CHAPTER 1 Overview of Micro-manufacturing 1 *Yi Qin*

| | |
|---|----|
| Introduction..... | 1 |
| Products and market..... | 3 |
| Meeting manufacturing requirements and adding values..... | 4 |
| Micro-manufacturing methods and processes..... | 7 |
| Manufacturing systems/equipment for micro-manufacturing..... | 16 |
| Miniature manufacturing systems and benchtop machines..... | 16 |
| Multiple-process equipment..... | 18 |
| Supporting technologies/devices/systems for micro-manufacturing..... | 19 |
| Design considerations and material factors..... | 20 |
| Design considerations..... | 20 |
| Material factors..... | 23 |
| Development and utilization strategies of micro-manufacturing technologies..... | 24 |
| References..... | 27 |

CHAPTER 2 Micro-/Nano-machining through Mechanical Cutting 35 *Xizhi Sun, Kai Cheng*

| | |
|--|----|
| Introduction..... | 35 |
| Fundamentals of the micro-/nano-cutting process..... | 36 |
| Specific energy and cutting force..... | 36 |
| Minimum chip thickness and chip formation..... | 37 |
| Ductile mode cutting..... | 38 |
| Effect of workpiece material micro-structure..... | 39 |
| Modeling the micro-/nano-cutting process..... | 41 |
| FE modeling..... | 41 |
| MD modeling..... | 42 |
| Multiscale modeling..... | 44 |
| Precision machines for micro-/nano-cutting..... | 47 |
| Ultraprecision machine tools..... | 47 |
| Mechanical structure..... | 47 |

| | |
|---|-----------|
| Spindle and drive system | 48 |
| Control system | 49 |
| Position measurement and feedback system | 49 |
| In-process condition-monitoring and inspection system | 50 |
| Micro- and meso-machines | 50 |
| Micro-tooling | 51 |
| Applications | 53 |
| Competitive technologies and economic considerations | 57 |
| Acknowledgments | 58 |
| References | 58 |
| | |
| CHAPTER 3 FIB Micro-/Nano-fabrication | 61 |
| <i>Nitul S. Rajput, Xichun Luo</i> | |
| | |
| Introduction | 62 |
| Architecture of FIB | 63 |
| Ion column | 64 |
| Electron column | 64 |
| Stage | 65 |
| Imaging detectors | 65 |
| Gas injector system | 65 |
| Pumping system | 66 |
| Energy dispersive spectroscopy | 66 |
| Residual gas analyzer | 66 |
| Electron backscatter diffraction | 66 |
| Manipulator | 67 |
| FIB processes | 67 |
| FIB milling | 67 |
| Mode of energy loss | 67 |
| Sputtering process | 68 |
| FIB deposition | 71 |
| FIB imaging | 73 |
| FIB etching process | 74 |
| Scanning strategies | 74 |
| Patterning strategies | 75 |
| Applications of FIB | 76 |
| 3-D micro-/nano-structuring | 76 |
| Circuit editing and failure analysis | 78 |
| TEM/STEM sample preparation | 78 |
| FIB as an analytical technique | 78 |
| Summary: issues and future of FIB | 79 |
| References | 79 |

CHAPTER 4 Micro-electrical Discharge Machining 81

*Eckart Uhlmann, Markus Röhner, Malte Langmack,
Tassilo-M. Schimmelpfennig*

| | |
|--|-----|
| Introduction..... | 82 |
| Working principle..... | 82 |
| Machining principle of electrical discharge machining..... | 82 |
| Process variants..... | 83 |
| Dielectric fluid..... | 84 |
| General flushing strategies..... | 85 |
| Process..... | 86 |
| Procedure of a single discharge..... | 86 |
| Micro-wire EDM..... | 88 |
| Micro-die sinking EDM..... | 91 |
| Micro-electrical discharge drilling..... | 93 |
| Micro-electrical discharge contouring..... | 94 |
| Material..... | 97 |
| Tool electrodes..... | 97 |
| Machinery..... | 97 |
| Machine design..... | 97 |
| Generator types..... | 99 |
| Applications..... | 103 |
| References..... | 103 |

