Preface to the Second Edition	ix
Preface to the First Edition	xi
Acknowledgements.....	xv
CHAPTER 1 Introduction.....	1
1.1 General overview.....	1
1.2 Classification of flow-induced vibrations	4
1.3 Scope and contents of this book	5
CHAPTER 2 Concepts, Definitions and Methods in Fluid-Structure Interactions	7
2.1 Discrete and distributed parameter systems.....	8
2.2 The fluid mechanics of fluid-structure interactions	25
2.3 Linear and nonlinear dynamics.....	54
CHAPTER 3 Pipes Conveying Fluid: Linear Dynamics I.....	63
3.1 Introduction.....	64
3.2 The fundamentals.....	65
3.3 The equations of motion	75
3.4 Pipes with supported ends	97
3.5 Cantilevered pipes.....	123
3.6 Systems with added springs, supports, masses and other modifications	177
3.7 Wave propagation in long pipes.....	201
3.8 Articulated pipes.....	221
CHAPTER 4 Pipes Conveying Fluid: Linear Dynamics II.....	235
4.1 Introduction.....	236
4.2 Nonuniform pipes	237
4.3 Aspirating pipes	254
4.4 Short pipes and refined flow modelling	269
4.5 Pipes with harmonically perturbed flow	291
4.6 Rotating cantilevered pipes.....	311
4.7 Forced vibration	311
4.8 Applications.....	317
4.9 Concluding remarks.....	332

CHAPTER 5	Pipes Conveying Fluid: Nonlinear and Chaotic Dynamics	333
5.1	Introductory comments	334
5.2	The nonlinear equations of motion	336
5.3	Equations for articulated systems	361
5.4	Methods of solution and analysis	365
5.5	Pipes with supported ends	367
5.6	Articulated cantilevered pipes	383
5.7	Cantilevered pipes	396
5.8	Chaotic dynamics	428
5.9	Nonlinear parametric resonances	479
5.10	Oscillation-Induced flow	500
5.11	Concluding remarks	500
CHAPTER 6	Curved Pipes Conveying Fluid	503
6.1	Introduction	503
6.2	Formulation of the problem	506
6.3	Finite element analysis	519
6.4	Curved pipes with supported ends	525
6.5	Curved cantilevered pipes	539
6.6	Curved pipes with an axially sliding end	546
CHAPTER 7	Cylindrical Shells Containing or Immersed in Flow: Basic Dynamics	551
7.1	Introductory remarks	552
7.2	General dynamical behaviour	553
7.3	Refinements and diversification	593
7.4	Wave propagation and acoustic coupling	631
7.5	Viscous and confinement effects	649
7.6	Nonlinear dynamics	674
7.7	Concluding remarks	713
Epilogue		715
APPENDIX A	A First-Principles Derivation of the Equation of Motion of a Pipe Conveying Fluid	717
APPENDIX B	Analytical Evaluation of b_{sr}, c_{sr} and d_{sr}	719
APPENDIX C	Destabilization by Damping: T. Brooke Benjamin's Work	721

APPENDIX D Experimental Methods for Elastomer Pipes 725

 D.1 Materials, equipment and procedures 725

 D.2 Short pipes, shells and cylinders 728

 D.3 Flexural rigidity and damping constants 728

 D.4 Measurement of frequencies and damping 730

APPENDIX E The Timoshenko Equations of Motion and Associated Analysis 733

 E.1 The equations of motion 733

 E.2 The eigenfunctions 735

 E.3 The integrals I_{kn} 737

APPENDIX F Some of the Basic Methods of Nonlinear Dynamics..... 739

 F.1 Lyapunov method..... 739

 F.2 Centre manifold reduction 744

 F.3 Normal forms 745

 F.4 The method of averaging..... 748

 F.5 Bifurcation theory and unfolding parameters 749

 F.6 Partial differential equations 751

APPENDIX G Newtonian Derivation of the Nonlinear Equations of Motion of a Pipe Conveying Fluid 759

 G.1 Cantilevered pipe..... 759

 G.2 Pipe fixed at both ends 760

APPENDIX H Nonlinear Dynamics Theory Applied to a Pipe Conveying Fluid 763

 H.1 Centre manifold 763

 H.2 Normal form..... 764

APPENDIX I The Fractal Dimension from the Experimental Pipe-Vibration Signal 773

APPENDIX J Detailed Analysis for the Derivation of the Equations of Motion of Chapter 6 779

 J.1 Relationship between $(X_0, Y_0, Z_0$ and $x, y, z)$ 779

 J.2 The expressions for curvature and twist..... 780

 J.3 Derivation of the fluid-acceleration vector..... 780

 J.4 The equations of motion for the pipe 782

APPENDIX K Matrices for the Analysis of an Extensible Curved Pipe Conveying Fluid	787
APPENDIX L Matrices in Hybrid Analytical/Finite-Element Method of Lakis <i>et al.</i>	789
L.1 Matrices for a cylindrical shell <i>in vacuo</i>	789
L.2 Matrices associated with fluid flow in a cylindrical shell	790
APPENDIX M Anisotropic Shells	791
APPENDIX N Nonlinear Motions of a Shell Conveying Fluid	793
N.1 The particular solution, F_p	793
N.2 The discretized equations of motion	794
References	797
Index	851
