

## Contents

**Contributors' CVs** XIII

**Foreword** XXI

**List of Acronyms** XXIII

**List of Units** XXXI

### **1 Introduction** 1

*Sergio Bertolucci*

### **Part I Knowledge Management and Technology Transfer in an Organization** 3

### **2 Knowledge Management: From Theory to Practice** 5

*Beatrice Bressan and Daan Boom*

#### **2.1 Knowledge-Based and Innovative Organization** 5

#### **2.2 The Theory of Knowledge** 7

##### **2.2.1 Tacit and Explicit Knowledge** 8

##### **2.2.2 The SECI Model and the Knowledge Creation Spiral** 9

##### **2.2.3 The Two Dimensions and the Two Spirals of Knowledge Creation** 11

##### **2.2.4 The Five Conditions and the Five Phases in Two Dimensions** 13

#### **2.3 The Core Processes of Managing Knowledge** 18

##### **2.3.1 Knowledge Outputs and Outcomes** 19

##### **2.4 The Knowledge Worker** 31

##### **2.4.1 The Individual Learning Process** 33

##### **2.4.2 Scientific, Technological and Social Processes** 36

##### **2.4.3 Concept Formation and the Hierarchical Levels of Conceptualization** 37

#### **2.5 The Knowledge Creation, Acquisition, and Transfer Model** 39

#### **2.6 Knowledge Management: A Case Study of CERN** 41

##### **2.6.1 The LHC Case Study Survey** 47

## Part II Examples of Knowledge and Technology Transfer 57

## Section 1 Linking Information 59

## 3 WWW and More 61

*Robert Cailliau*

- 3.1 The First Page 62
- 3.2 Influences on the History of the Web 64
- 3.2.1 A Matter of Age 64
- 3.2.2 The Approach 64
- 3.3 CERN's Role 65
- 3.3.1 A Possible Definition 65
- 3.3.2 Making it Work 66
- 3.3.3 On Documents 66
- 3.3.4 The Director General 66
- 3.3.5 Al Gore, the LHC, and the Rest is History 67
- 3.4 What-if Musings 68
- 3.4.1 Money, Money, Money . . . 68
- 3.4.2 And if Not? 69
- 3.5 The Dark Sides of the Force 70
- 3.5.1 Techies 70
- 3.5.2 Global Heating 72
- 3.5.3 Sin by Omission 72
- 3.6 Good Stuff 73
- 3.6.1 Public Domain 73
- 3.6.2 The Conferences 74
- 3.6.3 The Consortium 75
- 3.7 On the Nature of Computing 76
- 3.7.1 Copy 76
- 3.7.2 See 77
- 3.7.3 Understand 77
- 3.7.4 Remember 77
- 3.7.5 Interact 78
- 3.7.6 Share 78
- 3.7.7 Think 78
- 3.8 Science 'Un-human' 79
- 3.9 Lessons to be Learned 80
- 3.10 Conclusions 80

## 4 Grid and Cloud 81

*Bob Jones*

- 4.1 Why a Grid? 82
- 4.2 A Production Infrastructure 85
- 4.3 Transferring Technology: Grids in Other Science Domains 86

4.4	How CERN Openlab has Contributed to the WLCG Grid	86
4.5	Four Basic Principles	87
4.6	Three-Year Phases	88
4.7	EGEE to EGI Transition	90
4.8	Lessons Learned and Anticipated Evolution	91
4.9	Transferring Technology: Grids in Business	92
4.10	Sharing Resources Through Grids	94
4.11	What are the Hurdles?	94
4.12	Philips Research: Scientific Simulation, Modelling and Data Mining Supports Healthcare	95
4.13	Finance: Stock Analysis Application	95
4.14	Multimedia: GridVideo	96
4.15	Imense: From Laboratory to Market	97
4.16	Total, UK	97
4.17	Seismic Imaging and Reservoir Simulation: CGG Veritas Reaping Benefits from the Grid	98
4.18	Societal Impact	99
<b>5</b>	<b>The 'Touch Screen' Revolution</b>	<b>103</b>
	<i>Bent Stumpe</i>	
5.1	The Birth of a Touch Screen	103
5.2	The Novelty for the Control Room of the CERN SPS Accelerator	106
5.3	A Touch Screen as Replacement for Mechanical Buttons	110
5.4	Attempts at Early Knowledge Transfer	111
5.5	Evolution Turned Into Revolution	113
5.6	Touch Screen and Human Behaviour	115
	<b>Section 2 Developing Future</b>	<b>117</b>
<b>6</b>	<b>Solar Thermal Electricity Plants</b>	<b>119</b>
	<i>Cayetano Lopez</i>	
6.1	The Four STE Technologies	120
6.2	Optical Issues in the STE Plant	124
6.2.1	Solar Concentrators	124
6.2.2	Selective and Anti-Reflective Coatings	124
6.2.3	Thermography	128
6.3	Thermodynamic Issues in the STE Plant	131
6.4	Issues in STE Plants Related to Heat Transfer	134
6.5	Thermal Storage of Energy	137
6.6	Fluid Mechanics	138

