Preface.....	ix
Acknowledgment	xi
Authors.....	xiii

Chapter 1	Introduction	1
1.1	Issue of Scale	1
1.2	Models of Scale	4
1.3	Scaling Up and Down.....	9
1.4	Book Chapters	12

Chapter 2	Geographic Representations.....	17
2.1	Geo-Atoms	20
2.2	Geo-Fields	21
2.3	Geo-Objects.....	25
2.4	Hierarchical Data Structures	28
2.4.1	Quadtrees	28
2.4.2	Hierarchical TINs.....	29
2.5	Discussion.....	31
2.5.1	Geo-Dipoles and Spatial Interactions	31
2.5.2	Temporal Dimension	32
2.5.3	Scale Dependence of Representations.....	32

Chapter 3	Geospatial Measurements	35
3.1	Framework for Spatial Sampling.....	36
3.1.1	Spatial Sampling Design	36
3.1.2	Data Supports	43
3.1.3	Spatial Resolution in Remotely Sensed Images	44
3.1.3.1	Rayleigh Criterion.....	45
3.1.3.2	MTF and Its Equivalent Bandwidth	45
3.1.3.3	Effective Radiometric Resolution Element... ..	46
3.2	Optical Remote Sensing and Resolution	47
3.2.1	Spatial and Spectral Responses.....	47
3.2.2	Geometric Characteristics	50
3.3	Microwave Remote Sensing and Resolution	55
3.3.1	Resolution.....	55
3.3.2	Radar Signals, Imaging, and Distortions	58
3.3.3	Passive Microwave	62
3.4	Discussion.....	64

Chapter 4	Geostatistical Models of Scale	67
4.1	Geostatistical Fundamentals and Variograms.....	68
4.1.1	Random Fields.....	68
4.1.2	Variograms and Covariance Functions	70
4.1.3	Indicator Variograms and Transition Probability-Based Models	75
4.2	Variogram Regularization and Deregularization.....	77
4.2.1	Regularization	77
4.2.2	Deconvolution of Regularized Variograms.....	80
4.3	Statistics for Determining Measurement Scales	82
4.4	Discussion.....	87
Chapter 5	Lattice Data and Scale Models.....	91
5.1	Lattice Data	93
5.2	Spatial Autocorrelation and Its Measures	95
5.3	Local Models.....	99
5.4	Discussion.....	103
Chapter 6	Geostatistical Methods for Scaling	107
6.1	Kriging	109
6.2	Indicator Approaches.....	116
6.3	Upscaling by Block Kriging.....	118
6.4	Downscaling by Area-to-Point Kriging	120
6.5	Geostatistical Inverse Modeling	124
6.6	Discussion.....	126
Chapter 7	Methods for Scaling Gridded Data	129
7.1	Upscaling.....	131
7.1.1	Statistical Approaches	131
7.1.2	Mechanistic Approaches	134
7.2	Downscaling.....	137
7.2.1	Deconvolution	137
7.2.2	Super-Resolution Mapping	141
7.2.3	Subpixel Mapping	144
7.3	Discussion.....	145
Chapter 8	Multiscale Data Conflation.....	147
8.1	Multivariate Geostatistics.....	149
8.2	Image Fusion	154
8.2.1	Conventional Approaches.....	154
8.2.2	Multiresolution Representations Based on Wavelets ...	155
8.2.3	Wavelet-Based Image Fusion	161

8.3	Other Multiscale Methods.....	163
8.4	Discussion.....	166
Chapter 9	Scale in Terrain Analysis	169
9.1	Digital Elevation Data and Their Scales	171
9.2	Terrain Derivatives.....	176
9.2.1	Slope and Aspect.....	176
9.2.2	Curvature.....	180
9.2.3	Secondary Properties	186
9.3	Models of Scale in Topography	187
9.4	Methods for Scaling Terrain Variables	193
9.4.1	Upscaling.....	193
9.4.2	Downscaling.....	196
9.5	Discussion.....	198
Chapter 10	Scale in Area-Class Mapping.....	201
10.1	Area-Class Mapping	204
10.1.1	Discriminant-Space Model	204
10.1.2	Methods for Mapping Area Classes.....	209
10.2	Spatial Scales and Patterns in Area Classes.....	213
10.3	Scaling Area-Class Information.....	219
10.3.1	Upscaling.....	219
10.3.2	Downscaling.....	220
10.4	Discussion.....	223
Chapter 11	Information Content	227
11.1	Information Theory	230
11.2	Information Content in Remotely Sensed Images.....	238
11.2.1	Informational Characteristics of Images.....	238
11.2.2	Information Conveyed in Images with Additive Noise	242
11.2.3	Information in Images with Multiplicative Noise	247
11.3	Image Resolution and Information Content	250
11.3.1	Effects of Resolution on Information Content	250
11.3.2	Information Capacity and Super Resolution	253
11.4	Information Content in Map Data	255
11.5	Discussion.....	261
Chapter 12	Uncertainty Characterization.....	265
12.1	Accuracy Metrics and Assessment.....	268
12.1.1	Accuracy in Interval/Ratio Fields	268
12.1.2	Accuracy in Area Classes	271

12.1.3	Positional Accuracy.....	273
12.1.4	Confidence Intervals and Hypothesis Testing	274
12.2	Geostatistical Approaches to Validation	278
12.3	Analytical Approaches to Error Propagation	282
12.4	Geostatistical Simulation.....	287
12.4.1	Simulation over a Point Support.....	287
12.4.2	Point-Support Simulation Conditional to Areal Data	291
12.4.3	Simulation over Blocks.....	293
12.5	Discussion.....	296
Epilogue		299
References.....		309
Index.....		347
