PREFACE

xvii

PART ONE

BASIC CONCEPTS OF EDUCATIONAL RESEARCH

Chapter One

INTRODUCTION TO EDUCATIONAL RESEARCH

3

Empirical Versus Nonempirical Research	6
Basic Versus Applied Research	7
Summary	8
Key Concepts Developed in This Chapter	9
What Should I Understand at This Point?	9
What's Next?	9

Chapter Two

THE RESEARCH QUESTION

10

Stating a Question	12
Refining the Question	14
Feasibility	15
Clarity	15
Significance	20
Ethics and Research	22
Protecting Participants From Harm	23
Ensuring Confidentiality of Research Data	23
Should Subjects Be Deceived?	24
Summary	27
Key Concepts Developed in This Chapter	27
What Should I Understand at This Point?	28
What's Next?	28

Chapter Three

VARIABLES AND HYPOTHESES

29

Relationships	29
Variables	32
Measured and Categorical Variables	32
Independent and Dependent Variables	37
Extraneous Variables and Constants	38

vii

Hypotheses	39
Advantages and Disadvantages of Stating Questions as Hypotheses	40
Directional Versus Nondirectional Hypotheses	44
Summary	46
Key Concepts Developed in This Chapter	46
What Should I Understand at This Point?	46
What's Next?	47
 <i>Chapter Four</i>	
REVIEWING THE LITERATURE	48
Types of References	48
General References	48
Secondary Sources	49
Primary Sources	49
Steps Involved in a Literature Review	49
A Computer Search of the Literature	65
An Example of a Computer Search	68
Researching the World Wide Web	72
Meta-Analysis	76
Try a Literature Review of Your Own	77
Summary	78
Key Concepts Developed in This Chapter	79
What Should I Understand at This Point?	79
What's Next?	79
 <i>Chapter Five</i>	
INSTRUMENTATION	81
The Process of Instrument Development: An Example	81
The Rating Scale	84
Reliability and Validity	86
The Observation Record	87
More About Reliability and Validity	88
Validity	88
Reliability	97
Checking Reliability and Validity	102
Summary	104
Key Concepts Developed in This Chapter	104
What Should I Understand at This Point?	105
What's Next?	105
 <i>Chapter Six</i>	
MORE ON INSTRUMENTATION	106
The Structured Interview Schedule	106
Ability Tests	109
Projective Tests	114
Locating a Suitable Instrument	119
Developing Your Own Instrument	122
Summary	123

Key Concepts Developed in This Chapter	123
What Should I Understand at This Point?	123
What's Next?	124

Chapter Seven

SAMPLES AND POPULATIONS 125

The Process of Selecting a Sample	125
Samples Versus Populations	128
Defining the Population	128
Target Versus Accessible Populations	130
Random Versus Nonrandom Sampling	131
Simple Random Sampling	132
Stratified Random Sampling	135
Cluster Random Sampling	135
Two-Stage Random Sampling	137
Convenience Sampling	137
Purposive Sampling	139
Sample Size	141
A Cautionary Note About Sampling	142
Generalizing	143
Population Generalizability	143
When Random Sampling Is Not Feasible	145
Ecological Generalizability	145
Another Example of Sampling	147
Summary	152
Key Concepts Developed in This Chapter	152
What Should I Understand at This Point?	153
What's Next?	153

Chapter Eight

INTERNAL VALIDITY 154

Planning the Procedures of a Study	154
The "Design" of a Study	155
The Meaning of Internal Validity	157
Some General Threats to Internal Validity	159
Subject Characteristics	159
Loss of Subjects	160
Location	162
Instrument Decay	163
Data Collector Characteristics	164
Data Collector Bias	165
Testing	166
Extraneous Events	168
Maturation	169
Attitude of Subjects	170
Regression	172
Implementation	173
Two Studies to Examine	174
Study 1: An Innovative Curriculum	174
Study 2: The Open Classroom	176
Summary	178

Key Concepts Developed in This Chapter	178
What Should I Understand at This Point?	178
What's Next?	179

Chapter Nine

CONTROLLING THREATS TO INTERNAL VALIDITY 180

Experimental Research	180
The Control or Comparison Group	180
Manipulation of the Independent Variable	181
Randomization	182
General Methods of Controlling Threats to Internal Validity	183
Subject Characteristics	184
Loss of Subjects	184
Location	185
Instrument Decay	186
Data Collector Characteristics	186
Data Collector Bias	186
Testing	187
Extraneous Events	187
Maturation	187
Attitude of Subjects	188
Regression	188
Implementation	188
Two Studies Revisited	189
Study 1: An Innovative Curriculum	189
Study 2: The Open Classroom	189
Guidelines for Handling Internal Validity: Comparison-Group Studies	193
Guidelines for Handling Internal Validity: Correlational Studies	197
Summary	201
Key Concepts Developed in This Chapter	201
What Should I Understand at This Point?	202
What's Next?	202

