# Contents

Preface.....	xiii
Author.....	xv
<b>Chapter 1</b> Introduction.....	1
<b>Chapter 2</b> Measurement of Mechanical Properties of Reinforced Plastics.....	5
2.1 Introduction.....	5
2.2 Tensile Strength Electronic Dynamometer.....	6
2.3 Flexural Modulus (Modulus of Elasticity).....	6
2.3.1 Torsion Test.....	10
2.3.2 Hand Test.....	10
2.4 Elongation at Break.....	11
2.5 Strain at Yield.....	16
2.5.1 Isochronous Stress–Strain Curves.....	16
2.5.2 Stress–Time Curves.....	18
2.5.3 Stress–Temperature Curves.....	18
2.5.4 Rupture Data.....	19
2.5.5 Long-Term Strain–Time Data.....	21
2.6 Impact Strength Characteristics of Polymers.....	23
2.6.1 Notched Izod Impact Strength.....	24
2.6.2 Falling Weight Impact Test.....	25
2.6.3 Gardner Impact Test.....	27
2.7 Shear Strength.....	27
2.8 Elongation in Tension.....	28
2.9 Deformation under Load.....	28
2.10 Compressive Set (Permanent Deformation).....	28
2.11 Mold Shrinkage.....	29
2.12 Coefficient of Friction.....	31
2.13 Fatigue Index.....	31
2.14 Toughness.....	31
2.15 Abrasion Resistance or Wear.....	32
2.16 Application of Dynamic Mechanical Analysis.....	34
2.16.1 Theory.....	34
2.16.2 Fixed-Frequency Mode (i.e., Time–Stress Plots).....	36
2.16.3 Resonant Frequency Mode (i.e., Time–Oscillation Amplitude).....	36
2.16.4 Stress Relaxation Mode (i.e., Time–Percent Creep Plots).....	36
2.16.5 Creep Mode (i.e., Temperature–Flexural Storage Modulus Plots).....	37

2.16.6	Projection of Material Behavior Using Superpositioning .....	39
2.17	Rheology and Viscoelasticity .....	41
	References .....	47
<b>Chapter 3</b>	<b>Mechanical Properties of Reinforced Plastics .....</b>	<b>53</b>
3.1	Glass Fiber Reinforcement .....	53
3.1.1	Tensile Strength.....	53
3.1.2	Flexural Modulus .....	53
3.1.3	Elongation at Break .....	55
3.1.4	Impact Strength.....	55
3.1.5	Mechanical Properties of Reinforced Polyofins.....	55
3.1.6	Mechanical Properties of Polyether Ether Ketone .....	58
3.1.7	Mechanical Properties of Polyethylene Terephthalate .....	58
3.1.8	Mechanical Properties of Polybutylene Terephthalate .....	59
3.1.9	Mechanical Properties of Polyamides.....	59
3.1.10	Mechanical Properties of Polyamide Imide.....	60
3.1.11	Mechanical Properties of Polyimides .....	60
3.1.12	Mechanical Properties of Polyphenylene Oxide .....	60
3.1.13	Mechanical Properties of Perfluoroalkoxyethylene .....	60
3.1.14	Mechanical Properties of Epoxy Resins .....	61
3.1.15	Mechanical Properties of Polytetrafluoroethylene .....	61
3.1.16	Mechanical Properties of Polyphenylene Sulfide.....	61
3.1.17	Mechanical Properties of Miscellaneous Polymers....	61
3.2	Carbon Fiber Reinforcement .....	62
3.2.1	Mechanical Properties of Polyacetal.....	62
3.2.2	Mechanical Properties of Polycarbonate.....	62
3.2.3	Mechanical Properties of Polyamides.....	62
3.2.4	Mechanical Properties of Polyethersulfone .....	62
3.2.5	Mechanical Properties of Epoxy Resins .....	64
3.2.6	Mechanical Properties of Low-Density Polyethylene.....	64
3.2.7	Mechanical Properties of Polyvinylidene Fluoride....	64
3.2.8	Mechanical Properties of Phenolic Resins.....	64
3.2.9	Mechanical Properties of Syntactic Foam .....	65
3.3	Carbon Nanotube Reinforcement.....	65
3.3.1	Medium-Density Polyethylene .....	65
3.3.2	Low-Density Polyethylene.....	69
3.3.3	Ethylene–Propylene–Diene Terpolymers.....	69
3.3.4	Epoxy Resins .....	70
3.3.5	Polyamides .....	70
3.3.6	Polyethylene Oxide.....	71
3.3.7	Miscellaneous Polymers.....	71

