

Contents

1	Theory Versus Practice	1
	Stanko Strmčnik, Đani Juričić, Janko Petrovčić, and Vladimir Jovan	
Part I From Theory Towards Practice		
2	Identification and Control of Nonlinear Systems Using a Piecewise-Linear Hammerstein Model	37
	Gregor Dolanc and Stanko Strmčnik	
3	Tracking Explicit Model Predictive Controllers for Low-Level Control Applications	77
	Samo Gerškšič and Boštjan Pregelj	
4	The Divide-and-Conquer Method for Modelling and Control of Nonlinear Systems: Some Important Issues Concerning Its Application	101
	Juš Kocijan	
5	Model-Based Control of the Ammonia Nitrogen Removal Process in a Wastewater Treatment Plant	127
	Darko Vrečko and Nadja Hvala	
Part II From Practice Towards Theory		
6	Temperature Control in a Plastic Extruder Control System	157
	Janko Petrovčić and Damir Vrančić	
7	Tension Control in a Steel Slitting Line	185
	Gregor Dolanc	
8	End-Quality Control in the Manufacturing of Electrical Motors . . .	221
	Đani Juričić, Janko Petrovčić, Uroš Benko, Bojan Musizza, Gregor Dolanc, Pavle Boškoski, and Dejan Petelin	

9	A System for Model-Based Quality Assessment of Burn-Protective Garments	257
	Đani Juričić, Matej Gašperin, Bojan Musizza, Gregor Dolanc, and Igor Mekjavić	
Part III Tools and Building Blocks for Control Systems Implementation		
10	Rapid Prototyping Environment for Control Systems Implementation	289
	Damir Vrančić	
11	A PLC-Based System for Advanced Control	327
	Samo Gerkšič, Gregor Dolanc, Damir Vrančić, Juš Kocijan, Stanko Strmčnik, Sašo Blažič, Igor Škrjanc, Zoran Marinšek, Miha Božiček, Anna Stathaki, Robert King, Mincho Hadjiski, and Kosta Boshnakov	
12	A New Approach to Control Systems Software Development	363
	Giovanni Godena, Tomaž Lukman, and Gregor Kandare	
	Index	407
