Chapter 1 Introduction.....	1
Chapter 2 Sensing danger	7
2.1 Operation of the senses.....	7
2.2 Chemical senses.....	9
2.2.1 Olfaction (smell).....	9
2.2.2 Trigeminal sense (irritants)	12
2.2.3 Gustation (taste)	13
2.3 Somatosensory senses.....	14
2.3.1 Hunger, thirst, and satiety.....	15
2.3.2 Stretch.....	17
2.3.3 Visceral, vascular, and distributed components	17
2.4 Proprioception (kinesthetic sense).....	18
2.4.1 Equilibrioception (balance).....	19
2.4.2 Vibration.....	20
2.4.3 g-Force	20
2.5 Tactile senses	20
2.5.1 Touch and pressure	21
2.5.2 Nociception (pain)	21
2.5.3 Thermoception (heat, cold).....	23
2.5.4 Puriception (itch)	24
2.6 Audioception and vestibular senses.....	24
2.6.1 Audition	24
2.6.2 Volume, pitch, rhythm (duration), and timbre	25
2.6.3 Echolocation	26
2.7 Vision.....	26
2.7.1 Color	30
2.8 Sensory synthesis and integration.....	30
2.8.1 Time	32
2.8.2 Cross-modal plasticity	33
2.8.3 Developmental aspects	35
2.8.4 Sensory substitution.....	37
2.8.5 Cross-modal interactions create a multimodal or supramodal system.....	38
2.8.6 Sense of direction	39
2.8.7 Reflexes.....	39

2.9	Integrative function of social-cognitive system components.....	43
2.9.1	Consciousness	44
2.9.2	Attention	44
2.9.3	Memory	48
2.9.4	The self and self-awareness	49
2.9.5	Empathy	49
2.10	Sensing danger.....	50
2.10.1	Current threats to human health and safety	50
2.11	Summary points	54
Chapter 3 Sensor technology		57
3.1	Introduction.....	57
3.2	Sensor technology	59
3.2.1	Examples of sensor technology	62
3.2.2	Extending the tactile sense as a sensory substitution.....	62
3.2.3	Further enhancements of sensor technology	71
3.3	Detection to prevent or minimize harm	73
3.4	Likely future directions in sensor-based technology	75
Chapter 4 Perceiving risk		91
4.1	Risk perception or threat appraisal?	91
4.2	Danger perception.....	96
4.3	Risk and emotion.....	99
4.4	Fear and risk perception.....	100
4.5	Functionality of biased perception for action in response to threat	108
4.6	Individual differences.....	108
4.7	Role of emotions and framing in risk-related decision making	109
4.8	Neural correlates of fear, danger processing, and risk perception	111
4.9	Developmental aspects	122
4.10	Perceiving dangers that cannot be sensed.....	123
4.11	Difficult to identify risks	126
4.11.1	Sedentary behavior.....	126
4.11.2	Generic health threats	127
4.12	Role of consciousness and cognition	128
4.13	Risk and decision making	129
4.14	Risk preferences	131
4.15	Cognitive (attributional) biases	132
4.15.1	Reframing cognitive biases.....	133
4.16	Driving and risk behaviors	139
4.17	Wider considerations: Global and group levels	141
Chapter 5 Reframing error.....		143
5.1	Introduction.....	143
5.2	Neural correlates of error performance.....	145
5.3	Cognitive features of error	150
5.3.1	Attention and attentional lapses	150
5.3.2	Change blindness	153
5.3.3	Memory lapses	155

5.3.4	Cognitive biases and error management theory.....	155
5.3.5	Threat detection errors	158
5.4	From cognition to behavior.....	158
5.4.1	Situation awareness.....	158
5.4.2	Beyond immediate safety considerations	165
5.5	Errors as a crucial learning mechanism.....	167
5.6	Some error-reducing strategies.....	167
5.6.1	Increasing system automation	167
5.6.2	Intersector knowledge transfers.....	169
5.6.3	Other approaches.....	170
5.7	Conclusions	172
Chapter 6 Surviving stress.....		175
6.1	Nature and effects of stress.....	176
6.2	Models of occupational stress.....	179
6.2.1	Transactional model.....	181
6.2.2	Job demands–resources model.....	182
6.2.3	Conservation of resources model.....	182
6.2.4	Challenge-hindrance model.....	183
6.3	Workplace stressors, safety behavior, and injuries.....	183
6.3.1	Workload and work pace.....	184
6.3.2	Work schedules and shiftwork	186
6.3.3	Role-related stressors	187
6.3.4	Work relationships.....	187
6.3.5	Job insecurity	189
6.3.6	Work–home interface	189
6.3.7	Challenge and hindrance stressors.....	190
6.4	Direct mechanisms linking stress with workplace safety	190
6.4.1	Effects of acute stressors.....	191
6.4.2	Effects of chronic stressors.....	193
6.5	Indirect mechanisms linking stress with workplace safety	194
6.5.1	Work-related attitudes.....	194
6.5.2	General health.....	195
6.5.3	Burnout.....	196
6.6	Moderating effects.....	196
6.6.1	Job control.....	197
6.6.2	Social support.....	197
6.6.3	Coping strategies	198
6.7	Stress interventions	199
6.7.1	Stress interventions and work outcomes	199
6.7.2	Stress interventions and workplace safety	204
6.8	Conclusions	204
Chapter 7 Personality impacts.....		207
7.1	Accident proneness	209
7.2	Individual differences in error liability.....	211
7.3	Personality and accident involvement.....	213
7.3.1	Extraversion.....	215
7.3.2	Neuroticism.....	218

