

Preface	xiii
---------	------

1 Introduction 2

1.1 Introduction	4
1.2 Electrical Engineering for the Digital Age	4
1.2.1 Block Diagrams	4
1.2.2 Describing System Operation	6
1.2.3 What Electrical Engineers Do	9
1.3 Analog and Digital Signals	12
1.3.1 Converting Between Analog and Digital Signals	13
1.3.2 Advantages of Digital Signals	14
1.4 Where is EE Going?	16
1.5 Overview of Chapters	19
1.6 Further Reading	21
1.7 Summary	21
1.8 Problems	21
1.9 Excel Projects	22

2 Sensors and Actuators 24

2.1 Introduction	26
2.2 Analog and Digital Sensors	26
2.3 Mechanical Sensors and Actuators	27
2.3.1 Switches	27
2.3.2 Switch Arrays	29
2.3.3 Touch Screens	31
2.3.4 Vibrating Motor	34
2.4 Acoustic Sensors and Actuators	35
2.4.1 Microphone	35
2.4.2 Loud Speaker	36
2.5 Optical Sensors and Actuators	37
2.5.1 Camera	37
2.5.2 Display	38
2.6 Proprioception	39
2.6.1 Accelerometers	39
2.6.2 GPS	40

2.7	Active Sensors	43
	2.7.1 Optical Detection	43
	2.7.2 Infrared Ranging	45
	2.7.3 Acoustic Ranging	48
2.8	Summary	49
2.9	Problems	49
2.10	Excel Projects	50

3 Combinational Logic Circuits 52

3.1	Introduction	54
3.2	Logic Variables and Logic Equations	54
3.3	Elementary Logic Gates	55
	3.3.1 NOT Gate	55
	3.3.2 AND Gate	56
	3.3.3 OR Gate	57
3.4	Building-Block Gates	58
	3.4.1 NAND Gate	58
	3.4.2 NOR Gate	59
	3.4.3 ExOR Gate	60
3.5	From Logic Gates to Logic Circuits	62
	3.5.1 Constructing a Truth Table	62
	3.5.2 Binary Pattern Recognition	63
3.6	Logic Circuit Implementation Using Sum of Products	64
3.7	Truth Table from Logic Equation and Logic Circuit	65
3.8	Designing Efficient Logic Circuits	68
3.9	Useful Logic Circuits	71
	3.9.1 Implementing an ExOR Gate	71
	3.9.2 Seven-Segment Display Driver	71
	3.9.3 Binary Adder	73
	3.9.4 Binary Multiplication	74
	3.9.5 Binary Division	75
3.10	Summary	76
3.11	Problems	76
3.12	Excel Projects	77

4 Sequential Logic Circuits 78

4.1	Introduction	80
4.2	Sequential Circuits	80
4.3	Set-Reset Flip-Flop	80
	4.3.1 Addressable Memory	83
4.4	Toggle Flip-Flop	84

4.5	Counting with Toggle Flip-Flops	85
4.5.1	Modulo- K Counters	86
4.5.2	Efficient Modulo- K Counter	89
4.6	Summary	91
4.7	Problems	91
4.8	Excel Projects	91

5 Converting Between Analog and Digital Signals 92

5.1	Introduction	94
5.2	Analog-to-Digital Conversion	94
5.2.1	Sampling Analog Waveforms	95
5.2.2	Nyquist Sampling Criterion	96
5.2.3	Aliasing	97
5.3	Spatial Frequencies	100
5.4	Quantization	102
5.4.1	Sample-and-Hold Operation	102
5.4.2	Staircase Method for Quantization	103
5.4.3	Setting Number of Quantizer Bits	105
5.5	Digital-to-Analog Conversion	108
5.5.1	Boxcar Reconstruction	108
5.5.2	Pulse-Width Modulation	110
5.6	Summary	112
5.7	Problems	112
5.8	Excel Projects	113

6 Modeling Random Data and Noise 114

6.1	Introduction	116
6.2	Using Probability to Model Uncertainty	116
6.3	Histograms	117
6.4	Probability Density Functions	118
6.4.1	Moments	119
6.4.2	Uniform PDF	120
6.4.3	Gaussian PDF	121
6.5	Probability Mass Function	122
6.6	Pseudo-Random Number Generators	126
6.6.1	Uniform PRNG	126
6.6.2	Gaussian PRNG	129
6.7	Random Number Arithmetic	131
6.7.1	Adding a Constant to a RV	131
6.7.2	Multiplying a RV by a Constant	132
6.7.3	Adding Independent RVs	133
6.8	Summary	134

