Preface	xi
<b>Part 1 Introduction</b>	<b>3</b>
Chapter 1 Basics of radiological diagnosis <i>D. MacDonald</i>	5
Chapter 2 Viewing conditions <i>D. MacDonald</i>	37
Chapter 3 Physiological phenomena and radiological interpretation <i>D. MacDonald</i>	44
<b>Part 2 Advanced imaging modalities</b>	<b>47</b>
Chapter 4 Helical computed tomography <i>D. MacDonald</i>	49
Chapter 5 Cone-beam computed tomography <i>D. MacDonald</i>	59
Chapter 6 Magnetic resonance imaging <i>D. MacDonald</i>	67
Chapter 7 Positron emission tomography <i>D. MacDonald</i>	84
Chapter 8 Basics of ultrasound <i>D. MacDonald</i>	88
<b>Part 3 Radiological pathology of the jaws</b>	<b>91</b>
Chapter 9 Radiolucencies <i>D. MacDonald</i>	93
Chapter 10 Radiopacities <i>D. MacDonald</i>	151
Chapter 11 Maxillary antrum <i>D. MacDonald</i>	195
Chapter 12 Temporomandibular joint <i>D. MacDonald</i>	225
Chapter 13 Imaging of the salivary glands <i>D. MacDonald</i>	233

Chapter 14	Fractures of the face and jaws <i>D. MacDonald</i>	244
Chapter 15	Osseointegrated implants <i>T. Li and D. MacDonald</i>	249
<b>Part 4</b>	<b>Radiological pathology of the extragnathic head and neck regions</b>	<b>267</b>
Chapter 16	Introduction <i>D. MacDonald and M. Martin</i>	269
Chapter 17	Benign lesions <i>M. Martin and D. MacDonald</i>	278
Chapter 18	Malignant lesions <i>M. Martin and D. MacDonald</i>	304