Chapter Ten

DATA ANALYSIS 203

Scores	203
Statistics for Comparison-Group Studies	204
Averages	204
Frequency Polygons	206
Quartiles and the Five-Number Summary	211
Statistics for Correlational Studies	212
Interpreting Scatterplots	214
Correlation Coefficients	214
Other Correlational Techniques	220
Studies Involving Only Categorical Variables	221
Assessing the Magnitude of a Relationship	225
Inferential Statistics	227
Addendum 1: Statistical Matching	232
Addendum 2: Specific Inferential Statistics	234

Summary	235
Key Concepts Developed in This Chapter	236
What Should I Understand at This Point?	236
What's Next?	236

Chapter Eleven

THE RESEARCH PROPOSAL 237

An Example of a Student's Research Proposal	238
A Second Example of a Student's Research Proposal	248
Summary	256
What Should I Understand at This Point?	256
What's Next?	257

Chapter Twelve

CRITIQUING RESEARCH REPORTS 258

Criteria for Evaluating Research Reports	258
Results and Discussion	259
A Critique of a Research Report	260
Summary	275
Key Concepts Developed in This Chapter	275
What Should I Understand at This Point?	276
What's Next?	276

PART TWO

RESEARCH METHODOLOGIES

Chapter Thirteen

EXPERIMENTAL RESEARCH 279

The Nature of Experimental Research	279
True Experiments	279
Quasi-Experiments	280
Types of Experiments	280
Weak Experimental Designs	280
True Experimental Designs	282
Quasi-Experimental Designs	283
Examples of How Research Could Be Done in Schools:	
<i>Investigating the Teaching of Science Concepts</i>	
<i>by Means of an Experiment</i>	287
An Example of Experimental Research: <i>Effects on High School</i>	
<i>Students of Conflict-Resolution Training Integrated Into</i>	
<i>English Literature</i>	289
Try the Method Yourself: CONDUCT AN EXPERIMENT	303
Summary	306
Key Concepts Developed in This Chapter	306
What Should I Understand at This Point?	306
What's Next?	306

Chapter Fourteen	
SINGLE-SUBJECT RESEARCH	307
The Nature of Single-Subject Research	307
Single-Subject Designs	308
Other Single-Subject Designs	311
Graphing Single-Subject Designs	313
The Importance of Replicating Single-Subject Studies	314
Examples of How Research Could Be Done in Schools: <i>Studying the Effects of Time-Out on a Student's Disruptive Behavior by Means of a Single-Subject Experiment</i>	314
An Example of Single-Subject Research: <i>Reducing Indices of Unhappiness Among Individuals with Profound Multiple Disabilities During Therapeutic Exercise Routines.</i>	315
Try the Method Yourself: ANALYZE SOME SINGLE-SUBJECT DATA	328
Summary	329
Key Concepts Developed in This Chapter	329
What Should I Understand at This Point?	329
What's Next?	329
Chapter Fifteen	
CAUSAL-COMPARATIVE RESEARCH	330
The Nature of Causal-Comparative Research	330
Similarities and Differences Between Causal-Comparative and Experimental Research	333
Examples of How Research Could Be Done in Schools: <i>Comparing Two Different Ways of Teaching Chemistry by Means of a Causal-Comparative Study</i>	335
An Example of Causal-Comparative Research: <i>Moral Reasoning and Religious Belief: Does Content Influence Structure?</i>	336
Try the Method Yourself: ANALYZE SOME CAUSAL-COMPARATIVE DATA	347
Summary	348
Key Concepts Developed in This Chapter	348
What Should I Understand at This Point?	348
What's Next?	348
Chapter Sixteen	
CORRELATIONAL RESEARCH	349
The Nature of Correlational Research	349
Why Do Correlational Research?	350
Explanatory Studies	350
Prediction Studies	351
Basic Steps in Correlational Research	354
Problem Selection	354
Sample	354
Instruments	355

Design and Procedures	355
Data Collection	356
Data Analysis and Interpretation	356
Evaluating Threats to Internal Validity	357
What Do Correlation Coefficients Tell Us?	360
A Few Thoughts About Causation	361
Examples of How Research Could Be Done in Schools: <i>Predicting by Means of a Correlational Study Which Kinds of Students Are Likely to Have Trouble Learning Algebra</i>	361
An Example of Correlational Research: <i>Help-Seeking Behavior of Native American Indian High School Students</i>	362
Try the Method Yourself: ANALYZE SOME CORRELATIONAL DATA	374
Summary	375
Key Concepts Developed in This Chapter	375
What Should I Understand at This Point?	375
What's Next?	375