6.9	Problems	135
6.10	Excel Projects	135

7 Detecting Data Signals in Noise 136

7.1	Introduction	138
7.2	Data Transmission Model	138
7.3	Processing Data Signals	140
	7.3.1 Linear Processor	140
	7.3.2 Matched Processor	141
	7.3.3 Complementary Signals	143
7.4	Processing Signals in Noise	145
	7.4.1 Signal-to-Noise Ratio	145
	7.4.2 Matched Processor Output	146
	7.4.3 Detecting Signals in Noise	148
7.5	Probability of Error	152
7.6	Estimating Probability of Error with Simulations	155
	7.6.1 Modeling Random Data	155
	7.6.2 Modeling Random Noise	157
7.7	Summary	159
7.8	Problems	160
7.9	Excel Projects	160

8 Designing Signals for Multiple-Access Systems 162

8.1	Introduction	164
8.2	Multiple Simultaneous User Systems	164
8.3	Orthogonality Condition	165
8.4	Signals Orthogonal in Time—TDMA	168
8.5	Signals Orthogonal in Frequency—FDMA	171
8.6	Signals with Orthogonal Codes—CDMA	176
8.7	Detecting Orthogonal Signals in Noise	179
8.8	Summary	182
8.9	Problems	182
8.10	Excel Projects	182

9 Source Coding 184

9.1	Introduction	186
9.2	Data Compression	186
	9.2.1 Modeling Information	187
	9.2.2 Source Entropy	189
	9.2.3 Effective Probabilities	190
	9.2.4 Effective Source Entropy	191

9.2.5	Effective File Entropy	192
9.2.6	Huffman Code	193
9.3	Encryption	199
9.3.1	Simulating Randomness by Computer	203
9.3.2	Transmitting the Key (Almost) Securely	206
9.4	Summary	208
9.5	Problems	208
9.6	Excel Projects	210

10 Channel Coding 212

10.1	Introduction	214
10.2	Data Structures	214
10.3	Coding for Error Correction	215
10.3.1	Redundancy and Data Increase Factor	216
10.3.2	Bit-Level Error Detection	216
10.3.3	Bit-Level Error Correction	217
10.3.4	Data Packet Error Correction	219
10.4	Data Rate	223
10.5	Channel Capacity	224
10.5.1	Capacity Loss with Transmission Range	227
10.6	Summary	232
10.7	Problems	232
10.8	Excel Projects	233

11 Data Networks 234

11.1	Introduction	236
11.2	Evolution of Data Networks	237
11.2.1	Packet Switching and Circuit Switching	237
11.2.2	Internet Transmission Protocols	238
11.3	Asynchronous Data Transmission	239
11.4	Internet Data Packets	241
11.4.1	Probing the Internet	243
11.5	Detecting Packet Collisions	244
11.5.1	Packet Collisions in Wired Systems	244
11.5.2	Packet Collisions in Wireless Networks	246
11.6	Cloud Computing	248
11.7	Summary	251
11.8	Problems	252
11.9	Excel Projects	252

12 Symbology 254

12.1	Introduction	256
12.2	Credit Card Codes	256

12.3	Bar Codes	259
12.3.1	U.S. Postal Service Bar Code	259
12.3.2	Universal Product Code	263
12.3.3	Two-Dimensional Bar Codes	268
12.4	Machine Unreadable Codes	271
12.5	Steganography	272
12.5.1	Digital Watermarks	273
12.5.2	Embedding Secret Codes in Data	273
12.6	Summary	276
12.7	Problems	276
12.8	Excel Projects	277

13 Excel Best Practices 278

13.1	Introduction	280
13.2	Contents of Cells	280
13.3	Plotting Charts with Excel	283
13.4	Printing an Excel Worksheet	283
13.5	Displaying Worksheet Formulas	284
13.6	Inserting Rows and Columns	285
13.7	Conditional Formatting for Emphasis	285
13.8	Including a Narrative in Excel	286
13.9	Excel Tips	287
13.10	Recording Excel Macros	288
13.11	Inserting Shapes	289
13.12	Extending Excel Macros with VBA	290
13.13	Excel Built-in Functions	293
13.14	PC and Mac Excel Commands	294
13.15	Sample Excel Worksheets	294
13.15.1	Introduction	294
13.15.2	Sensors and Actuators	296
13.15.3	Combinatorial Logic Circuits	299
13.15.4	Sequential Logic Circuits	302
13.15.5	Converting Between Analog and Digital Signals	307
13.15.6	Modeling Random Data and Noise	311
13.15.7	Detecting Data Signals in Noise	318
13.15.8	Designing Signals for Multiple-Access Systems	327
13.15.9	Source Coding	327
13.15.10	Channel Coding	334
13.15.11	Data Networks	337
13.15.12	Symbology	340
13.16	Summary	341
	Glossary	343
	Index	347
