Preface	ix
Editor	xi
Contributors	xiii

SECTION I Fundamentals

1 Laser-Induced Damage Phenomena in Optics: A Historical Overview	3
<i>M.J. Soileau</i>	
2 Laser-Induced Damage by Thermal Effects	9
<i>Roger M. Wood</i>	
3 Defect-Induced Damage	25
<i>Semyon Papernov</i>	
4 Self-Focusing and Nonlinear Effects	75
<i>Vitaly Gruzdev</i>	
5 Femtosecond Laser-Induced Damage in Dielectric Materials	127
<i>Luke A. Emmert and Wolfgang Rudolph</i>	

SECTION II Measurements

6 Measurement and Detection of Laser-Induced Damage	155
<i>Jianda Shao</i>	
7 Statistics of Laser Damage Threshold Measurements	183
<i>Jonathan W. Arenberg</i>	
8 Measurement of Light Scattering, Transmittance, and Reflectance	213
<i>Sven Schröder and Angela Duparré</i>	

SECTION III Materials, Surfaces, Thin Films, and Contamination

9	Quartz and Glasses	249
	<i>Laurent Lamaignère</i>	
10	Crystalline Materials for UV Applications	269
	<i>Christian Mühlig and Wolfgang Triebel</i>	
11	Materials for Lasers: Frequency Conversion, Q-Switching, and Active Materials	287
	<i>Anne Hildenbrand-Dhollande and Frank R. Wagner</i>	
12	Surface Manufacturing and Treatment	317
	<i>Jérôme Néauport and Philippe Cormont</i>	
13	Introduction to Optical Coatings and Thin Film Production	343
	<i>H. Angus Macleod</i>	
14	High-Power Coatings for NIR Lasers	385
	<i>Christopher J. Stolz</i>	
15	Coatings for fs Lasers	411
	<i>Marco Jupé and Detlev Ristau</i>	
16	Spaceborne Applications	447
	<i>Wolfgang Riede and Denny Wernham</i>	

SECTION IV Applications

17	Lithography in the Deep Ultraviolet and Extreme Ultraviolet	475
	<i>Klaus R. Mann</i>	
18	Free-Electron Lasers	501
	<i>Michelle Shinn</i>	
19	The High-Energy Petawatt Laser PHELIX and Its High-Power Optics	513
	<i>Stefan Borneis and Collaborators</i>	
	Index	527