CHAPTER 5 Laser Micro-structuring..... 107

Arnold Gillner, Patrick Gretzki

| | |
|---|-----|
| Introduction..... | 107 |
| Basic properties of laser ablation..... | 108 |
| Absorption effects on ablation geometry..... | 109 |
| Thermal effects on ablation precision and ablation geometry.... | 110 |
| Process principles for laser ablation..... | 113 |
| Mask technique..... | 113 |
| Scribing technique..... | 114 |
| Examples..... | 115 |
| Conclusions..... | 118 |
| References..... | 118 |

CHAPTER 6 Micro-electrochemical Machining 121

Atanas Ivanov, Rebecca Leese, Alexandre Spieser

| | |
|-------------------------|-----|
| Introduction..... | 121 |
| Working principles..... | 122 |

| | |
|---|------------|
| Mechanism of the anodic dissolution | 125 |
| Polarization curves and Pourbaix diagrams | 127 |
| Basic calculations in ECM and/or micro-ECM process | 128 |
| Electrolytes | 132 |
| IEG control and modeling | 134 |
| IEG control methods | 134 |
| Interelectrode gap modeling | 136 |
| Equipment for micro-ECM..... | 138 |
| Applications and examples..... | 140 |
| References..... | 142 |
| | |
| CHAPTER 7 Hot Embossing | 147 |
| <i>Matthias Worgull</i> | |
| Introduction..... | 148 |
| Hot embossing process | 150 |
| Process variations | 152 |
| Double-sided molding | 152 |
| Multilayer molding | 153 |
| Through holes..... | 154 |
| Hot punching | 155 |
| Thermoforming of high-temperature polymers by hot embossing..... | 157 |
| Roller embossing..... | 158 |
| Materials for hot embossing | 159 |
| Hot embossing techniques..... | 160 |
| Components..... | 160 |
| Commercial available machines | 162 |
| Hot embossing tools..... | 165 |
| Basic tools for hot embossing | 166 |
| Micro-structured mold inserts | 168 |
| Applications | 169 |
| Micro-optical devices | 171 |
| Micro-fluidic devices..... | 171 |
| Micro-needles | 173 |
| Change of Surface Properties..... | 175 |
| The outlook | 175 |
| References..... | 176 |

CHAPTER 8 Forming of Polymeric Tubular Micro-components.....179

*Yi Qin, Jie Zhao, Gerald Anyasodor, Klaus S. Hansen,
Ivan Calderon, Konstantin Konrad, Christoph Hartl,
Mogens Arentoft, Ioannis S. Chronakis*

| | |
|---------------------------------|-----|
| Introduction..... | 179 |
| Principle | 180 |
| Hot embossing | 180 |
| Micro-blow molding | 185 |
| Cross rolling..... | 188 |
| The whole system..... | 190 |
| Materials..... | 191 |
| Forming tools and machines..... | 192 |
| Hot embossing | 192 |
| Micro-blow molding | 194 |
| Cross rolling..... | 195 |
| Polytubes “micro-factory”..... | 197 |
| Applications | 198 |
| References..... | 199 |

CHAPTER 9 Micro-injection Molding.....201

Guido Tosello

| | |
|---|-----|
| Introduction..... | 201 |
| μIM scenario | 202 |
| μIM technology..... | 203 |
| Micro-molding with conventional injection molding machine... | 204 |
| μIM machine | 206 |
| Process control and analysis | 209 |
| Micro-cavity filling analysis | 210 |
| Short shots method | 211 |
| Flow visualization tests..... | 212 |
| Length flow tests | 213 |
| Filling analysis in μIM using weld lines as flow markers..... | 215 |
| μIM process control and analysis | 218 |
| Defects of micro-injection molded parts: weld lines..... | 219 |
| Process simulation | 230 |
| Conclusions | 234 |
| References..... | 235 |

