Preface vii

Part I The Force–Motion Relation 1

Chapter 1 Describing Motion 3

- Measurement Rules 3
- Motion Descriptors 5
- Constant Acceleration 9
- Up and Down 13
- Scalars and Vectors 17
- Linear and Angular Motion 21
- Curve Fitting and Smoothing 25
- Summary 34
- References 34

Chapter 2 Movement Forces 35

- Laws of Motion 35
- Describing Forces in Human Movement 36
- Forces Due to Body Mass 40
- Forces Due to the Surroundings 50
- Musculoskeletal Forces 62
- Summary 79
- References 79

Chapter 3 Movement Analysis 81

- Static Analysis 81
- Dynamic Analysis 91
- Momentum 105
- Work 118
- Summary 126
- References 127

Chapter 4 Running, Jumping, and Throwing 129

- Walking and Running 129
- Jumping 145
- Throwing and Kicking 155
- Summary 157
- References 158

Part I Summary 161

Part II The Motor System 163

Chapter 5 Excitable Membranes 165

- Essentials of Electricity 165
- Resting Membrane Potential 172

Neurons 175
Synaptic Transmission 184
Electromyography 195
Summary 203
References 204

Chapter 6 Muscle and Motor Units 205

Muscle 205
Excitation–Contraction Coupling 209
Motor Unit 215
Muscle Mechanics 230
Summary 251
References 251

Chapter 7 Neural Control of Movement 255

Spinal Reflexes 255
Automatic Behaviors 280
Voluntary Actions 298
Summary 310
References 311

Part II Summary 315

Part III Adaptability of the Motor System 317

Chapter 8 Acute Adjustments 319

Warm-Up Effects 319
Flexibility 322
Muscle Soreness and Damage 326
Fatigue 331
Muscle Potentiation 362
Arousal 366
Summary 370
References 371

Chapter 9 Chronic Adaptations 377

Muscle Strength 377
Muscle Power 408
Adaptations to Reduced Use 414
Motor Recovery After Nervous System Injury 427
Adaptations With Age 436
Summary 450
References 451

Part III Summary 461

Appendix A: SI Units 463

Appendix B: Equations 465

Glossary 470

Index 486

About the Author 496