3.4	Carbon Black Reinforcement .....	71
3.4.1	Epoxy Resins .....	72
3.4.2	Polyvinylidene Fluoride .....	74
3.5	Graphite-Reinforced Plastics.....	74
3.6	Montmorillonite Organically Modified Clay Reinforcement....	75
3.6.1	Epoxy Resins .....	77
3.6.2	Ethylene–Propylene–Diene Terpolymers.....	77
3.6.3	Polyamides .....	77
3.6.4	Polylactic Acid.....	79
3.6.5	Polyvinylidene Fluoride .....	79
3.6.6	Maleic Anhydride–Grafted Polypropylene.....	79
3.7	Talc Reinforcement.....	79
3.8	Silica Reinforcement .....	80
3.8.1	Epoxy Resins .....	80
3.8.2	Polypropylene .....	80
3.8.3	Polyesters.....	81
3.8.4	Polyethylene Terephthalate.....	81
3.9	Calcium Carbonate Reinforcement .....	81
3.9.1	Polypropylene .....	81
3.9.2	Polypropylene Vinyl Acetate.....	81
3.9.3	Polyether Ether Ketone.....	82
3.10	Miscellaneous Reinforcing Agents.....	82
3.11	Natural Biomaterial Reinforcement .....	83
3.12	Organic Reinforcing Agents.....	83
3.13	Methods for Reinforced Plastics.....	84
	References .....	86
<b>Chapter 4</b>	<b>Thermal Properties of Reinforced Plastics .....</b>	<b>95</b>
4.1	Typical Values of Thermal Properties.....	95
4.2	Heat-Resistant Plastics.....	104
4.3	Individual Thermal Properties .....	104
4.3.1	Coefficient of Cubical Expansion.....	104
4.3.2	Thermal Conductivity .....	107
4.3.3	Melt Temperature and Crystallization Temperature ...	107
4.3.4	Specific Heat .....	108
4.3.4.1	Hot-Wire Technique.....	108
4.3.4.2	Transient Plane Source Technique.....	108
4.3.4.3	Laser Flash Technique .....	108
4.3.5	Mold Shrinkage.....	108
4.3.6	Thermal Diffusivity .....	108
4.3.7	Heat Distortion Temperature.....	109
4.3.7.1	Heat Distortion Temperature at 0.45 Mpa (°C).....	109
4.3.7.2	Heat Distortion Temperature at 1.80 Mpa (°C).....	109

4.4	Melting Temperature ( $T_m$ ) and Crystallization Temperature ...	110
4.5	Maximum Operating Temperature.....	112
4.6	Brittleness Temperature.....	113
4.7	Mold Temperature.....	113
4.8	VICAT Softening Point.....	114
4.9	Glass Transition Temperature.....	114
4.9.1	Differential Scanning Calorimetry.....	114
4.9.2	Thermomechanical Analysis.....	115
	References.....	118
<b>Chapter 5</b>	<b>Electrical Properties.....</b>	<b>123</b>
5.1	Typical Electrical Properties.....	123
5.2	Electrical Applications.....	123
5.3	Individual Electrical Properties.....	123
5.3.1	Dielectric Constant.....	123
5.3.2	Dielectric Strength.....	128
5.3.3	Volume and Surface Resistivity.....	133
5.3.4	Electrical Resistance and Resistivity.....	133
5.3.5	Surface Arc Resistance.....	134
5.3.6	Tracking Resistance.....	134
5.3.7	Dissipation Factor.....	135
5.3.8	Electrical Conductivity.....	135
5.4	Effect of Glass Fiber Reinforcement on Electrical Properties of Polymers.....	135
5.5	Effect of Carbon Fiber Reinforcement on Electrical Properties of Polymers.....	136
5.6	Effect of Carbon Black Reinforcement on Electrical Properties of Polymers.....	138
5.7	Effect of Graphite Reinforcement on Electrical Properties of Polymers.....	140
5.8	Effect of Carbon Nanotubes on Electrical Properties of Polymer.....	141
5.9	Effect of Montmorillonite Clay Reinforcement on Electrical Properties of Polymers.....	143
5.10	Effect of Zinc Oxide Reinforcement on Electrical Properties of Polymers.....	144
5.11	Effect of Mineral Reinforcement in Electrical Properties of Polymers.....	144
5.12	Effect of Silica Reinforcement on Electrical Properties of Polymer.....	145
5.13	Effect of Talc Reinforcement on the Electrical Properties of Polymers.....	145
5.14	Effect of Iron Oxide and Hematite Nanoparticles on Electrical Properties of Polymers.....	145