CHAPTER 10 Net Shape Manufacture of Freestanding Ceramic Micro-components through Soft Lithography239

Hany Hassanin, Kyle Jiang

Introduction..... 239
 Process 242
 Fabrication and characterization of the molds 242
 Ceramic slurry preparation and control..... 244
 Sintered micro-components 251
 Conclusions 254
 References..... 255

CHAPTER 11 Micro-sintering through a FAST Process257

Yi Yang, Kunlan Huang, Gang Yang, Deqiang Yin, Yu Zhou, Yi Qin

Introduction..... 257
 Micro-FAST sintering process..... 258
 Analysis of process 260
 Analysis of sintering process 260
 Effects of coupled multifields activation 260
 Applications of Micro-FAST 263
 Fabrication of MnZn ferrite..... 263
 Fabrication of hard alloy..... 267
 Fabrication of pure copper 270
 Conclusions..... 275
 References..... 275

CHAPTER 12 Micro-bulk Forming277

Mogens Arentoft, Rasmus Solmer Eriksen, Hans Nørsgaard Hansen

Introduction..... 277
 Basic cold forming processes..... 278
 The size effect..... 279
 Workpiece materials..... 281
 Amorphous metals..... 281
 Tool materials 283
 Machine and tool design 284
 Billet preparation..... 284
 Press system 284

| | |
|--|-----|
| The tool die system..... | 285 |
| Precision and alignment of tooling elements..... | 285 |
| Flexibility of tool system | 287 |
| Warm forging of micro-components..... | 288 |
| Handling and ejection system | 289 |
| Process supervision..... | 291 |
| Micro-tribology..... | 292 |
| Process analysis..... | 294 |
| References..... | 297 |

CHAPTER 13 Forming of Micro-sheet Metal Components.....299

Yi Qin, Wan-Nawang W.A., Jie Zhao

| | |
|---|-----|
| Introduction..... | 299 |
| Manufacturing processes and fundamentals..... | 301 |
| Manufacture of sheet metal parts by blanking/punching | 301 |
| Manufacture of sheet metal parts by bending..... | 305 |
| Deep drawing of sheet metal parts..... | 307 |
| Other micro-sheet metal forming processes..... | 309 |
| General considerations for manufacturing | 309 |
| Forming tools..... | 310 |
| Manufacturing presses/machines | 313 |
| Design considerations for micro-sheet metal parts for forming..... | 315 |
| Micro-sheet forming—a case study..... | 316 |
| Technological competitiveness and operational economics..... | 318 |
| Acknowledgment..... | 320 |
| References..... | 320 |

CHAPTER 14 Micro-hydroforming.....323

Christoph Hartl

| | |
|--|-----|
| Introduction..... | 323 |
| Principle of hydroforming and process variants..... | 324 |
| Semifinished products and materials | 326 |
| Process chain for part production | 330 |
| Hydroforming process design..... | 332 |
| Design considerations and potential applications of micro-hydroforming..... | 336 |
| Tools and machines..... | 337 |
| Conclusions..... | 342 |
| References..... | 343 |

