.2	Exhaust After-treatment	306
13.4	Reducing Carbon Dioxide Emissions	311
13.5	Fuel Quality	312
13.6	Alternative Fuels	314
13.6.1	Introduction	314
13.6.2	Natural Gas	315
13.6.3	Electric Vehicles	316
13.6.4	Hybrid Electric Vehicles	316
13.6.5	Biofuels	317
13.6.6	Hydrogen	320
13.7	Particle Emissions	320
13.8	Non-exhaust Particles	321

13.9 In-service Emissions	322
13.10 Conclusions	324
Acknowledgements	324
References	324
Chapter 14 Climate Change	326
<i>Keith P. Shine</i>	
14.1 Historical and Political Background	326
14.2 Scientific Background.	328
14.3 Observed Changes in Climate	329
14.4 Changes in Atmospheric Composition and Radiative Forcing.	332
14.5 Modelling Climate Change	335
14.6 Attribution of Climate Change over Past 150 Years.	336
14.7 Modelling Future Climate Change	337
14.8 Conclusions.	337
References	338
Chapter 15 Soil Pollution and Risk Assessment	340
<i>Chris D. Collins</i>	
15.1 Introduction	340
15.2 Sources of Soil Pollutants.	342
15.2.1 Potentially Toxic Elements	342
15.2.2 Organic Pollutants	344
15.2.3 Nanoparticles	345
15.3 Pathways of Pollutants in Soils.	345
15.3.1 PTEs.	346
15.3.2 Organic Pollutants	347
15.3.3 Nanoparticles	349
15.4 Consequences of Soil Pollution – Risk Assessment	349
15.4.1 Fine Tuning the Risk Assessment	350
15.5 Remediation of Contaminated Soils	351
15.6 Conclusions.	352
References	353
Chapter 16 Solid Waste Management	356
<i>Gev Eduljee</i>	
16.1 Introduction	356
16.2 An Integrated Approach to Waste Management	357
16.2.1 The Waste Management Hierarchy	357
16.2.2 An Integrated Approach	358
16.3 Technical Options for Waste Prevention and Recycling	359
16.3.1 Opportunities for Waste Avoidance and Minimization	359
16.3.2 Collection and Sorting	360
16.4 Policy Options to make Waste Prevention and Recycling Work in Practice.	361
16.4.1 Introduction	361
16.4.2 Producer Responsibility	362

16.4.3	Eco-labelling	364
16.4.4	Charges and Economic Incentives	365
16.4.5	Persuasion Measures	368
16.4.6	Integrated Product Policy (IPP)	369
16.5	Bulk Waste Reduction Technologies and Final Disposal	370
16.5.1	Combustion/Incineration	371
16.5.2	Other Thermal Processes	371
16.5.3	Composting	372
16.5.4	Anaerobic Digestion	373
16.5.5	Mechanical Biological Treatment (MBT)	374
16.5.6	Landfilling	374
16.5.7	Environmental Considerations	375
16.6	Integrated Waste Management Strategies	377
16.6.1	Revisiting the Waste Management Hierarchy	377
16.6.2	Principles of Life Cycle Assessment (LCA)	378
16.6.3	Selecting the Best Environmental Option for Individual Materials	379
16.6.4	Waste Management and Climate Change	380
16.6.5	Waste Management Strategy for Northern Ireland	380
16.6.6	Recycling and Recovery of Plastics in Germany	382
	References	382
Chapter 17	System Approaches: Life Cycle Assessment and Industrial Ecology	385
	<i>Roland Clift</i>	
17.1	Introduction: Changing Paradigms	385
17.2	Environmental System Analysis	386
17.2.1	Economy and Environment	386
17.2.2	Life Cycle Assessment	387
17.2.3	Material Flow Accounting	398
17.3	Applications and Aspirations	399
17.3.1	Industrial Ecology and the Circular Economy	399
17.3.2	Clean Technology and Pollution Prevention	400
17.3.3	Life Cycle Management	405
17.4	The Green Economy	412
	References	412
Chapter 18	The Environmental Behaviour of Persistent Organic Pollutants	417
	<i>Stuart Harrad and Mohamed Abou-Elwafa Abdallah</i>	
18.1	Introduction	417
18.1.1	Definition of Persistent Organic Pollutants (POPs)	418
18.1.2	Scope	419
18.1.3	Chemical Structure and Nomenclature	419
18.2	Adverse Effects	421
18.2.1	PCDD/Fs	421
18.2.2	PCBs	424
18.2.3	PBDEs	424
18.2.4	HBCDs	425