<b>7</b>	<b>Computers and Aviation</b>	<b>141</b>
	<i>Antony Jameson</i>	
7.1	Computing in Structural and Aerodynamic Analysis	145
7.2	Computer-Aided Design and Manufacturing	149
7.3	Fly-By-Wire and Other On-Board Systems	151
7.4	Airborne Software	154
7.5	Ground-Based Computer Systems	155
7.6	Conclusions	156
<b>8</b>	<b>Antimatter Pushing Boundaries</b>	<b>159</b>
	<i>Niels Madsen</i>	
8.1	Science and the Unknown	159
8.2	Antimatter and CERN	162
8.2.1	Antimatter at the LHC	164
8.2.2	The CERN Antimatter Facility	164
8.3	The Anti-World in Everyday Life	167
8.4	Beyond the Present Day	169
	<b>Section 3 Sustainability and Learning</b>	<b>171</b>
<b>9</b>	<b>Towards a Globally Focussed Earth Simulation Centre</b>	<b>173</b>
	<i>Robert Bishop</i>	
9.1	A String of Disasters	174
9.2	Now is the Time	176
9.3	A Global Synthesis of Knowledge	176
9.4	Modelling and Simulation as a Platform for Collaboration	177
9.5	Advances in High-Performance Computing	178
9.6	Creating Value from Massive Data Pools	179
9.7	Interactive and Immersive 4D Visualizations	180
9.8	Leveraging the Many Layers of Computing	182
9.9	Getting a Complete Picture of the Whole Earth	183
9.10	Influence of the Solar System	184
9.11	Prediction and Uncertainty of Extreme Events	186
9.12	Impact on Cities and Bioregions	189
9.13	Towards Urban Resilience	190
9.14	Modelling the Whole-Earth System: A Challenge Whose Time has Come!	191
<b>10</b>	<b>Radiation Detection in Environment and Classrooms</b>	<b>195</b>
	<i>Michael Campbell</i>	
10.1	The Origins of the Hybrid Pixel Detector	196
10.2	Hybrid Pixel Detectors for High-Energy Physics	197
10.3	Hybrid Pixel Detectors for Imaging: The Medipix Chips	199
10.4	Applications	205

- 10.4.1 Medical X-Ray Imaging 205
- 10.4.2 Biology 206
- 10.4.3 X-Ray Materials Analysis 207
- 10.4.4 Gas Detector Readout 208
- 10.4.5 Radiation Monitoring 209
- 10.4.6 Chemistry 210
- 10.4.7 Dosimetry in Space 210
- 10.4.8 Education 211
- 10.4.9 Art Meets Science 212
- 10.5 Back to High-Energy Physics 213
- 10.6 Collaboration, Organization and Serendipity 214

## 11 Theory for Development 215

*Fernando Quevedo*

- 11.1 The Importance of Theoretical Research Through History 216
- 11.2 Knowledge Management and Science for Peace 219

## Part III Economic Aspects of Knowledge Management and Technology Transfer 227

## 12 Innovation and Big Data 229

*Edwin Morley-Fletcher*

- 12.1 The Wealth of Nations: Agriculture, the Division of Labour, or Profits? 230
- 12.2 Industrialization and/or Exploitation 231
- 12.3 Perfect Competition, the Disappearance of Profits, Economies of Scale 232
- 12.4 Creative Destruction 233
- 12.5 Risk and Uncertainty 235
- 12.6 Accumulation Without Innovation 236
- 12.7 The Real Engine of Economic Growth 237
- 12.8 Endogenous Technological Change 238
- 12.9 The Appropriate Set of Market and Non-Market Institutions 239
- 12.10 Limitless Knowledge 241
- 12.11 Post-Scarcity and Networks 242
- 12.12 Intellectual Property Rights 244
- 12.13 Governments' Support of Scientific Research 245
- 12.14 The Remaining Scarce Resource is Human Creativity 246
- 12.15 Different Organizational Modes for Overcoming Uncertainty 247
- 12.16 Information and Allocation Gains of Peer Production 248
- 12.17 An Ecosystem of Technologies Leading to the Singularity? 250
- 12.18 Big Data Analytics and Data-Intensive Healthcare 251

13	<b>Universities and Corporations: The Case of Switzerland</b>	255
	<i>Spyros Arvanitis and Martin Woerter</i>	
13.1	Background	255
13.2	KTТ Activities in the Swiss Economy: The Main Facts from the <i>Firm's</i> Point of View	261
13.2.1	Forms and Partners of KTT Activities	262
13.2.2	Technological Fields of KTT-Active and R&D-Active Firms	267
13.2.3	Mediating Institutions and Motives for KTT Activities	268
13.2.4	Impact of KTT Activities as Assessed by the Firms	270
13.2.5	Obstacles to KTT Activities	272
13.3	KTТ Activities in the Swiss Economy: The Main Facts from the <i>Science Institution</i> Point of View	276
13.3.1	Incidence and Forms of KTT Activities	276
13.3.2	Mediating Institutions and Obstacles of KTT Activities	276
13.4	Analytical Part: Exploration of KTT Activities in Switzerland	278
13.4.1	Drivers of KTT Activities from the Point of View of the <i>Firm</i>	279
13.4.1.1	Determinants of KTT Activities of Firms	280
13.4.1.2	Empirical Evidence	281
13.4.2	KTТ Activities Determinants from the <i>University</i> Point of View	284
13.4.2.1	Determinants of the Propensity to KTT Activities of Universities	286
13.4.2.2	Empirical Evidence	287
13.4.3	Impact of KTT Activities on Innovation and Labour Productivity	288
13.4.3.1	Empirical Evidence	290
13.4.4	KTТ Strategies Determinants and their Impact on Innovation Performance	291
13.4.4.1	Firm Characteristics, KTT Strategies, and Innovation Performance	291
13.4.5	Exploration and Exploitation	294
13.4.5.1	Empirical Evidence	297
13.4.6	Technological Proximity Between Firms and Universities and TT	299
13.4.6.1	Empirical Evidence	300
13.5	Conclusion	302
14	<b>Conclusion</b>	307
	<i>Marilena Streit-Bianchi</i>