| | | |
|-------------------|--|------------|
| CHAPTER 15 | Laser-assisted Micro-forming | 347 |
| | <i>DR Jens Holtkamp</i> | |
| | Introduction..... | 347 |
| | System technology..... | 348 |
| | Processes..... | 350 |
| | Stamping..... | 350 |
| | Embossing..... | 353 |
| | Bonding of plastic with metal and ceramic—LIFTEC®..... | 357 |
| | Conclusions..... | 364 |
| | References..... | 364 |
| | | |
| CHAPTER 16 | Deep X-ray Lithography | 365 |
| | <i>P. Meyer, J. Schulz</i> | |
| | Introduction..... | 365 |
| | LIGA process and strengths..... | 366 |
| | Basic process..... | 366 |
| | LIGA manufacturing steps | 368 |
| | Unique features of the LIGA process | 381 |
| | Market situation of DXRL | 383 |
| | Commercial application..... | 385 |
| | Micro-spectrometer—mold..... | 385 |
| | Polymer compound refractive X-ray lenses | 385 |
| | Gratings for differential phase contrast imaging..... | 386 |
| | Micro-gears—direct metal parts | 387 |
| | Conclusions..... | 388 |
| | References..... | 389 |
| | | |
| CHAPTER 17 | Polymer Thin Films—Processes, Parameters and Property Control | 393 |
| | <i>Bertrand Fillon</i> | |
| | Introduction..... | 394 |
| | Thin films obtained by extrusion coating | 394 |
| | Principle of extrusion coating | 395 |
| | Process parameters and influences | 396 |
| | Summary on extrusion coating..... | 399 |
| | Organic coatings deposited in solution | 399 |
| | Main polymers used in roll coating..... | 399 |
| | Principle of organic coating deposition in solution | 401 |
| | Process parameters and influences | 403 |
| | Summary on organic coatings..... | 408 |
| | Vacuum-deposited coatings | 409 |
| | Principle of vacuum polymer deposition..... | 410 |

| | |
|---|------------|
| Major precursor families..... | 413 |
| Process parameters and influences | 414 |
| Phase 1..... | 418 |
| Phase 2..... | 418 |
| Phase 3..... | 418 |
| Summary on vacuum-deposited coatings..... | 420 |
| Conclusions..... | 421 |
| References..... | 421 |
| CHAPTER 18 Advanced Inkjet Technology for 3D Micro-metal Structure Fabrication | 425 |
| <i>Seung Hwan Ko</i> | |
| Introduction..... | 425 |
| Inkjet printing system..... | 427 |
| Materials (metal NP ink)..... | 429 |
| Inkjet printed 3D metal micro-structure..... | 430 |
| Applications/cases/cost issues | 437 |
| References..... | 438 |
| CHAPTER 19 Process Chains and Tooling Concepts | 441 |
| <i>Hans Nørgaard Hansen, Mogens Arentoft, Peter T. Tang, Giuliano Bissacco, Guido Tosello</i> | |
| Introduction..... | 441 |
| Definition of tooling..... | 442 |
| Definition of “process chain” | 443 |
| Tooling concepts | 443 |
| Material compatibility | 444 |
| Direct versus indirect tooling..... | 446 |
| Selection criteria for tooling process chains..... | 450 |
| Applications | 452 |
| Application 1: polymer micro-fluidics | 452 |
| Application 2: die/mold fabrication for micro-bulk forming..... | 453 |
| Conclusions..... | 456 |
| References..... | 456 |
| CHAPTER 20 Surface Engineering and Micro-manufacturing ... | 459 |
| <i>Gonzalo G. Fuentes</i> | |
| Introduction..... | 459 |
| Surface engineering | 459 |
| Surface contact phenomena and tribology | 460 |
| Characterization techniques | 460 |

| | |
|--|-----|
| Fundamentals of advanced surface engineering processes for tooling protection..... | 461 |
| Physical–chemical functionalization I: thermal and plasma nitriding | 461 |
| Physical–chemical functionalization II: ion implantation..... | 463 |
| Coating techniques I: electrodeposition | 464 |
| Coating techniques II: CVD | 465 |
| Coating techniques III: PVD..... | 466 |
| Coating failure prediction by finite element modeling techniques | 471 |
| Applications of surface engineering processes in micro-manufacturing | 472 |
| Advanced surface treatments for micro-cutting tools..... | 472 |
| Antiadhesion and wear resistance coatings on micro-molding tools | 475 |
| Micro-forming tool fabrication using surface engineering processes..... | 478 |
| Summary..... | 482 |
| Acknowledgments..... | 482 |
| References..... | 482 |