5.15	Effect of Miscellaneous Reinforcing Agents on the Electrical Properties of Polymers .....	146
5.16	Electrically Conductive Polymers .....	146
	References .....	148
<b>Chapter 6</b>	<b>Thermal and Thermooxidative Degradation of Reinforced Polymers .....</b>	<b>153</b>
6.1	Glass Fiber Reinforcement .....	154
6.2	Clay Reinforcement .....	156
6.3	Silica Reinforcement .....	156
6.4	Carbon Nanotube Reinforcement .....	157
6.5	Talc Reinforcement.....	158
6.6	Carbon Fiber Carbon and Graphite Reinforcement .....	158
6.7	Mineral Reinforcement.....	158
6.8	Reinforcement with Other Compounds.....	159
6.9	Effect of Metals on the Heat Stability of Polymers.....	159
	References .....	162
<b>Chapter 7</b>	<b>Applications of Reinforced Plastics .....</b>	<b>167</b>
7.1	Summary of Applications.....	167
7.2	Applications Using Glass Fiber–Reinforced Polymers .....	167
7.2.1	Polyamides .....	167
7.2.2	Polyketones.....	177
7.2.3	Polyphenylene Sulfide .....	177
7.3	Applications of Carbon Fiber .....	177
7.3.1	Polyamides .....	178
7.3.2	Polyether Ether Ketone.....	178
7.3.3	Phenolic Resins .....	179
7.4	Applications of Carbon Nanotubes .....	179
7.4.1	Sulfonated (Polyarylene Sulfone).....	181
7.5	Electronically Conducting Polymers.....	181
	References .....	182
<b>Chapter 8</b>	<b>Applications of Reinforced Plastics in the Automobile Industry.....</b>	<b>185</b>
8.1	Polypropylene .....	185
8.2	Polyether Ether Ketone.....	187
8.3	Polybutylene Terephthalate.....	187
8.4	Polyethylene Terephthalate .....	187
8.5	Unsaturated Polyesters .....	187
8.6	Polyamides.....	188
8.7	Polyphenylene Sulfides.....	188
8.8	Natural Fiber Composites for Automotive Applications.....	188
	References .....	189

<b>Chapter 9</b>	Applications of Reinforced Plastics in the General Engineering Industry.....	191
9.1	Miscellaneous Engineering Applications.....	191
9.2	Plastic Gears.....	191
9.3	Use of Lubricating Agents in Reinforced Plastics.....	195
	References .....	195
<b>Chapter 10</b>	Applications of Reinforced Plastics in the Aerospace Industry.....	197
10.1	Glass Fiber–Reinforced Plastics: Aerospace Applications....	197
10.2	Carbon Fiber Reinforcement Plastics Aerospace Applications.....	198
10.3	Pitch Fiber Cyanate Ester Composites .....	201
	References .....	201
<b>Chapter 11</b>	Radiation Resistance of Unreinforced and Reinforced Plastics.....	203
11.1	Introduction .....	203
11.2	Effect of Gamma Radiation on the Physical Properties.....	205
11.2.1	Unreinforced Plastics .....	205
11.2.1.1	Unreinforced Polyimides .....	205
11.2.2	Reinforced Polyimides .....	207
11.2.3	Unreinforced High-Density Polyethylene and Low-Density Polyethylene.....	208
11.2.4	Reinforced High-Density Polyethylene.....	209
11.2.4.1	High Density Polyethylene (HDDE)–Alumina Composites .....	209
11.2.4.2	HDDE–Hydroxyapatite Composites.....	210
11.2.4.3	High-Density Polyethylene–Ethylene Vinyl Acetate–Clay Nanocomposites.....	210
11.2.5	Unreinforced Ultra-High-Molecular-Weight Polyethylene.....	210
11.2.6	Reinforced Ultra-High-Molecular-Weight Polyethylene.....	210
11.2.7	Unreinforced Polypropylene.....	210
11.2.8	Reinforced Isotactic Polypropylene Titanium Dioxide and Other Composites.....	212
11.2.8.1	Perlite-Filled Polypropylene .....	212
11.2.9	Effect of Gamma Radiation on Other Polymers .....	214
11.3	Effect of Electron Irradiation of Plastics.....	214
11.3.1	Polypropylene .....	214
11.3.2	Low-Density Polyethylene.....	214
11.4	Effect of Ultraviolet Irradiation.....	216
11.4.1	Protection against Ultraviolet Irradiation.....	218
11.4.2	Formulation .....	218
	References .....	219

<b>Chapter 12</b>	Unreinforced and Reinforced Fire Retardant Polymers.....	223
12.1	Flammability Characteristics .....	223
12.2	Effect on Physical Properties .....	223
12.2.1	Mechanical Properties.....	223
12.2.2	Electrical Properties.....	227
12.2.3	Thermal Properties.....	227
Index	.....	231