7.3.3	Conscientiousness	221
7.3.4	Agreeableness	222
7.3.5	Openness	225
7.4	Core self-evaluation and safety outcomes	225
7.5	Behaviors linking personality with safety outcomes.....	227
7.6	Individual differences and job stress.....	229
7.7	Selection implications for personality at work.....	230
7.8	Conclusions	233
Chapter 8 Group climate		235
8.1	Teams and safety performance.....	236
8.1.1	Cohesion.....	239
8.1.2	Group discussion and decision making.....	240
8.1.3	Shared leadership and self-managing teams	243
8.1.4	Intergroup relations.....	246
8.2	Group norms and safety performance	247
8.2.1	Group norms and expectations	247
8.2.2	Theory of planned behavior.....	251
8.3	Organizational safety climate.....	253
8.3.1	Structure of safety climate	254
8.3.2	Multilevel model of safety climate.....	255
8.3.3	Safety climate as a leading indicator	255
8.4	Group safety climate	256
8.4.1	Group safety climate as a function of supervisory action.....	256
8.4.2	Group safety climate as an emergent property of the team.....	257
8.4.3	Group safety climate and trust.....	259
8.5	Managing effective work teams	260
8.6	Conclusions	261
Chapter 9 Safety leadership.....		263
9.1	Trait and behavioral leadership theories.....	264
9.1.1	Trait theories.....	265
9.1.2	Behavioral theories	265
9.1.3	Integrating trait and behavioral leadership theories.....	267
9.2	Charismatic leadership	267
9.3	Transformational and transactional leadership.....	268
9.3.1	Transformational leadership and safety	270
9.3.2	Contingent reward	271
9.3.3	Transactional leadership and safety	272
9.3.4	Passive leadership and safety	273
9.4	Other leadership models	274
9.4.1	Empowering leadership.....	274
9.4.2	Ethical leadership	275
9.4.3	Authentic leadership	275
9.5	Contingency theories	276
9.6	Psychological mechanisms linking leadership to safety outcomes	277
9.6.1	Interpersonal trust and leader integrity.....	277
9.6.2	Leader–member exchange theory	280

9.6.3	Safety climate	281
9.6.4	Empowerment	283
9.7	Model of safety leadership	283
9.8	Leadership development, training, and other interventions	285
9.9	Conclusions	287
Chapter 10 Safety culture.....		289
10.1	Nature of safety culture.....	291
10.1.1	Interpretive approach.....	291
10.1.2	Functionalist approach	291
10.2	Relationship between safety culture and safety climate	292
10.3	Theoretical models of safety culture	294
10.3.1	Organizational culture approach.....	294
10.3.2	Total safety culture	295
10.3.3	Safety culture: An informed culture	297
10.3.4	Reciprocal safety culture model.....	298
10.3.5	Sociotechnical model of safety culture	299
10.3.6	Cultural maturity model	300
10.4	Organizational safety and subcultures.....	301
10.5	High-reliability organizations	305
10.6	Measurement approaches.....	307
10.6.1	Safety systems	307
10.6.2	Safety attitudes	308
10.6.3	Safety behavior	309
10.6.4	Injuries.....	310
10.6.5	Triangulation.....	310
10.7	Changing toward a positive safety culture	311
10.7.1	Indicators of a positive safety culture	311
10.7.2	Safety culture interventions.....	313
10.8	Safety culture and risk management.....	315
10.8.1	Antecedents of a safety culture	316
10.8.2	Safety culture as a form of risk control	316
10.8.3	Risk management approach to safety.....	319
10.9	Conclusions	323
Chapter 11 Managing risk.....		325
11.1	Introduction.....	325
11.2	Economic risks	331
11.3	Environmental risks.....	332
11.3.1	Greater incidence of extreme weather events.....	332
11.3.2	Greater incidence of natural catastrophes	332
11.3.3	Greater incidence of human-induced catastrophes.....	335
11.3.4	Emerging and emergent technology risks.....	344
11.3.5	Major biodiversity loss and ecosystem collapse	346
11.3.6	Water crises.....	349
11.3.7	Climate change mitigation and adaptation failure.....	350
11.4	Geopolitical.....	351

11.5	Societal	352
11.5.1	Food crises	352
11.5.2	Pandemic outbreaks	354
11.5.3	General health issues	356
11.6	Technological.....	358
11.7	Risk governance and risk management.....	359
11.8	Conclusions	361
	References	365
	Glossary.....	455
	Index	463