CHAPTER 21 DLC-Coated Tools for Micro-forming.....487

Chunju Wang, Debin Shan, Bin Guo

| | |
|--|-----|
| Introduction..... | 487 |
| Characteristics and preparation of DLC film..... | 488 |
| Characteristics of DLC film..... | 488 |
| Deposition methods of DLC film..... | 490 |
| Evaluation methods for DLC films..... | 490 |
| DLC-coated tools in micro-sheet forming | 493 |
| Deposition of DLC film on the inner surface of a micro-cavity of the die | 493 |
| DLC-coated tools in strip drawing..... | 495 |
| DLC-coated tools in micro-bending | 497 |
| DLC-coated tools in micro-deep drawing..... | 499 |
| DLC-coated tools in micro-bulk forming | 504 |
| DLC-coated tools in micro-extrusion..... | 504 |
| DLC-coated tools in embossing/coining..... | 504 |
| Diamond tools in embossing..... | 505 |

| | |
|--|-----|
| DLC-coated tools in nano-fabrication/imprinting..... | 507 |
| Wear mechanism of DLC film | 508 |
| References..... | 510 |

CHAPTER 22 Micro- and Nano-fibers by Electrospinning Technology: Processing, Properties, and Applications.....513

Ioannis S. Chronakis

| | |
|--|-----|
| Introduction..... | 514 |
| Working principle and configuration of electrospinning processing | 516 |
| The electrospinning mechanism | 517 |
| Formation of the Taylor cone and subsequent fluid jet..... | 517 |
| Thinning of the fluid jet..... | 518 |
| Electrospinning processing parameters—control of the micro- and nano-fiber morphology..... | 518 |
| Solution properties..... | 519 |
| Process conditions | 519 |
| Ambient conditions..... | 519 |
| Electrospinning setups and tools..... | 522 |
| Novel setups..... | 522 |
| Setups involving dual syringes..... | 523 |
| Setups controlling the orientation and alignment of micro- and nano-fibers..... | 523 |
| Characteristics and design considerations of electrospun micro- and nano-fibers..... | 526 |
| Molecular orientation | 526 |
| Shapes and sizes..... | 527 |
| Alterations of secondary structure and functionality..... | 527 |
| Applications of electrospun functional micro- and nano-fibers | 529 |
| Biomedical applications..... | 529 |
| Generation of micro- and nano-mechanical and micro- and nano-fluidic devices through electrospinning..... | 533 |
| Micro- and nano-fibers in sensors..... | 534 |
| Micro- and nano-fibers in electric and electronic applications | 535 |
| Micro- and nano-fibers in filters | 536 |
| Micro- and nano-fibers in textiles | 537 |

| | |
|--|------------|
| Micro- and nano-fibers as composite reinforcement | 537 |
| Micro- and nano-fibers for packaging applications..... | 537 |
| Attempts to increase the production rate of electrospun micro- and nano-fibers..... | 539 |
| Electrospinning using multiple nozzles..... | 539 |
| Electrospinning without nozzles..... | 540 |
| Commercial products | 541 |
| Technological competitiveness and operation economics | 542 |
| Acknowledgment..... | 543 |
| References..... | 544 |
| CHAPTER 23 Micro-factories..... | 549 |
| <i>Eeva Järvenpää, Riku Heikkilä, Niko Siltala, Timo Prusi, Reijo Tuokko</i> | |
| Introduction..... | 549 |
| Characteristics of micro-factories | 550 |
| Definition of micro-factories..... | 551 |
| Challenges and limitations relating to micro- and desktop manufacturing..... | 551 |
| Benefits of micro-factories compared to traditional larger size factories..... | 552 |
| Evolution of micro- and desktop factories..... | 555 |
| Academic micro-factory development | 556 |
| Commercial micro-factory development | 556 |
| Further introduction to a selected set of academic and commercial micro-factory developments..... | 559 |
| Introduction to TUT-micro-factory concept..... | 566 |
| TUT-micro-factory concept | 566 |
| Applications of TUT-micro-factory concept | 568 |
| Potential applications for micro-factory solutions..... | 570 |
| Replacing traditional size equipment with miniaturized equipment | 570 |
| Relocating the production further into downstream..... | 572 |
| On the spot manufacturing | 574 |
| Summary and conclusions..... | 575 |
| References..... | 576 |
| CHAPTER 24 Micro-mechanical Assembly..... | 581 |
| <i>Hans Nørgaard Hansen, Mogens Arentoft, Guido Tosello</i> | |
| Introduction..... | 581 |
| Classification of micro-mechanical assembly methods..... | 583 |