Chapter Seventeen

SURVEY RESEARCH **376**

The Nature of Survey Research	376
Survey or Interview?	377
Why Conduct Surveys?	377
Types of Surveys	378
Cross-Sectional Surveys	378
Longitudinal Surveys	378
Survey Research and Correlational Research	379
Steps in Survey Research	379
Problem Definition	379
Identification of the Target Population	380
Mode of Data Collection	381
Selection of the Sample	382
Preparation of the Instrument	383
Training of Interviewers	384
Using an Interview to Measure Ability	385
Nonresponse	386
Total Nonresponse	386
Item Nonresponse	388
Problems in the Instrumentation Process in Survey Research	389
Evaluating Threats to Internal Validity in Survey Research	390
Data Analysis in Survey Research	390
Examples of How Research Could Be Done in Schools: <i>Determining What Students Like About School by Means of a Survey</i>	391
An Example of Survey Research: <i>Literature Preferences of Fourth Graders</i>	392
Try the Method Yourself: ANALYZE SOME SURVEY DATA	405
Summary	406
Key Concepts Developed in This Chapter	406
What Should I Understand at This Point?	406
What's Next?	407

Chapter Eighteen	
CONTENT ANALYSIS RESEARCH	408
The Nature of Content Analysis	408
What Does Content Analysis Allow Us to Study?	409
Some Applications	410
Steps Involved in Content Analysis	411
Decide on the Specific Objectives	411
Define Terms	411
Specify the Unit of Analysis	411
Locate Relevant Data	411
Develop a Rationale	412
Develop a Sampling Plan	412
Formulate Coding Categories	412
Data Analysis	417
Using the Computer in Content Analysis	418
Advantages of Content Analysis	418
Disadvantages of Content Analysis	419
Examples of How Research Could Be Done in Schools: <i>Checking for Bias in English Anthologies by Means of a Content Analysis</i>	420
An Example of a Content Analysis: <i>The Portrayal of Older People in Award-Winning Literature for Children</i>	421
Try the Method Yourself: DO A CONTENT ANALYSIS	429
Summary	430
Key Concepts Developed in This Chapter	431
What Should I Understand at This Point?	431
What's Next?	431
 Chapter Nineteen	
QUALITATIVE RESEARCH: I	432
What is Qualitative Research?	432
General Characteristics of Qualitative Research	433
Forms of Qualitative Research	436
Observation	436
Interviewing	440
Generalization in Qualitative Research	446
Examples of How Research Could Be Done in Schools: <i>Identifying Aggression in Second-Grade Boys by Means of an Observational Study</i>	447
An Example of a Qualitative Study: <i>Dumping Ground or Effective Alternative? Dropout-Prevention Programs in Urban Schools</i>	448
Try the Method Yourself: OBSERVE A CLASSROOM DISCUSSION	465
Summary	466
Key Concepts Developed in This Chapter	467
What Should I Understand at This Point?	467
What's Next?	468

*Chapter Twenty***QUALITATIVE RESEARCH: II 469**

The Nature of Ethnographic Research	469
The Unique Value of Ethnographic Research	471
Field Notes	472
Sampling in Ethnographic Research	475
Advantages and Disadvantages of Ethnographic Research	475
Validity and Reliability in Qualitative Research	476
Ethics and Qualitative Research	478
Qualitative and Quantitative Research Reconsidered	480
Examples of How Research Could Be Done in Schools: <i>Finding Out How Music Teachers Teach Their Subject by Means of an Ethnographic Study</i>	481
All Have Value	483
Another Example of a Qualitative Study: <i>A Portrait of Four Social Studies Teachers and Their Classes: With Special Attention Paid to Identification of Teaching Techniques and Behaviors That Contribute to Student Learning</i>	483
Try the Method Yourself: DO SOME ETHNOGRAPHIC RESEARCH	509
Summary	510
Key Concepts Developed in This Chapter	510
What Should I Understand at This Point?	510
What's Next?	511

APPENDIXES

Appendix A: General Glossary of Research Terminology	515
Appendix B: Specialized Glossary of Statistical Terminology	525
Appendix C: Calculation of Some Commonly Used Statistics	529
Appendix D: Table of Random Numbers	535
Appendix E: Table of Chi-Square Values	537