18.3	Measurement Techniques	425
18.3.1	Sampling Methodology	425
18.3.2	Analytical Methodology	428
18.4	Sources	429
18.4.1	PCDD/Fs	430
18.4.2	PCBs	431
18.4.3	PBDEs	432
18.4.4	HBCD	433
18.5	Important Physicochemical Properties and their Influence on Environmental Behaviour	433
18.5.1	Equilibrium Partitioning Coefficients	434
18.5.2	Aqueous Solubility	435
18.5.3	Environmental Persistence	436
18.5.4	Vapour Pressure	436
18.5.5	General Comments	436
18.6	Modelling Environmental Behaviour	437
18.6.1	The Fugacity Concept	437
18.6.2	Equilibrium Partitioning Modelling Approaches	438
18.6.3	Pharmacokinetic Models of Human Exposure	439
	References	439
Chapter 19	Radioactivity in the Environment	442
	<i>C. Nicholas Hewitt</i>	
19.1	Introduction	442
19.2	Radiation and Radioactivity	442
19.2.1	Types of Radiation	442
19.2.2	The Energy Changes of Nuclear Reactions	444
19.2.3	Rates of Radioactive Decay	444
19.2.4	Activity	445
19.2.5	Radioactive Decay Series	445
19.2.6	Production of Artificial Radionuclides	446
19.2.7	Nuclear Fission	447
19.2.8	Beta Decay of Fission Products	448
19.2.9	Units of Radiation Dose	448
19.3	Biological Effects of Radiation	450
19.3.1	General Effects	450
19.3.2	Biological Availability and Residence Times	450
19.3.3	Radiation Protection of Terrestrial Ecosystems	451
19.4	Natural Radioactivity	451
19.4.1	Cosmic Rays	451
19.4.2	Terrestrial Gamma Radiation	452
19.4.3	Radon and its Decay Products	452
19.4.4	Radioactivity in Food and Water	453
19.5	Medical Applications of Radioactivity	453
19.6	Pollution from Nuclear Weapons Explosions	454
19.7	Pollution from Electric Power Generation Plant and other Nuclear Reactors	455
19.7.1	Emissions Resulting from Normal Reactor Operation	455
19.7.2	Pollution Following Reactor Accidents	458

19.7.3	Radioactive Waste Treatments and Disposal	461
19.7.4	Fuel Reprocessing	462
19.8	Pollution from Non-nuclear Processes	463
	Acknowledgements	464
	Bibliography	464
Chapter 20	Health Effects of Environmental Chemicals	465
	<i>Juana Maria Delgado-Saborit and Roy M. Harrison</i>	
20.1	Introduction	465
20.2	Catastrophic Exposure	466
20.2.1	Seveso, Italy	466
20.2.2	Bhopal, India	468
20.3	Localized Contamination Incidents	468
20.3.1	Toxic Oil Syndrome	468
20.3.2	Rice Oil Contamination by Polychlorinated Biphenyls (PCBs)	469
20.3.3	Polybrominated Biphenyls (PBBs) in Cattle Feed	470
20.3.4	Mercury Poisoning in Minamata and Niigata	470
20.3.5	Methylmercury Poisoning in Iraq	471
20.3.6	Aluminium Contamination of Drinking Water in North Cornwall	471
20.3.7	'Epping Jaundice' – Chemical Contamination of Food during Storage	472
20.3.8	Love Canal, USA	473
20.3.9	Exxon Valdez, MV Braer, Prestige and other Major Oil Spill Accidents	473
20.4	Generalized Environmental Pollution	474
20.4.1	Indoor Air Pollution	474
20.4.2	Metals	477
20.4.3	Asbestos and Man-made Mineral Fibres (MMMF)	478
20.4.4	Pesticides	479
20.4.5	Endocrine Disrupters (see also Chapters 1 and 3)	481
20.4.6	Nanoparticles	481
20.5	Conclusions	484