| | |
|--|------------|
| Micro-snap fits | 585 |
| Micro-screwing | 585 |
| Micro-velcro | 585 |
| Micro-joinery | 586 |
| Micro-injection molding | 588 |
| Micro-riveting, folding, and clinching | 589 |
| Systematic approach to micro-mechanical handling and assembly | 590 |
| Application example: mechanical assembly of push button parts... | 591 |
| Conclusion | 593 |
| References | 594 |
| CHAPTER 25 Self-assembly of Micro-parts | 597 |
| <i>Matthias Burgard</i> | |
| Introduction | 597 |
| Theory/principle | 599 |
| Processes | 601 |
| Singularization and arrangement of micro-parts | 601 |
| Positioning of micro-parts | 605 |
| Conclusion | 609 |
| References | 609 |
| CHAPTER 26 Laser Beam Micro-joining | 613 |
| <i>Felix Schmitt, Alexander Olowinsky</i> | |
| Introduction | 613 |
| Laser beam soldering | 614 |
| Laser beam micro-welding | 624 |
| Processes and results | 625 |
| Beam delivery | 626 |
| Spot welding | 627 |
| Continuous welding | 629 |
| Preconditions and limits of laser beam micro-welding | 633 |
| Conclusions and remarks | 633 |
| References | 634 |
| CHAPTER 27 Handling for Micro-manufacturing | 637 |
| <i>Antonio J. Sánchez</i> | |
| Introduction | 638 |
| Serial pick-and-place task | 639 |
| Intermachine transport systems | 640 |

| | |
|---|-----|
| Standard carriers..... | 642 |
| Conventional transport equipment..... | 642 |
| Intramachine micro-handling systems..... | 643 |
| Significant forces at the micro-scale..... | 644 |
| Micro-part feeders | 645 |
| Fixtures and grippers..... | 648 |
| Sensors and control systems | 651 |
| Applications | 653 |
| Micro-fabrication..... | 653 |
| Intramachine handling system in a micro-forming application..... | 653 |
| Inspection..... | 654 |
| Assembly | 656 |
| Conclusions..... | 657 |
| Acknowledgments..... | 658 |
| References..... | 658 |

**CHAPTER 28 Robotics in Micro-manufacturing and
Micro-robotics 661**

Rafa López Tarazón

| | |
|--|-----|
| Introduction: robot definitions..... | 661 |
| Micro-robotics applications | 663 |
| Micro-assembly..... | 664 |
| Micro-handling..... | 665 |
| Sensors and actuators in micro-robotics..... | 665 |
| Sensors | 665 |
| Actuators..... | 667 |
| Piezoelectric actuators | 667 |
| Micro-motors..... | 667 |
| Micro-robot examples..... | 668 |
| Micro-air vehicle..... | 669 |
| Hexapod M-850 micro-robot | 669 |
| Open-source micro-robotic project..... | 670 |
| Waalbot | 670 |
| Strider micro-robot | 670 |
| Micro-mechanical flying object project..... | 672 |
| Conclusions..... | 672 |
| References..... | 672 |
| Further reading..... | 674 |

**CHAPTER 29 Measurement, Testing, and Diagnosis
for Micro-manufacturing Systems.....675**

Pietro Larizza

| | |
|--|-----|
| Introduction..... | 675 |
| Precision measurement systems..... | 678 |
| Mono- and multidimensional measurement | 680 |
| Thickness measurement | 682 |
| 2D profile and shape measurement | 683 |
| Vibration Measurement and Analysis | 686 |
| Mixed qualitative–quantitative analysis systems | 687 |
| Scanning electron microscopy, atomic force microscopy, and scanning tunneling microscopy..... | 688 |
| Testing and diagnosis methods..... | 688 |
| Quantitative model-based testing | 689 |
| The Kalman estimator | 697 |
| Application on micro-devices and machines..... | 699 |
| Conclusions | 703 |
| Acknowledgments..... | 703 |
| References..... | 703 |

**CHAPTER 30 Optical Coherence Tomography for the
Characterization of Micro-parts and Structures ..705**

David Stifter

| | |
|--|-----|
| Introduction..... | 705 |
| Measurement principles of standard and selected advanced OCT techniques..... | 706 |
| Application of OCT for the evaluation of structures on the micron scale | 708 |
| Conclusions and outlook..... | 712 |
| Acknowledgments..... | 713 |
| References..... | 713 |

**CHAPTER 31 In situ Testing of Mechanical Properties
of Materials.....715**

*Fredrik Östlund, Karolina Rzepiejewska-Malyska,
Laetitia Philippe, Patrick Schwaller, Johann Michler*

| | |
|--|-----|
| Introduction..... | 715 |
| Integrating a mechanical testing setup in an SEM | 716 |

Tensile tests..... 717
 Compression tests..... 719
 Instrumented indentation/nano-indentation 722
 Indentation inside the SEM 724
 Image analysis 726
 Case study: A comparison of in situ micro-tension and
 micro-compression for studying the plastic properties
 of nano-crystalline electrodeposited nickel at different length
 scales..... 727
 Conclusion and outlook 731
 References..... 732

**CHAPTER 32 Micro-mechanics Modeling for Micro-forming
 Processes 733**

Shiwen Wang, Weimin Zhuang, Jian Cao, Jianguo Lin

Introduction..... 733
 CPFE theory 735
 Physical basis for single-crystal deformation 735
 Crystal kinematics 736
 Crystal plasticity constitutive equations 738
 Integrated CPFE analysis for the forming of micro-parts 740
 CPFE implementation 740
 Development of the CPFE model 741
 The integrated numerical process..... 743
 Process simulation for the forming of micro-pins 744
 Conclusions..... 746
 References..... 747

**CHAPTER 33 Manufacturing Execution Systems for
 Micro-manufacturing..... 749**

Matthias Meier, Ursula Rauschecker

Introduction..... 749
 Production IT overview..... 751
 Exploring the manufacturing operations and control
 level..... 755
 Operations/detailed scheduling..... 755
 Resource management..... 757
 Material management..... 759
 Labor management 760
 Data collection and acquisition 760

| | |
|--|------------|
| Performance analysis..... | 761 |
| Quality management | 762 |
| Information management | 763 |
| MES implementation and integration into the production IT..... | 764 |
| Common hierarchical IT infrastructure | 765 |
| Outlook toward intelligent, networked production | 767 |
| Production IT standardization | 768 |
| General production IT standards..... | 769 |
| Equipment interface standards | 769 |
| Conclusions..... | 772 |
| References..... | 772 |
| | |
| CHAPTER 34 Life Cycle Assessment in Nanotechnology, Materials and Manufacturing | 775 |
| <i>Sergio Durante, Mauro Comoglio, Nicola Ridgway</i> | |
| Introduction..... | 776 |
| Nano-materials and the environment | 777 |
| The principles of LCE..... | 777 |
| The life cycle assessment..... | 778 |
| Commercial and customized software tools..... | 783 |
| LCA as a methodology for product design guidelines and design for life cycle | 786 |
| Energy consumption..... | 787 |
| Energy mix..... | 787 |
| Embodied energy, embodied CO ₂ | 788 |
| Relevant industrial case studies | 788 |
| Hybrid parts approach | 791 |
| LCA for nanotechnology and micro-manufacturing | 800 |
| Goal and scope definition..... | 800 |
| Life cycle inventory | 800 |
| Life cycle impact assessment..... | 801 |
| Life cycle interpretation..... | 802 |
| Consideration of LCC | 803 |
| Conclusions..... | 803 |
